Azerbaijan's high economic growth during 2006-08 was attributable to large and growing oil exports, but some non-export sectors also featured double-digit growth, spurred by growth in the construction, banking, and real estate sectors. In 2009, economic growth remained above 9% even as oil prices moderated and growth in the construction sector cooled. In 2010, economic growth slowed to approximately 3.7%, although the impact of the global financial crisis was less severe than in many other countries in the region. The current global economic slowdown presents some challenges for the Azerbaijani economy as oil prices remain below their mid-2008 highs, highlighting Azerbaijan's reliance on energy exports and lackluster attempts to diversify its economy. Azerbaijan's oil

production increased dramatically in 1997, when Azerbaijan signed the first production-sharing arrangement (PSA) with the Azerbaijan International Operating Company. Oil exports through the Baku-Tbilisi-Ceyhan Pipeline remain the main economic driver while efforts to boost Azerbaijan's gas production are underway. However, Azerbaijan has made only limited progress on instituting market-based economic reforms. Pervasive public and private sector corruption and structural economic inefficiencies remain a drag on long-term growth, particularly in non-energy sectors. Several other obstacles impede Azerbaijan's economic progress: the need for stepped up foreign investment in the non-energy sector and the continuing conflict with Armenia over the Nagorno-Karabakh region. Trade with Russia and the other former Soviet republics is declining in importance, while trade is building with Turkey and the nations of Europe. Long-term prospects will depend on world oil prices, the location of new oil and gas pipelines in the region, and Azerbaijan's ability to manage its energy wealth to promote sustainable growth in non-energy sectors of the economy and spur employment.

Bahamas, The

The Bahamas is one of the wealthiest Caribbean countries with an economy heavily dependent on tourism and offshore banking. Tourism together with tourism-driven construction and manufacturing accounts for approximately 60% of GDP and directly or indirectly employs half of the archipelago's labor force. Prior to 2006, a steady growth in tourism receipts and a boom in construction of new hotels, resorts, and residences led to solid GDP growth but since then tourism receipts have begun to drop off. The global recession in 2009 took a sizeable toll on the Bahamas, resulting in a contraction in GDP and a widening budget deficit. The decline continued in 2010 as tourism from the US and sector investment lagged. Financial services constitute the second-most important sector of the Bahamian economy and, when combined with business services, account for about 36% of GDP. However, the financial sector currently is smaller than it has been in the past because of the enactment of new and more strict financial regulations in 2000 that caused many international businesses to relocate elsewhere. Manufacturing and agriculture combined contribute approximately a tenth of GDP and show little growth, despite government incentives aimed at those sectors. Overall growth prospects in the short run rest heavily on the fortunes of the tourism sector.

Bahrain

Bahrain is one of the most diversified economies in the

Persian Gulf. Highly developed communication and transport facilities make Bahrain home to numerous multinational firms with business in the Gulf. As part of its diversification plans, Bahrain implemented a Free Trade Agreement (FTA) with the US in August 2006, the first FTA between the US and a Gulf state. Bahrain's economy, however, continues to depend heavily on oil. Petroleum production and refining account for more than 60% of Bahrain's export receipts, 70% of government revenues, and 11% of GDP (exclusive of allied industries). Other major economic activities are production of aluminum - Bahrain's second biggest export after oil - finance, and construction. Bahrain competes with Malaysia as a worldwide center for Islamic banking and continues to seek new natural gas supplies as feedstock to support its expanding petrochemical and aluminum industries. Unemployment, especially among the young, is a long-term economic problem Bahrain struggles to address. In 2009, to help lower unemployment among Bahraini nationals, Bahrain reduced sponsorship for expatriate workers, increasing the costs of employing foreign labor. The global financial crisis caused funding for many non-oil projects to dry up and resulted in slower economic growth for Bahrain. Other challenges facing Bahrain include the slow growth of government debt as a result of a large subsidy program, the financing of large government projects, and debt restructuring, such as the bailout of state-owned Gulf Air.

Bangladesh

The economy has grown 5-6% per year since 1996 despite political instability, poor infrastructure, corruption, insufficient power supplies, and slow implementation of economic reforms. Bangladesh remains a poor, overpopulated, and inefficiently-governed nation. Although more than half of GDP is generated through the service sector, 45% of Bangladeshis are employed in the agriculture sector, with rice as the single-most-important product. Bangladesh's growth was resilient during the 2008-09 global financial crisis and recession. Garment exports, totaling \$12.3 billion in FY09 and remittances from overseas Bangladeshis totaling \$9.7 billion in FY09 accounted for almost 25% of GDP.

Barbados

Historically, the Barbadian economy was dependent on sugarcane cultivation and related activities. However, in recent years the economy has diversified into light industry and tourism with about three-quarters of GDP and 80% of exports being attributed to services. Growth has rebounded since 2003, bolstered by increases in construction projects and tourism revenues, reflecting its success in the higher-end segment, but the sector faced declining

revenues in 2009 with the global economic downturn. The country enjoys one of the highest per capita incomes in the region. Offshore finance and information services are important foreign exchange earners and thrive from having the same time zone as eastern US financial centers and a relatively highly educated workforce. The government continues its efforts to reduce unemployment, to encourage direct foreign investment, and to privatize remaining state-owned enterprises. The public debt-to-GDP ratio rose to over 100% in 2009, largely because a sharp slowdown in tourism and financial services led to a wide budget deficit.

Belarus

Belarus has seen limited structural reform since 1995, when President LUKASHENKO launched the country on the path of "market socialism." In keeping with this policy, LUKASHENKO reimposed administrative controls over prices and currency exchange rates and expanded the state's right to intervene in the management of private enterprises. Since 2005, the government has re-nationalized a number of private companies. In addition, businesses have been subjected to pressure by central and local governments, including arbitrary changes in regulations, numerous rigorous inspections, retroactive application of new business regulations, and arrests of "disruptive" businessmen and factory owners. Continued state control over economic operations hampers market entry for businesses, both domestic and foreign. Government statistics indicate GDP growth was strong, surpassing 10% in 2008, despite the roadblocks of a tough, centrally directed economy with a high rate of inflation and a low rate of unemployment. However, the global crisis pushed the country into recession in 2009, and GDP grew only 0.2% for the year. Slumping foreign demand hit the industrial sector hard. Minsk has depended on a standby-agreement with the IMF to assist with balance of payments shortfalls. In line with IMF conditions, in 2009, Belarus devalued the ruble more than 40% and tightened some fiscal and monetary policies. On 1 January 2010, Russia, Kazakhstan and Belarus launched a customs union, with unified trade regulations and customs codes still under negotiation. In late January, Russia and Belarus amended their 2007 oil supply agreement. The new terms raised prices for above quota purchases, increasing Belarus' current account deficit. GDP grew 4.8% in 2010, in part, on the strength of renewed export growth. In December 2010, Belarus, Russia and Kazakhstan signed an agreement to form a Common Economic Space and Russia removed all Belarusian oil duties.

Belgium

This modern, private-enterprise economy has capitalized on

its central geographic location, highly developed transport network, and diversified industrial and commercial base. Industry is concentrated mainly in the populous Flemish area in the north. With few natural resources, Belgium imports substantial quantities of raw materials and exports a large volume of manufactures, making its economy vulnerable to volatility in world markets. Roughly three-quarters of Belgium's trade is with other EU countries. In 2009 Belgian GDP contracted by 2.7%, the unemployment rate rose slightly, and the budget deficit worsened because of large-scale bail-outs in the financial sector. Belgium's budget deficit widened to 4.8% of GDP in 2010, while public debt was just over 100% of GDP. Belgian banks have been severely affected by the international financial crisis with three major banks receiving capital injections from the government. An ageing population and rising social expenditures are also increasing pressure on public finances, making it likely the government will need to implement unpopular austerity measures to assuage investor concerns about Belgium's ability to restore fiscal balance.

Belize

In this small, essentially private-enterprise economy, tourism is the number one foreign exchange earner followed by exports of marine products, citrus, cane sugar, bananas, and garments. The government's expansionary monetary and fiscal policies, initiated in September 1998, led to sturdy GDP growth averaging nearly 4% in 1999-2007, though growth slipped to 3.8% in 2008, 0% in 2009, and 1.5% in 2010 as a result of the global slowdown, natural disasters, and the drop in the price of oil. Oil discoveries in 2006 bolstered economic growth. Exploration efforts continue and production increased a small amount in 2009. Major concerns continue to be the sizable trade deficit and heavy foreign debt burden. In February 2007, the government restructured nearly all of its public external commercial debt, which helped reduce interest payments and relieved some of the country's liquidity concerns. A key objective remains the reduction of poverty and inequality with the help of international donors.

Benin

The economy of Benin remains underdeveloped and dependent on subsistence agriculture, cotton production, and regional trade. Growth in real output had averaged about 4% before the global recession, but fell to 2.5% in 2009 and 3% in 2010. Inflation has subsided over the past several years. In order to raise growth, Benin plans to attract more foreign investment, place more emphasis on tourism, facilitate the development of new food processing

systems and agricultural products, and encourage new information and communication technology. Specific projects to improve the business climate by reforms to the land tenure system, the commercial justice system, and the financial sector were included in Benin's \$307 million Millennium Challenge Account grant signed in February 2006. The 2001 privatization policy continues in telecommunications, water, electricity, and agriculture. As result of these reforms, Benin has become the most competitive country in the West African Economic and Monetary Union, according to the World Economic Forum. The Paris Club and bilateral creditors have eased the external debt situation, with Benin benefiting from a G-8 debt reduction announced in July 2005, while pressing for more rapid structural reforms. An insufficient electrical supply continues to adversely affect Benin's economic growth though the government recently has taken steps to increase domestic power production.

Bermuda

Bermuda enjoys the third highest per capita income in the world, more than 50% higher than that of the US; the average cost of a house by the mid-2000s exceeded \$1,000,000. Its economy is primarily based on providing financial services for international business and luxury facilities for tourists. A number of reinsurance companies relocated to the island following the 11 September 2001 attacks and again after Hurricane Katrina in August 2005 contributing to the expansion of an already robust international business sector. Bermuda's tourism industry - which derives over 80% of its visitors from the US - continues to struggle but remains the island's number two industry. Most capital equipment and food must be imported. Bermuda's industrial sector is largely focused on construction and agriculture is limited, with only 20% of the land being arable.

Bhutan

The economy, one of the world's smallest and least developed, is based on agriculture and forestry, which provide the main livelihood for more than 60% of the population. Agriculture consists largely of subsistence farming and animal husbandry. Rugged mountains dominate the terrain and make the building of roads and other infrastructure difficult and expensive. The economy is closely aligned with India's through strong trade and monetary links and dependence on India's financial assistance. The industrial sector is technologically backward, with most production of the cottage industry type. Most development projects, such as road construction, rely on Indian migrant labor. Model education, social, and environment programs are underway with support from multilateral

development organizations. Each economic program takes into account the government's desire to protect the country's environment and cultural traditions. For example, the government, in its cautious expansion of the tourist sector, encourages visits by upscale, environmentally conscientious tourists. Complicated controls and uncertain policies in areas such as industrial licensing, trade, labor, and finance continue to hamper foreign investment. Hydropower exports to India have boosted Bhutan's overall growth. New hydropower projects will be the driving force behind Bhutan's ability to create employment and sustain growth in the coming years.

Bolivia

Bolivia is one of the poorest and least developed countries in Latin America. Following a disastrous economic crisis during the early 1980s, reforms spurred private investment, stimulated economic growth, and cut poverty rates in the 1990s. The period 2003-05 was characterized by political instability, racial tensions, and violent protests against plans - subsequently abandoned - to export Bolivia's newly discovered natural gas reserves to large northern hemisphere markets. In 2005, the government passed a controversial hydrocarbons law that imposed significantly higher royalties and required foreign firms then operating under risk-sharing contracts to surrender all production to the state energy company in exchange for a predetermined service fee. After higher prices for mining and hydrocarbons exports produced a fiscal surplus in 2008, the global recession in 2009 slowed growth. A decline in commodity prices that began in late 2008, a lack of foreign investment in the mining and hydrocarbon sectors, a poor infrastructure, and the suspension of trade benefits with the United States will pose challenges for the Bolivian economy.

Bosnia and Herzegovina

The interethnic warfare in Bosnia and Herzegovina caused production to plummet by 80% from 1992 to 1995 and unemployment to soar. With an uneasy peace in place, output recovered in 1996-99 at high percentage rates from a low base; but output growth slowed in 2000-02. Part of the lag in output was made up in 2003-08 when GDP growth exceeded 5% per year. However, the country experienced negative GDP growth of almost 3% in 2009 due in large part to a reduction in exports caused by the global economic crisis. One of Bosnia's main economic challenges in 2010 has been to reduce spending on public sector wages and social benefits to meet the IMF's criteria for obtaining funding for budget shortfalls. Banking reform accelerated in 2001 as all the Communist-era payments bureaus were shut down; foreign banks, primarily from Austria and

Italy, now control most of the banking sector. The konvertibilna marka (convertible mark or BAM)- the national currency introduced in 1998 - is pegged to the euro, and confidence in the currency and the banking sector has increased. Bosnia's private sector is growing and foreign investment is slowly increasing, but government spending, at roughly 50% of GDP, remains high because of redundant government offices at the state, entity and municipal level. Privatization of state enterprises, however, has been slow, particularly in the Federation where political division between ethnically-based political parties makes agreement on economic policy more difficult. A sizeable current account deficit and high unemployment rate remain the two most serious macroeconomic problems. Successful implementation of a value-added tax in 2006 provided a predictable source of revenue for the government and helped rein in gray market activity. National-level statistics have also improved over time but a large share of economic activity remains unofficial and unrecorded. Bosnia and Herzegovina became a full member of the Central European Free Trade Agreement in September 2007.

Botswana

Botswana has maintained one of the world's highest economic growth rates since independence in 1966, though growth fell below 5% in 2007-08, and turned sharply negative in 2009, with industry falling nearly 30%. Through fiscal discipline and sound management, Botswana transformed itself from one of the poorest countries in the world to a middle-income country with a per capita GDP of \$13,100 in 2010. Two major investment services rank Botswana as the best credit risk in Africa. Diamond mining has fueled much of the expansion and currently accounts for more than one-third of GDP, 70-80% of export earnings, and about half of the government's revenues. Botswana's heavy reliance on a single luxury export was a critical factor in the sharp economic contraction of 2009. Tourism, financial services, subsistence farming, and cattle raising are other key sectors. Although unemployment was 7.5% in 2007 according to official reports, unofficial estimates place it closer to 40%. The prevalence of HIV/AIDS is second highest in the world and threatens Botswana's impressive economic gains. An expected leveling off in diamond mining production within the next two decades overshadows long-term prospects.

Bouvet Island

no economic activity; declared a nature reserve

Brazil

Characterized by large and well-developed agricultural,

mining, manufacturing, and service sectors, Brazil's economy outweighs that of all other South American countries, and Brazil is expanding its presence in world markets. Since 2003, Brazil has steadily improved its macroeconomic stability, building up foreign reserves, and reducing its debt profile by shifting its debt burden toward real denominated and domestically held instruments. In 2008, Brazil became a net external creditor and two ratings agencies awarded investment grade status to its debt. After record growth in 2007 and 2008, the onset of the global financial crisis hit Brazil in September 2008. Brazil experienced two quarters of recession, as global demand for Brazil's commodity-based exports dwindled and external credit dried up. However, Brazil was one of the first emerging markets to begin a recovery. Consumer and investor confidence revived and GDP growth returned to positive in 2010, boosted by an export recovery. Brazil's strong growth and high interest rates make it an attractive destination for foreign investors. Large capital inflows over the past year have contributed to the rapid appreciation of its currency and led the government to raise taxes on some foreign investments. President Dilma ROUSSEFF has pledged to retain the previous administration's commitment to inflation targeting by the Central Bank, a floating exchange rate, and fiscal restraint.

British Indian Ocean Territory All economic activity is concentrated on the largest island of Diego Garcia, where a joint UK-US military facility is located. Construction projects and various services needed to support the military installation are performed by military and contract employees from the UK, Mauritius, the Philippines, and the US. There are no industrial or agricultural activities on the islands. The territory earns foreign exchange by selling fishing licenses and postage stamps.

British Virgin Islands

The economy, one of the most stable and prosperous in the Caribbean, is highly dependent on tourism generating an estimated 45% of the national income. More than 934,000 tourists, mainly from the US, visited the islands in 2008. In the mid-1980s, the government began offering offshore registration to companies wishing to incorporate in the islands, and incorporation fees now generate substantial revenues. Roughly 400,000 companies were on the offshore registry by yearend 2000. The adoption of a comprehensive insurance law in late 1994, which provides a blanket of confidentiality with regulated statutory gateways for investigation of criminal offenses, made the British Virgin Islands even more attractive to international business. Livestock raising is the most important agricultural activity; poor soils limit the islands' ability to meet domestic food requirements. Because of traditionally close links with the US Virgin Islands, the

British Virgin Islands has used the US dollar as its currency since 1959.

Brunei

Brunei has a small well-to-do economy that encompasses a mixture of foreign and domestic entrepreneurship, government regulation, welfare measures, and village tradition. Crude oil and natural gas production account for just over half of GDP and more than 90% of exports. Per capita GDP is among the highest in Asia, and substantial income from overseas investment supplements income from domestic production. The government provides for all medical services and free education through the university level and subsidizes rice and housing. A new monetary authority was established in January 2011 with responsibilities that include monetary policy, monitoring of financial institutions, and currency trading activities. Other plans for the future include upgrading the labor force, reducing unemployment, strengthening the banking and tourist sectors, increasing agricultural production, and, in general, further widening the economic base beyond oil and gas.

Bulgaria

Bulgaria, a former Communist country that entered the EU on 1 January 2007, averaged more than 6% growth from 2004 to 2008, driven by significant amounts of foreign direct investment and consumption. Successive governments have demonstrated a commitment to economic reforms and responsible fiscal planning, but the global downturn sharply reduced domestic demand, exports, capital inflows, and industrial production. GDP contracted by approximately 5% in 2009, and stagnated in 2010, despite a significant recovery in exports. The economy is expected to grow modestly in 2011, however. Corruption in the public administration, a weak judiciary, and the presence of organized crime remain significant challenges.

Burkina Faso

Burkina Faso is a poor, landlocked country that relies heavily on cotton and gold exports for revenue. The country has few natural resources and a weak industrial base. About 90% of the population is engaged in subsistence agriculture, which is vulnerable to periodic drought. Cotton is the main cash crop. Since 1998, Burkina Faso has embarked upon a gradual privatization of state-owned enterprises and in 2004 revised its investment code to attract foreign investment. As a result of this new code and other legislation favoring the mining sector, the country has seen an upswing in gold exploration and production. By 2010, gold had become the main source of export revenue.

Burma Burma, a resource-rich country, suffers from pervasive government controls, inefficient economic policies, corruption, and rural poverty. Despite Burma's emergence as a natural gas exporter, socio-economic conditions have deteriorated under the regime's mismanagement, leaving most of the public in poverty, while military leaders and their business cronies exploit the country's ample natural resources. The economy suffers from serious macroeconomic imbalances - including rising inflation, fiscal deficits, multiple official exchange rates that overvalue the Burmese kyat, a distorted interest rate regime, unreliable statistics, and an inability to reconcile national accounts to determine a realistic GDP figure. Burma's poor investment climate hampers the inflow of foreign investment; in recent years, foreign investors have shied away from nearly every sector except for natural gas, power generation, timber, and mining. The business climate is widely perceived as opaque, corrupt, and highly inefficient. Over 60% of the FY 2009-10 budget is allocated to state owned enterprises - most operating at a deficit. The government has recently privatized a number of state owned enterprises, but most of the benefits have accrued to regime insiders and cronies. The most productive sectors will continue to be in extractive industries - especially oil and gas, mining, and timber - with the latter two causing significant environmental degradation. Other areas, such as manufacturing, tourism and services, struggle in the face of inadequate infrastructure, unpredictable trade policies, neglected health and education systems, and endemic corruption. A major banking crisis in 2003 caused 20 private banks to close; private banks still operate under tight restrictions, limiting the private sector's access to credit. The United States, the European Union, Canada, and Australia have imposed financial and economic sanctions on Burma, prohibiting most financial transactions with Burmese entities, imposing travel bans on Burmese officials and others connected to the ruling regime, and banning imports of certain Burmese products. These sanctions affected the country's fledgling garment industry, isolated the struggling banking sector, and raised the costs of doing business with Burmese companies, particularly firms tied to Burmese regime leaders. The global crisis of 2008-09 caused exports and domestic consumer demand to drop. Remittances from overseas Burmese workers - who had provided significant financial support for their families - slowed or dried up as jobs were lost and migrant workers returned home. Though the Burmese government has good economic relations with its neighbors, better investment and business climates and an improved political situation are needed to promote serious foreign investment, exports, and tourism.

Burundi

Burundi is a landlocked, resource-poor country with an underdeveloped manufacturing sector. The economy is predominantly agricultural which accounts for about 35% of GDP and employs more than 90% of the population. Burundi's primary exports are coffee and tea, which account for 90% of foreign exchange earnings, though exports are a relatively small share of GDP. Burundi's export earning - and its ability to pay for imports - rests primarily on weather conditions and international coffee and tea prices. The Tutsi minority, 14% of the population, dominates the coffee trade. An ethnic-based war that lasted for over a decade resulted in more than 200,000 deaths, forced more than 48,000 refugees into Tanzania, and displaced 140,000 others internally. Only one in two children go to school, and approximately one in 15 adults has HIV/AIDS. Food,

medicine, and electricity remain in short supply. Burundi's GDP grew around 4% annually in 2006-09. Political stability and the end of the civil war have improved aid flows and economic activity has increased, but underlying weaknesses - a high poverty rate, poor education rates, a weak legal system, and low administrative capacity - risk undermining planned economic reforms. Burundi will continue to remain heavily dependent on aid from bilateral and multilateral donors; the delay of funds after a corruption scandal cut off bilateral aid in 2007 reduced government's revenues and its ability to pay salaries. Burundi joined the East African Community, which should boost Burundi's regional trade ties, and received \$700 million in debt relief in 2009. Instability spilling over from eastern Congo-Kinshasa and the ban on minerals smuggled across Burundi's border will be the main challenges to economic growth.

Cambodia From 2004 to 2007, the economy grew about 10% per year, driven largely by an expansion in the garment sector, construction, agriculture, and tourism. GDP contracted 1.5% in 2009 as a result of the global economic slowdown, but climbed more than 4% in 2010, driven by renewed exports. With the January 2005 expiration of a WTO Agreement on Textiles and Clothing, Cambodian textile producers were forced to compete directly with lower-priced countries such as China, India, Vietnam, and Bangladesh. The garment industry currently employs more than 280,000 people - about 5% of the work force - and contributes more than 70% of Cambodia's exports. In 2005, exploitable oil deposits were found beneath Cambodia's territorial waters, representing a new revenue stream for the government if commercial extraction begins. Mining also is attracting significant investor interest, particularly in the northern parts of the country. The government has said opportunities exist for mining bauxite, gold, iron and gems. In 2006, a US-Cambodia bilateral Trade and Investment Framework Agreement (TIFA) was signed, and several rounds of discussions have been held since 2007. Rubber exports increased about 25% in 2009 due to rising global demand. The tourism industry has continued to grow rapidly, with foreign arrivals exceeding 2 million per year in 2007-08, however, economic troubles abroad dampened growth in 2009. The global financial crisis is weakening demand for Cambodian exports, and construction is declining due to a shortage of credit. The long-term development of the economy remains a daunting challenge. The Cambodian government is working with bilateral and multilateral donors, including the World Bank and IMF, to address the country's many pressing needs. The major economic challenge for Cambodia over the next decade will be fashioning an economic environment in which the private sector can create enough jobs to handle Cambodia's demographic imbalance. More than 50% of the population is less than 25 years old. The population lacks education and productive skills, particularly in the poverty-ridden countryside, which suffers from an almost total lack of basic infrastructure.

Cameroon

Because of its modest oil resources and favorable agricultural conditions, Cameroon has one of the best-endowed primary commodity economies in sub-Saharan Africa. Still, it faces many of the serious problems facing other underdeveloped countries, such as stagnate per capita income, a relatively inequitable

distribution of income, a top-heavy civil service, and a generally unfavorable climate for business enterprise. Since 1990, the government has embarked on various IMF and World Bank programs designed to spur business investment, increase efficiency in agriculture, improve trade, and recapitalize the nation's banks. The IMF is pressing for more reforms, including increased budget transparency, privatization, and poverty reduction programs. Weak prices for oil and cocoa led to the significant slowdown in growth in 2009. The government is under pressure to reduce its budget deficit, which by the government's own forecast will hit 2.8% of GDP, but the presidential election in 2011 may make fiscal austerity difficult.

Canada

As an affluent, high-tech industrial society in the trillion-dollar class, Canada resembles the US in its market-oriented economic system, pattern of production, and affluent living standards. Since World War II, the impressive growth of the manufacturing, mining, and service sectors has transformed the nation from a largely rural economy into one primarily industrial and urban. The 1989 US-Canada Free Trade Agreement (FTA) and the 1994 North American Free Trade Agreement (NAFTA) (which includes Mexico) touched off a dramatic increase in trade and economic integration with the US, its principal trading partner. Canada enjoys a substantial trade surplus with the US, which absorbs about three-fourths of Canadian exports each year. Canada is the US's largest foreign supplier of energy, including oil, gas, uranium, and electric power. Given its great natural resources, skilled labor force, and modern capital plant, Canada enjoyed solid economic growth from 1993 through 2007. Buffeted by the global economic crisis, the economy dropped into a sharp recession in the final months of 2008, and Ottawa posted its first fiscal deficit in 2009 after 12 years of surplus. Canada's major banks, however, emerged from the financial crisis of 2008-09 among the strongest in the world, owing to the country's tradition of conservative lending practices and strong capitalization. During 2010, Canada's economy grew only 3%, because of weak exports.

Cape Verde

This island economy suffers from a poor natural resource base, including serious water shortages exacerbated by cycles of long-term drought and poor soil for agriculture on several of the islands. The economy is service oriented with commerce, transport, tourism, and public services accounting for about three-fourths of GDP. Although nearly 70% of the population lives in rural areas, the

share of food production in GDP is low. About 82% of food must be imported. The fishing potential, mostly lobster and tuna, is not fully exploited. Cape Verde annually runs a high trade deficit financed by foreign aid and remittances from its large pool of emigrants; remittances supplement GDP by more than 20%. Despite the lack of resources, sound economic management has produced steadily improving incomes. Continued economic reforms are aimed at developing the private sector and attracting foreign investment to diversify the economy. Future prospects depend heavily on the maintenance of aid flows, the encouragement of tourism, remittances, and the momentum of the government's development program. Cape Verde became a member of the WTO in July 2008.

Cayman Islands

With no direct taxation, the islands are a thriving offshore financial center. More than 93,000 companies were registered in the Cayman Islands as of 2008, including almost 300 banks, 800 insurers, and 10,000 mutual funds. A stock exchange was opened in 1997. Tourism is also a mainstay, accounting for about 70% of GDP and 75% of foreign currency earnings. The tourist industry is aimed at the luxury market and caters mainly to visitors from North America. Total tourist arrivals exceeded 1.9 million in 2008, with about half from the US. About 90% of the islands' food and consumer goods must be imported. The Caymanians enjoy one of the highest outputs per capita and one of the highest standards of living in the world.

Central African Republic

Subsistence agriculture, together with forestry, remains the backbone of the economy of the Central African Republic (CAR), with about 60% of the population living in outlying areas. The agricultural sector generates more than half of GDP. Timber has accounted for about 16% of export earnings and the diamond industry, for 40%. Important constraints to economic development include the CAR's landlocked position, a poor transportation system, a largely unskilled work force, and a legacy of misdirected macroeconomic policies. Factional fighting between the government and its opponents remains a drag on economic revitalization. Distribution of income is extraordinarily unequal. Grants from France and the international community can only partially meet humanitarian needs.

Chad

Chad's primarily agricultural economy will continue to be boosted by major foreign direct investment projects in the oil

sector that began in 2000. At least 80% of Chad's population relies on subsistence farming and livestock raising for its livelihood.

Chad's economy has long been handicapped by its landlocked position, high energy costs, and a history of instability. Chad relies on foreign assistance and foreign capital for most public and private sector investment projects. A consortium led by two US companies has been investing \$3.7 billion to develop oil reserves - estimated at 1 billion barrels - in southern Chad. Chinese companies are also expanding exploration efforts and are currently building a 300-km pipeline and the country's first refinery. The nation's total oil reserves are estimated at 1.5 billion barrels. Oil production came on stream in late 2003. Chad began to export oil in 2004. Cotton, cattle, and gum arabic provide the bulk of Chad's non-oil export earnings.

Chile Chile has a market-oriented economy characterized by a high level of foreign trade and a reputation for strong financial institutions and sound policy that have given it the strongest sovereign bond rating in South America. Exports account for more than one-fourth of GDP, with commodities making up some three-quarters of total exports. Copper alone provides one-third of government revenue. During the early 1990s, Chile's reputation as a role model for economic reform was strengthened when the democratic government of Patricio AYLWIN - which took over from the military in 1990 - deepened the economic reform initiated by the military government. Growth in real GDP averaged 8% during 1991-97, but fell to half that level in 1998 because of tight monetary policies implemented to keep the current account deficit in check and because of lower export earnings - the latter a product of the global financial crisis. A severe drought exacerbated the situation in 1999, reducing crop yields and causing hydroelectric shortfalls and electricity rationing, and Chile experienced negative economic growth for the first time in more than 15 years. In the years since then, growth has averaged 4% per year. Chile deepened its longstanding commitment to trade liberalization with the signing of a free trade agreement with the US, which took effect on 1 January 2004. Chile claims to have more bilateral or regional trade agreements than any other country. It has 57 such agreements (not all of them full free trade agreements), including with the European Union, Mercosur, China, India, South Korea, and Mexico. Over the past seven years, foreign direct investment inflows have quadrupled to some \$15 billion in 2010, but FDI had dropped to about \$7 billion in 2009 in the face of diminished investment throughout the world. The Chilean government conducts a rule-based countercyclical fiscal policy, accumulating surpluses in sovereign wealth funds during periods of high copper prices and economic growth, and allowing deficit spending only during periods of low copper prices and growth. As of September 2008, those sovereign wealth funds - kept mostly outside the country and separate from Central Bank reserves - amounted to more than \$20 billion. Chile used \$4 billion from this fund to finance a fiscal stimulus package to fend off recession. In December 2009, the OECD invited Chile to become a full member, after a two year period of compliance with organization mandates. The economy started to show signs of a rebound in the fourth quarter, 2009, and GDP grew more than 5% in 2010. The magnitude 8.8 earthquake that struck Chile in February 2010 was one of the top ten strongest earthquakes on record. It caused considerable damage near the epicenter, located about 70 miles from Concepcion - and about 200 miles southwest of Santiago.

China China's economy since the late 1970s has changed from a closed, centrally planned system to a more market-oriented one that plays a major role in the global economy - in 2010 China became the world's largest exporter. Reforms began with the phasing out of collectivized agriculture, and expanded to include the gradual liberalization of prices, fiscal decentralization, increased autonomy for state enterprises, creation of a diversified banking system, development of stock markets, rapid growth of the private sector, and opening to foreign trade and investment. China generally has implemented reforms in a gradualist fashion. In recent years, China has renewed its support for state-owned enterprises in sectors it considers important to "economic security," explicitly looking to foster globally competitive national champions. After keeping its currency tightly linked to the US dollar for years, in July 2005 China revalued its currency by 2.1% against the US dollar and moved to an exchange rate system that references a basket of currencies. From mid 2005 to late 2008 cumulative appreciation of the renminbi against the US dollar was more than 20%, but the exchange rate remained virtually pegged to the dollar from the onset of the global financial crisis until June 2010, when Beijing allowed resumption of a gradual appreciation. The restructuring of the economy and resulting efficiency gains have contributed to a more than tenfold increase in GDP since 1978. Measured on a purchasing power parity (PPP) basis that adjusts for price differences, China in 2010 stood as the second-largest economy in the world after the US, having surpassed Japan in 2001. The dollar values of China's agricultural and industrial output each exceeded those of the US, although China was second to the US in the value of services it produced. Still, per capita income is below the world average. The Chinese government faces numerous economic development challenges, including: (a) reducing its high domestic savings rate and correspondingly low domestic demand; (b) sustaining adequate job growth for tens of millions of migrants and new entrants to the work force; (c) reducing corruption and other economic crimes; and (d) containing environmental damage and social strife related to the economy's rapid transformation. Economic development has progressed further in coastal provinces than in the interior, and approximately 200 million rural laborers and their dependents have relocated to urban areas to find work. One demographic consequence of the "one child" policy is that China is now one of the most rapidly aging countries in the world. Deterioration in the environment - notably air pollution, soil erosion, and the steady fall of the water table, especially in the north - is another long-term problem. China continues to lose arable land because of erosion and economic development. The Chinese government is seeking to add energy production capacity from sources other than coal and oil, focusing on nuclear and alternative energy development. In 2009, the global economic downturn reduced foreign demand for Chinese exports for the first time in many years, but China rebounded quickly, outperforming all other major economies in 2010 with GDP growth around 10%. The economy appears set to remain on a strong growth trajectory in 2011, lending credibility to the stimulus policies the regime rolled out during the global financial crisis. The government vows to continue reforming the economy and emphasizes the need to increase domestic consumption in order to make the economy less dependent on exports for GDP growth in the future, but China likely will make only marginal progress toward these rebalancing goals in 2011. Two economic problems China currently faces are inflation - which, late in 2010, surpassed the government's target of 3% - and local government debt, which swelled as a result of stimulus policies, and is largely off-the-books and potentially low-quality.

Christmas Island

Phosphate mining had been the only significant economic activity, but in December 1987 the Australian government

closed the mine. In 1991, the mine was reopened. With the support of the government, a \$34 million casino opened in 1993, but closed in 1998.

Clipperton Island

Although 115 species of fish have been identified in the territorial waters of Clipperton Island, the only economic activity is tuna fishing.

Cocos (Keeling) Islands

Coconuts, grown throughout the islands, are the sole cash crop. Small local gardens and fishing contribute to the food supply, but additional food and most other necessities must be imported from Australia. There is a small tourist industry.

Colombia

Colombia experienced accelerating growth between 2002 and 2007, chiefly due to improvements in domestic security, rising commodity prices, and to President URIBE's promarket economic policies. Foreign direct investment reached a record \$10 billion in 2008, and continues to flow in, especially in the oil sector. A series of policies enhanced Colombia's investment climate: pro-business reforms in the oil and gas sectors and export-led growth fueled mainly by the Andean Trade Promotion and Drug Eradication Act. Inequality, underemployment, and narcotrafficking remain significant challenges, and Colombia's infrastructure requires major improvements to sustain economic expansion. Because of the global financial crisis and weakening demand for Colombia's exports, Colombia's economy grew only 2.7% in 2008, and 0.8% in 2009 but rebounded to around 4.5% in 2010. The government has encouraged exporters to diversify their customer base beyond the United States and Venezuela, traditionally Colombia's largest trading partners; the SANTOS administration continues to pursue free trade agreements with Asian and South American partners and awaits the approval of a Canadian trade accord by Canada's and EU's parliaments. The business sector remains concerned about Venezuela's trade restrictions on Colombian exports, an appreciating domestic currency, and the pending US Congressional approval of the US-Colombia Trade Promotion Agreement.

Comoros

One of the world's poorest countries, Comoros is made up of three islands that have inadequate transportation links, a young and rapidly increasing population, and few natural resources. The low educational level of the labor force contributes to a subsistence

level of economic activity, high unemployment, and a heavy dependence on foreign grants and technical assistance. Agriculture, including fishing, hunting, and forestry, contributes 40% to GDP, employs 80% of the labor force, and provides most of the exports. Export income is heavily reliant on the three main crops of vanilla, cloves, and ylang-ylang and Comoros' export earnings are easily disrupted by disasters such as fires. The country is not self-sufficient in food production; rice, the main staple, accounts for the bulk of imports. The government - which is hampered by internal political disputes - lacks a comprehensive strategy to attract foreign investment and is struggling to upgrade education and technical training, privatize commercial and industrial enterprises, improve health services, diversify exports, promote tourism, and reduce the high population growth rate. Political problems have inhibited growth, which has averaged only about 1% in 2006-09. Remittances from 150,000 Comorans abroad help supplement GDP. In September 2009 the IMF approved Comoros for a three-year \$21 million loan. The IMF gave generally positive reports of the country's program performance as of October 2010. The African Development Bank approved a \$34.6 million debt-relief package loan for Comoros in September 2010, and Comoros will attempt to qualify for debt relief in 2012 under the IMF and World Bank's Heavily Indebted Poor Countries (HIPC) initiative.

Congo, Democratic Republic of the The economy of the Democratic Republic of the Congo - a nation endowed with vast potential wealth - is slowly recovering from decades of decline. Systemic corruption since independence in 1960 and conflict that began in May 1997 has dramatically reduced national output and government revenue, increased external debt, and resulted in the deaths of more than 5 million people from violence, famine, and disease. Foreign businesses curtailed operations due to uncertainty about the outcome of the conflict, lack of infrastructure, and the difficult operating environment. Conditions began to improve in late 2002 with the withdrawal of a large portion of the invading foreign troops. The transitional government reopened relations with international financial institutions and international donors, and President KABILA began implementing reforms. Progress has been slow and the International Monetary Fund curtailed their program for the DRC at the end of March 2006 because of fiscal overruns. Much economic activity still occurs in the informal sector, and is not reflected in GDP data. Renewed activity in the mining sector, the source of most export income, boosted Kinshasa's fiscal position and GDP growth from 2006-2008, however, the government's review of mining contracts that began in 2006, combined with a fall in world market prices for the DRC's key mineral exports temporarily weakened output in 2009, leading to a balance of payments crisis. The recovery in mineral prices beginning in mid 2009 boosted mineral exports, and emergency funds from the IMF boosted foreign reserves. An uncertain legal framework, corruption, a lack of transparency in government policy are long-term problems for the mining sector and the economy as a whole. The global recession cut economic growth in 2009 to less than half its 2008 level, but growth returned to 3% in 2010. The DRC signed a Poverty Reduction and Growth Facility with the IMF in 2009 and received \$12 billion in multilateral and bilateral debt relief in 2010.

Congo, Republic of the

The economy is a mixture of subsistence agriculture, an industrial sector based largely on oil and support services, and government spending. Oil has supplanted forestry as the mainstay of the economy, providing a major share of government revenues and exports. In the early 1980s, rapidly rising oil revenues enabled the government to finance large-scale development projects with GDP growth averaging 5% annually, one of the highest rates in Africa. Characterized by budget problems and overstaffing, the government has mortgaged a substantial portion of its oil earnings through oil-backed loans that have contributed to a growing debt burden and chronic revenue shortfalls. Economic reform efforts have been undertaken with the support of international organizations, notably the World Bank and the IMF. However, the reform program came to a halt in June 1997 when civil war erupted. Denis SASSOU-NGUESSO, who returned to power when the war ended in October 1997, publicly expressed interest in moving forward on economic reforms and privatization and in renewing cooperation with international financial institutions. Economic progress was badly hurt by slumping oil prices and the resumption of armed conflict in December 1998, which worsened the republic's budget deficit. The current administration presides over an uneasy internal peace and

faces difficult economic challenges of stimulating recovery and reducing poverty. The drop in oil prices during the global crisis reduced oil revenue by about 30%, but the subsequent recovery of oil prices has boosted the economy's GDP and near-term prospects. In March 2006, the World Bank and the International Monetary Fund (IMF) approved Heavily Indebted Poor Countries (HIPC) treatment for Congo, receiving \$1.9 billion in debt relief under the program in 2010.

Cook Islands

Like many other South Pacific island nations, the Cook Islands' economic development is hindered by the isolation of the country from foreign markets, the limited size of domestic markets, lack of natural resources, periodic devastation from natural disasters, and inadequate infrastructure. Agriculture, employing more than one-quarter of the working population, provides the economic base with major exports made up of copra and citrus fruit. Black pearls are the Cook Islands' leading export. Manufacturing activities are limited to fruit processing, clothing, and handicrafts. Trade deficits are offset by remittances from emigrants and by foreign aid overwhelmingly from New Zealand. In the 1980s and 1990s, the country lived beyond its means, maintaining a bloated public service and accumulating a large foreign debt. Subsequent reforms, including the sale of state assets, the strengthening of economic management, the encouragement of tourism, and a debt restructuring agreement, have rekindled investment and growth.

Coral Sea Islands

no economic activity

Costa Rica Prior to the global economic crisis, Costa Rica enjoyed stable economic growth. The economy contracted 0.7% in 2009, but resumed growth at more than 3% in 2010. While the traditional agricultural exports of bananas, coffee, sugar, and beef are still the backbone of commodity export trade, a variety of industrial and specialized agricultural products have broadened export trade in recent years. High value added goods and services, including microchips, have further bolstered exports. Tourism continues to bring in foreign exchange, as Costa Rica's impressive biodiversity makes it a key destination for ecotourism. Foreign investors remain attracted by the country's political stability and relatively high education levels, as well as the fiscal incentives offered in the free-trade zones; and Costa Rica has attracted one of the highest levels of foreign direct investment per capita in Latin America. However, many business impediments, such as high levels of bureaucracy, difficulty of enforcing contracts, and weak investor protection, remain. Poverty has remained around 15-20% for nearly 20 years, and the strong social safety net that had been put into place by the government has eroded due to increased financial constraints on government expenditures. Unlike the rest of Central America, Costa Rica is not highly dependent on remittances as they only represent about 2% of GDP. Immigration from Nicaragua has increasingly become a concern for the government. The estimated 300,000-500,000 Nicaraguans in Costa Rica legally and

illegally are an important source of - mostly unskilled - labor, but also place heavy demands on the social welfare system. The US-Central American-Dominican Republic Free Trade Agreement (CAFTA-DR) entered into force on 1 January 2009, after significant delays within the Costa Rican legislature. CAFTA-DR will likely lead to increased foreign direct investment in key sectors of the economy, including the insurance and telecommunications sectors recently opened to private investors. President CHINCHILLA is likely to push for fiscal reform in the coming year, seeking to boost revenue, possibly through revised tax legislation, to fund an increase in security services and education.

Cote d'Ivoire

Cote d'Ivoire is heavily dependent on agriculture and related activities, which engage roughly 68% of the population. Cote d'Ivoire is the world's largest producer and exporter of cocoa beans and a significant producer and exporter of coffee and palm oil. Consequently, the economy is highly sensitive to fluctuations in international prices for these products, and, to a lesser extent, in climatic conditions. Cocoa, oil, and coffee are the country's top export revenue earners, but the country is also producing gold. Since the end of the civil war in 2003, political turmoil has continued to damage the economy, resulting in the loss of foreign investment and slow economic growth. GDP grew by more than 2% in 2008 and around 4% per year in 2009-10. Per capita income has declined by 15% since 1999, but registered a slight improvement in 2009-10. Power cuts caused by a turbine failure in early 2010 slowed economic activity. Cote d'Ivoire in 2010 signed agreements to restructure its Paris Club bilateral, other bilateral, and London Club debt. Cote d'Ivoire's long term challenges include political instability and degrading infrastructure.

Croatia

Once one of the wealthiest of the Yugoslav republics, Croatia's economy suffered badly during the 1991-95 war as output collapsed and the country missed the early waves of investment in Central and Eastern Europe that followed the fall of the Berlin Wall. Between 2000 and 2007, however, Croatia's economic fortunes began to improve slowly, with moderate but steady GDP growth between 4% and 6% led by a rebound in tourism and credit-driven consumer spending. Inflation over the same period has remained tame and the currency, the kuna, stable. Nevertheless, difficult problems still remain, including a stubbornly high unemployment rate, a growing trade deficit and uneven regional development. The state retains a large role in the economy, as privatization efforts often meet stiff public and political resistance. While macroeconomic stabilization has largely been achieved, structural reforms lag because of deep resistance on the part of the public and lack of strong support from

politicians. The EU accession process should accelerate fiscal and structural reform. While long term growth prospects for the economy remain strong, Croatia will face significant pressure as a result of the global financial crisis. Croatia's high foreign debt, anemic export sector, strained state budget, and over-reliance on tourism revenue will result in higher risk to economic stability over the medium term.

Cuba

The government continues to balance the need for economic loosening against a desire for firm political control. The government announced it would eliminate 500,000 state jobs by March 2011 and has expanded opportunities for self-employment. President CASTRO said such changes were needed to update the economic model to ensure the survival of socialism. It has rolled back limited reforms undertaken in the 1990s to increase enterprise efficiency and alleviate serious shortages of food, consumer goods, and services. The average Cuban's standard of living remains at a lower level than before the downturn of the 1990s, which was caused by the loss of Soviet aid and domestic inefficiencies. Since late 2000, Venezuela has been providing oil on preferential terms, and it currently supplies about 100,000 barrels per day of petroleum products. Cuba has been paying for the oil, in part, with the services of Cuban personnel in Venezuela including some 30,000 medical professionals.

Curacao

Tourism, petroleum refining, and offshore finance are the mainstays of this small economy, which is closely tied to the outside world. Although GDP grew slightly during the past decade, the island enjoys a high per capita income and a well-developed infrastructure compared with other countries in the region. Curacao has an excellent natural harbor that can accommodate large oil tankers. The Venezuelan state oil company leases the single refinery on the island from the government; most of the oil for the refinery is imported from Venezuela; most of the refined products are exported to the US. Almost all consumer and capital goods are imported, with the US, Brazil, Italy, and Mexico being the major suppliers. The government is attempting to diversify its industry and trade and has signed an Association Agreement with the EU to expand business there. Poor soils and inadequate water supplies hamper the development of agriculture. Budgetary problems complicate reform of the health and pension systems for an aging population.

Cyprus

The area of the Republic of Cyprus under government control

has a market economy dominated by the service sector, which accounts for nearly four-fifths of GDP. Tourism, financial services, and real estate are the most important sectors. Erratic growth rates over the past decade reflect the economy's reliance on tourism, which often fluctuates with political instability in the region and economic conditions in Western Europe. Nevertheless, the economy in the area under government control has grown at a rate well above the EU average since 2000. Cyprus joined the European Exchange Rate Mechanism (ERM2) in May 2005 and adopted the euro as its national currency on 1 January 2008. An aggressive austerity program in the preceding years, aimed at paving the way for the euro, helped turn a soaring fiscal deficit (6.3% in 2003) into a surplus of 1.2% in 2008, and reduced inflation to 4.7%. This prosperity came under pressure in 2009, as construction and tourism slowed in the face of reduced foreign demand triggered by the ongoing global financial crisis. Although Cyprus lagged its EU peers in showing signs of stress from the global crisis, the economy tipped into recession in mid 2009 and contracted 1.8% for the year. In addition, the budget deficit is on the rise and reached 5.7% of GDP in 2010, a violation of the EU's budget deficit criteria of no more than 3% of GDP. In response to the country's deteriorating finances, Nicosia is promising to implement measures to cut the cost of the state payroll, curb tax evasion, and revamp social benefits. However, it has been slow to act, lacking a consensus in parliament and among the social partners for its proposed measures.

Czech Republic

The Czech Republic is one of the most stable and prosperous of the post-Communist states of Central and Eastern Europe. Maintaining an open investment climate has been a key element of the Czech Republic's transition from a communist, centrally planned economy to a functioning market economy. As a member of the European Union, with an advantageous location in the center of Europe, a relatively low cost structure, and a well-qualified labor force, the Czech Republic is an attractive destination for foreign investment. Prior to its EU accession in 2004, the Czech government harmonized its laws and regulations with those of the European Union. The small, open, export-driven Czech economy grew by over 6% annually from 2005-2007 and by 2.5% in 2008. The conservative Czech financial system has remained relatively healthy throughout 2009. Nevertheless, the real economy contracted by 4.1% in 2009, mainly due to a significant drop in external demand as the Czech Republic's main export markets fell into recession. GDP is expected to grow by 2.4% in 2010, driven largely by a rebound in external demand, particularly from Germany.

Denmark

This thoroughly modern market economy features a high-tech agricultural sector, state-of-the-art industry with world-leading firms in pharmaceuticals, maritime shipping and renewable energy, and a high dependence on foreign trade. The Danish economy is also characterized by extensive government welfare measures, an equitable distribution of income, and comfortable living standards. Denmark is a net exporter of food and energy and enjoys a comfortable balance of payments surplus. After a long consumption-driven upswing, Denmark's economy began slowing in 2007 with the end of a housing boom. Housing prices dropped markedly in 2008-09. The global financial crisis has exacerbated this cyclical slowdown through increased borrowing costs and lower export demand, consumer confidence, and investment. The global financial crises cut Danish GDP by 0.9% in 2008 and 4.7% in 2009. Historically low levels of unemployment rose sharply with the recession but remain below 5%, about half the level of the EU. Denmark made a modest recovery in 2010 in part because of increased government spending. An impending decline in the ratio of workers to retirees will be a major long-term issue. Denmark maintained a healthy budget surplus for many years up to 2008, but the budget balance swung into deficit during 2009-10. Nonetheless, Denmark's fiscal position remains among the strongest in the EU. Despite previously meeting the criteria to join the European Economic and Monetary Union (EMU), so far Denmark has decided not to join, although the Danish krone remains pegged to the euro.

Dhekelia

Economic activity is limited to providing services to the military and their families located in Dhekelia. All food and manufactured goods must be imported.

Djibouti

The economy is based on service activities connected with the country's strategic location and status as a free trade zone in the Horn of Africa. Two-thirds of Djibouti's inhabitants live in the capital city; the remainder are mostly nomadic herders. Scanty rainfall limits crop production to fruits and vegetables, and most food must be imported. Djibouti provides services as both a transit port for the region and an international transshipment and refueling center. Imports and exports from landlocked neighbor Ethiopia represent 70% of port activity at Djibouti's container terminal. Djibouti has few natural resources and little industry. The nation is, therefore, heavily dependent on foreign assistance to help support its balance of payments and to finance development projects.

An unemployment rate of nearly 60% in urban areas continues to be a major problem. While inflation is not a concern, due to the fixed tie of the Djiboutian franc to the US dollar, the artificially high value of the Djiboutian franc adversely affects Djibouti's balance of payments. Per capita consumption dropped an estimated 35% between 1999 and 2006 because of recession, civil war, and a high population growth rate (including immigrants and refugees). Djibouti has experienced relatively minimal impact from the global economic downturn, but its reliance on diesel-generated electricity and imported food leave average consumers vulnerable to global price shocks.

Dominica

The Dominican economy has been dependent on agriculture - primarily bananas - in years past, but increasingly has been driven by tourism as the government seeks to promote Dominica as an "ecotourism" destination. In order to diversify the island's production base, the government also is attempting to develop an offshore financial sector and has signed an agreement with the EU to develop geothermal energy resources. In 2003, the government began a comprehensive restructuring of the economy - including elimination of price controls, privatization of the state banana company, and tax increases - to address an economic and financial crisis and to meet IMF requirements. This restructuring paved the way for an economic recovery - real growth for 2006 reached a two-decade high - and helped to reduce the debt burden, which remains at about 85% of GDP. Hurricane Dean struck the island in August 2007 causing damages equivalent to 20% of GDP. In 2009, growth slowed as a result of the global recession; it picked up only slightly in 2010.

Dominican Republic

The Dominican Republic has long been viewed primarily as an exporter of sugar, coffee, and tobacco, but in recent years the service sector has overtaken agriculture as the economy's largest employer, due to growth in tourism and free trade zones. The economy is highly dependent upon the US, the destination for nearly 60% of exports. Remittances from the US amount to about a tenth of GDP, equivalent to almost half of exports and three-quarters of tourism receipts. The country suffers from marked income inequality; the poorest half of the population receives less than one-fifth of GDP, while the richest 10% enjoys nearly 40% of GDP. High unemployment and underemployment remains an important long-term challenge. The Central America-Dominican Republic Free Trade Agreement (CAFTA-DR) came into force in March 2007, boosting investment and exports and reducing losses to the Asian garment

industry. The growth of the Dominican Republic's economy slowed in 2008-09 because of the global recession, but still remained one of the fastest growing in the region.

Ecuador

Ecuador is substantially dependent on its petroleum resources, which have accounted for more than half of the country's export earnings and one-fourth of public sector revenues in recent years. In 1999/2000, Ecuador suffered a severe economic crisis, with GDP contracting by more than 6%. Poverty increased significantly, the banking system collapsed, and Ecuador defaulted on its external debt later that year. In March 2000, the Congress approved a series of structural reforms that also provided for the adoption of the US dollar as legal tender. Dollarization stabilized the economy, and positive growth returned in the years that followed, helped by high oil prices, remittances, and increased non-traditional exports. From 2002-06 the economy grew 5.5%, the highest five-year average in 25 years. After moderate growth in 2007, the economy reached a growth rate of 7.2% in 2008, in large part due to high global petroleum prices. President Rafael CORREA, who took office in January 2007, defaulted on Ecuador's sovereign debt in December 2008, refusing to make payment on \$3.2 billion in international bonds, representing over 80% of Ecuador's private external debt. Economic policies under the CORREA administration - including an announcement in late 2009 terminating 13 bilateral investment treaties - have generated economic uncertainty and discouraged private investment. The Ecuadorian economy slowed to 0.4% growth in 2009 due to the global financial crisis, and the sharp decline in world oil prices and remittance flows, but picked up to a 2.4% growth rate in 2010.

Egypt

Occupying the northeast corner of the African continent, Egypt is bisected by the highly fertile Nile valley, where most economic activity takes place. Egypt's economy was highly centralized during the rule of former President Gamal Abdel NASSER but has opened up considerably under former President Anwar EL-SADAT and current President Mohamed Hosni MUBARAK. Cairo from 2004 to 2008 aggressively pursued economic reforms to attract foreign investment and facilitate GDP growth. The global financial crisis has slowed the reform efforts. The budget deficit climbed to over 8% of GDP and Egypt's GDP growth slowed to 4.6% in 2009, predominately due to reduced growth in export-oriented sectors, including manufacturing and tourism, and Suez Canal revenues. In 2010, the government spent more on infrastructure and public projects, and exports drove GDP growth to more than 5%, but GDP growth in 2011 is unlikely to bounce

back to pre-global financial recession levels, when it stood at 7%. Despite the relatively high levels of economic growth over the past few years, living conditions for the average Egyptian remain poor.

El Salvador

Despite being the smallest country geographically in Central America, El Salvador has the third largest economy in the region. The economy took a hit from the global recession and real GDP contracted by 3.5% in 2009. The economy began a slow recovery in 2010 on the back of improved export and remittances figures.

Remittances accounted for 16% of GDP in 2009, and about a third of all households receive these transfers. In 2006 El Salvador was the first country to ratify the Dominican Republic-Central American Free Trade Agreement (CAFTA-DR), which has bolstered the export of processed foods, sugar, and ethanol, and supported investment in the apparel sector amid increased Asian competition and the expiration of the Multi-Fiber Agreement in 2005. El Salvador has promoted an open trade and investment environment, and has embarked on a wave of privatizations extending to telecom, electricity distribution, banking, and pension funds. In late 2006, the government and the Millennium Challenge Corporation signed a five-year, \$461 million compact to stimulate economic growth and reduce poverty in the country's northern region, the primary conflict zone during the civil war, through investments in education, public services, enterprise development, and transportation infrastructure. With the adoption of the US dollar as its currency in 2001, El Salvador lost control over monetary policy. Any counter-cyclical policy response to the downturn must be through fiscal policy, which is constrained by legislative requirements for a two-thirds majority to approve any international financing.

Equatorial Guinea

The discovery and exploitation of large oil reserves have contributed to dramatic economic growth but fluctuating oil prices have produced huge swings in GDP growth in recent years. Forestry, farming, and fishing are also major components of GDP. Subsistence farming is the dominate form of livelihood. Although pre-independence Equatorial Guinea counted on cocoa production for hard currency earnings, the neglect of the rural economy under successive regimes has diminished potential for agriculture-led growth (the government has stated its intention to reinvest some oil revenue into agriculture). A number of aid programs sponsored by the World Bank and the IMF have been cut off since 1993 because of corruption and mismanagement. Government officials and their family members own most businesses, but

corruption is rampant. Undeveloped natural resources include titanium, iron ore, manganese, uranium, and alluvial gold. Growth remained strong in 2008, led by oil, but dropped in 2009-10, as the price of oil fell.

Eritrea

Since independence from Ethiopia in 1993, Eritrea has faced the economic problems of a small, desperately poor country, accentuated by the recent implementation of restrictive economic policies. Eritrea has a command economy under the control of the sole political party, the People's Front for Democracy and Justice (PFDJ). Like the economies of many African nations, a large share of the population - nearly 80% - is engaged in subsistence agriculture, but they produce only a small share of total output. Since the conclusion of the Ethiopian-Eritrea war in 2000, the government has maintained a firm grip on the economy, expanding the use of the military and party-owned businesses to complete Eritrea's development agenda. The government strictly controls the use of foreign currency by limiting access and availability. Few private enterprises remain in Eritrea. Eritrea's economy depends heavily on taxes paid by members of the diaspora. Erratic rainfall and the delayed demobilization of agriculturalists from the military continue to interfere with agricultural production, and Eritrea's recent harvests have been unable to meet the food needs of the country. The Government continues to place its hope for additional revenue on the development of several international mining projects. Despite difficulties for international companies in working with the Eritrean Government, a Canadian mining company signed a contract with the government in 2007 and began mineral extraction in 2010. Eritrea's economic future depends upon its ability to master social problems such as illiteracy, unemployment, and low skills, and more importantly, on the government's willingness to support a true market economy.

Estonia

Estonia, a 2004 European Union entrant, has a modern market-based economy and one of the higher per capita income levels in Central Europe and the Baltic region. Estonia's successive governments have pursued a free market, pro-business economic agenda and have wavered little in their commitment to pro-market reforms. The current government has pursued relatively sound fiscal policies that have resulted in balanced budgets and very low public debt. The economy benefits from strong electronics and telecommunications sectors and strong trade ties with Finland, Sweden, and Germany. Tallinn's priority has been to sustain high growth rates - on

average 8% per year from 2003 to 2007. Estonia's economy slowed down markedly and fell sharply into recession in mid-2008, primarily as a result of an investment and consumption slump following the bursting of the real estate market bubble. GDP dropped nearly 15% in 2009, among the world's highest rates of contraction. A modest recovery began in 2010, but unemployment stands above 13%. Estonia adopted the euro in January 2011.

Ethiopia

Ethiopia's poverty-stricken economy is based on agriculture, accounting for almost 45% of GDP, and 85% of total employment. The agricultural sector suffers from frequent drought and poor cultivation practices. Coffee is critical to the Ethiopian economy with exports of some \$350 million in 2006, but historically low prices have seen many farmers switching to qat to supplement income. Under Ethiopia's constitution, the state owns all land and provides long-term leases to the tenants; the system continues to hamper growth in the industrial sector as entrepreneurs are unable to use land as collateral for loans. In November 2001, Ethiopia qualified for debt relief from the Highly Indebted Poor Countries (HIPC) initiative, and in December 2005 the IMF forgave Ethiopia's debt. The global economic downturn led to balance of payments pressures, partially alleviated by recent emergency funding from the IMF. While GDP growth has remained high, per capita income is among the lowest in the world.

European Union

Internally, the EU has abolished trade barriers, adopted a common currency, and is striving toward convergence of living standards. Internationally, the EU aims to bolster Europe's trade position and its political and economic power. Because of the great differences in per capita income among member states (from \$7,000 to \$78,000) and in national attitudes toward issues like inflation, debt, and foreign trade, the EU faces difficulties in devising and enforcing common policies. In the wake of the global economic crisis, the European Commission projected that the EU's economy would shrink by 4% in 2009 and 0.1% in 2010. The EU has recovered from the crisis faster than expected, however, and the Commission estimates 2010 growth at 1.8%. Significant risks to growth nevertheless remain, including, high official debts and deficits, aging populations, over-regulation of non-financial businesses, and doubts about the sustainability of European Economic and Monetary Union (EMU). In June 2010, prompted by the Greek financial crisis, the EU and the IMF set up a \$1 trillion bailout fund to rescue any EMU member in danger of default, but it has not

calmed market jitters that have diminished the value of the euro. Eleven established EU member states introduced the euro as their common currency on 1 January 1999 (Greece did so two years later), but the UK and Denmark have 'opt-outs' that allow them to keep their national currencies, and Sweden has not taken the steps needed to participate. Between 2004 and 2007, the EU admitted 12 countries that are, in general, less advanced economically than the other 15. Of the 12 most recent member states, only Slovenia (1 January 2007), Cyprus and Malta (1 January 2008), Slovakia (1 January 2009), and Estonia (1 January 2011) have adopted the euro; the remaining states other than the UK and Denmark are legally required to adopt the currency upon meeting EU's fiscal and monetary convergence criteria.

Falkland Islands (Islas Malvinas) The economy was formerly based on agriculture, mainly sheep farming, but today fishing contributes the bulk of economic activity. In 1987, the government began selling fishing licenses to foreign trawlers operating within the Falkland Islands' exclusive fishing zone. These license fees total more than \$40 million per year, which help support the island's health, education, and welfare system. Squid accounts for 75% of the fish taken. Dairy farming supports domestic consumption; crops furnish winter fodder. Foreign exchange earnings come from shipments of high-grade wool to the UK and the sale of postage stamps and coins. The islands are now self-financing except for defense. The British Geological Survey announced a 200-mile oil exploration zone around the islands in 1993, and early seismic surveys suggest substantial reserves capable of producing 500,000 barrels per day; to date, no exploitable site has been identified. An agreement between Argentina and the UK in 1995 seeks to defuse licensing and sovereignty conflicts that would dampen foreign interest in exploiting potential oil reserves. Political tensions between the UK and Argentina rose in early 2010 after a UK company began oil drilling activities in the waters around the Falkland Islands but abated somewhat when the drilling operation failed to discover commercially exploitable oil reserves. Tourism, especially eco-tourism, is increasing rapidly, with about 30,000 visitors in 2001. Another large source of income is interest paid on money the government has in the bank. The British military presence also provides a sizeable economic boost.

Faroe Islands

The Faroese economy is dependent on fishing, which makes the economy vulnerable to price swings. The sector accounts for about 95% of exports and nearly half of GDP. In early 2008 the Faroese economy began to slow as a result of smaller catches and historically high oil prices that continue to trouble the economy. Though oil prices have come down, reduced catches, especially of cod and haddock, have continued to strain the Faroese economy. GDP grew 0.5% in 2008-09. The slowdown in the Faroese economy followed a strong performance since the mid-1990s with annual growth rates averaging close to 6%, mostly a result of increased fish landings and salmon farming, and high export prices. Unemployment reached its lowest level in the first half of 2008, but increased to 3.9% in 2009 and is rising. The Faroese Home Rule Government produced

increasing budget surpluses that helped to reduce the large public debt, most of it to Denmark. However, total dependence on fishing and salmon farming make the Faroese economy very vulnerable to fluctuations in world demand. In addition, budget surpluses turned to deficits in 2008-09, and the economy at both the country and local level is running large deficits. Initial discoveries of oil in the Faroese area give hope for eventual oil production, which may provide a foundation for a more diversified economy and less dependence on Danish economic assistance. Aided by an annual subsidy from Denmark amounting to about 6% of Faroese GDP, the Faroese have a standard of living almost equal to that of Denmark and Greenland.

Fiji

Fiji, endowed with forest, mineral, and fish resources, is one of the most developed of the Pacific island economies though still with a large subsistence sector. Sugar exports, remittances from Fijians working abroad, and a growing tourist industry - with 400,000 to 500,000 tourists annually - are the major sources of foreign exchange. Fiji's sugar has special access to European Union markets but will be harmed by the EU's decision to cut sugar subsidies. Sugar processing makes up one-third of industrial activity but is not efficient. Fiji's tourism industry was damaged by the December 2006 coup and is facing an uncertain recovery time. In 2007 tourist arrivals were down almost 6%, with substantial job losses in the service sector, and GDP dipped. The coup has created a difficult business climate. The EU has suspended all aid until the interim government takes steps toward new elections. Long-term problems include low investment, uncertain land ownership rights, and the government's inability to manage its budget. Overseas remittances from Fijians working in Kuwait and Iraq have decreased significantly. Fiji's current account deficit reached 23% of GDP in 2006.

Finland

Finland has a highly industrialized, largely free-market economy with per capita output roughly that of Austria, Belgium, the Netherlands, and Sweden. Trade is important with exports accounting for over one third of GDP in recent years. Finland is strongly competitive in manufacturing - principally the wood, metals, engineering, telecommunications, and electronics industries. Finland excels in high-tech exports such as mobile phones. Except for timber and several minerals, Finland depends on imports of raw materials, energy, and some components for manufactured goods. Because of the climate, agricultural development is limited to maintaining self-sufficiency in basic products. Forestry, an important export

earner, provides a secondary occupation for the rural population.

Finland had been one of the best performing economies within the EU in recent years and its banks and financial markets avoided the worst of global financial crisis. However, the world slowdown hit exports and domestic demand hard in 2009, with Finland experiencing one of the deepest contractions in the euro zone. A recovery of exports stimulated economic growth in 2010, and led to a lowering of unemployment. The recession left a deep mark on general government finances and the debt ratio, turning previously strong budget surpluses into deficits. In the next few years, the great challenge of economic policy will be to implement a post-recession exit strategy in which measures supporting growth will be combined with general government adjustment measures. Longer-term, Finland must address a rapidly aging population and decreasing productivity that threaten competitiveness, fiscal sustainability, and economic growth.

France France is in the midst of transition from a well-to-do modern economy that has featured extensive government ownership and intervention to one that relies more on market mechanisms. The government has partially or fully privatized many large companies, banks, and insurers, and has ceded stakes in such leading firms as Air France, France Telecom, Renault, and Thales. It maintains a strong presence in some sectors, particularly power, public transport, and defense industries. With at least 75 million foreign tourists per year, France is the most visited country in the world and maintains the third largest income in the world from tourism. France's leaders remain committed to a capitalism in which they maintain social equity by means of laws, tax policies, and social spending that reduce income disparity and the impact of free markets on public health and welfare. France has weathered the global economic crisis better than most other big EU economies because of the relative resilience of domestic consumer spending, a large public sector, and less exposure to the downturn in global demand than in some other countries. Nonetheless, France's real GDP contracted 2.5% in 2009, but recovered somewhat in 2010, while the unemployment rate increased from 7.4% in 2008 to 9.5% in 2010. The government pursuit of aggressive stimulus and investment measures in response to the economic crisis, however, are contributing to a deterioration of France's public finances. The government budget deficit rose sharply from 3.4% of GDP in 2008 to 7.8% of GDP in 2010, while France's public debt rose from 68% of GDP to 84% over the same period. Paris is terminating stimulus measures, eliminating tax credits, and freezing most government spending to bring the budget deficit under the 3% euro-zone ceiling by 2013, and to highlight France's commitment to fiscal discipline at a time of intense financial market scrutiny of euro zone debt levels. President SARKOZY - who secured passage of pension reform in 2010 - is expected to seek passage of some tax reforms in 2011, but he may delay additional, more costly, reforms until after the 2012 election.

French Polynesia

Since 1962, when France stationed military personnel in the region, French Polynesia has changed from a subsistence agricultural economy to one in which a high proportion of the work force is either employed by the military or supports the tourist industry. With the halt of French nuclear testing in 1996,

the military contribution to the economy fell sharply. Tourism accounts for about one-fourth of GDP and is a primary source of hard currency earnings. Other sources of income are pearl farming and deep-sea commercial fishing. The small manufacturing sector primarily processes agricultural products. The territory benefits substantially from development agreements with France aimed principally at creating new businesses and strengthening social services.

French Southern and Antarctic Lands

Economic activity is limited to servicing meteorological and geophysical research stations, military bases, and French and other fishing fleets. The fish catches landed on Iles Kerguelen by foreign ships are exported to France and Reunion.

Gabon

Gabon enjoys a per capita income four times that of most sub-Saharan African nations, but because of high income inequality, a large proportion of the population remains poor. Gabon depended on timber and manganese until oil was discovered offshore in the early 1970s. The oil sector now accounts for more than 50% of GDP although the industry is in decline as fields pass their peak production.

Gabon continues to face fluctuating prices for its oil, timber, and manganese exports and the global recession led to a GDP contraction of 1.4% in 2009. Despite the abundance of natural wealth, poor fiscal management hobbles the economy. In 1997, an IMF mission to Gabon criticized the government for overspending on off-budget items, overborrowing from the central bank, and slipping on its schedule for privatization and administrative reform. The rebound of oil prices from 1999 to 2008 helped growth, but drops in production have hampered Gabon from fully realizing potential gains. Gabon signed a 14-month Stand-By Arrangement with the IMF in May 2007, and later that year issued a \$1 billion sovereign bond to buy back a sizable portion of its Paris Club debt.

Gambia, The

The Gambia has sparse natural resource deposits and a limited agricultural base, and relies in part on remittances from workers overseas and tourist receipts. About three-quarters of the population depends on the agricultural sector for its livelihood. Small-scale manufacturing activity features the processing of peanuts, fish, and hides. The Gambia's natural beauty and proximity to Europe has made it one of the larger markets for tourism in West Africa, boosted by government and private sector investments in

eco-tourism and upscale facilities. In the past few years, The Gambia's re-export trade - traditionally a major segment of economic activity - has declined, but its banking sector has grown rapidly. Unemployment and underemployment rates remain high; economic progress depends on sustained bilateral and multilateral aid, on responsible government economic management, and on continued technical assistance from multilateral and bilateral donors. The quality of fiscal management, however, is weak. The government has promised to raise civil service wages over the next two years and the deficit is projected to worsen.

Gaza Strip

High population density, limited land and sea access, continuing isolation, and strict internal and external security controls have degraded economic conditions in the Gaza Strip - the smaller of the two areas in the Palestinian Territories. Israeli-imposed crossings closures, which became more restrictive after HAMAS violently took over the territory in June 2007, and fighting between HAMAS and Israel during December 2008-January 2009, resulted in the near collapse of most of the private sector, extremely high unemployment, and high poverty rates. Shortages of goods are met through large-scale humanitarian assistance - led by UNRWA - and the HAMAS-regulated black market tunnel trade that flourishes under the Gaza Strip's border with Egypt. However, changes to the blockade in 2010 included moving from a white list - in which only approved items were allowed into Gaza through the crossings - to a black list, where all but non-approved items were allowed into Gaza through the crossings. Israeli authorities have recently signaled that exports from the territory might be possible in the future, but currently regular exports from Gaza are not permitted.

Georgia Georgia's economy sustained GDP growth of more than 10% in 2006-07, based on strong inflows of foreign investment and robust government spending. However, GDP growth slowed in 2008 following the August 2008 conflict with Russia, and turned negative in 2009 as foreign direct investment and workers' remittances declined in the wake of the global financial crisis, but rebounded in 2010. Georgia's main economic activities include the cultivation of agricultural products such as grapes, citrus fruits, and hazelnuts; mining of manganese and copper; and output of a small industrial sector producing alcoholic and nonalcoholic beverages, metals, machinery, aircraft and chemicals. Areas of recent improvement include growth in the construction, banking services, and mining sectors, but reduced availability of external investment and the slowing regional economy are emerging risks. The country imports nearly all its needed supplies of natural gas and oil products. It has sizeable hydropower capacity, a growing component of its energy supplies. Georgia has overcome the chronic energy shortages and gas supply interruptions of the past by renovating hydropower plants and by increasingly relying on natural gas imports from Azerbaijan instead of from

Russia. The construction on the Baku-T'bilisi-Ceyhan oil pipeline, the Baku-T'bilisi-Erzurum gas pipeline, and the Kars-Akhalkalaki Railroad are part of a strategy to capitalize on Georgia's strategic location between Europe and Asia and develop its role as a transit point for gas, oil and other goods. Georgia has historically suffered from a chronic failure to collect tax revenues; however, the government, since coming to power in 2004, has simplified the tax code, improved tax administration, increased tax enforcement, and cracked down on petty corruption. However, the economic downturn of 2008-09 eroded the tax base and led to a decline in the budget surplus and an increase in public borrowing needs. The country is pinning its hopes for renewed growth on a determined effort to continue to liberalize the economy by reducing regulation, taxes, and corruption in order to attract foreign investment, but the economy faces a more difficult investment climate both domestically and internationally.

Germany The German economy - the fifth largest economy in the world in PPP terms and Europe's largest - is a leading exporter of machinery, vehicles, chemicals, and household equipment and benefits from a highly skilled labor force. Like its western European neighbors, Germany faces significant demographic challenges to sustained long-term growth. Low fertility rates and declining net immigration are increasing pressure on the country's social welfare system and necessitate structural reforms. The modernization and integration of the eastern German economy - where unemployment can exceed 20% in some municipalities - continues to be a costly long-term process, with annual transfers from west to east amounting in 2008 alone to roughly \$12 billion. Reforms launched by the government of Chancellor Gerhard SCHROEDER (1998-2005), deemed necessary to address chronically high unemployment and low average growth, contributed to strong growth in 2006 and 2007 and falling unemployment, which in 2008 reached a new post-reunification low of 7.8%. These advances, as well as a government subsidized, reduced working hour scheme, help explain the relatively modest increase in unemployment during the 2008-09 recession - the deepest since World War II - and its healthy decrease in 2010. GDP contracted nearly 5% in 2009 but grew by 3.3% in 2010. Germany crept out of recession thanks largely to rebounding manufacturing orders and exports - primarily outside the Euro Zone - and relatively steady consumer demand. Stimulus and stabilization efforts initiated in 2008 and 2009 and tax cuts introduced in Chancellor Angela MERKEL's second term increased Germany's budget deficit to 3.3% in 2009 and to 3.6% in 2010. The EU has given Germany until 2013 to get its consolidated budget deficit below 3% of GDP. A new constitutional amendment likewise limits the federal government to structural deficits of no more than 0.35% of GDP per annum as of 2016.

Ghana

Ghana is well endowed with natural resources and agriculture accounts for roughly one-third of GDP and employs more than half of the workforce, mainly small landholders. The services sector accounts for 50% of GDP. Gold and cocoa production and individual remittances are major sources of foreign exchange. Oil production at Ghana's offshore Jubilee field began in mid-December and is expected to boost economic growth. Ghana signed a Millennium Challenge Corporation (MCC) Compact in 2006, which aims to assist in transforming Ghana's agricultural sector. Ghana opted for debt relief under the Heavily Indebted Poor Country (HIPC) program in

2002, and is also benefiting from the Multilateral Debt Relief Initiative that took effect in 2006. In 2009 Ghana signed a three-year Poverty Reduction and Growth Facility with the IMF to improve macroeconomic stability, private sector competitiveness, human resource development, and good governance and civic responsibility. Sound macro-economic management along with high prices for gold and cocoa helped sustain GDP growth in 2008-10. In early 2010 President John Atta MILLS targeted recovery from high inflation and current account and budget deficits as his priorities.

Gibraltar

Self-sufficient Gibraltar benefits from an extensive shipping trade, offshore banking, and its position as an international conference center. Tax rates are low to attract foreign investment. The British military presence has been sharply reduced and now contributes about 7% to the local economy, compared with 60% in 1984. The financial sector, tourism (almost 5 million visitors in 1998), gaming revenues, shipping services fees, and duties on consumer goods also generate revenue. The financial sector, tourism, and the shipping sector contribute 30%, 30%, and 25%, respectively, of GDP. Telecommunications, e-commerce, and e-gaming account for the remaining 15%. In recent years, Gibraltar has seen major structural change from a public to a private sector economy, but changes in government spending still have a major impact on the level of employment.

Greece Greece has a capitalist economy with the public sector accounting for about 40% of GDP and with per capita GDP about two-thirds that of the leading euro-zone economies. Tourism provides 15% of GDP. Immigrants make up nearly one-fifth of the work force, mainly in agricultural and unskilled jobs. Greece is a major beneficiary of EU aid, equal to about 3.3% of annual GDP. The Greek economy grew by nearly 4.0% per year between 2003 and 2007, due partly to infrastructural spending related to the 2004 Athens Olympic Games, and in part to an increased availability of credit, which has sustained record levels of consumer spending. But the economy went into recession in 2009 as a result of the world financial crisis, tightening credit conditions, and Athens' failure to address a growing budget deficit, which was triggered by falling state revenues, and increased government expenditures. The economy contracted by 2% in 2009, and 4.8% in 2010. Greece violated the EU's Growth and Stability Pact budget deficit criterion of no more than 3% of GDP from 2001 to 2006, but finally met that criterion in 2007-08, before exceeding it again in 2009, with the deficit reaching 15.4% of GDP. Austerity measures reduced the deficit to 9.4% of GDP in 2010. Public debt, inflation, and unemployment are above the euro-zone average while per capita income is below; unemployment rose to 12% in 2010. Eroding public finances, a credibility gap stemming from inaccurate and misreported statistics, and consistent underperformance on following through with reforms prompted major credit rating agencies in late 2009 to downgrade Greece's international debt rating, and has led the country into a financial crisis. Under intense pressure by the EU and international market participants, the government has adopted a medium-term austerity program that

includes cutting government spending, reducing the size of the public sector, decreasing tax evasion, reforming the health care and pension systems, and improving competitiveness through structural reforms to the labor and product markets. Athens, however, faces long-term challenges to push through unpopular reforms in the face of often vocal opposition from the country's powerful labor unions and the general public. Greek labor unions are striking over new austerity measures, but the strikes so far have had a limited impact on the government's will to adopt reforms. An uptick in widespread unrest, however, could challenge the government's ability to implement reforms and meet budget targets, and could also lead to rioting or violence. In April 2010 a leading credit agency assigned Greek debt its lowest possible credit rating; in May, the International Monetary Fund and Eurozone governments provided Greece emergency short- and medium-term loans worth \$147 billion so that the country could make debt repayments to creditors. In exchange for the largest bailout ever assembled, the government announced combined spending cuts and tax increases totaling \$40 billion over three years, on top of the tough austerity measures already taken. Greece, however, struggled to boost revenues and cut spending to meet 2010 targets set by the EU and the IMF, especially after Eurostat - the EU's statistical office - revised upward Greece's deficit and debt numbers for 2009 and 2010. Greece's lenders are calling on Athens to step up efforts in 2011 to increase tax collection, shore up public enterprises, and rein in health spending, and are planning to give Greece more time to repay its EU-IMF loan. Greece responded by introducing major structural reforms, but investors still question whether Greece can sustain fiscal efforts in the face of a bleak economic outlook and public discontent.

Greenland

The economy remains critically dependent on exports of shrimp and fish and on a substantial subsidy - about \$650 million in 2009 - from the Danish Government, which supplies nearly 60% of government revenues. The public sector, including publicly owned enterprises and the municipalities, plays the dominant role in Greenland's economy. Greenland's GDP contracted about 2% in 2009 as a result of the global economic slowdown. Budget surpluses turned to deficits beginning in 2007 and unemployment has risen. During the last decade the Greenland Home Rule Government (GHRG) pursued conservative fiscal and monetary policies, but public pressure has increased for better schools, health care and retirement systems. The Greenlandic economy has benefited from increasing catches and exports of shrimp, Greenland halibut and, more recently, crabs. Due to Greenland's continued dependence on exports of fish - which account for 82% of exports - the economy remains very sensitive to foreign developments. International consortia are increasingly active in exploring for hydrocarbon resources off Greenland's western coast, and international studies indicate the potential for oil and gas fields in northern and northeastern Greenland. In May 2007 a US aluminum producer concluded a memorandum of understanding with the Greenland Home Rule Government to build an aluminum smelter and a power generation facility, which takes advantage of Greenland's abundant hydropower potential. Within the area of

mining, olivine sand continues to be produced and gold production has resumed in south Greenland. Tourism also offers another avenue of economic growth for Greenland, with increasing numbers of cruise lines now operating in Greenland's western and southern waters during the peak summer tourism season.

Grenada

Grenada relies on tourism as its main source of foreign exchange especially since the construction of an international airport in 1985. Hurricanes Ivan (2004) and Emily (2005) severely damaged the agricultural sector - particularly nutmeg and cocoa cultivation - which had been a key driver of economic growth. Grenada has rebounded from the devastating effects of the hurricanes but is now saddled with the debt burden from the rebuilding process. Public debt-to-GDP is nearly 110%, leaving the THOMAS administration limited room to engage in public investments and social spending. Strong performances in construction and manufacturing, together with the development of tourism and an offshore financial industry, have also contributed to growth in national output; however, economic growth was stagnant in 2010 after a sizeable contraction in 2009, because of the global economic slowdown's effects on tourism and remittances.

Guam

The economy depends largely on US military spending and tourism. Total US grants, wage payments, and procurement outlays amounted to \$1.3 billion in 2004. Over the past 30 years, the tourist industry has grown to become the largest income source following national defense. The Guam economy continues to experience expansion in both its tourism and military sectors.

Guatemala Guatemala is the most populous of the Central American countries with a GDP per capita roughly one-half that of the average for Latin America and the Caribbean. The agricultural sector accounts for nearly 15% of GDP and half of the labor force; key agricultural exports include coffee, sugar, and bananas. The 1996 peace accords, which ended 36 years of civil war, removed a major obstacle to foreign investment, and since then Guatemala has pursued important reforms and macroeconomic stabilization. The Central American Free Trade Agreement (CAFTA) entered into force in July 2006 spurring increased investment and diversification of exports, with the largest increases in ethanol and non-traditional agricultural exports. While CAFTA has helped improve the investment climate, concerns over security, the lack of skilled workers and poor infrastructure continue to hamper foreign direct investment. The distribution of income remains highly unequal with the richest decile comprising over 40% of Guatemala's overall consumption. More than half of the population is below the national poverty line and 15% lives in extreme poverty. Poverty among indigenous groups, which make up 38% of the population, averages 76% and extreme poverty rises to 28%. 43% of children under five are chronically malnourished, one of the highest malnutrition rates

in the world. President COLOM entered into office with the promise to increase education, healthcare, and rural development, and in April 2008 he inaugurated a conditional cash transfer program, modeled after programs in Brazil and Mexico, that provide financial incentives for poor families to keep their children in school and get regular health check-ups. Given Guatemala's large expatriate community in the United States, it is the top remittance recipient in Central America, with inflows serving as a primary source of foreign income equivalent to nearly two-thirds of exports. Economic growth fell in 2009 as export demand from US and other Central American markets fell and foreign investment slowed amid the global recession, but the economy recovered gradually in 2010 and will likely return to more normal growth rates by 2012. President COLOM, in his last year in office, will likely face opposition to economic reform, particularly over a long-delayed tax reform and an IMF-recommended reform to strengthen the banking sector. Larger budget deficits and increased debt can be expected in 2011.

Guernsey

Financial services - banking, fund management, insurance - account for about 23% of employment and about 55% of total income in this tiny, prosperous Channel Island economy. Tourism, manufacturing, and horticulture, mainly tomatoes and cut flowers, have been declining. Financial services, construction, retail, and the public sector have been growing. Light tax and death duties make Guernsey a popular tax haven. The evolving economic integration of the EU nations is changing the environment under which Guernsey operates.

Guinea

Guinea is a poor country that possesses major mineral, hydropower, and agricultural resources. The country has almost half of the world's bauxite reserves. The mining sector accounts for more than 70% of exports. Long-run improvements in the management of the economy, literacy, and the legal framework are needed if the country is to move out of poverty. Investor confidence has been sapped by rampant corruption, a lack of electricity and other infrastructure, a lack of skilled workers, and the political uncertainty resulting from the death of President Lansana CONTE in December 2008. International donors, including the G-8, the IMF, and the World Bank, cut their development programming significantly in response to the coup, and international partners have said that a resumption of aid will be contingent on a successful democratic transition with a democratically elected president and a functioning National Assembly. Growth rose slightly in 2006-08, primarily due to increases in global demand and commodity prices on world markets, but bauxite and alumina exports were negatively affected by the global economic downturn and the economy in 2009 contracted. International investors expressed renewed interest in Guinea's iron ore mines in 2010.

Guinea-Bissau

One of the poorest countries in the world,

Guinea-Bissau's legal economy depends mainly on farming and fishing, but trafficking narcotics is probably the most lucrative trade.

Cashew crops have increased remarkably in recent years.

Guinea-Bissau exports fish and seafood along with small amounts of peanuts, palm kernels, and timber. Rice is the major crop and staple food. However, intermittent fighting between Senegalese-backed government troops and a military junta destroyed much of the country's infrastructure and caused widespread damage to the economy in 1998; the civil war led to a 28% drop in GDP that year, with partial recovery in 1999-2002. In December 2003, the World Bank, IMF, and UNDP were forced to step in to provide emergency budgetary support in the amount of \$107 million for 2004, representing over 80% of the total national budget. The combination of limited economic prospects, a weak and faction-ridden government, and favorable geography have made this West African country a way station for drugs bound for Europe.

Guyana

The Guyanese economy exhibited moderate economic growth in recent years and is based largely on agriculture and extractive industries. The economy is heavily dependent upon the export of six commodities - sugar, gold, bauxite, shrimp, timber, and rice - which represent nearly 60% of the country's GDP and are highly susceptible to adverse weather conditions and fluctuations in commodity prices.

Guyana's entrance into the Caricom Single Market and Economy (CSME) in January 2006 has broadened the country's export market, primarily in the raw materials sector. Economic recovery since a 2005 flood-related contraction was buoyed by increases in remittances and foreign direct investment in the sugar and rice industries as well as the mining sector. Chronic problems include a shortage of skilled labor and a deficient infrastructure. The government is juggling a sizable external debt against the urgent need for expanded public investment. In March 2007, the Inter-American Development Bank, Guyana's principal donor, canceled Guyana's nearly \$470 million debt, equivalent to nearly 48% of GDP, which along with other Highly Indebted Poor Country (HIPC) debt forgiveness brought the debt-to-GDP ratio down from 183% in 2006 to 120% in 2007. Guyana became heavily indebted as a result of the inward-looking, state-led development model pursued in the 1970s and 1980s. Growth slowed in 2009-10 as a result of the world recession. The slowdown in the domestic economy and lower import costs helped to narrow the country's current account deficit, despite generally lower earnings from exports.

Haiti

Haiti's economy suffered a severe setback when a 7.1 magnitude earthquake damaged its capital city, Port-au-Prince, in January 2010. Already the poorest country in the Western Hemisphere with 80% of the population living under the poverty line and 54% in abject poverty, the damage to Port-au-Prince caused the country's GDP to contract an estimated 8% in 2010. Two-thirds of all Haitians depend on the agricultural sector, mainly small-scale subsistence farming, and remain vulnerable to damage from frequent natural disasters, exacerbated by the country's widespread deforestation. US economic engagement under the Haitian Hemispheric Opportunity through Partnership Encouragement (HOPE) Act, passed in December 2006, has boosted apparel exports and investment by providing tariff-free access to the US. Congress voted in 2010 to extend the legislation until 2020 under the Haitian Economic Lift Act (HELP); the apparel sector accounts for three-quarters of Haitian exports and nearly one-tenth of GDP. Remittances are the primary source of foreign exchange, equaling nearly a quarter of GDP and more than twice the earnings from exports. Haiti suffers from a lack of investment because of insecurity and limited infrastructure, and a severe trade deficit. In 2005, Haiti paid its arrears to the World Bank, paving the way for reengagement with the Bank. Haiti received debt forgiveness for over \$1 billion of its debt through the Highly-Indebted Poor Country (HIPC) initiative in 2009. The remainder of its outstanding external debt was cancelled by donor countries in early 2010 but has since climbed back to about \$500 million. The government relies on formal international economic assistance for fiscal sustainability.

Heard Island and McDonald Islands

The islands have no indigenous economic activity, but the Australian Government allows limited fishing in the surrounding waters.

Holy See (Vatican City)

The Holy See is supported financially by a variety of sources, including investments, real estate income, and donations from Catholic individuals, dioceses, and institutions; these help fund the Roman Curia (Vatican bureaucracy), diplomatic missions, and media outlets. The separate Vatican City State budget includes the Vatican museums and post office and is supported financially by the sale of stamps, coins, medals, and tourist mementos; by fees for admission to museums; and by publications sales. Moreover, an annual collection taken up in dioceses and direct donations go to a non-budgetary fund known as Peter's Pence, which is used directly by the Pope for charity, disaster relief, and aid to churches in developing nations. The incomes and living standards of lay workers are comparable to those of counterparts who work in the city of Rome.

Honduras

Honduras, the second poorest country in Central America, suffers from extraordinarily unequal distribution of income, as well as high underemployment. While historically dependent on the export of bananas and coffee, Honduras has diversified its export base to include apparel and automobile wire harnessing. Nearly half of Honduras's economic activity is directly tied to the US, with exports to the US equivalent to 30% of GDP and remittances for another 20%. The US-Central America Free Trade Agreement (CAFTA) came into force in 2006 and has helped foster foreign direct investment, but physical and political insecurity may deter potential investors; about 70% of FDI is from US firms. The economy registered marginally positive economic growth in 2010, insufficient to improve living standards for the nearly 60% of the population in poverty. The LOBO administration inherited a difficult fiscal position with off-budget debts accrued in previous administrations and government salaries nearly equivalent to tax collections. His government has displayed a commitment to improving tax collection and cutting expenditures. This enabled Tegucigalpa to secure an IMF Precautionary Stand-By agreement in October 2010. The IMF agreement has helped renew multilateral and bilateral donor confidence in Honduras following the ZELAYA administration's economic mismanagement and the political coup.

Hong Kong Hong Kong has a free market economy highly dependent on international trade and finance - the value of goods and services trade, including the sizable share of re-exports, is about four times GDP. Hong Kong's open economy left it exposed to the global economic slowdown, but its increasing integration with China, through trade, tourism, and financial links, helped it recover more quickly than many observers anticipated. The Hong Kong government is promoting the Special Administrative Region (SAR) as the site for Chinese renminbi (RMB) internationalization. Hong Kong residents are allowed to establish RMB-denominated savings accounts; RMB-denominated corporate and Chinese government bonds have been issued in Hong Kong; and RMB trade settlement is allowed. The territory far exceeded the RMB conversion quota set by Beijing for trade settlements in 2010 due to the growth of earnings from exports to the mainland. RMB deposits grew to roughly 3.6% of total system deposits in Hong Kong by October 2010, an increase of over 250% since the beginning of the year. The government is pursuing efforts to introduce additional use of RMB in Hong Kong financial markets and is seeking to expand the RMB quota for 2011. The mainland has long been Hong Kong's largest trading partner, accounting for about half of Hong Kong's exports by value. Hong Kong's natural resources are limited, and food and raw materials must be imported. As a result of China's easing of travel restrictions, the number of mainland tourists to the territory has surged from 4.5 million in 2001 to 17.7 million in 2009, outnumbering visitors from all other countries combined. Hong Kong has also established itself as the premier stock market for Chinese firms seeking to list abroad. In 2009 mainland Chinese companies constituted about 40% of the firms listed on the Hong Kong Stock Exchange and accounted for 60% of the Exchange's market capitalization. During the past decade, as Hong Kong's manufacturing industry moved to the mainland, its service industry has grown rapidly and in 2009 accounted for more than 90% of the territory's GDP. GDP growth averaged a strong 4% from 1989 to 2008. Hong Kong's GDP fell in 2009 as a result of the global financial crisis, but a recovery began in third quarter 2009, and the economy grew nearly 6% in 2010. The Hong Kong government adopted several temporary fiscal policy support measures in response to the crisis that it may discontinue if strong growth is sustained. Credit expansion and tight housing supply conditions caused Hong Kong property prices to rise rapidly in 2010, and some lower income segments of the population are increasingly unable to afford adequate housing. Hong Kong continues to link its currency closely to the US dollar, maintaining an arrangement established in 1983.

Hungary

Hungary has made the transition from a centrally planned to a market economy, with a per capita income nearly two-thirds that of the EU-25 average. The private sector accounts for more than 80% of GDP. Foreign ownership of and investment in Hungarian firms are widespread, with cumulative foreign direct investment worth more than \$70 billion. The government's austerity measures, imposed since late 2006, have reduced the budget deficit from over 9% of GDP in 2006 to 3.8% in 2010. Hungary's impending inability to service its short-term debt - brought on by the global financial crisis in late 2008 - led Budapest to obtain an IMF-arranged financial assistance package worth over \$25 billion. The global economic downturn, declining exports, and low domestic consumption and fixed asset accumulation, dampened by government austerity measures, resulted in an economic contraction of 6.3% in 2009. The economy rebounded in

2010 with a big boost from exports, and growth of more than 2.5% is expected in 2011. Unemployment remained high, at more than 11%.

Iceland Iceland's Scandinavian-type social-market economy combines a capitalist structure and free-market principles with an extensive welfare system. Prior to the 2008 crisis, Iceland had achieved high growth, low unemployment, and a remarkably even distribution of income. The economy depends heavily on the fishing industry, which provides 40% of export earnings, more than 12% of GDP, and employs 7% of the work force. It remains sensitive to declining fish stocks as well as to fluctuations in world prices for its main exports: fish and fish products, aluminum, and ferrosilicon. Iceland's economy has been diversifying into manufacturing and service industries in the last decade, particularly within the fields of software production, biotechnology, and tourism. Abundant geothermal and hydropower sources have attracted substantial foreign investment in the aluminum sector and boosted economic growth, although the financial crisis has put several investment projects on hold. Much of Iceland's economic growth in recent years came as the result of a boom in domestic demand following the rapid expansion of the country's financial sector. Domestic banks expanded aggressively in foreign markets, and consumers and businesses borrowed heavily in foreign currencies, following the privatization of the banking sector in the early 2000s. Worsening global financial conditions throughout 2008 resulted in a sharp depreciation of the krona vis-a-vis other major currencies. The foreign exposure of Icelandic banks, whose loans and other assets totaled more than 10 times the country's GDP, became unsustainable. Iceland's three largest banks collapsed in late 2008. The country secured over \$10 billion in loans from the IMF and other countries to stabilize its currency and financial sector, and to back government guarantees for foreign deposits in Icelandic banks. GDP fell 6.8% in 2009, and unemployment peaked at 9.4% in February 2009. GDP fell 3.4% in 2010. Since the collapse of Iceland's financial sector, government economic priorities have included: stabilizing the krona, reducing Iceland's high budget deficit, containing inflation, restructuring the financial sector, and diversifying the economy. Three new banks were established to take over the domestic assets of the collapsed banks. Two of them have foreign majority ownership, while the State holds a majority of the shares of the third. British and Dutch authorities have pressed claims totaling over \$5 billion against Iceland to compensate their citizens for losses suffered on deposits held in the failed Icelandic bank, Landsbanki Islands. Iceland agreed to new terms with the UK and the Netherlands to compensate British and Dutch depositors, but the agreement must first be approved by the Icelandic President. Iceland began EU accession negotiations with the EU in July 2010, however, public support has dropped substantially because of concern about losing control over fishing resources and in reaction to measures taken by Brussels during the ongoing Eurozone crisis.

India India is developing into an open-market economy, yet traces of its past autarkic policies remain. Economic liberalization, including industrial deregulation, privatization of state-owned enterprises, and reduced controls on foreign trade and investment, began in the early 1990s and has served to accelerate the country's growth, which has averaged more than 7% per year since 1997. India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Slightly more than half of the work force is in agriculture, but services are the major source of economic growth, accounting for more than half of India's output, with only one-third of its labor force. India has capitalized on its large educated English-speaking population to become a major exporter of information technology services and

software workers. In 2010, the Indian economy rebounded robustly from the global financial crisis - in large part because of strong domestic demand - and growth exceeded 8% year-on-year in real terms. Merchandise exports, which account for about 15% of GDP, returned to pre-financial crisis levels. An industrial expansion and high food prices, resulting from the combined effects of the weak 2009 monsoon and inefficiencies in the government's food distribution system, fueled inflation which peaked at about 11% in the first half of 2010, but has gradually decreased to single digits following a series of central bank interest rate hikes. New Delhi in 2010 reduced subsidies in fuel and fertilizers, sold a small percentage of its shares in some state-owned enterprises and auctioned off rights to radio bandwidth for 3G telecommunications in part to lower the government's deficit. The Indian Government seeks to reduce its deficit to 5.5% of GDP in FY 2010-11, down from 6.8% in the previous fiscal year. India's long term challenges include widespread poverty, inadequate physical and social infrastructure, limited non-agricultural employment opportunities, insufficient access to quality basic and higher education, and accommodating rural-to-urban migration.

Indian Ocean

The Indian Ocean provides major sea routes connecting the Middle East, Africa, and East Asia with Europe and the Americas. It carries a particularly heavy traffic of petroleum and petroleum products from the oilfields of the Persian Gulf and Indonesia. Its fish are of great and growing importance to the bordering countries for domestic consumption and export. Fishing fleets from Russia, Japan, South Korea, and Taiwan also exploit the Indian Ocean, mainly for shrimp and tuna. Large reserves of hydrocarbons are being tapped in the offshore areas of Saudi Arabia, Iran, India, and western Australia. An estimated 40% of the world's offshore oil production comes from the Indian Ocean. Beach sands rich in heavy minerals and offshore placer deposits are actively exploited by bordering countries, particularly India, South Africa, Indonesia, Sri Lanka, and Thailand.

Indonesia

Indonesia, a vast polyglot nation, has weathered the global financial crisis relatively smoothly because of its heavy reliance on domestic consumption as the driver of economic growth. Although the economy slowed significantly in 2009 from the 6%-plus growth rate recorded in 2007 and 2008, by 2010 growth returned to a 6% rate. During the recession, Indonesia outperformed its regional neighbors and joined China and India as the only G20 members posting growth. The government made economic advances under the first administration of President YUDHOYONO, introducing significant reforms in the financial sector, including tax and customs reforms, the use of Treasury bills, and capital market development and supervision. Indonesia's debt-to-GDP ratio in recent years has declined steadily because of increasingly robust GDP growth and sound fiscal stewardship. Indonesia still struggles with poverty and

unemployment, inadequate infrastructure, corruption, a complex regulatory environment, and unequal resource distribution among regions. YUDHOYONO's reelection, with respected economist BOEDIONO as his vice president, suggests broad continuity of economic policy, although the start of their term has been marred by corruption scandals and the departure of an internationally respected finance minister. The government in 2010 faces the ongoing challenge of improving Indonesia's insufficient infrastructure to remove impediments to economic growth, while addressing climate change mitigation and adaptation needs, particularly with regard to conserving Indonesia's forests and peatlands, the focus of a potentially trailblazing \$1 billion REDD+ pilot project.

Iran

Iran's economy is marked by an inefficient state sector, reliance on the oil sector, which provides the majority of government revenues, and statist policies, which create major distortions throughout the system. Private sector activity is typically limited to small-scale workshops, farming, and services. Price controls, subsidies, and other rigidities weigh down the economy, undermining the potential for private-sector-led growth. Significant informal market activity flourishes. The legislature in late 2009 passed President Mahmud AHMADI-NEJAD's bill to reduce subsidies, particularly on food and energy. The bill would phase out subsidies - which benefit Iran's upper and middle classes the most - over three to five years and replace them with cash payments to Iran's lower classes. However, the start of the program was delayed repeatedly throughout 2010 over fears of public reaction to higher prices. This is the most extensive economic reform since the government implemented gasoline rationing in 2007. The recovery of world oil prices in the last year increased Iran's oil export revenue by at least \$10 billion over 2009, easing some of the financial impact of the newest round of international sanctions. Although inflation has fallen substantially since the mid-2000s, Iran continues to suffer from double-digit unemployment and underemployment. Underemployment among Iran's educated youth has convinced many to seek jobs overseas, resulting in a significant "brain drain."

Iraq An improved security environment and an initial wave of foreign investment are helping to spur economic activity, particularly in the energy, construction, and retail sectors. Broader economic improvement, long-term fiscal health, and sustained increases in the standard of living still depend on the government passing major policy reforms and on continued development of Iraq's massive oil reserves. Although foreign investors viewed Iraq with increasing interest in 2010, most are still hampered by difficulties in acquiring land for projects and by other regulatory impediments. Iraq's

economy is dominated by the oil sector, which provides over 90% of government revenue and 80% of foreign exchange earnings. Since mid-2009, oil export earnings have returned to levels seen before Operation Iraqi Freedom and government revenues have rebounded, along with global oil prices. In 2011 Baghdad probably will increase oil exports above the current level of 1.9 million barrels per day (bbl/day) as a result of new contracts with international oil companies, but is likely to fall short of the 2.4 million bbl/day it is forecasting in its budget. Iraq is making modest progress in building the institutions needed to implement economic policy. In 2010, Bagdad signed a new agreement with both the IMF and World Bank for conditional aid programs that will help strengthen Iraq's economic institutions. Some reform-minded leaders within the Iraqi government are seeking to pass laws to strengthen the economy. This legislation includes a package of laws to establish a modern legal framework for the oil sector and a mechanism to equitably divide oil revenues within the nation, although these and other important reforms are still under contentious and sporadic negotiation. Iraq's recent contracts with major oil companies have the potential to greatly expand oil revenues, but Iraq will need to upgrade its oil processing, pipeling, and export infrastructure to enable these deals to reach their potential. The Government of Iraq is pursuing a strategy to gain additional foreign investment in Iraq's economy. This includes an amendment to the National Investment Law, multiple international trade and investment events, as well as potential participation in joint ventures with state-owned enterprises. Provincial Councils also are using their own budgets to promote and facilitate investment at the local level. However, widespread corruption, inadequate infrastructure, insufficient essential services, and antiquated commercial laws and regulations stifle investment and continue to constrain the growth of private, non-energy sectors. The Central Bank has successfully held the exchange rate at approximately 1,170 Iraqi dinar/US dollar since January 2009. Inflation has decreased consistently since 2006 as the security situation has improved. However, Iraqi leaders remain hard pressed to translate macroeconomic gains into improved lives for ordinary Iraqis. Unemployment remains a problem throughout the country. Reducing corruption and implementing reforms - such as bank restructuring and developing the private sector - would be important steps in this direction.

Ireland Ireland is a small, modern, trade-dependent economy. Ireland joined 11 other EU nations in circulating the euro on 1 January 2002. GDP growth averaged 6% in 1995-2007, but economic activity has dropped sharply since 2008 with GDP falling by over 3% in 2008, nearly 8% in 2009, and 1% in 2010, and further contraction is expected in 2011. Ireland entered into a recession for the first time in more than a decade with the onset of the world financial crisis and subsequent severe slowdown in its domestic property and construction markets. Agriculture, once the most important sector, is now dwarfed by industry and services. Although the export sector, dominated by foreign multinationals, remains a key component of Ireland's economy, construction most recently fueled economic growth along with strong consumer spending and business investment. Property prices rose more rapidly in Ireland in the decade up to 2007 than in any other developed economy. However, average home prices have fallen 50% from the 2007 peak. In 2008 the COWEN government moved to guarantee all bank deposits, recapitalize the banking system, and establish partly-public venture capital funds in response to the country's economic downturn. In 2009, in an effort to stabilize the banking sector, the Irish Government established the National Asset Management Agency (NAMA) to acquire problem commercial property and development loans from Irish banks. Faced with sharply reduced revenues and a burgeoning budget deficit, the Irish Government introduced the first in a series of draconian budgets in 2009. In addition to across-the-board cuts in spending, the 2009 budget

included wage reductions for all public servants. These measures were not sufficient. The budget deficit reached nearly 38% of GDP in 2010 because of additional government support for the banking sector. In late 2010, the COWEN Government agreed to a \$112 billion loan package from the EU and IMF to help Dublin recapitalize its banking sector and avoid defaulting on its sovereign debt, and initiated a four-year austerity plan to cut an additional \$20 billion from its budget.

Isle of Man

Offshore banking, manufacturing, and tourism are key sectors of the economy. The government offers low taxes and other incentives to high-technology companies and financial institutions to locate on the island; this has paid off in expanding employment opportunities in high-income industries. As a result, agriculture and fishing, once the mainstays of the economy, have declined in their contributions to GDP. The Isle of Man also attracts online gambling sites and the film industry. Trade is mostly with the UK. The Isle of Man enjoys free access to EU markets.

Israel Israel has a technologically advanced market economy. It depends on imports of crude oil, grains, raw materials, and military equipment. Despite limited natural resources, Israel has intensively developed its agricultural and industrial sectors over the past 20 years. Cut diamonds, high-technology equipment, and agricultural products (fruits and vegetables) are the leading exports. Israel usually posts sizable trade deficits, which are covered by large transfer payments from abroad and by foreign loans. Roughly half of the government's external debt is owed to the US, its major source of economic and military aid. Israel's GDP, after contracting slightly in 2001 and 2002 due to the Palestinian conflict and troubles in the high-technology sector, grew about 5% per year from 2004-07. The global financial crisis of 2008-09 spurred a brief recession in Israel, but the country entered the crisis with solid fundamentals - following years of prudent fiscal policy and a series of liberalizing reforms - and a resilient banking sector, and the economy has shown signs of an early recovery. Following GDP growth of 4% in 2008, Israel's GDP slipped to 0.2% in 2009, but reached 3.4% in 2010, as exports rebounded. The global economic downturn affected Israel's economy primarily through reduced demand for Israel's exports in the United States and EU, Israel's top trading partners. Exports account for about 25% of the country's GDP. The Israeli Government responded to the recession by implementing a modest fiscal stimulus package and an aggressive expansionary monetary policy - including cutting interest rates to record lows, purchasing government bonds, and intervening in the foreign currency market. The Bank of Israel began raising interest rates in the summer of 2009 when inflation rose above the upper end of the Bank's target and the economy began to show signs of recovery.

Italy Italy has a diversified industrial economy, which is divided into a developed industrial north, dominated by private companies, and a less-developed, welfare-dependent, agricultural south, with high unemployment. The Italian economy is driven in large part by the manufacture of high-quality consumer goods produced by small and medium-sized enterprises, many of them family owned. Italy also has a sizable underground economy, which by some estimates accounts for as much as 15% of GDP. These activities are most common within the agriculture, construction, and service sectors. Italy has moved slowly on implementing needed structural reforms, such as reducing graft, overhauling

costly entitlement programs, and increasing employment opportunities for young workers, particularly women. The international financial crisis worsened conditions in Italy's labor market, with unemployment rising from 6.2% in 2007 to 8.4% in 2010, but in the longer-term Italy's low fertility rate and quota-driven immigration policies will increasingly strain its economy. A rise in exports and investment driven by the global economic recovery nevertheless helped the economy grow by about 1% in 2010 following a 5% contraction in 2009. The Italian government has struggled to limit government spending, but Italy's exceedingly high public debt remains above 115% of GDP, and its fiscal deficit - just 1.5% of GDP in 2007 - exceeded 5% in 2009 and 2010, as the costs of servicing the country's debt rose.

Jamaica

The Jamaican economy is heavily dependent on services, which now account for more than 60% of GDP. The country continues to derive most of its foreign exchange from tourism, remittances, and bauxite/alumina. Remittances account for nearly 15% of GDP and exports of bauxite and alumina make up about 10%. Tourism revenues account for roughly 10% of GDP, and both arrivals and revenues grew in 2010, up 4% and 6% respectively. The Economic growth faces many challenges: high crime and corruption, large-scale unemployment and underemployment, and a debt-to-GDP ratio of more than 120%. Jamaica's onerous debt burden - the fourth highest per capita - is the result of government bailouts to ailing sectors of the economy, most notably to the financial sector in the mid-to-late 1990s. The Government of Jamaica signed a \$1.27 billion, 27-month Standby Agreement with the International Monetary Fund for balance of payment support in February 2010. Other multilaterals have also provided millions of dollars in loans and grants. The government's difficult fiscal position hinders spending on infrastructure and social programs, particularly as job losses rise in a shrinking economy. The GOLDING administration faces the difficult prospect of having to achieve fiscal discipline in order to maintain debt payments, while simultaneously attacking a serious and growing crime problem that is hampering economic growth. High unemployment exacerbates the crime problem, including gang violence that is fueled by the drug trade.

Jan Mayen

Jan Mayen is a volcanic island with no exploitable natural resources, although surrounding waters contain substantial fish stocks and potential untapped petroleum resources. Economic activity is limited to providing services for employees of Norway's radio and meteorological stations on the island.

Japan In the years following World War II, government-industry cooperation, a strong work ethic, mastery of high technology, and a comparatively small defense allocation (1% of GDP) helped Japan

develop a technologically advanced economy. Two notable characteristics of the post-war economy were the close interlocking structures of manufacturers, suppliers, and distributors, known as keiretsu, and the guarantee of lifetime employment for a substantial portion of the urban labor force. Both features are now eroding under the dual pressures of global competition and domestic demographic change. Japan's industrial sector is heavily dependent on imported raw materials and fuels. A tiny agricultural sector is highly subsidized and protected, with crop yields among the highest in the world. Usually self sufficient in rice, Japan imports about 60% of its food on a caloric basis. Japan maintains one of the world's largest fishing fleets and accounts for nearly 15% of the global catch. For three decades, overall real economic growth had been spectacular - a 10% average in the 1960s, a 5% average in the 1970s, and a 4% average in the 1980s. Growth slowed markedly in the 1990s, averaging just 1.7%, largely because of the after effects of inefficient investment and an asset price bubble in the late 1980s that required a protracted period of time for firms to reduce excess debt, capital, and labor. The Japanese financial sector was not heavily exposed to sub-prime mortgages or their derivative instruments and weathered the initial effect of the recent global credit crunch, but a sharp downturn in business investment and global demand for Japan's exports in late 2008 pushed Japan further into recession. Government stimulus spending helped the economy recover in late 2009 and 2010, but Tokyo is warning that GDP growth will slow in 2011. Prime Minister Kan's government has proposed opening the agricultural and services sectors to greater foreign competition and boosting exports through free-trade agreements, but debate continues on restructuring the economy and funding new stimulus programs in the face of a tight fiscal situation. Japan's huge government debt, which is approaching 200 percent of GDP, persistent deflation, and an aging and shrinking population are major complications for the economy.

Jersey

Jersey's economy is based on international financial services, agriculture, and tourism. In 2005 the finance sector accounted for about 50% of the island's output. Potatoes, cauliflower, tomatoes, and especially flowers are important export crops, shipped mostly to the UK. The Jersey breed of dairy cattle is known worldwide and represents an important export income earner. Milk products go to the UK and other EU countries. Tourism accounts for one-quarter of GDP. In recent years, the government has encouraged light industry to locate in Jersey with the result that an electronics industry has developed, displacing more traditional industries. All raw material and energy requirements are imported as well as a large share of Jersey's food needs. Light taxes and death duties make the island a popular tax haven. Living standards come close to those of the UK.

Jordan

Jordan's economy is among the smallest in the Middle East, with insufficient supplies of water, oil, and other natural resources, underlying the government's heavy reliance on foreign assistance. Other economic challenges for the government include chronic high rates of poverty, unemployment, inflation, and a large

budget deficit. Since assuming the throne in 1999, King ABDALLAH has implemented significant economic reforms, such as opening the trade regime, privatizing state-owned companies, and eliminating most fuel subsidies, which in the past few years have spurred economic growth by attracting foreign investment and creating some jobs. The global economic slowdown, however, has depressed Jordan's GDP growth. Export-oriented sectors such as manufacturing, mining, and the transport of re-exports have been hit the hardest. The Government approved two supplementary budgets in 2010, but sweeping tax cuts planned for 2010 did not materialize because of Amman's need for additional revenue to cover excess spending. The budget deficit is likely to remain high, at 5-6% of GDP, and Amman likely will continue to depend heavily on foreign assistance to finance the deficit in 2011. Jordan's financial sector has been relatively isolated from the international financial crisis because of its limited exposure to overseas capital markets. Jordan is currently exploring nuclear power generation to forestall energy shortfalls.

Kazakhstan

Kazakhstan, geographically the largest of the former Soviet republics, excluding Russia, possesses enormous fossil fuel reserves and plentiful supplies of other minerals and metals, such as uranium, copper, and zinc. It also has a large agricultural sector featuring livestock and grain. Kazakhstan's industrial sector is primarily focused on the extraction and processing of these natural resources. Kazakhstan enjoyed double-digit growth in 2000-01 and 8% or more per year in 2002-07 - thanks largely to its booming energy sector but also to economic reform, good harvests, and increased foreign investment; GDP growth slowed dramatically following the near-collapse of the banking sector in late 2007 and the declines in oil and metals prices associated with the global economic downturn in 2008-09. Kazakhstan has embarked upon an industrial policy designed to diversify the economy away from overdependence on the oil sector as well expanding export markets away from its historical reliance on Russia. Nevertheless, growth is still driven by oil. The government has engaged in several disputes with Western oil companies over the terms of production agreements, most recently, with regard to the Kashagan project in 2007-08 and the Karachaganak project in 2009.

Kenya

Although the regional hub for trade and finance in East Africa, Kenya has been hampered by corruption and by reliance upon several primary goods whose prices have remained low. In 1997, the IMF suspended Kenya's Enhanced Structural Adjustment Program due to

the government's failure to maintain reforms and curb corruption. The IMF, which had resumed loans in 2000 to help Kenya through a drought, again halted lending in 2001 when the government failed to institute several anticorruption measures. In the key December 2002 elections, Daniel Arap Moi's 24-year-old reign ended, and a new opposition government took on the formidable economic problems facing the nation. After some early progress in rooting out corruption and encouraging donor support, the KIBAKI government was rocked by high-level graft scandals in 2005 and 2006. In 2006, the World Bank and IMF delayed loans pending action by the government on corruption. The international financial institutions and donors have since resumed lending, despite little action on the government's part to deal with corruption. Post-election violence in early 2008, coupled with the effects of the global financial crisis on remittance and exports, reduced GDP growth to 1.7 in 2008, but the economy rebounded in 2009-10.

Kiribati

A remote country of 33 scattered coral atolls, Kiribati has few natural resources and is one of the least developed Pacific Islands. Commercially viable phosphate deposits were exhausted at the time of independence from the UK in 1979. Copra and fish now represent the bulk of production and exports. The economy has fluctuated widely in recent years. Economic development is constrained by a shortage of skilled workers, weak infrastructure, and remoteness from international markets. Tourism provides more than one-fifth of GDP. Private sector initiatives and a financial sector are in the early stages of development. Foreign financial aid from the EU, UK, US, Japan, Australia, New Zealand, Canada, UN agencies, and Taiwan accounts for 20-25% of GDP. Remittances from seamen on merchant ships abroad account for more than \$5 million each year. Kiribati receives around \$15 million annually for the government budget from an Australian trust fund.

Korea, North North Korea, one of the world's most centrally directed and least open economies, faces chronic economic problems. Industrial capital stock is nearly beyond repair as a result of years of underinvestment and shortages of spare parts. Large-scale military spending draws off resources needed for investment and civilian consumption. Industrial and power output have declined in parallel from pre-1990 levels. Severe flooding in the summer of 2007 aggravated chronic food shortages caused by on-going systemic problems, including a lack of arable land, collective farming practices, and persistent shortages of tractors and fuel. Large-scale international food aid deliveries have allowed the people of North Korea to escape widespread starvation since famine threatened in 1995, but the population continues to suffer from prolonged malnutrition and poor living conditions. Since 2002, the government has allowed private "farmers' markets" to begin selling a wider range of goods. It also permitted some private farming - on an experimental basis - in an effort to boost

agricultural output. In October 2005, the government tried to reverse some of these policies by forbidding private sales of grains and reinstating a centralized food rationing system. By December 2005, the government terminated most international humanitarian assistance operations in North Korea (calling instead for developmental assistance only) and restricted the activities of remaining international and non-governmental aid organizations. In mid-2008, North Korea began receiving food aid under a US program to deliver 500,000 metric tons of food via the World Food Program and US nongovernmental organizations; but Pyongyang stopped accepting the aid in March 2009. In December 2009, North Korea carried out a redenomination of its currency, capping the amount of North Korean won that could be exchanged for the new notes, and limiting the exchange to a one-week window. A concurrent crackdown on markets and foreign currency use yielded severe shortages and inflation, forcing Pyongyang to ease the restrictions by February 2010. Nevertheless, firm political control remains the Communist government's overriding concern, which likely will inhibit changes to North Korea's current economic system.

Korea, South

Since the 1960s, South Korea has achieved an incredible record of growth and global integration to become a high-tech industrialized economy. Four decades ago, GDP per capita was comparable with levels in the poorer countries of Africa and Asia. In 2004, South Korea joined the trillion dollar club of world economies, and currently is among the world's 20 largest economies. Initially, a system of close government and business ties, including directed credit and import restrictions, made this success possible. The government promoted the import of raw materials and technology at the expense of consumer goods, and encouraged savings and investment over consumption. The Asian financial crisis of 1997-98 exposed longstanding weaknesses in South Korea's development model including high debt/equity ratios and massive short-term foreign borrowing. GDP plunged by 6.9% in 1998, and then recovered by 9% in 1999-2000. Korea adopted numerous economic reforms following the crisis, including greater openness to foreign investment and imports. Growth moderated to about 4-5% annually between 2003 and 2007. With the global economic downturn in late 2008, South Korean GDP growth slowed to 0.2% in 2009. In the third quarter of 2009, the economy began to recover, in large part due to export growth, low interest rates, and an expansionary fiscal policy, and growth exceeded 6% in 2010. The South Korean economy's long term challenges include a rapidly aging population, inflexible labor market, and overdependence on manufacturing exports to drive economic growth.

Kosovo Over the past few years Kosovo's economy has shown significant progress in transitioning to a market-based system and maintaining macroeconomic stability, but it is still highly dependent on the international community and the diaspora for financial and technical assistance. Remittances from the diaspora - located mainly in Germany and Switzerland - are estimated to account for about 14% of GDP, and donor-financed activities and aid for another 7.5%. Kosovo's citizens are the poorest in

Europe with an average annual per capita income of only \$2,500. Unemployment, around 40% of the population, is a significant problem that encourages outward migration and black market activity. Most of Kosovo's population lives in rural towns outside of the capital, Pristina. Inefficient, near-subsistence farming is common - the result of small plots, limited mechanization, and lack of technical expertise. With international assistance, Kosovo has been able to privatize 50% of its state-owned enterprises (SOEs) by number, and over 90% of SOEs by value. Minerals and metals - including lignite, lead, zinc, nickel, chrome, aluminum, magnesium, and a wide variety of construction materials - once formed the backbone of industry, but output has declined because of ageing equipment and insufficient investment. A limited and unreliable electricity supply due to technical and financial problems is a major impediment to economic development. Kosovo's Ministry of Energy and Mining has solicited expressions of interest from private investors to develop a new power plant in order to address Kosovo and the region's unmet and growing demands for power. The official currency of Kosovo is the euro, but the Serbian dinar is also used in Serb enclaves. Kosovo's tie to the euro has helped keep core inflation low. Kosovo has one of the most open economies in the region, and continues to work with the international community on measures to improve the business environment and attract foreign investment. Kosovo has kept the government budget in balance as a result of efficient value added tax (VAT) collection at the borders and inefficient budget execution. In order to help integrate Kosovo into regional economic structures, UNMIK signed (on behalf of Kosovo) its accession to the Central Europe Free Trade Area (CEFTA) in 2006. However, Serbia and Bosnia have refused to recognize Kosovo's customs stamp or extend reduced tariff privileges for Kosovo products under CEFTA. In July 2008, Kosovo received pledges of \$1.9 billion from 37 countries in support of its reform priorities. In June 2009, Kosovo joined the World Bank and International Monetary Fund, and Kosovo began servicing its share of the former Yugoslavia's debt.

Kuwait

Kuwait has a geographically small, but wealthy, relatively open economy with self-reported crude oil reserves of about 102 billion barrels - about 9% of world reserves. Petroleum accounts for nearly half of GDP, 95% of export revenues, and 95% of government income. Kuwaiti officials have committed to increasing oil production to 4 million barrels per day by 2020. The rise in global oil prices throughout 2010 is reviving government consumption and economic growth as Kuwait experiences a 20% increase in government budget revenue. Kuwait has done little to diversify its economy, in part, because of this positive fiscal situation, and, in part, due to the poor business climate and the acrimonious relationship between the National Assembly and the executive branch, which has stymied most movement on economic reforms. Nonetheless, the government in May 2010 passed a privatization bill that allows the government to sell assets to private investors, and in January passed an economic development plan that pledges to spend up to \$130 billion in five years to diversify the economy away from oil, attract more investment, and boost private sector participation in the economy. Increasing government expenditures by so large an amount during the planned time frame may be difficult to accomplish.

Kyrgyzstan Kyrgyzstan is a poor, mountainous country with a dominant agricultural sector. Cotton, tobacco, wool, and meat are the main agricultural products, although only tobacco and cotton are exported in any quantity. Industrial exports include gold, mercury, uranium, natural gas, and electricity. The economy depends heavily on gold exports - mainly from output at the Kumtor gold mine. Following independence, Kyrgyzstan was progressive in carrying out market reforms, such as an improved regulatory system and land reform. Kyrgyzstan was the first Commonwealth of Independent States (CIS) country to be accepted into the World Trade Organization. Much of the government's stock in enterprises has been sold. Drops in production had been severe after the breakup of the Soviet Union in December 1991, but by mid-1995, production began to recover and exports began to increase. In 2005, the BAKIEV government and international financial institutions initiated a comprehensive medium-term poverty reduction and economic growth strategy. Bishkek agreed to pursue much needed tax reform and, in 2006, became eligible for the heavily indebted poor countries (HIPC) initiative. The government made steady strides in controlling its substantial fiscal deficit, nearly closing the gap between revenues and expenditures in 2006, before boosting expenditures more than 20% in 2007-08. GDP grew about 8% annually in 2007-08, partly due to higher gold prices internationally, but slowed to 2.3% in 2009. The overthrow of President BAKIEV in April, 2010 and subsequent ethnic clashes left hundreds dead and damaged infrastructure. Shrinking trade and agricultural production, as well as political instability, caused GDP to contract about 3.5% in 2010. The fiscal deficit widened to 12% of GDP, reflecting significant increases in crisis-related spending, including both rehabilitation of damaged infrastructure and bank recapitalization. Progress in reconstruction, fighting corruption, restructuring domestic industry, and attracting foreign aid and investment are key to future growth.

Laos

The government of Laos, one of the few remaining one-party Communist states, began decentralizing control and encouraging private enterprise in 1986. The results, starting from an extremely low base, were striking - growth averaged 6% per year from 1988-2008 except during the short-lived drop caused by the Asian financial crisis that began in 1997. Despite this high growth rate, Laos remains a country with an underdeveloped infrastructure, particularly in rural areas. It has a rudimentary, but improving, road system, and limited external and internal telecommunications. Electricity is available in urban areas and in many rural districts. Subsistence agriculture, dominated by rice cultivation in lowland areas, accounts for about 30% of GDP and provides 80% of total employment. The government in FY08/09 received \$560 million from international donors. Economic growth has reduced official poverty rates from 46% in 1992 to 26% in 2009. The economy has benefited from high foreign investment in hydropower, mining, and construction. Laos gained Normal Trade Relations status with the US in 2004, and is taking steps required to join the World Trade Organization, such as reforming import licensing. Related trade policy reforms will improve the business environment. On the fiscal side, Laos launched an effort to ensure the collection of taxes in

2009 as the global economic slowdown reduced revenues from mining projects. Simplified investment procedures and expanded bank credits for small farmers and small entrepreneurs will improve Lao's economic prospects. The government appears committed to raising the country's profile among investors. The World Bank has declared that Laos's goal of graduating from the UN Development Program's list of least-developed countries by 2020 is achievable. According to Laotian officials, the 7th Socio-Economic Development Plan for 2011-15 will outline efforts to achieve Millennium Development Goals.

Latvia

Latvia's economy experienced GDP growth of more than 10% per year during 2006-07 but entered a severe recession in 2008 as a result of an unsustainable current account deficit and large debt exposure amid the softening world economy. GDP plunged 18% in 2009 - the three former Soviet Baltic republics had the world's worst declines that year - and another 1.8% in 2010. The IMF, EU, and other donors provided assistance to Latvia as part of an agreement to defend the currency's peg to the euro and reduce the fiscal deficit to about 5% of GDP over time. DOMBROVSKIS' government enacted major spending cuts to reduce the fiscal deficit to 7.8% of GDP in 2010, and plans to cut the deficit further in 2011. The majority of companies, banks, and real estate have been privatized, although the state still holds sizable stakes in a few large enterprises. Latvia officially joined the World Trade Organization in February 1999. EU membership, a top foreign policy goal, came in May 2004.

Lebanon Lebanon has a free-market economy and a strong laissez-faire commercial tradition. The government does not restrict foreign investment; however, the investment climate suffers from red tape, corruption, arbitrary licensing decisions, high taxes, tariffs, and fees, archaic legislation, and weak intellectual property rights. The Lebanese economy is service-oriented; main growth sectors include banking and tourism. The 1975-90 civil war seriously damaged Lebanon's economic infrastructure, cut national output by half, and all but ended Lebanon's position as a Middle Eastern entrepot and banking hub. In the years since, Lebanon has rebuilt much of its war-torn physical and financial infrastructure by borrowing heavily - mostly from domestic banks. In an attempt to reduce the ballooning national debt, the Rafiq HARIRI government in 2000 began an austerity program, reining in government expenditures, increasing revenue collection, and passing legislation to privatize state enterprises, but economic and financial reform initiatives stalled and public debt continued to grow despite receipt of more than \$2 billion in bilateral assistance at the 2002 Paris II Donors Conference. The Israeli-Hizballah conflict in July-August 2006 caused an estimated \$3.6 billion in infrastructure damage, and prompted international donors to pledge nearly \$1 billion in recovery and reconstruction assistance. Donors met again in January 2007 at the Paris III Donor Conference and pledged more than \$7.5 billion to Lebanon for development projects and budget support, conditioned on progress on Beirut's fiscal reform and privatization program. An 18-month political stalemate and

sporadic sectarian and political violence hampered economic activity, particularly tourism, retail sales, and investment, until the new government was formed in July 2008. Political stability following the Doha Accord of May 2008 helped boost tourism and, together with a strong banking sector, enabled real GDP growth of 7% per year in 2009-10 despite a slowdown in the region.

Lesotho

Small, landlocked, and mountainous, Lesotho relies on remittances from miners employed in South Africa, customs duties from the Southern Africa Customs Union (SACU), and export revenue for the majority of government revenue. However, the government has recently strengthened its tax system to reduce dependency on customs duties. Completion of a major hydropower facility in January 1998 permitted the sale of water to South Africa and generated royalties for Lesotho. Lesotho produces about 90% of its own electrical power needs. As the number of mineworkers has declined steadily over the past several years, a small manufacturing base has developed based on farm products that support the milling, canning, leather, and jute industries, as well as an apparel-assembly sector. Despite Lesotho's market-based economy being heavily tied to its neighbor South Africa, the US is an important trade partner because of the export sector's heavy dependence on apparel exports. Exports have grown significantly because of the trade benefits contained in the Africa Growth and Opportunity Act. The economy is still primarily based on subsistence agriculture, especially livestock, although drought has decreased agricultural activity. The extreme inequality in the distribution of income remains a major drawback. Lesotho has signed an Interim Poverty Reduction and Growth Facility with the IMF. In July 2007, Lesotho signed a Millennium Challenge Account Compact with the US worth \$362.5 million. Economic growth dropped in 2009, due mainly to the effects of the global economic crisis as demand for the country's exports declined and SACU revenue fell precipitously when South Africa - the primary contributor to the SACU revenue pool - went into recession, but growth returned to 3.5% in 2010.

Liberia

Liberia is a low income country heavily reliant on foreign assistance for revenue. Civil war and government mismanagement destroyed much of Liberia's economy, especially the infrastructure in and around the capital, Monrovia. Many businesses fled the country, taking capital and expertise with them, but with the conclusion of fighting and the installation of a democratically-elected government in 2006, several have returned. Liberia has the distinction of having the highest ratio of direct foreign investment to GDP in the world. Richly endowed with water,

mineral resources, forests, and a climate favorable to agriculture, Liberia had been a producer and exporter of basic products, primarily raw timber and rubber and is reviving those sectors. Local manufacturing, mainly foreign owned, had been small in scope. President JOHNSON SIRLEAF, a Harvard-trained banker and administrator, has taken steps to reduce corruption, build support from international donors, and encourage private investment. Embargos on timber and diamond exports have been lifted, opening new sources of revenue for the government and Liberia shipped its first major timber exports to Europe in 2010. The country reached its Heavily Indebted Poor Countries initiative completion point in 2010 and nearly \$5 billion of international debt was permanently eliminated. This new status will enable Liberia to establish a sovereign credit rating and issue bonds. Liberia's Paris Club creditors agreed to cancel Liberia's debt as well. Rebuilding infrastructure and raising incomes will depend on generous financial and technical assistance from donor countries and foreign investment in key sectors, such as infrastructure and power generation.

Libya The Libyan economy depends primarily upon revenues from the oil sector, which contribute about 95% of export earnings, 25% of GDP, and 80% of government revenue. The weakness in world hydrocarbon prices in 2009 reduced Libyan government tax income and constrained economic growth. Substantial revenues from the energy sector coupled with a small population give Libya one of the highest per capita GDPs in Africa, but little of this income flows down to the lower orders of society. Libyan officials in the past five years have made progress on economic reforms as part of a broader campaign to reintegrate the country into the international fold. This effort picked up steam after UN sanctions were lifted in September 2003 and as Libya announced in December 2003 that it would abandon programs to build weapons of mass destruction. The process of lifting US unilateral sanctions began in the spring of 2004; all sanctions were removed by June 2006, helping Libya attract greater foreign direct investment, especially in the energy sector. Libyan oil and gas licensing rounds continue to draw high international interest; the National Oil Corporation (NOC) set a goal of nearly doubling oil production to 3 million bbl/day by 2012. In November 2009, the NOC announced that that target may slip to as late as 2017. Libya faces a long road ahead in liberalizing the socialist-oriented economy, but initial steps - including applying for WTO membership, reducing some subsidies, and announcing plans for privatization - are laying the groundwork for a transition to a more market-based economy. The non-oil manufacturing and construction sectors, which account for more than 20% of GDP, have expanded from processing mostly agricultural products to include the production of petrochemicals, iron, steel, and aluminum. Climatic conditions and poor soils severely limit agricultural output, and Libya imports about 75% of its food. Libya's primary agricultural water source remains the Great Manmade River Project, but significant resources are being invested in desalinization research to meet growing water demands.

Liechtenstein

Despite its small size and limited natural resources, Liechtenstein has developed into a prosperous, highly

industrialized, free-enterprise economy with a vital financial service sector and the highest per capita income in the world. The Liechtenstein economy is widely diversified with a large number of small businesses. Low business taxes - the maximum tax rate is 20% - and easy incorporation rules have induced many holding companies to establish nominal offices in Liechtenstein providing 30% of state revenues. The country participates in a customs union with Switzerland and uses the Swiss franc as its national currency. It imports more than 90% of its energy requirements. Liechtenstein has been a member of the European Economic Area (an organization serving as a bridge between the European Free Trade Association (EFTA) and the EU) since May 1995. The government is working to harmonize its economic policies with those of an integrated Europe. In 2008, Liechtenstein came under renewed international pressure - particularly from Germany - to improve transparency in its banking and tax systems. In December 2008, Liechtenstein signed a Tax Information Exchange Agreement with the US. Upon Liechtenstein's conclusion of 12 bilateral information-sharing agreements, the OECD in October 2009 removed the principality from its "grey list" of countries that had yet to implement the organization's Model Tax Convention.

Lithuania

Lithuania gained membership in the World Trade Organization and joined the EU in May 2004. Despite Lithuania's EU accession, Lithuania's trade with its Central and Eastern European neighbors, and Russia in particular, accounts for a growing percentage of total trade. Privatization of the large, state-owned utilities is nearly complete. Foreign government and business support have helped in the transition from the old command economy to a market economy. Lithuania's economy grew on average 8% per year for the four years prior to 2008 driven by exports and domestic demand. However, GDP plunged nearly 15% in 2009 - during the 2008-09 crisis the three former Soviet Baltic republics had the world's worst economic declines. In 2009, the government launched a high-profile campaign, led by Prime Minister KUBILIUS, to attract foreign investment and to develop export markets. The current account deficit, which had risen to roughly 15% of GDP in 2007-08, recovered to a surplus of 4% 2009 and 3.5% in 2010 in the wake of a cutback in imports to almost half the 2008 level. Nevertheless, economic growth was flat and unemployment continued upward to 16% in 2010.

Luxembourg

This small, stable, high-income economy - benefiting from

its proximity to France, Belgium, and Germany - has historically featured solid growth, low inflation, and low unemployment. The industrial sector, initially dominated by steel, has become increasingly diversified to include chemicals, rubber, and other products. Growth in the financial sector, which now accounts for about 28% of GDP, has more than compensated for the decline in steel. Most banks are foreign owned and have extensive foreign dealings, but Luxembourg has lost some of its advantages as a tax haven because of OECD and EU pressure. The economy depends on foreign and cross-border workers for about 60% of its labor force. Luxembourg, like all EU members, suffered from the global economic crisis that began in late 2008, but unemployment has trended below the EU average. Following strong expansion from 2004 to 2007, Luxembourg's economy contracted and 3.4% in 2009, but rebounded 2.6% in 2010. The country continues to enjoy an extraordinarily high standard of living - GDP per capita ranks third in the world, after Liechtenstein and Qatar, and is the highest in the EU. Turmoil in the world financial markets and lower global demand during 2008-09 prompted the government to inject capital into the banking sector and implement stimulus measures to boost the economy. Government stimulus measures and support for the banking sector, however, led to a 5% government budget deficit in 2009, however, the deficit was cut below 3% in 2010.

Macau

Macau's economy slowed dramatically in 2009 as a result of the global economic slowdown, but strong growth resumed in 2010, largely on the back of strong tourism and gaming sectors. After opening up its locally-controlled casino industry to foreign competition in 2001, the territory attracted tens of billions of dollars in foreign investment, transforming Macau into one of the world's largest gaming center. Macau's gaming and tourism businesses were fueled by China's decision to relax travel restrictions on Chinese citizens wishing to visit Macau. By 2006, Macau's gaming revenue surpassed that of the Las Vegas strip, and gaming-related taxes accounted for more than 70% of total government revenue. In 2008, Macau introduced measures to cool the rapidly developing sector. This city of nearly 570,000 hosted more than 21 million visitors in 2009. Almost 51% came from mainland China. Macau's traditional manufacturing industry has virtually disappeared since the termination of the Multi-Fiber Agreement in 2005. In 2009, total exports were less than US\$1 billion, while gaming receipts were almost US\$15 billion. By October 2010, gross gaming revenue had already reached US\$19 billion for the year. The Macau government plans to tighten control over the opening of new casinos and strengthen supervision of local casino operations

in 2011 and has introduced measures to diversify the economy. The Closer Economic Partnership Agreement (CEPA) between Macau and mainland China that came into effect on 1 January 2004 offers Macau-made products tariff-free access to the mainland; nevertheless, China remains Macau's third largest goods export market, behind Hong Kong and the United States. Macau's currency, the Pataca, is closely tied to the Hong Kong dollar, which is also freely accepted in the territory.

Macedonia

Having a small, open economy makes Macedonia vulnerable to economic developments in Europe and dependent on regional integration and progress toward EU membership for continued economic growth. At independence in September 1991, Macedonia was the least developed of the Yugoslav republics, producing a mere 5% of the total federal output of goods and services. The collapse of Yugoslavia ended transfer payments from the central government and eliminated advantages from inclusion in a de facto free trade area. An absence of infrastructure, UN sanctions on the downsized Yugoslavia, and a Greek economic embargo over a dispute about the country's constitutional name and flag hindered economic growth until 1996. Since then, Macedonia has maintained macroeconomic stability with low inflation, but it has so far lagged the region in attracting foreign investment and creating jobs, despite making extensive fiscal and business sector reforms. Official unemployment remains high at 33%, but may be overstated based on the existence of an extensive gray market, estimated to be more than 20% of GDP, that is not captured by official statistics. In the wake of the global economic downturn, Macedonia has experienced decreased foreign direct investment, lowered credit, and a large trade deficit, but the financial system remained sound. Macroeconomic stability was maintained by a prudent monetary policy, which kept the domestic currency at the pegged level against the euro, at the expense of raising interest rates. As a result, GDP fell in 2009, but returned to positive in 2010.

Madagascar

After discarding socialist economic policies in the mid-1990s, Madagascar followed a World Bank- and IMF-led policy of privatization and liberalization that has been undermined since the start of the political crisis. This strategy placed the country on a slow and steady growth path from an extremely low level. Agriculture, including fishing and forestry, is a mainstay of the economy, accounting for more than one-fourth of GDP and employing 80% of the population. Exports of apparel have boomed in recent

years primarily due to duty-free access to the US. However, Madagascar's failure to comply with the requirements of the African Growth and Opportunity Act (AGOA) led to the termination of the country's duty-free access in January 2010. Deforestation and erosion, aggravated by the use of firewood as the primary source of fuel, are serious concerns. Former President RAVALOMANANA worked aggressively to revive the economy following the 2002 political crisis, which triggered a 12% drop in GDP that year. The current political crisis which began in early 2009 has dealt additional blows to the economy. Tourism dropped more than 50% in 2009, compared with the previous year, and many investors are wary of entering the uncertain investment environment.

Malawi

Landlocked Malawi ranks among the world's most densely populated and least developed countries. The economy is predominately agricultural with about 80% of the population living in rural areas. Agriculture, which has benefited from fertilizer subsidies since 2006, accounts for more than one-third of GDP and 90% of export revenues. The performance of the tobacco sector is key to short-term growth as tobacco accounts for more than half of exports. The economy depends on substantial inflows of economic assistance from the IMF, the World Bank, and individual donor nations. In 2006, Malawi was approved for relief under the Heavily Indebted Poor Countries (HIPC) program. In December 2007, the US granted Malawi eligibility status to receive financial support within the Millennium Challenge Corporation (MCC) initiative. The government faces many challenges including developing a market economy, improving educational facilities, facing up to environmental problems, dealing with the rapidly growing problem of HIV/AIDS, and satisfying foreign donors that fiscal discipline is being tightened. Since 2005 President MUTHARIKA'S government has exhibited improved financial discipline under the guidance of Finance Minister Goodall GONDWE and signed a three year Poverty Reduction and Growth Facility worth \$56 million with the IMF. Improved relations with the IMF lead other international donors to resume aid as well. The government has announced infrastructure projects that could yield improvements, such as a new oil pipeline, for better fuel access, and the potential for a waterway link through Mozambican rivers to the ocean, for better transportation options. Since 2009, however, Malawi experienced some setbacks, including a general shortage of foreign exchange, which has damaged its ability to pay for imports, and fuel shortages that hinder transportation and productivity. Investment fell 23% in 2009. The government has failed to address barriers to investment such as

unreliable power, water shortages, poor telecommunications infrastructure, and the high costs of services.

Malaysia

Malaysia, a middle-income country, has transformed itself since the 1970s from a producer of raw materials into an emerging multi-sector economy. Under current Prime Minister NAJIB, Malaysia is attempting to achieve high-income status by 2020 and to move farther up the value-added production chain by attracting investments in Islamic finance, high technology industries, medical technology, and pharmaceuticals. The NAJIB administration also is continuing efforts to boost domestic demand and to wean the economy off of its dependence on exports. Nevertheless, exports - particularly of electronics - remain a significant driver of the economy. As an oil and gas exporter, Malaysia has profited from higher world energy prices, although the rising cost of domestic gasoline and diesel fuel, combined with strained government finances, has forced Kuala Lumpur to reduce government subsidies. The government is also trying to lessen its dependence on state oil producer Petronas, which supplies at least 40% of government revenue. The central bank maintains healthy foreign exchange reserves and its well-developed regulatory regime has limited Malaysia's exposure to riskier financial instruments and the global financial crisis. Nevertheless, decreasing worldwide demand for consumer goods hurt Malaysia's exports and economic growth in 2009, although both showed signs of recovery in 2010. In order to attract increased investment, NAJIB has also sought to revise the special economic and social preferences accorded to ethnic Malays under the New Economic Policy of 1970, but he has encountered significant opposition, especially from Malay nationalists.

Maldives

Tourism, Maldives' largest economic activity, accounts for 28% of GDP and more than 60% of foreign exchange receipts. Over 90% of government tax revenue comes from import duties and tourism-related taxes. Fishing is the second leading sector.

Agriculture and manufacturing continue to play a lesser role in the economy, constrained by the limited availability of cultivable land and the shortage of domestic labor. Most staple foods must be imported. The Maldivian Government implemented economic reforms, beginning in 1989 that initially lifted import quotas, opened some exports to the private sector, and liberalized regulations to allow more foreign investment. Real GDP growth averaged over 7.5% per year for more than a decade, and registered 18% in 2006, due to a rebound in tourism and reconstruction following the tsunami of December 2004. GDP slowed in 2007-08, then contracted in 2009 due to the global recession. Falling tourist arrivals and fish exports, combined with high government spending on social needs, subsidies, and civil servant salaries contributed to a balance of payments crisis, which was eased with a December 2009, \$79.3 million dollar IMF standby agreement. Diversifying the economy beyond tourism and fishing, reforming public finance, and increasing employment opportunities are major challenges facing the government. Over the longer term Maldivian authorities worry about the impact of erosion and possible global warming on their low-lying country; 80% of the area is 1 meter or less above sea level.

Mali

Among the 25 poorest countries in the world, Mali is a landlocked country highly dependent on gold mining and agricultural exports for revenue. The country's fiscal status fluctuates with gold and agricultural commodity prices and the harvest. Mali remains dependent on foreign aid. Economic activity is largely confined to the riverine area irrigated by the Niger River and about 65% of its land area is desert or semidesert. About 10% of the population is nomadic and some 80% of the labor force is engaged in farming and fishing. Industrial activity is concentrated on processing farm commodities. The government has continued an IMF-recommended structural adjustment program that has helped the economy grow, diversify, and attract foreign investment. Mali is developing its cotton and iron ore extraction industries to diversify its revenue sources because gold production has started to fall. Mali has invested in tourism but security issues are hurting the industry. Mali's adherence to economic reform and the 50% devaluation of the CFA franc in January 1994 have pushed up economic growth to a 5% average in 1996-2010. Worker remittances and external trade routes

for the landlocked country have been jeopardized by continued unrest in neighboring Cote d'Ivoire, however, Mali is building a road network that will connect it to all adjacent countries and it has a railway line to Senegal. In 2010, Mali experienced a regional drought that hurt livestock and livelihoods.

Malta

Malta produces only about 20% of its food needs, has limited fresh water supplies, and has few domestic energy sources. Malta's geographic position between the EU and Africa makes it a target for illegal immigration, which has strained Malta's political and economic resources. Malta adopted the euro on 1 January 2008. Malta's financial services industry has grown in recent years and in 2008-09 it escaped significant damage from the international financial crisis, largely because the sector is centered on the indigenous real estate market and is not highly leveraged. Locally, the restricted damage from the financial crisis has been attributed to the stability of the Maltese banking system and to its prudent risk-management practices. The global economic downturn and high electricity and water prices hurt Malta's real economy, which is dependent on foreign trade, manufacturing - especially electronics and pharmaceuticals - and tourism, but growth bounced back as the global economy recovered in 2010. Following a 1.2% contraction in 2009, GDP grew 2% in 2010.

Marshall Islands

US Government assistance is the mainstay of this tiny island economy. The Marshall Islands received more than \$1 billion in aid from the US from 1986-2002. Agricultural production, primarily subsistence, is concentrated on small farms; the most important commercial crops are coconuts and breadfruit. Small-scale industry is limited to handicrafts, tuna processing, and copra. The tourist industry, now a small source of foreign exchange employing less than 10% of the labor force, remains the best hope for future added income. The islands have few natural resources, and imports far exceed exports. Under the terms of the Amended Compact of Free Association, the US will provide millions of dollars per year to the Marshall Islands (RMI) through 2023, at which time a Trust Fund made up of US and RMI contributions will begin perpetual annual payouts. Government downsizing, drought, a drop in construction, the decline in tourism, and less income from the renewal of fishing vessel licenses have held GDP growth to an average of 1% over the past decade.

Mauritania

Half the population still depends on agriculture and livestock for a livelihood, even though many of the nomads and subsistence farmers were forced into the cities by recurrent droughts in the 1970s and 1980s. Mauritania has extensive deposits of iron ore, which account for nearly 40% of total exports. The nation's coastal waters are among the richest fishing areas in the world but overexploitation by foreigners threatens this key source of revenue. The country's first deepwater port opened near Nouakchott in 1986. Before 2000, drought and economic mismanagement resulted in a buildup of foreign debt. In February 2000, Mauritania qualified for debt relief under the Heavily Indebted Poor Countries (HIPC) initiative and nearly all of its foreign debt has since been forgiven. A new investment code approved in December 2001 improved the opportunities for direct foreign investment. Mauritania and the IMF agreed to a three-year Poverty Reduction and Growth Facility (PRGF) arrangement in 2006. Mauritania made satisfactory progress, but the IMF, World Bank, and other international actors suspended assistance and investment in Mauritania after the August 2008 coup. Since the presidential election in July 2009, donors have resumed assistance. Oil prospects, while initially promising, have largely failed to materialize, and the government has placed a priority on attracting private investment to spur economic growth. The Government also emphasizes reduction of poverty, improvement of health and education, and privatization of the economy.

Mauritius

Since independence in 1968, Mauritius has developed from a low-income, agriculturally based economy to a middle-income diversified economy with growing industrial, financial, and tourist sectors. For most of the period, annual growth has been in the order of 5% to 6%. This remarkable achievement has been reflected in more equitable income distribution, increased life expectancy, lowered infant mortality, and a much-improved infrastructure. The economy rests on sugar, tourism, textiles and apparel, and financial services, and is expanding into fish processing, information and communications technology, and hospitality and property development. Sugarcane is grown on about 90% of the cultivated land area and accounts for 15% of export earnings. The government's development strategy centers on creating vertical and horizontal clusters of development in these sectors. Mauritius has attracted more than 32,000 offshore entities, many aimed at commerce in India, South Africa, and China. Investment in the banking sector alone has reached over \$1 billion. Mauritius, with its strong textile sector, has been well poised to take advantage of the Africa Growth and Opportunity Act (AGOA). Mauritius' sound economic policies and

prudent banking practices helped to mitigate negative effects from the global financial crisis in 2008-09. GDP grew 3.6% in 2010 and the country continues to expand its trade and investment outreach around the globe.

Mayotte

Economic activity is based primarily on the agricultural sector, including fishing and livestock raising. Mayotte is not self sufficient and must import a large portion of its food requirements, mainly from France. The economy and future development of the island are heavily dependent on French financial assistance, an important supplement to GDP. Mayotte's remote location is an obstacle to the development of tourism.

Mexico

Mexico has a free market economy in the trillion dollar class. It contains a mixture of modern and outmoded industry and agriculture, increasingly dominated by the private sector. Recent administrations have expanded competition in seaports, railroads, telecommunications, electricity generation, natural gas distribution, and airports. Per capita income is roughly one-third that of the US; income distribution remains highly unequal. Since the implementation of the North American Free Trade Agreement (NAFTA) in 1994, Mexico's share of US imports has increased from 7% to 12%, and its share of Canadian imports has doubled to 5%. Mexico has free trade agreements with over 50 countries including, Guatemala, Honduras, El Salvador, the European Free Trade Area, and Japan, putting more than 90% of trade under free trade agreements. In 2007, during its first year in office, the Felipe CALDERON administration was able to garner support from the opposition to successfully pass pension and fiscal reforms. The administration passed an energy reform measure in 2008, and another fiscal reform in 2009. Mexico's GDP plunged 6.5% in 2009 as world demand for exports dropped and asset prices tumbled, but GDP posted positive growth of 5% in 2010, with export growth leading the way. The administration continues to face many economic challenges, including improving the public education system, upgrading infrastructure, modernizing labor laws, and fostering private investment in the energy sector. CALDERON has stated that his top economic priorities remain reducing poverty and creating jobs.

Micronesia, Federated States of

Economic activity consists primarily of subsistence farming and fishing. The islands have few mineral deposits worth exploiting, except for high-grade phosphate. The

potential for a tourist industry exists, but the remote location, a lack of adequate facilities, and limited air connections hinder development. Under the original terms of the Compact of Free Association, the US provided \$1.3 billion in grant aid during the period 1986-2001; the level of aid has been subsequently reduced. The Amended Compact of Free Association with the US guarantees the Federated States of Micronesia (FSM) millions of dollars in annual aid through 2023, and establishes a Trust Fund into which the US and the FSM make annual contributions in order to provide annual payouts to the FSM in perpetuity after 2023. The country's medium-term economic outlook appears fragile due not only to the reduction in US assistance but also to the current slow growth of the private sector.

Moldova Moldova remains one of the poorest countries in Europe despite recent progress from its small economic base. It enjoys a favorable climate and good farmland but has no major mineral deposits. As a result, the economy depends heavily on agriculture, featuring fruits, vegetables, wine, and tobacco. Moldova must import almost all of its energy supplies. Moldova's dependence on Russian energy was underscored at the end of 2005, when a Russian-owned electrical station in Moldova's separatist Transnistria region cut off power to Moldova and Russia's Gazprom cut off natural gas in disputes over pricing. In January 2009, gas supplies were cut during a dispute between Russia and Ukraine. Russia's decision to ban Moldovan wine and agricultural products, coupled with its decision to double the price Moldova paid for Russian natural gas, have hurt growth. The onset of the global financial crisis and poor economic conditions in Moldova's main foreign markets, caused GDP to fall 6.5% in 2009. Unemployment almost doubled and inflation disappeared - at -0.1%, a record low. Moldova's IMF agreement expired in May 2009. In fall 2009, the IMF allocated \$186 million to Moldova to cover its immediate budgetary needs, and the government signed a new agreement with the IMF in January 2010 for a program worth \$574 million. In 2010, an upturn in the world economy boosted GDP growth to 3.1% and inflation to 7.3%. Economic reforms have been slow because of corruption and strong political forces backing government controls. Nevertheless, the government's primary goal of EU integration has resulted in some market-oriented progress. The granting of EU trade preferences and increased exports to Russia will encourage higher growth rates, but the agreements are unlikely to serve as a panacea, given the extent to which export success depends on higher quality standards and other factors. The economy has made a modest recovery, but remains vulnerable to political uncertainty, weak administrative capacity, vested bureaucratic interests, higher fuel prices, poor agricultural weather, and the skepticism of foreign investors as well as the presence of an illegal separatist regime in Moldova's Transnistria region.

Monaco

Monaco, bordering France on the Mediterranean coast, is a popular resort, attracting tourists to its casino and pleasant climate. The principality also is a major banking center and has successfully sought to diversify into services and small, high-value-added, nonpolluting industries. The state has no income tax and low business taxes and thrives as a tax haven both for individuals who have established residence and for foreign companies

that have set up businesses and offices. Monaco, however, is not a tax-free shelter; it charges nearly 20% value-added tax, collects stamp duties, and companies face a 33% tax on profits unless they can show that three-quarters of profits are generated within the principality. Monaco was formally removed from the OECD's "grey list" of uncooperative tax jurisdictions in late 2009, but continues to face international pressure to abandon its banking secrecy laws and help combat tax evasion. The state retains monopolies in a number of sectors, including tobacco, the telephone network, and the postal service. Living standards are high, roughly comparable to those in prosperous French metropolitan areas.

Mongolia Economic activity in Mongolia has traditionally been based on herding and agriculture - Mongolia's extensive mineral deposits, however, have attracted foreign investors. The country holds copper, gold, coal, molybdenum, fluorspar, uranium, tin, and tungsten deposits, which account for a large part of foreign direct investment and government revenues. Soviet assistance, at its height one-third of GDP, disappeared almost overnight in 1990 and 1991 at the time of the dismantlement of the USSR. The following decade saw Mongolia endure both deep recession, because of political inaction and natural disasters, as well as economic growth, because of reform-embracing, free-market economics and extensive privatization of the formerly state-run economy. Severe winters and summer droughts in 2000-02 resulted in massive livestock die-off and zero or negative GDP growth. This was compounded by falling prices for Mongolia's primary sector exports and widespread opposition to privatization. Growth averaged nearly 9% per year in 2004-08 largely because of high copper prices and new gold production. In 2008 Mongolia experienced a soaring inflation rate with year-to-year inflation reaching nearly 30% - the highest inflation rate in over a decade. By late 2008, as the country began to feel the effects of the global financial crisis, falling commodity prices helped lower inflation, but also reduced government revenues and forced cuts in spending. In early 2009, the International Monetary Fund reached a \$236 million Stand-by Arrangement with Mongolia, and the country has started to move out of the crisis. Although the banking sector remains unstable, the government is now enforcing stricter supervision regulations. In October 2009, the government passed long-awaited legislation on an investment agreement to develop Mongolia's Oyu Tolgoi mine, considered to be one of the world's largest untapped copper deposits. The economy grew an estimated 7% in 2010, largely on the strength of exports to nearby countries, and international reserves reached \$1.6 billion in September, an all time high for Mongolia. Mongolia's economy continues to be heavily influenced by its neighbors. Mongolia purchases 95% of its petroleum products and a substantial amount of electric power from Russia, leaving it vulnerable to price increases. Trade with China represents more than half of Mongolia's total external trade - China receives about two-thirds of Mongolia's exports. Remittances from Mongolians working abroad are sizable, but have fallen due to the economic crisis; money laundering is a growing concern. Mongolia joined the World Trade Organization in 1997 and seeks to expand its participation in regional economic and trade regimes.

Montenegro

Montenegro severed its economy from federal control and from Serbia during the MILOSEVIC era and maintained its own central

bank, adopted the Deutchmark, then the euro - rather than the Yugoslav dinar - as official currency, collected customs tariffs, and managed its own budget. The dissolution of the loose political union between Serbia and Montenegro in 2006 led to separate membership in several international financial institutions, such as the European Bank for Reconstruction and Development. In January 2007, Montenegro joined the World Bank and IMF. Montenegro is pursuing its own membership in the World Trade Organization and signed a Stabilization and Association agreement with the European Union in October 2007. The European Council granted candidate country status to Montenegro at the December 2010 session.

Unemployment and regional disparities in development are key political and economic problems. Montenegro has privatized its large aluminum complex - the dominant industry - as well as most of its financial sector, and has begun to attract foreign direct investment in the tourism sector. The global financial crisis has had a significant negative impact on the economy, due to the ongoing credit crunch, a decline in the real estate sector, and a fall in aluminum exports.

Montserrat

Severe volcanic activity, which began in July 1995, has put a damper on this small, open economy. A catastrophic eruption in June 1997 closed the airports and seaports, causing further economic and social dislocation. Two-thirds of the 12,000 inhabitants fled the island. Some began to return in 1998 but lack of housing limited the number. The agriculture sector continued to be affected by the lack of suitable land for farming and the destruction of crops. Prospects for the economy depend largely on developments in relation to the volcanic activity and on public sector construction activity. The UK has launched a three-year \$122.8 million aid program to help reconstruct the economy. Half of the island is expected to remain uninhabitable for another decade.

Morocco

Morocco's market economy benefits from the country's relatively low labor costs and proximity to Europe, which aid key areas of the economy such as agriculture, light manufacturing, tourism, and remittances. Morocco is also the world's largest exporter of phosphate, which has long provided a source of export earnings and economic stability. Economic policies pursued since 2003 by King MOHAMMED VI have brought macroeconomic stability to the country with generally low inflation, improved financial performance, and steady progress in developing the service and industrial sectors. In 2006, Morocco entered a Free Trade Agreement

(FTA) with the US, and in 2008 entered into an advanced status in its 2000 Association Agreement with the EU. However, poverty, illiteracy, and unemployment rates remain high. In response to these challenges, King MOHAMMED in 2005 launched a National Initiative for Human Development, a \$2 billion program aimed at alleviating poverty and underdevelopment by expanding electricity to rural areas and replacing urban slums with public and subsidized housing, among other policies. Morocco's trade and budget deficits widened in 2010, and reducing government spending and adapting to sluggish economic growth in Europe will be challenges in 2011. Morocco's long-term challenges include improving education and job prospects for young Moroccans, closing the disparity in wealth between the rich and the poor, confronting corruption, and expanding and diversifying exports beyond phosphates and low-value-added products.

Mozambique At independence in 1975, Mozambique was one of the world's poorest countries. Socialist mismanagement and a brutal civil war from 1977-92 exacerbated the situation. In 1987, the government embarked on a series of macroeconomic reforms designed to stabilize the economy. These steps, combined with donor assistance and with political stability since the multi-party elections in 1994, have led to dramatic improvements in the country's growth rate. Fiscal reforms, including the introduction of a value-added tax and reform of the customs service, have improved the government's revenue collection abilities. In spite of these gains, Mozambique remains dependent upon foreign assistance for more than half of its annual budget, and the majority of the population remains below the poverty line. Subsistence agriculture continues to employ the vast majority of the country's work force and smallholder agricultural productivity and productivity growth is weak. A substantial trade imbalance persists although the opening of the Mozal aluminum smelter, the country's largest foreign investment project to date, has increased export earnings. At the end of 2007, and after years of negotiations, the government took over Portugal's majority share of the Cahora Bassa Hydroelectricity (HCB) company, a dam that was not transferred to Mozambique at independence because of the ensuing civil war and unpaid debts. More power is needed for additional investment projects in titanium extraction and processing and garment manufacturing that could further close the import/export gap. Mozambique's once substantial foreign debt has been reduced through forgiveness and rescheduling under the IMF's Heavily Indebted Poor Countries (HIPC) and Enhanced HIPC initiatives, and is now at a manageable level. In July 2007 the Millennium Challenge Corporation (MCC) signed a Compact with Mozambique; the Compact entered into force in September 2008 and will continue for five years. Compact projects will focus on improving sanitation, roads, agriculture, and the business regulation environment in an effort to spur economic growth in the four northern provinces of the country. Mozambique grew at an average annual rate of 9% in the decade up to 2007, one of Africa's strongest performances. However, heavy reliance on aluminum, which accounts for about one-third of exports, subjects the economy to volatile international prices. The sharp decline in aluminum prices during the global economic crisis lowered GDP growth by several percentage points. Despite 8.3% GDP growth in 2010, the increasing cost of living prompted citizens to riot in September 2010, after bread price increases were announced. In an attempt to contain the cost of living, the government implemented subsidies, decreased taxes and tariffs, and instituted other fiscal measures.

Namibia

The economy is heavily dependent on the extraction and processing of minerals for export. Mining accounts for 8% of GDP, but provides more than 50% of foreign exchange earnings. Rich alluvial diamond deposits make Namibia a primary source for gem-quality diamonds. Namibia is the fourth-largest exporter of nonfuel minerals in Africa, the world's fifth-largest producer of uranium, and the producer of large quantities of lead, zinc, tin, silver, and tungsten. The mining sector employs only about 3% of the population while about 35-40% of the population depends on subsistence agriculture for its livelihood. Namibia normally imports about 50% of its cereal requirements; in drought years food shortages are a major problem in rural areas. A high per capita GDP, relative to the region, hides one of the world's most unequal income distributions, as shown by Namibia's GINI coefficient. The Namibian economy is closely linked to South Africa with the Namibian dollar pegged one-to-one to the South African rand. Until 2010, Namibia drew 40% of its budget revenues from the Southern African Customs Union (SACU). Increased payments from SACU put Namibia's budget into surplus in 2007 for the first time since independence. SACU allotments to Namibia increased in 2009, but will drop for 2010 and 2011 because South Africa went into recession during the global economic crisis, reducing overall SACU income. Increased fish production and mining of zinc, copper, uranium, and silver spurred growth in 2003-08, but growth in recent years was undercut by poor fish catches, higher costs of producing metals, and the global recession.

Nauru

Revenues of this tiny island have traditionally come from exports of phosphates now significantly depleted. An Australian company in 2005 entered into an agreement intended to exploit remaining supplies. Few other resources exist with most necessities being imported, mainly from Australia its former occupier and later major source of support. The rehabilitation of mined land and the replacement of income from phosphates are serious long-term problems. Reserves of phosphates may only last until 2010 at current mining rates. In anticipation of the exhaustion of Nauru's phosphate deposits, substantial amounts of phosphate income were invested in trust funds to help cushion the transition and provide for Nauru's economic future. As a result of heavy spending from the trust funds, the government faces virtual bankruptcy. To cut costs the government has frozen wages and reduced overstuffed public service departments. Nauru lost further revenue in 2008 with the closure of Australia's refugee processing center, making it almost totally dependent on

food imports and foreign aid. Housing, hospitals, and other capital plant is deteriorating. The cost to Australia of keeping the government and economy afloat continues to climb. Few comprehensive statistics on the Nauru economy exist with estimates of Nauru's GDP varying widely.

Navassa Island

Subsistence fishing and commercial trawling occur within refuge waters.

Nepal

Nepal is among the poorest and least developed countries in the world, with almost one-quarter of its population living below the poverty line. Agriculture is the mainstay of the economy, providing a livelihood for three-fourths of the population and accounting for about one-third of GDP. Industrial activity mainly involves the processing of agricultural products, including pulses, jute, sugarcane, tobacco, and grain. Nepal has considerable scope for exploiting its potential in hydropower, with an estimated 42,000 MW of feasible capacity, but political instability hampers foreign investment. Additional challenges to Nepal's growth include its landlocked geographic location, civil strife and labor unrest, and its susceptibility to natural disaster.

Netherlands

The Netherlands economy is noted for stable industrial relations, moderate unemployment and inflation, a sizable current account surplus, and an important role as a European transportation hub. Industrial activity is predominantly in food processing, chemicals, petroleum refining, and electrical machinery. A highly mechanized agricultural sector employs only 2% of the labor force but provides large surpluses for the food-processing industry and for exports. The Netherlands, along with 11 of its EU partners, began circulating the euro currency on 1 January 2002. The country has been one of the leading European nations for attracting foreign direct investment and is one of the four largest investors in the US. After 26 years of uninterrupted economic growth, the Netherlands' economy - which is highly open and dependent on foreign trade and financial services - was hard-hit by global economic crisis. Dutch GDP contracted 3.9% in 2009, while exports declined nearly 25% due to a sharp contraction in world demand. The Dutch financial sector has also suffered, due in part to the high exposure of some Dutch banks to U.S. mortgage-backed securities. In response to turmoil in financial markets, the government nationalized two banks and injected billions of dollars into a third, to prevent

further systemic risk. The government also sought to boost the domestic economy by accelerating infrastructure programs, offering corporate tax breaks for employers to retain workers, and expanding export credit facilities. The stimulus programs and bank bailouts, however, resulted in a government budget deficit of nearly 4.6% of GDP in 2009 and 5.6% in 2010 that contrasts sharply with a surplus of 0.7% of GDP in 2008. With unemployment weighing on private-sector consumption, the government of Prime Minister Mark RUTTE is likely to come under increased pressure to keep the budget deficit in check while promoting economic recovery.

New Caledonia

New Caledonia has about 25% of the world's known nickel resources. Only a small amount of the land is suitable for cultivation, and food accounts for about 20% of imports. In addition to nickel, substantial financial support from France - equal to more than 15% of GDP - and tourism are keys to the health of the economy. Substantial new investment in the nickel industry, combined with the recovery of global nickel prices, brightens the economic outlook for the next several years.

New Zealand

Over the past 20 years the government has transformed New Zealand from an agrarian economy dependent on concessionary British market access to a more industrialized, free market economy that can compete globally. This dynamic growth has boosted real incomes - but left behind some at the bottom of the ladder - and broadened and deepened the technological capabilities of the industrial sector. Per capita income rose for ten consecutive years until 2007 in purchasing power parity terms, but fell in 2008-09. Debt-driven consumer spending drove robust growth in the first half of the decade, helping fuel a large balance of payments deficit that posed a challenge for economic managers. Inflationary pressures caused the central bank to raise its key rate steadily from January 2004 until it was among the highest in the OECD in 2007-08; international capital inflows attracted to the high rates further strengthened the currency and housing market, however, aggravating the current account deficit. The economy fell into recession before the start of the global financial crisis and contracted for five consecutive quarters in 2008-09. In line with global peers, the central bank cut interest rates aggressively and the government developed fiscal stimulus measures. The economy posted a 1.7% decline in 2009, but pulled out of recession late in the year, and achieved 2.1% growth in 2010. Nevertheless, key trade sectors remain vulnerable to weak external demand. The government plans to raise

productivity growth and develop infrastructure, while reining in government spending.

Nicaragua

Nicaragua, the poorest country in Central America and the second poorest in the Hemisphere, has widespread underemployment and poverty. The US-Central America Free Trade Agreement (CAFTA) has been in effect since April 2006 and has expanded export opportunities for many agricultural and manufactured goods. Textiles and apparel account for nearly 60% of Nicaragua's exports, but increases in the minimum wage during the ORTEGA administration will likely erode its comparative advantage in this industry. ORTEGA's promotion of mixed business initiatives, owned by the Nicaraguan and Venezuelan state oil firms, together with the weak rule of law, could undermine the investment climate for domestic and international private firms in the near-term. Nicaragua relies on international economic assistance to meet internal- and external-debt financing obligations. Foreign donors have curtailed this funding, however, in response to November 2008 electoral fraud. Managua has an IMF extended Credit Facility program, which could help keep the government's fiscal deficit on target during the 2011 election year and encourage transparency in the use of Venezuelan off-budget loans and assistance. In early 2004, Nicaragua secured some \$4.5 billion in foreign debt reduction under the Heavily Indebted Poor Countries (HIPC) initiative, however, Managua still struggles with a high public debt burden. Nicaragua is gradually recovering from the global economic crisis as increased exports drove positive growth in 2010. The economy is expected to grow at a rate of about 3% in 2011.

Niger

Niger is a landlocked, Sub-Saharan nation, whose economy centers on subsistence crops, livestock, and some of the world's largest uranium deposits. Drought, desertification, and strong population growth have undercut the economy. Niger shares a common currency, the CFA franc, and a common central bank, the Central Bank of West African States (BCEAO), with seven other members of the West African Monetary Union. In December 2000, Niger qualified for enhanced debt relief under the International Monetary Fund program for Highly Indebted Poor Countries (HIPC) and concluded an agreement with the Fund on a Poverty Reduction and Growth Facility (PRGF). Debt relief provided under the enhanced HIPC initiative significantly reduces Niger's annual debt service obligations, freeing funds for expenditures on basic health care, primary education, HIV/AIDS prevention, rural infrastructure, and other

programs geared at poverty reduction. In December 2005, Niger received 100% multilateral debt relief from the IMF, which translates into the forgiveness of approximately US \$86 million in debts to the IMF, excluding the remaining assistance under HIPC. In 2010, the Niger economy was recovering from the effects of a 2009 drought that reduced grain and cowpea production and decimated livestock herds. The economy was also hurt when the international community cut off non-humanitarian aid in response to TANDJA's moves to extend his term as president. Nearly half of the government's budget is derived from foreign donor resources. Future growth may be sustained by exploitation of oil, gold, coal, and other mineral resources.

Nigeria

Oil-rich Nigeria has been hobbled by political instability, corruption, inadequate infrastructure, and poor macroeconomic management but in 2008 began pursuing economic reforms. Nigeria's former military rulers failed to diversify the economy away from its overdependence on the capital-intensive oil sector, which provides 95% of foreign exchange earnings and about 80% of budgetary revenues. Following the signing of an IMF stand-by agreement in August 2000, Nigeria received a debt-restructuring deal from the Paris Club and a \$1 billion credit from the IMF, both contingent on economic reforms. Nigeria pulled out of its IMF program in April 2002, after failing to meet spending and exchange rate targets, making it ineligible for additional debt forgiveness from the Paris Club. In November 2005, Abuja won Paris Club approval for a debt-relief deal that eliminated \$18 billion of debt in exchange for \$12 billion in payments - a total package worth \$30 billion of Nigeria's total \$37 billion external debt. Since 2008 the government has begun to show the political will to implement the market-oriented reforms urged by the IMF, such as modernizing the banking system, curbing inflation by blocking excessive wage demands, and resolving regional disputes over the distribution of earnings from the oil industry. GDP rose strongly in 2007-10 because of increased oil exports and high global crude prices in 2010. President JONATHAN has pledged to continue the economic reforms of his predecessor with emphasis on infrastructure improvements. Infrastructure is the main impediment to growth and in August 2010 JONATHAN unveiled a power sector blueprint that includes privatization of the state-run electricity generation and distribution facilities. The government also is working toward developing stronger public-private partnerships for roads. Nigeria's financial sector was hurt by the global financial and economic crises and the Central Bank governor has taken measures to

strengthen that sector.

Niue

The economy suffers from the typical Pacific island problems of geographic isolation, few resources, and a small population. Government expenditures regularly exceed revenues, and the shortfall is made up by critically needed grants from New Zealand that are used to pay wages to public employees. Niue has cut government expenditures by reducing the public service by almost half. The agricultural sector consists mainly of subsistence gardening, although some cash crops are grown for export. Industry consists primarily of small factories to process passion fruit, lime oil, honey, and coconut cream. The sale of postage stamps to foreign collectors is an important source of revenue. The island in recent years has suffered a serious loss of population because of emigration to New Zealand. Efforts to increase GDP include the promotion of tourism and financial services, although the International Banking Repeal Act of 2002 resulted in the termination of all offshore banking licenses. Economic aid from New Zealand in FY08/09 was US\$5.7 million. Niue suffered a devastating typhoon in January 2004, which decimated nascent economic programs. While in the process of rebuilding, Niue has been dependent on foreign aid.

Norfolk Island

Tourism, the primary economic activity, has steadily increased over the years and has brought a level of prosperity unusual among inhabitants of the Pacific islands. The agricultural sector has become self sufficient in the production of beef, poultry, and eggs.

Northern Mariana Islands

The economy benefits substantially from financial assistance from the US. The rate of funding has declined as locally generated government revenues have grown. The key tourist industry employs about 50% of the work force and accounts for roughly one-fourth of GDP. Japanese tourists predominate. Annual tourist entries have exceeded one-half million in recent years, but financial difficulties in Japan have caused a temporary slowdown. The agricultural sector is made up of cattle ranches and small farms producing coconuts, breadfruit, tomatoes, and melons. Garment production is by far the most important industry with the employment of 17,500 mostly Chinese workers and sizable shipments to the US under duty and quota exemptions.

Norway

The Norwegian economy is a prosperous bastion of welfare capitalism, featuring a combination of free market activity and government intervention. The government controls key areas, such as the vital petroleum sector, through large-scale state-majority-owned enterprises. The country is richly endowed with natural resources - petroleum, hydropower, fish, forests, and minerals - and is highly dependent on the petroleum sector, which accounts for nearly half of exports and over 30% of state revenue. Norway is the world's second-largest gas exporter; its position as an oil exporter has slipped to ninth-largest as production has begun to decline. Norway opted to stay out of the EU during a referendum in November 1994; nonetheless, as a member of the European Economic Area, it contributes sizably to the EU budget. In anticipation of eventual declines in oil and gas production, Norway saves almost all state revenue from the petroleum sector in the world's second largest sovereign wealth fund, valued at over \$500 billion in 2010. After lackluster growth of less than 1.5% in 2002-03, GDP growth picked up to 2.5-6.2% in 2004-07, partly due to higher oil prices. Growth fell to 1.8% in 2008, and the economy contracted by 1.4% in 2009 as a result of the slowing world economy and the drop in oil prices.

Oman

Oman is a middle-income economy that is heavily dependent on dwindling oil resources. Because of declining reserves, Muscat has actively pursued a development plan that focuses on diversification, industrialization, and privatization, with the objective of reducing the oil sector's contribution to GDP to 9% by 2020. Tourism and gas-based industries are key components of the government's diversification strategy. By using enhanced oil recovery techniques, Oman succeeded in increasing oil production, giving the country more time to diversify, and the increase in global oil prices throughout 2010 provides the government greater financial resources to invest in non-oil sectors.

Pacific Ocean

The Pacific Ocean is a major contributor to the world economy and particularly to those nations its waters directly touch. It provides low-cost sea transportation between East and West, extensive fishing grounds, offshore oil and gas fields, minerals, and sand and gravel for the construction industry. In 1996, over 60% of the world's fish catch came from the Pacific Ocean. Exploitation of offshore oil and gas reserves is playing an ever-increasing role in the energy supplies of the US, Australia, NZ, China, and Peru. The high cost of recovering offshore oil and gas, combined with the wide swings in world prices for oil since 1985, has led to

fluctuations in new drillings.

Pakistan

Pakistan, an impoverished and underdeveloped country, has suffered from decades of internal political disputes and low levels of foreign investment. Between 2001-07, however, poverty levels decreased by 10%, as Islamabad steadily raised development spending. Between 2004-07, GDP growth in the 5-8% range was spurred by gains in the industrial and service sectors - despite severe electricity shortfalls - but growth slowed in 2008-09 and unemployment rose. Inflation remains the top concern among the public, climbing from 7.7% in 2007 to more than 13% in 2010. In addition, the Pakistani rupee has depreciated since 2007 as a result of political and economic instability. The government agreed to an International Monetary Fund Standby Arrangement in November 2008 in response to a balance of payments crisis, but during 2009-10 its current account strengthened and foreign exchange reserves stabilized - largely because of lower oil prices and record remittances from workers abroad. Record floods in July-August 2010 lowered agricultural output and contributed to a jump in inflation, and reconstruction costs will strain the limited resources of the government. Textiles account for most of Pakistan's export earnings, but Pakistan's failure to expand a viable export base for other manufactures has left the country vulnerable to shifts in world demand. Other long term challenges include expanding investment in education, healthcare, and electricity production, and reducing dependence on foreign donors.

Palau

The economy consists primarily of tourism, subsistence agriculture, and fishing. The government is the major employer of the work force relying heavily on financial assistance from the US. The Compact of Free Association with the US, entered into after the end of the UN trusteeship on 1 October 1994, provided Palau with up to \$700 million in US aid for the following 15 years in return for furnishing military facilities. Business and tourist arrivals numbered 85,000 in 2007. The population enjoys a per capita income roughly 50% higher than that of the Philippines and much of Micronesia. Long-run prospects for the key tourist sector have been greatly bolstered by the expansion of air travel in the Pacific, the rising prosperity of leading East Asian countries, and the willingness of foreigners to finance infrastructure development.

Panama

Panama's dollarized economy rests primarily on a

well-developed services sector that accounts for three-quarters of GDP. Services include operating the Panama Canal, banking, the Colon Free Zone, insurance, container ports, flagship registry, and tourism. Economic growth will be bolstered by the Panama Canal expansion project that began in 2007 and is scheduled to be completed by 2014 at a cost of \$5.3 billion - about 25% of current GDP. The expansion project will more than double the Canal's capacity, enabling it to accommodate ships that are now too large to transverse the transoceanic crossway, and should help to reduce the unemployment rate. The United States and China are the top users of the Canal. Panama also plans to construct a metro system in Panama City, valued at \$1.2 billion and scheduled to be completed by 2014. Panama's aggressive infrastructure development projects will likely lead the economy to continued growth in 2011. Strong economic performance has not translated into broadly shared prosperity as Panama has the second worst income distribution in Latin America. About 30% of the population lives in poverty, however, during TORRIJOS's term poverty was reduced from 40% to 30% and unemployment dropped from 12% to 6%. Not a CAFTA signatory, Panama in December 2006 independently negotiated a free trade agreement with the US, which, when implemented, will help promote the country's economic growth. Seeking removal from the Organization of Economic Development's gray-list of tax havens, Panama has also recently signed various double taxation treaties with other nations.

Papua New Guinea Papua New Guinea is richly endowed with natural resources, but exploitation has been hampered by rugged terrain and the high cost of developing infrastructure. Agriculture provides a subsistence livelihood for 85% of the population. Mineral deposits, including copper, gold, and oil, account for nearly two-thirds of export earnings. Natural gas reserves amount to an estimated 227 billion cubic meters. A consortium led by a major American oil company is constructing a liquefied natural gas (LNG) production facility that could begin exporting in 2013 or 2014. As the largest investment project in the country's history, it has the potential to double GDP in the near-term and triple Papua New Guinea's export revenue. The government faces the challenge of ensuring transparency and accountability for revenues flowing from this and other large LNG projects. The government of Prime Minister SOMARE has expended much of its energy remaining in power. He was the first prime minister ever to serve a full five-year term. The government has brought stability to the national budget, largely through expenditure control; however, it relaxed spending constraints in 2006 and 2007 as elections approached. Numerous challenges still face the government, including providing physical security for foreign investors, regaining investor confidence, restoring integrity to state institutions, promoting economic efficiency by privatizing moribund state institutions, and balancing relations with Australia, its former colonial ruler. Other socio-cultural challenges could upend the economy including an HIV/AIDS epidemic, with the highest infection rate in all of East Asia and the Pacific, and chronic law and order and land tenure issues. The global financial crisis had little impact because of continued high demand for Papua New Guinea's commodities exports.

Paracel Islands

The islands have the potential for oil and gas development. Waters around the islands support commercial fishing, but the islands themselves are not populated on a permanent basis.

Paraguay

Landlocked Paraguay has a market economy distinguished by a large informal sector, featuring re-export of imported consumer goods to neighboring countries, as well as the activities of thousands of microenterprises and urban street vendors. A large percentage of the population, especially in rural areas, derives its living from agricultural activity, often on a subsistence basis. Because of the importance of the informal sector, accurate economic measures are difficult to obtain. On a per capita basis, real income has stagnated at 1980 levels. The economy grew rapidly between 2003 and 2008 as growing world demand for commodities combined with high prices and favorable weather to support Paraguay's commodity-based export expansion. Paraguay is the sixth largest soy producer in the world. Drought hit in 2008, reducing agricultural exports and slowing the economy even before the onset of the global recession. The economy fell 3.8% in 2009, as lower world demand and commodity prices caused exports to contract. The government reacted by introducing fiscal and monetary stimulus packages. Growth resumed at a 6.5% level in 2010. Political uncertainty, corruption, limited progress on structural reform, and deficient infrastructure are the main obstacles to growth.

Peru

Peru's economy reflects its varied geography - an arid coastal region, the Andes further inland, and tropical lands bordering Colombia and Brazil. Abundant mineral resources are found in the mountainous areas, and Peru's coastal waters provide excellent fishing grounds. The Peruvian economy grew by more than 4% per year during the period 2002-06, with a stable exchange rate and low inflation. Growth jumped to 9% per year in 2007 and 2008, driven by higher world prices for minerals and metals and the government's aggressive trade liberalization strategies, but then fell to less than 1% in 2009 in the face of the world recession and lower commodity export prices. Growth resumed in 2010 at nearly 8%, due partly to increased exports. Peru's rapid expansion has helped to reduce the national poverty rate by about 15% since 2002, though underemployment remains high; inflation has trended downward in 2009, to below the Central Bank's 1-3% target. Despite Peru's strong macroeconomic performance, overdependence on minerals and metals subjects the economy to fluctuations in world prices, and poor

infrastructure precludes the spread of growth to Peru's non-coastal areas. Not all Peruvians therefore have shared in the benefits of growth and despite President GARCIA's pursuit of sound trade and macroeconomic policies, persistent inequality has cost him political support. Nevertheless, he remains committed to Peru's free-trade path. Since 2006, Peru has signed trade deals with the United States, Canada, Singapore, and China, concluded negotiations with the European Union, and begun trade talks with Korea, Japan, and others. The US-Peru Trade Promotion Agreement (PTPA) entered into force 1 February 2009, opening the way to greater trade and investment between the two economies.

Philippines

Philippine GDP grew nearly 7% in 2010. The economy weathered the 2008-09 global recession better than its regional peers due to minimal exposure to securities issued by troubled global financial institutions; lower dependence on exports; relatively resilient domestic consumption, supported by large remittances from four-to five-million overseas Filipino workers; and a growing business process outsourcing industry. Economic growth in the Philippines has averaged 4.5% per year since 2001, when former President MACAPAGAL-ARROYO took office. Despite this growth, poverty worsened during the term of MACAPAGAL-ARROYO, because of a high population growth rate and inequitable distribution of income. MACAPAGAL-ARROYO averted a fiscal crisis by pushing for new revenue measures and, until recently, tightening expenditures to address the government's yawning budget deficit and to reduce high debt and debt service ratios. But the government abandoned its 2008 balanced-budget goal in order to help the economy weather the global financial and economic storm. The economy under AQUINO faces budget shortfalls in the near term, but has had little difficulty issuing debt both locally and internationally to finance the deficits. AQUINO's first budget emphasizes education and other social spending programs, relying on the private sector to finance important infrastructure projects. Weak tax collection in recent years limits the government's ability to address major challenges.

Pitcairn Islands

The inhabitants of this tiny isolated economy exist on fishing, subsistence farming, handicrafts, and postage stamps. The fertile soil of the valleys produces a wide variety of fruits and vegetables, including citrus, sugarcane, watermelons, bananas, yams, and beans. Bartering is an important part of the economy. The major sources of revenue are the sale of postage stamps to collectors and the sale of handicrafts to passing ships. In October

2004, more than one-quarter of Pitcairn's small labor force was arrested, putting the economy in a bind, since their services were required as lighter crew to load or unload passing ships.

Poland Poland has pursued a policy of economic liberalization since 1990 and today stands out as a success story among transition economies. Before 2009, GDP had grown about 5% annually, based on rising private consumption, a jump in corporate investment, and EU funds inflows. GDP per capita is still much below the EU average, but is similar to that of the three Baltic states. Since 2004, EU membership and access to EU structural funds have provided a major boost to the economy. Unemployment fell rapidly to 6.4% in October 2008, but climbed back to 11.8% for the year 2010, exceeding the EU average by more than 2%. In 2008 inflation reached 4.2%, more than the upper limit of the National Bank of Poland's target range, but fell to 2.4% in 2010 due to global economic slowdown. Poland's economic performance could improve over the longer term if the country addresses some of the remaining deficiencies in its road and rail infrastructure and its business environment. An inefficient commercial court system, a rigid labor code, bureaucratic red tape, burdensome tax system, and persistent low-level corruption keep the private sector from performing up to its full potential. Rising demands to fund health care, education, and the state pension system caused the public sector budget deficit to rise to 7.9% of GDP in 2010. The PO/PSL coalition government, which came to power in November 2007, plans to reduce the budget deficit in 2011 and has also announced its intention to enact business-friendly reforms, increase workforce participation, reduce public sector spending growth, lower taxes, and accelerate privatization. The government, however, has moved slowly on major reforms. The legislature passed a law significantly limiting early retirement benefits. A health-care bill also passed through the legislature, but the legislature failed to overturn a presidential veto.

Portugal

Portugal has become a diversified and increasingly service-based economy since joining the European Community in 1986. Over the past two decades, successive governments have privatized many state-controlled firms and liberalized key areas of the economy, including the financial and telecommunications sectors. The country qualified for the European Monetary Union (EMU) in 1998 and began circulating the euro on 1 January 2002 along with 11 other EU member economies. Economic growth had been above the EU average for much of the 1990s, but fell back in 2001-08, shrank 2.6% in 2009, before growing 1% in 2010. GDP per capita stands at roughly two-thirds of the EU-27 average. A poor educational system and a rigid labor market have been obstacles to greater productivity and growth. Portugal also has been increasingly overshadowed by lower-cost producers in Central Europe and Asia as a target for foreign direct investment. Portugal's competitiveness problems, low growth prospects, and high levels of public debt have made it vulnerable to bond market turbulence. Lisbon is implementing austerity measures to reduce the budget deficit from 9.4% of GDP in 2009 to 4.6% of GDP in 2011, but some investors have expressed

concern about Portugal's ability to achieve these targets and cover its sovereign debt. Without the option for stimulus measures, the government is focusing instead on boosting exports and implementing labor market reforms to try to raise GDP growth and tackle Portugal's competitiveness problems, which may help mitigate investor concerns over time.

Puerto Rico

Puerto Rico has one of the most dynamic economies in the Caribbean region. A diverse industrial sector has far surpassed agriculture as the primary locus of economic activity and income. Encouraged by duty-free access to the US and by tax incentives, US firms have invested heavily in Puerto Rico since the 1950s. US minimum wage laws apply. Sugar production has lost out to dairy production and other livestock products as the main source of income in the agricultural sector. Tourism has traditionally been an important source of income with estimated arrivals of more than 3.6 million tourists in 2008.

Qatar

Despite the global financial crisis, Qatar has prospered in the last several years - in 2010 Qatar had the world's highest growth rate. Qatari authorities throughout the crisis sought to protect the local banking sector with direct investments into domestic banks. GDP rebounded in 2010 largely due to the increase in oil prices. Economic policy is focused on developing Qatar's nonassociated natural gas reserves and increasing private and foreign investment in non-energy sectors, but oil and gas still account for more than 50% of GDP, roughly 85% of export earnings, and 70% of government revenues. Oil and gas have made Qatar the second highest per-capita income country - following Liechtenstein - and likely the country with the lowest unemployment. Proved oil reserves of 15 billion barrels should enable continued output at current levels for 37 years. Qatar's proved reserves of natural gas exceed 25 trillion cubic meters, about 14% of the world total and third largest in the world. Qatar's successful 2022 world cup bid will likely accelerate large-scale infrastructure projects such as Qatar's metro system and the Qatar-Bahrain causeway.

Romania

Romania, which joined the European Union on 1 January 2007, began the transition from Communism in 1989 with a largely obsolete industrial base and a pattern of output unsuited to the country's needs. The country emerged in 2000 from a punishing three-year recession thanks to strong demand in EU export markets. Domestic

consumption and investment have fueled strong GDP growth in recent years, but have led to large current account imbalances. Romania's macroeconomic gains have only recently started to spur creation of a middle class and address Romania's widespread poverty. Corruption and red tape continue to handicap its business environment.

Inflation rose in 2007-08, driven in part by strong consumer demand and high wage growth, rising energy costs, a nation-wide drought affecting food prices, and a relaxation of fiscal discipline.

Romania's GDP contracted markedly in the last quarter of 2008 as the country began to feel the effects of a global downturn in financial markets and trade, and GDP fell more than 7% in 2009, prompting Bucharest to seek a \$26 billion emergency assistance package from the IMF, the EU, and other international lenders. Drastic austerity measures, as part of Romania's IMF-led agreement led to a further 1.9% GDP contraction in 2010. The economy is expected to return to positive growth in 2011.

Russia Russia has undergone significant changes since the collapse of the Soviet Union, moving from a globally-isolated, centrally-planned economy to a more market-based and globally-integrated economy. Economic reforms in the 1990s privatized most industry, with notable exceptions in the energy and defense-related sectors. The protection of property rights is still weak and the private sector remains subject to heavy state interference. Russian industry is primarily split between globally-competitive commodity producers - in 2009 Russia was the world's largest exporter of natural gas, the second largest exporter of oil, and the third largest exporter of steel and primary aluminum - and other less competitive heavy industries that remain dependent on the Russian domestic market. This reliance on commodity exports makes Russia vulnerable to boom and bust cycles that follow the highly volatile swings in global commodity prices. The government since 2007 has embarked on an ambitious program to reduce this dependency and build up the country's high technology sectors, but with few results so far. The economy had averaged 7% growth since the 1998 Russian financial crisis, resulting in a doubling of real disposable incomes and the emergence of a middle class. The Russian economy, however, was one of the hardest hit by the 2008-09 global economic crisis as oil prices plummeted and the foreign credits that Russian banks and firms relied on dried up. The Central Bank of Russia spent one-third of its \$600 billion international reserves, the world's third largest, in late 2008 to slow the devaluation of the ruble. The government also devoted \$200 billion in a rescue plan to increase liquidity in the banking sector and aid Russian firms unable to roll over large foreign debts coming due. The economic decline bottomed out in mid-2009 and the economy began to grow in the first quarter of 2010. However, a severe drought and fires in central Russia reduced agricultural output, prompting a ban on grain exports for part of the year, and slowed growth in other sectors such as manufacturing and retail trade. Russia's long-term challenges include a shrinking workforce, a high level of corruption, difficulty in accessing capital for smaller, non-energy companies, and poor infrastructure in need of large investments.

Rwanda

Rwanda is a poor rural country with about 90% of the population engaged in (mainly subsistence) agriculture and some

mineral and agro-processing. In 2008, minerals overtook coffee and tea as Rwanda's primary foreign exchange earner. The 1994 genocide decimated Rwanda's fragile economic base, severely impoverished the population, particularly women, and temporarily stalled the country's ability to attract private and external investment. However, Rwanda has made substantial progress in stabilizing and rehabilitating its economy to pre-1994 levels. GDP has rebounded and inflation has been curbed. Nonetheless, a majority still live below the poverty line of 250 Rwandan francs per day (about US\$0.43). Despite Rwanda's fertile ecosystem, food production often does not keep pace with demand, requiring food imports. Rwanda continues to receive substantial aid money and obtained IMF-World Bank Heavily Indebted Poor Country (HIPC) initiative debt relief in 2005-06. Rwanda also received a Millennium Challenge Account Compact in 2008. Africa's most densely populated country is trying to overcome the limitations of its small, landlocked economy by leveraging regional trade. Rwanda joined the East African Community and is aligning its budget, trade, and immigration policies with its regional partners. The government has embraced an expansionary fiscal policy to reduce poverty by improving education, infrastructure, and foreign and domestic investment and pursuing market-oriented reforms, although energy shortages, instability in neighboring states, and lack of adequate transportation linkages to other countries continue to handicap growth. The global downturn hurt export demand and tourism, but economic growth is recovering, driven in large part by the services sector, and inflation has been contained. On the back of this growth, government is gradually ending its fiscal stimulus policy while protecting aid to the poor.

Saint Barthelemy

The economy of Saint Barthelemy is based upon high-end tourism and duty-free luxury commerce, serving visitors primarily from North America. The luxury hotels and villas host 70,000 visitors each year with another 130,000 arriving by boat. The relative isolation and high cost of living inhibits mass tourism. The construction and public sectors also enjoy significant investment in support of tourism. With limited fresh water resources, all food must be imported, as must all energy resources and most manufactured goods. Employment is strong and attracts labor from Brazil and Portugal.

Saint Helena, Ascension, and Tristan da Cunha

The economy depends largely on financial assistance from the UK, which amounted to about \$27 million in FY06/07 or more than twice the level of annual budgetary revenues. The local population earns income from fishing, raising livestock, and sales of handicrafts. Because there are few jobs, 25% of the work force has left to seek employment on Ascension Island, on the Falklands, and in the UK.

Saint Kitts and Nevis

The economy of Saint Kitts and Nevis is heavily dependent upon tourism revenues, which has replaced sugar, the traditional mainstay of the economy until the 1970s. Following the 2005 harvest, the government closed the sugar industry after decades of losses of 3-4% of GDP annually. To compensate for employment losses, the government has embarked on a program to diversify the agricultural sector and to stimulate other sectors of the economy, such as tourism, export-oriented manufacturing, and offshore banking. More than 200,000 tourists visited the islands in 2009. Like other tourist destinations in the Caribbean, St. Kitts and Nevis is vulnerable to damage from natural disasters and shifts in tourism demand. The current government is constrained by one of the world's highest public debt burdens equivalent to roughly 185% of GDP, largely attributable to public enterprise losses.

Saint Lucia

The island nation has been able to attract foreign business and investment, especially in its offshore banking and tourism industries, with a surge in foreign direct investment in 2006, attributed to the construction of several tourism projects. Although crops such as bananas, mangos, and avocados continue to be grown for export, tourism provides Saint Lucia's main source of income and the industry is the island's biggest employer. Tourism is

the main source of foreign exchange, although tourism sector revenues declined with the global economic downturn as US and European travel dropped in 2009. The manufacturing sector is the most diverse in the Eastern Caribbean area, and the government is trying to revitalize the banana industry, although recent hurricanes have caused exports to contract. Saint Lucia is vulnerable to a variety of external shocks including volatile tourism receipts, natural disasters, and dependence on foreign oil. The public debt-to-GDP ratio is about 77% and high debt servicing obligations constrain the KING administration's ability to respond to adverse external shocks. Economic fundamentals remain solid, even though unemployment needs to be reduced.

Saint Martin

The economy of Saint Martin centers around tourism with 85% of the labor force engaged in this sector. Over one million visitors come to the island each year with most arriving through the Princess Juliana International Airport in Sint Maarten. No significant agriculture and limited local fishing means that almost all food must be imported. Energy resources and manufactured goods are also imported, primarily from Mexico and the United States. Saint Martin is reported to have the highest per capita income in the Caribbean.

Saint Pierre and Miquelon

The inhabitants have traditionally earned their livelihood by fishing and by servicing fishing fleets operating off the coast of Newfoundland. The economy has been declining, however, because of disputes with Canada over fishing quotas and a steady decline in the number of ships stopping at Saint Pierre. In 1992, an arbitration panel awarded the islands an exclusive economic zone of 12,348 sq km to settle a longstanding territorial dispute with Canada, although it represents only 25% of what France had sought. France heavily subsidizes the islands to the great betterment of living standards. The government hopes an expansion of tourism will boost economic prospects. Fish farming, crab fishing, and agriculture are being developed to diversify the local economy. Recent test drilling for oil may pave the way for development of the energy sector.

Saint Vincent and the Grenadines Success of the economy hinges upon seasonal variations in agriculture, tourism, and construction activity as well as remittance inflows. Much of the workforce is employed in banana production and tourism, but persistent high unemployment has prompted many to leave the islands. This lower-middle-income country is vulnerable to natural disasters - tropical storms wiped out substantial portions of crops in 1994, 1995, and 2002. In 2008, the islands had

more than 200,000 tourist arrivals, mostly to the Grenadines, a drop of nearly 20% from 2007. Saint Vincent is home to a small offshore banking sector and has moved to adopt international regulatory standards. The government's ability to invest in social programs and respond to external shocks is constrained by its high public debt burden, which was over 90% of GDP at the end of 2010. Following the global downturn, St. Vincent and the Grenadines saw an economic decline in 2009, after slowing since 2006, when GDP growth reached a 10-year high of nearly 7%. The GONSALVES administration is directing government resources to infrastructure projects, including a new international airport that is expected to be completed in 2011.

Samoa

The economy of Samoa has traditionally been dependent on development aid, family remittances from overseas, agriculture, and fishing. The country is vulnerable to devastating storms. Agriculture employs two-thirds of the labor force and furnishes 90% of exports, featuring coconut cream, coconut oil, and copra. The manufacturing sector mainly processes agricultural products. One factory in the Foreign Trade Zone employs 3,000 people to make automobile electrical harnesses for an assembly plant in Australia. Tourism is an expanding sector accounting for 25% of GDP; 122,000 tourists visited the islands in 2007. In late September 2009, an earthquake and the resulting tsunami severely damaged Samoa, and nearby American Samoa, disrupting transportation and power generation, and resulting in about 200 deaths. The Samoan Government has called for deregulation of the financial sector, encouragement of investment, and continued fiscal discipline, while at the same time protecting the environment. Observers point to the flexibility of the labor market as a basic strength for future economic advances. Foreign reserves are in a relatively healthy state, the external debt is stable, and inflation is low.

San Marino

San Marino's economy relies heavily on its tourism and banking industries, as well as on the manufacture and export of ceramics, clothing, fabrics, furniture, paints, spirits, tiles, and wine. The per capita level of output and standard of living are comparable to those of the most prosperous regions of Italy, which supplies much of its food. San Marino boasts the world's longest life expectancy for men with 80 years. The economy benefits from foreign investment due to its relatively low corporate taxes and low taxes on interest earnings. San Marino has recently faced increased international pressure to improve cooperation with foreign tax authorities and transparency within its own banking sector, which generates about one-fifth of the country's tax revenues. Italy's implementation in October 2009 of a tax amnesty to repatriate untaxed funds held abroad has resulted in financial outflows from

San Marino to Italy worth more than \$4.5 billion. Such outflows, combined with a money-laundering scandal at San Marino's largest financial institution and the recent global economic downturn, have contributed to a deep recession and growing budget deficit. However, San Marino has no national debt, and an unemployment rate half the size of Italy's. The San Marino government has adopted measures to counter the downturn, including subsidized credit to businesses. San Marino also continues to work towards harmonizing its fiscal laws with EU members and international standards. In September 2009, the OECD removed San Marino from its list of tax havens that have yet to fully implement global tax standards.

Sao Tome and Principe

This small, poor island economy has become increasingly dependent on cocoa since independence in 1975. Cocoa production has substantially declined in recent years because of drought and mismanagement. Sao Tome and Principe has to import all fuels, most manufactured goods, consumer goods, and a substantial amount of food. Over the years, it has had difficulty servicing its external debt and has relied heavily on concessional aid and debt rescheduling. Sao Tome and Principe benefited from \$200 million in debt relief in December 2000 under the Highly Indebted Poor Countries (HIPC) program, which helped bring down the country's \$300 million debt burden. In August 2005, the government signed on to a new 3-year IMF Poverty Reduction and Growth Facility (PRGF) program worth \$4.3 million. Considerable potential exists for development of a tourist industry, and the government has taken steps to expand facilities in recent years. The government also has attempted to reduce price controls and subsidies. Potential exists for the development of petroleum resources in Sao Tome and Principe's territorial waters in the oil-rich Gulf of Guinea, which are being jointly developed in a 60-40 split with Nigeria, but any actual production is at least several years off. The first production licenses were sold in 2004, though a dispute over licensing with Nigeria delayed the country's receipt of more than \$20 million in signing bonuses for almost a year.

Saudi Arabia

Saudi Arabia has an oil-based economy with strong government controls over major economic activities. It possesses about 20% of the world's proven petroleum reserves, ranks as the largest exporter of petroleum, and plays a leading role in OPEC. The petroleum sector accounts for roughly 80% of budget revenues, 45% of GDP, and 90% of export earnings. Saudi Arabia is encouraging the growth of the private sector in order to diversify its economy and

to employ more Saudi nationals. Diversification efforts are focusing on power generation, telecommunications, natural gas exploration, and petrochemical sectors. Almost 6 million foreign workers play an important role in the Saudi economy, particularly in the oil and service sectors, while Riyadh is struggling to reduce unemployment among its own nationals. Saudi officials are particularly focused on employing its large youth population, which generally lacks the education and technical skills the private sector needs. Riyadh has substantially boosted spending on job training and education, most recently with the opening of the King Abdallah University of Science and Technology - Saudi Arabia's first co-educational university. As part of its effort to attract foreign investment, Saudi Arabia acceded to the WTO in December 2005 after many years of negotiations. The government has begun establishing six "economic cities" in different regions of the country to promote foreign investment and plans to spend \$373 billion between 2010 and 2014 on social development and infrastructure projects to advance Saudi Arabia's economic development.

Senegal

Senegal relies heavily on donor assistance. The country's key export industries are phosphate mining, fertilizer production, and commercial fishing. The country is also working on iron ore and oil exploration projects. In January 1994, Senegal undertook a bold and ambitious economic reform program with the support of the international donor community. Government price controls and subsidies have been steadily dismantled. After seeing its economy contract by 2.1% in 1993, Senegal made an important turnaround, thanks to the reform program, with real growth in GDP averaging over 5% annually during 1995-2008. Annual inflation had been pushed down to the single digits. The country was adversely affected by the global economic downturn in 2009 and GDP growth fell below 2%. As a member of the West African Economic and Monetary Union (WAEMU), Senegal is working toward greater regional integration with a unified external tariff and a more stable monetary policy. High unemployment, however, continues to prompt illegal migrants to flee Senegal in search of better job opportunities in Europe. Under the IMF's Highly Indebted Poor Countries (HIPC) debt relief program, Senegal benefited from eradication of two-thirds of its bilateral, multilateral, and private-sector debt. In 2007, Senegal and the IMF agreed to a new, non-disbursing, Policy Support Initiative program which was completed in 2010. Senegal received its first disbursement from the \$540 million Millennium Challenge Account compact it signed in September 2009 for infrastructure and agriculture development. In 2010, the Senegalese people protested against frequent power cuts.

The government pledged to expand capacity by 2012 and to promote renewable energy but until Senegal has more capacity, more protests are likely and economic activity will be hindered. During the year, bakers protested government price controls on bread. Foreign investment in Senegal is constrained by Senegal's business environment, which has slipped in recent years, and by perceptions of corruption.

Serbia

MILOSEVIC-era mismanagement of the economy, an extended period of international economic sanctions, and the damage to Yugoslavia's infrastructure and industry during the NATO airstrikes in 1999 left the economy only half the size it was in 1990. After the ousting of former Federal Yugoslav President MILOSEVIC in September 2000, the Democratic Opposition of Serbia (DOS) coalition government implemented stabilization measures and embarked on a market reform program. After renewing its membership in the IMF in December 2000, Yugoslavia continued to reintegrate into the international community by rejoining the World Bank (IBRD) and the European Bank for Reconstruction and Development (EBRD). Belgrade has made progress in trade liberalization and enterprise restructuring and privatization, including telecommunications and small- and medium-size firms. It has made some progress towards EU membership, signing a Stabilization and Association Agreement with Brussels in May 2008, and with full implementation of the Interim Trade Agreement with the EU in February 2010. Serbia is also pursuing membership in the World Trade Organization. Reforms needed to ensure the country's long-term viability have largely stalled since the onset of the global financial crisis. Serbia is grappling with fallout from crisis, which has led to a sharp drop in exports to Western Europe and a decline in manufacturing output.

Unemployment and limited export earnings remain ongoing political and economic problems. Serbia signed an augmented \$4 billion Stand By Arrangement with the IMF in May 2009. IMF conditions on Serbia constrain the use of stimulus efforts to revive the economy, while Serbia's concerns about inflation and exchange rate stability preclude the use of expansionary monetary policy. Serbia's economy grew by 1.8% in 2010 after a 3% contraction in 2009 as a recovery in Western Europe began.

Seychelles

Since independence in 1976, per capita output in this Indian Ocean archipelago has expanded to roughly seven times the pre-independence, near-subsistence level, moving the island into the upper-middle income group of countries. Growth has been led by the

tourist sector, which employs about 30% of the labor force and provides more than 70% of hard currency earnings, and by tuna fishing. In recent years, the government has encouraged foreign investment to upgrade hotels and other services. At the same time, the government has moved to reduce the dependence on tourism by promoting the development of farming, fishing, and small-scale manufacturing. GDP grew about 7-8% per year in 2006-07, driven by tourism and a boom in tourism-related construction. The Seychelles rupee was allowed to depreciate in 2006 after being overvalued for years and fell by 10% in the first 9 months of 2007. Despite these actions, the Seychelles economy has struggled to maintain its gains and in 2008 suffered from food and oil price shocks, a foreign exchange shortage, high inflation, large financing gaps, and the global recession. In July 2008 the government defaulted on a Euro amortizing note worth roughly US\$80 million, leading to a downgrading of Seychelles credit rating, but in October 2010 the EU approved a \$2.9 million grant as part of a larger four-year program for Seychelles. In response to Seychelles successful implementation of tighter monetary and fiscal policies, the IMF upgraded Seychelles to a three-year extended fund facility (EFF) of \$31 million in December 2009. In 2008, GDP fell more than 1% due to declining tourism, but the economy recovered in 2009-10 with a notable increase in tourist numbers for 2010.

Sierra Leone

Sierra Leone is an extremely poor nation with tremendous inequality in income distribution. While it possesses substantial mineral, agricultural, and fishery resources, its physical and social infrastructure has yet to recover from the civil war, and serious social disorders continue to hamper economic development. Nearly half of the working-age population engages in subsistence agriculture. Manufacturing consists mainly of the processing of raw materials and of light manufacturing for the domestic market. Alluvial diamond mining remains the major source of hard currency earnings accounting for nearly half of Sierra Leone's exports. The fate of the economy depends upon the maintenance of domestic peace and the continued receipt of substantial aid from abroad, which is essential to offset the severe trade imbalance and supplement government revenues. The IMF has completed a Poverty Reduction and Growth Facility program that helped stabilize economic growth and reduce inflation and in 2010 approved a new program worth \$45 million over three years. Political stability has led to a revival of economic activity such as the rehabilitation of bauxite and rutile mining, which are set to benefit from planned tax incentives. A number of offshore oil discoveries were announced in

2009 and 2010. The development on these reserves, which could be significant, is still several years away.

Singapore

Singapore has a highly developed and successful free-market economy. It enjoys a remarkably open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. The economy depends heavily on exports, particularly in consumer electronics, information technology products, pharmaceuticals, and on a growing financial services sector. Real GDP growth averaged 6.9% between 2004 and 2008. The economy contracted 1.3% in 2009 as a result of the global financial crisis, but rebounded nearly 15% in 2010, on the strength of renewed exports. Over the longer term, the government hopes to establish a new growth path that focuses on raising productivity growth, which has sunk to 1% per year in the last decade. Singapore has attracted major investments in pharmaceuticals and medical technology production and will continue efforts to establish Singapore as Southeast Asia's financial and high-tech hub.

Sint Maarten

The economy of Sint Maarten centers around tourism with nearly four-fifths of the labor force engaged in this sector. Over one million visitors come to the island each year - 1.3 million in 2008 - with most arriving through the Princess Juliana International Airport. Cruise ships and yachts also call on Sint Maarten's numerous ports and harbors. No significant agriculture and limited local fishing means that almost all food must be imported. Energy resources and manufactured goods are also imported. Sint Maarten had the highest per capita income among the five islands that formerly comprised the Netherlands Antilles.

Slovakia

Slovakia has made significant economic reforms since its separation from the Czech Republic in 1993. Reforms to the taxation, healthcare, pension, and social welfare systems helped Slovakia to consolidate its budget and get on track to join the EU in 2004 and to adopt the euro in January 2009. Major privatizations are nearly complete, the banking sector is almost entirely in foreign hands, and the government has helped facilitate a foreign investment boom with business friendly policies such as labor market liberalization and a 19% flat tax. Foreign investment in the automotive and electronic sectors has been strong. Slovakia's economic growth exceeded expectations in 2001-08 despite the general European slowdown. Unemployment, at an unacceptable 18% in 2003-04, dropped

to 7.7% in 2008 but remains the economy's Achilles heel. FICO's cabinet was careful to keep a lid on spending in order to meet euro adoption criteria and has focused on regulating energy and food prices instead. To maintain a stable operating environment for investors, the European Bank for Reconstruction and Development advised the Slovak government to refrain from intervening in important sectors of the economy. However, Bratislava's approach to mitigating the economic slowdown has included substantial government intervention and the option to nationalize strategic companies. Slovakia was admitted to the euro zone in January 2009. RADICOVA's government, in power since July 2010, has allowed the budget deficit to rise slightly, to 8.2% of GDP in 2010. GDP fell nearly 5% in 2009 before gaining back 4% in 2010, and unemployment rose above 12% in 2010, as the global recession impacted many segments of the economy.

Slovenia

Slovenia became the first 2004 European Union entrant to adopt the euro (on 1 January 2007) and has become a model of economic success and stability for the region. With the highest per capita GDP in Central Europe, Slovenia has excellent infrastructure, a well-educated work force, and a strategic location between the Balkans and Western Europe. Privatization has lagged since 2002, and the economy has one of highest levels of state control in the EU. Structural reforms to improve the business environment have allowed for somewhat greater foreign participation in Slovenia's economy and have helped to lower unemployment. In March 2004, Slovenia became the first transition country to graduate from borrower status to donor partner at the World Bank. In December 2007, Slovenia was invited to begin the accession process for joining the OECD. Despite its economic success, foreign direct investment (FDI) in Slovenia has lagged behind the region average, and taxes remain relatively high. Furthermore, the labor market is often seen as inflexible, and legacy industries are losing sales to more competitive firms in China, India, and elsewhere. In 2009, the world recession caused the economy to contract - through falling exports and industrial production - by more than 8%, and unemployment to rise above 9%. Although growth resumed in 2010, the unemployment rate continued to rise, topping 10%.

Solomon Islands

The bulk of the population depends on agriculture, fishing, and forestry for at least part of its livelihood. Most manufactured goods and petroleum products must be imported. The islands are rich in undeveloped mineral resources such as lead, zinc, nickel, and gold. Prior to the arrival of RAMSI, severe ethnic

violence, the closing of key businesses, and an empty government treasury culminated in economic collapse. RAMSI's efforts to restore law and order and economic stability have led to modest growth as the economy rebuilds.

Somalia

Despite the lack of effective national governance, Somalia has maintained a healthy informal economy, largely based on livestock, remittance/money transfer companies, and telecommunications. Agriculture is the most important sector with livestock normally accounting for about 40% of GDP and more than 50% of export earnings. Nomads and semi-pastoralists, who are dependent upon livestock for their livelihood, make up a large portion of the population. Livestock, hides, fish, charcoal, and bananas are Somalia's principal exports, while sugar, sorghum, corn, qat, and machined goods are the principal imports. Somalia's small industrial sector, based on the processing of agricultural products, has largely been looted and the machinery sold as scrap metal. Somalia's service sector also has grown. Telecommunication firms provide wireless services in most major cities and offer the lowest international call rates on the continent. In the absence of a formal banking sector, money transfer/remittance services have sprouted throughout the country, handling up to \$1.6 billion in remittances annually. Mogadishu's main market offers a variety of goods from food to the newest electronic gadgets. Hotels continue to operate and are supported with private-security militias. Due to armed attacks on and threats to humanitarian aid workers, the World Food Programme partially suspended its operations in southern Somalia in early January 2010 pending improvement in the security situation. Somalia's arrears to the IMF have continued to grow.

South Africa

South Africa is a middle-income, emerging market with an abundant supply of natural resources; well-developed financial, legal, communications, energy, and transport sectors; a stock exchange that is the 18th largest in the world; and modern infrastructure supporting a relatively efficient distribution of goods to major urban centers throughout the region. At the end of 2007, South Africa began to experience an electricity crisis. State power supplier Eskom encountered problems with aged plants, necessitating "load-shedding" cuts to residents and businesses in the major cities. Growth was robust from 2004 to 2007 as South Africa reaped the benefits of macroeconomic stability and a global commodities boom, but began to slow in the second half of 2007 due to the electricity crisis and the subsequent global financial

crisis' impact on commodity prices and demand. GDP fell nearly 2% in 2009. Unemployment remains high and outdated infrastructure has constrained growth. Daunting economic problems remain from the apartheid era - especially poverty, lack of economic empowerment among the disadvantaged groups, and a shortage of public transportation. South Africa's former economic policy was fiscally conservative, focusing on controlling inflation, and attaining a budget surplus. The current government largely follows the same prudent policies, but must contend with the impact of the global crisis and is facing growing pressure from special interest groups to use state-owned enterprises to deliver basic services to low-income areas and to increase job growth. More than one-quarter of South Africa's population currently receives social grants.

South Georgia and South Sandwich Islands

Some fishing takes place in adjacent waters. There is a potential source of income from harvesting finfish and krill. The islands receive income from postage stamps produced in the UK, sale of fishing licenses, and harbor and landing fees from tourist vessels. Tourism from specialized cruise ships is increasing rapidly.

Southern Ocean

Fisheries in 2006-07 landed 126,976 metric tons, of which 82% (104,586 tons) was krill (*Euphausia superba*) and 9.5% (12,027 tons) Patagonian toothfish (*Dissostichus eleginoides* - also known as Chilean sea bass), compared to 127,910 tons in 2005-06 of which 83% (106,591 tons) was krill and 9.7% (12,396 tons) Patagonian toothfish (estimated fishing from the area covered by the Convention of the Conservation of Antarctic Marine Living Resources (CCAMLR), which extends slightly beyond the Southern Ocean area).

International agreements were adopted in late 1999 to reduce illegal, unreported, and unregulated fishing, which in the 2000-01 season landed, by one estimate, 8,376 metric tons of Patagonian and Antarctic toothfish. In the 2007-08 Antarctic summer, 45,213 tourists visited the Southern Ocean, compared to 35,552 in 2006-2007, and 29,799 in 2005-2006 (estimates provided to the Antarctic Treaty by the International Association of Antarctica Tour Operators (IAATO), and does not include passengers on overflights and those flying directly in and out of Antarctica).

Spain Spain's mixed capitalist economy is the 12th largest in the world, and its per capita income roughly matches that of Germany and France. However, after almost 15 years of above average GDP growth, the Spanish economy began to slow in late 2007 and entered into a recession in the second quarter of 2008. GDP contracted by 3.7% in 2009, ending a 16-year growth trend, and by another

0.4% in 2010, making Spain the last major economy to emerge from the global recession. The reversal in Spain's economic growth reflects a significant decline in the construction sector, an oversupply of housing, falling consumer spending, and slumping exports. Government efforts to boost the economy through stimulus spending, extended unemployment benefits, and loan guarantees did not prevent a sharp rise in the unemployment rate, which rose from a low of about 8% in 2007 to 20% in 2010. The government budget deficit worsened from 3.8% of GDP in 2008 to about 9.7% of GDP in 2010, more than three times the euro-zone limit. Spain's large budget deficit and poor economic growth prospects have made it vulnerable to financial contagion from other highly-indebted euro zone members despite the government's efforts to cut spending, privatize industries, and boost competitiveness through labor market reforms. Spanish banks' high exposure to the collapsed domestic construction and real estate market also poses a continued risk for the sector. The government intervened in one regional savings bank in 2009, and investors remain concerned that Madrid may need to bail out more troubled banks. The Bank of Spain, however, is seeking to boost confidence in the financial sector by pressuring banks to come clean about their losses and consolidate into stronger groups.

Spratly Islands

Economic activity is limited to commercial fishing.

The proximity to nearby oil- and gas-producing sedimentary basins suggests the potential for oil and gas deposits, but the region is largely unexplored. There are no reliable estimates of potential reserves. Commercial exploitation has yet to be developed.

Sri Lanka

Sri Lanka is engaging in large-scale reconstruction and development projects following the end of the 26-year conflict with the LTTE, including increasing electricity access and rebuilding its road and rail network. Additionally, Sri Lanka seeks to reduce poverty by using a combination of state directed policies and private investment promotion to spur growth in disadvantaged areas, develop small and medium enterprises, and promote increased agriculture. High levels of government funding may be difficult, as the government already is faced with high debt interest payments, a bloated civil service, and historically high budget deficits. The 2008-09 global financial crisis and recession exposed Sri Lanka's economic vulnerabilities and nearly caused a balance of payments crisis, which was alleviated by a \$2.6 billion IMF standby agreement in July 2009. The end of the civil war and the IMF loan, however, have largely restored investors' confidence, reflected in part by the Sri Lankan stock market's recognition as one of the best performing markets in the world. Sri Lankan growth rates averaged nearly 5% in during the war, but increased government spending on development and fighting the LTTE in the final years spurred GDP growth to around 6-7% per year in 2006-08. After experiencing 3.5% growth in 2009, Sri Lanka's economy is poised to achieve high growth

rates in the postwar period.

Sudan

Since 1997, Sudan has been working with the IMF to implement macroeconomic reforms including a managed float of the exchange rate and a large reserve of foreign exchange. A new currency, the Sudanese Pound, was introduced in January 2007 at an initial exchange rate of \$1.00 equals 2 Sudanese Pounds. Sudan began exporting crude oil in the last quarter of 1999 and the economy boomed on the back of increases in oil production, high oil prices, and significant inflows of foreign direct investment until the second half of 2008. The Darfur conflict, the aftermath of two decades of civil war in the south, the lack of basic infrastructure in large areas, and a reliance by much of the population on subsistence agriculture ensure much of the population will remain at or below the poverty line for years to come despite rapid rises in average per capita income. Sudan's real GDP expanded by 5.2% during 2010, an improvement over 2009's 4.2% growth but significantly below the more than 10% per year growth experienced prior to the global financial crisis in 2006 and 2007. While the oil sector continues to drive growth, services and utilities play an increasingly important role in the economy with agriculture production remaining important as it employs 80% of the work force and contributes a third of GDP. In the lead up to the referendum on southern secession, scheduled in January 2011, Sudan saw its currency depreciate considerably on the black market with the Central Bank's official rate also losing value as the Sudanese people started to hoard foreign currency. The Central Bank of Sudan intervened heavily in the currency market to defend the value of the pound and the Sudanese government introduced a number of measures to restrain excess local demand for hard currency, but uncertainty ahead of the referendum has meant that foreign exchange remained in heavy demand as 2010 came to a close.

Suriname

The economy is dominated by the mining industry, with exports of alumina, gold, and oil accounting for about 85% of exports and 25% of government revenues, making the economy highly vulnerable to mineral price volatility. In 2000, the government of Ronald VENETIAAN, returned to office and inherited an economy with inflation of over 100% and a growing fiscal deficit. He quickly implemented an austerity program, raised taxes, attempted to control spending, and tamed inflation. Economic growth reached about 6% in 2007 and 2008, owing to sizeable foreign investment in mining and oil. Suriname has received aid for projects in the bauxite and gold mining sectors from Netherlands, Belgium, and the European

Development Fund. The economy contracted in 2009, however, as investment waned and the country earned less from its commodity exports when global prices for most commodities fell. Trade picked up, boosting Suriname's economic growth in 2010, but the government's budget remained strained, with increased social spending during last year's election. Suriname's economic prospects for the medium term will depend on continued commitment to responsible monetary and fiscal policies and to the introduction of structural reforms to liberalize markets and promote competition.

Svalbard

Coal mining, tourism, and international research are the major revenue sources on Svalbard. Coal mining is the dominant economic activity and a treaty of 9 February 1920 gave the 41 signatories equal rights to exploit mineral deposits, subject to Norwegian regulation. Although US, UK, Dutch, and Swedish coal companies have mined in the past, the only companies still engaging in this are Norwegian and Russian. The settlements on Svalbard are essentially company towns. The Norwegian state-owned coal company employs nearly 60% of the Norwegian population on the island, runs many of the local services, and provides most of the local infrastructure. There is also some hunting of seal, reindeer, and fox.

Swaziland

In this small, landlocked economy, subsistence agriculture occupies approximately 70% of the population. The manufacturing sector has diversified since the mid-1980s. Sugar and wood pulp remain important foreign exchange earners. In 2007, the sugar industry increased efficiency and diversification efforts, in response to a 17% decline in EU sugar prices. Mining has declined in importance in recent years with only coal and quarry stone mines remaining active. Surrounded by South Africa, except for a short border with Mozambique, Swaziland is heavily dependent on South Africa from which it receives more than nine-tenths of its imports and to which it sends 60% of its exports. Swaziland's currency is pegged to the South African rand, subsuming Swaziland's monetary policy to South Africa. Customs duties from the Southern African Customs Union (SACU) account for two-thirds of Swaziland's government revenues, and worker remittances from South Africa substantially supplement domestically earned income. Customs revenues plummeted during the global economic crisis and Swaziland has appealed to SACU for assistance. With an estimated 40% unemployment rate, Swaziland's need to increase the number and size of small and medium enterprises and attract foreign direct

investment is acute. Overgrazing, soil depletion, drought, and sometimes floods persist as problems for the future. More than one-fourth of the population needed emergency food aid in 2006-07 because of drought, and more than one-quarter of the adult population has been infected by HIV/AIDS.

Sweden

Aided by peace and neutrality for the whole of the 20th century, Sweden has achieved an enviable standard of living under a mixed system of high-tech capitalism and extensive welfare benefits. It has a modern distribution system, excellent internal and external communications, and a skilled labor force. In September 2003, Swedish voters turned down entry into the euro system concerned about the impact on the economy and sovereignty. Timber, hydropower, and iron ore constitute the resource base of an economy heavily oriented toward foreign trade. Privately owned firms account for about 90% of industrial output, of which the engineering sector accounts for 50% of output and exports. Agriculture accounts for little more than 1% of GDP and of employment. Until 2008, Sweden was in the midst of a sustained economic upswing, boosted by increased domestic demand and strong exports. This and robust finances offered the center-right government considerable scope to implement its reform program aimed at increasing employment, reducing welfare dependence, and streamlining the state's role in the economy. Despite strong finances and underlying fundamentals, the Swedish economy slid into recession in the third quarter of 2008 and growth continued downward in 2009 as deteriorating global conditions reduced export demand and consumption. Strong exports of commodities and a return to profitability by Sweden's banking sector drove the strong rebound in 2010.

Switzerland Switzerland is a peaceful, prosperous, and modern market economy with low unemployment, a highly skilled labor force, and a per capita GDP among the highest in the world. Switzerland's economy benefits from a highly developed service sector, led by financial services, and a manufacturing industry that specializes in high-technology, knowledge-based production. The Swiss have brought their economic practices largely into conformity with the EU's, in order to enhance their international competitiveness, but some trade protectionism remains, particularly for its small agricultural sector. The global financial crisis and resulting economic downturn put Switzerland in a recession in 2009 as global export demand stalled. The Swiss National Bank during this period effectively implemented a zero-interest rate policy in a bid to boost the economy and prevent appreciation of the franc. Switzerland's economy grew 2.8% in 2010, when Bern implemented a third fiscal stimulus program, but its prized banking sector has recently faced significant challenges. The country's largest banks suffered sizable losses in 2008-09, leading its largest bank to accept a government rescue deal in late 2008. Switzerland has also come under increasing pressure from individual neighboring countries, the EU, the US, and international

institutions to reform its banking secrecy laws. Consequently, the government agreed to conform to OECD regulations on administrative assistance in tax matters, including tax evasion. The government has renegotiated its double taxation agreements with numerous countries, including the US, to incorporate the OECD standard, and it is working with Germany and the UK to resolve outstanding issues, particularly the possibility of imposing taxes on bank deposits held by foreigners. Parliament passed the first five double-taxation agreements, including that with the US, in March 2010, but the agreements are subject to public referendum. In 2009, Swiss financial regulators ordered the country's largest bank to reveal at Washington's behest the names of US account-holders suspected of using the bank to commit tax fraud. These steps will have a lasting impact on Switzerland's long history of bank secrecy.

Syria

Syrian economic growth slowed to 1.8% in 2009 as the global economic crisis affected oil prices and the economies of Syria's key export partners and sources of investment. Damascus has implemented modest economic reforms in the past few years, including cutting lending interest rates, opening private banks, consolidating all of the multiple exchange rates, raising prices on some subsidized items, most notably gasoline and cement, and establishing the Damascus Stock Exchange - which began operations in 2009. In addition, President ASAD signed legislative decrees to encourage corporate ownership reform, and to allow the Central Bank to issue Treasury bills and bonds for government debt. Nevertheless, the economy remains highly controlled by the government. Long-run economic constraints include declining oil production, high unemployment, rising budget deficits, and increasing pressure on water supplies caused by heavy use in agriculture, rapid population growth, industrial expansion, and water pollution.

Taiwan Taiwan has a dynamic capitalist economy with gradually decreasing government guidance of investment and foreign trade. In keeping with this trend, some large, state-owned banks and industrial firms have been privatized. Exports, led by electronics and machinery, generate about 70% of Taiwan's GDP growth, and have provided the primary impetus for economic development. This heavy dependence on exports makes the economy vulnerable to downturns in world demand. In 2009, Taiwan's GDP fell by 1.9%, due primarily to a 20% year-on-year decline in exports. GDP grew more than 8% in 2010, as exports returned to the level of previous years. Taiwan's diplomatic isolation, low birth rate, and rapidly aging population are major long-term challenges. Free trade agreements have proliferated in East Asia over the past several years, but so far Taiwan has been excluded from this greater economic integration, largely for reasons of diplomacy. Taiwan's birth rate of only 1.2 child per woman is among the lowest in the world, raising the prospect of future labor shortages, falling domestic demand, and declining tax revenues. Taiwan's population is aging quickly, with the number of people over 65 accounting for 10.8% of the island's total population as of the end of 2009. The island runs a large trade surplus, and its foreign reserves are the world's fourth largest, behind China, Japan, and Russia. Since President MA Ying-jeou took office in May 2008, cross-Strait economic ties have increased significantly. Since 2005 China has overtaken the US to become

Taiwan's second-largest source of imports after Japan. China is also the island's number one destination for foreign direct investment. Taipei has focused much of its economic recovery effort on improving cross-Strait economic integration. Three financial memorandums of understanding, covering banking, securities, and insurance, took effect in mid-January 2010, opening the island to greater investments from the Mainland's financial firms and institutional investors, and providing new opportunities for Taiwan financial firms to operate in China. Taiwan and the mainland in June 2010 signed the landmark Economic Cooperation Framework Agreement (ECFA), an agreement similar to a free-trade agreement deal that will increase cross-Strait economic ties by lowering tariffs on a number of goods. Taiwan's government has said that the ECFA will serve as a stepping stone toward trade pacts with other regional partners and announced the beginning of negotiations on such an agreement with Singapore in August.

Tajikistan Tajikistan has one of the lowest per capita GDPs among the 15 former Soviet republics. Because of a lack of employment opportunities in Tajikistan, nearly half of the labor force works abroad, primarily in Russia and Kazakhstan, supporting families in Tajikistan through remittances. The exact number of labor migrants is unknown, but estimated at around 1 million. Less than 7% of the land area is arable. Cotton is the most important crop, but this sector is burdened with debt and obsolete infrastructure; moreover, government has encouraged a gradual transition away from cotton and towards food cultivation due to its concerns about feeding the population. Mineral resources include silver, gold, uranium, and tungsten. Industry consists only of a large aluminum plant, hydropower facilities, and small obsolete factories mostly in light industry and food processing. The civil war (1992-97) severely damaged the already weak economic infrastructure and caused a sharp decline in industrial and agricultural production. Tajikistan's economic situation remains fragile due to uneven implementation of structural reforms, corruption, weak governance, seasonal power shortages, and the external debt burden. A debt restructuring agreement was reached with Russia in December 2002, including a \$250 million write-off of Tajikistan's \$300 million debt. Completion of the Sangtuda I hydropower dam - finished in 2009 with Russian investment - and the Sangtuda II and Rogun dams will add substantially to electricity output. If finished according to Tajik plans, Rogun will be the world's tallest dam. The World Bank, in 2010, agreed to fund safety and feasibility studies for the Rogun Dam. Favorable reports from these studies could increase investor interest in the project, which has been stalled due to lack of funding. Tajikistan has also received substantial infrastructure development loans from the Chinese government to improve roads and an electricity transmission network. To help increase north-south trade, the US funded a \$36 million bridge which opened in August 2007 and links Tajikistan and Afghanistan. While Tajikistan has experienced steady economic growth since 1997, more than half of the population continues to live in poverty. Economic growth reached 10.6% in 2004, but dropped below 8% in 2005-08, as the effects of higher oil prices and then the international financial crisis began to register - mainly in the form of lower prices for key export commodities and lower remittances from Tajiks working abroad, due to the global economic downturn. In 2009 GDP growth dropped to 3.4% as a result of the world recession.

Tanzania

Tanzania is one of the world's poorest economies in terms of per capita income, however, Tanzania average 7% GDP growth per year between 2000 and 2008 on strong gold production and tourism. The economy depends heavily on agriculture, which accounts for more

than one-fourth of GDP, provides 85% of exports, and employs about 60% of the work force. The World Bank, the IMF, and bilateral donors have provided funds to rehabilitate Tanzania's aging economic infrastructure, including rail and port infrastructure that are important trade links for inland countries. Recent banking reforms have helped increase private-sector growth and investment, and the government has increased spending on agriculture to 7% of its budget. Continued donor assistance and solid macroeconomic policies supported a positive growth rate, despite the world recession. In 2008, Tanzania received the world's largest Millennium Challenge Compact grant, worth \$698 million. Dar es Salaam used fiscal stimulus and loosened monetary policy to ease the impact of the global recession. GDP growth in 2009-10 was a respectable 6% per year due to high gold prices and increased production.

Thailand

With a well-developed infrastructure, a free-enterprise economy, generally pro-investment policies, and strong export industries, Thailand enjoyed solid growth from 2000 to 2008 - averaging more than 4% per year - as it recovered from the Asian financial crisis of 1997-98. Thai exports - mostly machinery and electronic components, agricultural commodities, and jewelry - continue to drive the economy, accounting for more than half of GDP. The global financial crisis of 2008-09 severely cut Thailand's exports, with most sectors experiencing double-digit drops. In 2009, the economy contracted 2.2%. In 2010, Thailand's economy expanded 7.6%, its fastest pace since 1995, as exports rebounded from their depressed 2009 level. Antigovernment protests during March-May and the country's polarized political situation had - at most - a temporary impact on business and consumer confidence. Although tourism was hit hard during the protests, its quick recovery helped boost consumer confidence to new highs. Moreover, business and investor sentiment remained buoyant as Thailand's stock market grew almost 5% during the three-month period. The economy probably will continue to experience high growth well into 2011.

Timor-Leste

In late 1999, about 70% of the economic infrastructure of Timor-Leste was laid waste by Indonesian troops and anti-independence militias. Three hundred thousand people fled westward. Over the next three years a massive international program, manned by 5,000 peacekeepers (8,000 at peak) and 1,300 police officers, led to substantial reconstruction in both urban and rural areas. By the end of 2005, refugees had returned or had settled in Indonesia. The country continues to face great challenges in

rebuilding its infrastructure, strengthening the civil administration, and generating jobs for young people entering the work force. The development of oil and gas resources in offshore waters has greatly supplemented government revenues. This technology-intensive industry, however, has done little to create jobs for the unemployed because there are no production facilities in Timor. Gas is piped to Australia. In June 2005, the National Parliament unanimously approved the creation of a Petroleum Fund to serve as a repository for all petroleum revenues and to preserve the value of Timor-Leste's petroleum wealth for future generations. The Fund held assets of US\$5.3 billion as of October 2009. The economy has been little impacted by the global financial crisis and continues to recover strongly from the mid-2006 outbreak of violence and civil unrest, which disrupted both private and public sector economic activity. The government in 2008 resettled tens of thousands of an estimated 100,000 internally displaced persons (IDPs); most IDPs returned home by early 2009. The underlying economic policy challenge the country faces remains how best to use oil-and-gas wealth to lift the non-oil economy onto a higher growth path and to reduce poverty.

Togo

This small, sub-Saharan economy suffers from anemic economic growth and depends heavily on both commercial and subsistence agriculture, which provides employment for 65% of the labor force. Some basic foodstuffs must still be imported. Cocoa, coffee, and cotton generate about 40% of export earnings with cotton being the most important cash crop. Togo is the world's fourth-largest producer of phosphate. The government's decade-long effort, supported by the World Bank and the IMF, to implement economic reform measures, encourage foreign investment, and bring revenues in line with expenditures has moved slowly. Progress depends on follow through on privatization, increased openness in government financial operations, progress toward legislative elections, and continued support from foreign donors. Togo is on track with its IMF Extended Credit Facility and reached a HIPC debt relief completion point in 2010 at which 95% of the country's debt was forgiven. Economic growth prospects remain marginal due to declining cotton production and underinvestment in phosphate mining.

Tokelau

Tokelau's small size (three villages), isolation, and lack of resources greatly restrain economic development and confine agriculture to the subsistence level. The people rely heavily on aid from New Zealand - about \$10 million annually in 2008 and 2009 - to

maintain public services. New Zealand's support amounts to 80% of Tokelau's recurrent government budget. An international trust fund, currently worth nearly US\$32 million, was established in 2004 to provide Tokelau an independent source of revenue. The principal sources of revenue come from sales of copra, postage stamps, souvenir coins, and handicrafts. Money is also remitted to families from relatives in New Zealand.

Tonga

Tonga has a small, open, South Pacific island economy. It has a narrow export base in agricultural goods. Squash, vanilla beans, and yams are the main crops. Agricultural exports, including fish, make up two-thirds of total exports. The country must import a high proportion of its food, mainly from New Zealand. The country remains dependent on external aid and remittances from Tongan communities overseas to offset its trade deficit. Tourism is the second-largest source of hard currency earnings following remittances. Tonga had 39,000 visitors in 2006. The government is emphasizing the development of the private sector, especially the encouragement of investment, and is committing increased funds for health and education. Tonga has a reasonably sound basic infrastructure and well developed social services. High unemployment among the young, a continuing upturn in inflation, pressures for democratic reform, and rising civil service expenditures are major issues facing the government.

Trinidad and Tobago

Trinidad and Tobago has earned a reputation as an excellent investment site for international businesses and has one of the highest growth rates and per capita incomes in Latin America. Economic growth between 2000 and 2007 averaged slightly over 8%, significantly above the regional average of about 3.7% for that same period; however, GDP has slowed down since then and contracted about 3.5% in 2009, before rising more than 2% in 2010. Growth has been fueled by investments in liquefied natural gas (LNG), petrochemicals, and steel. Additional petrochemical, aluminum, and plastics projects are in various stages of planning. Trinidad and Tobago is the leading Caribbean producer of oil and gas, and its economy is heavily dependent upon these resources but it also supplies manufactured goods, notably food products and beverages, as well as cement to the Caribbean region. Oil and gas account for about 40% of GDP and 80% of exports, but only 5% of employment. The country is also a regional financial center, and tourism is a growing sector, although it is not as important domestically as it is to many other Caribbean islands. The economy

benefits from a growing trade surplus. The previous MANNING administration benefited from fiscal surpluses fueled by the dynamic export sector; however, declines in oil and gas prices have reduced government revenues which will challenge the new government's commitment to maintaining high levels of public investment.

Tunisia

Tunisia has a diverse economy, with important agricultural, mining, tourism, and manufacturing sectors. Governmental control of economic affairs while still heavy has gradually lessened over the past decade with increasing privatization, simplification of the tax structure, and a prudent approach to debt. Progressive social policies also have helped raise living conditions in Tunisia relative to the region. Real growth, which averaged almost 5% over the past decade, declined to 4.6% in 2008 and to 3-4% in 2009-10 because of economic contraction and slowing of import demand in Europe - Tunisia's largest export market. However, development of non-textile manufacturing, a recovery in agricultural production, and strong growth in the services sector somewhat mitigated the economic effect of slowing exports. Tunisia will need to reach even higher growth levels to create sufficient employment opportunities for an already large number of unemployed as well as the growing population of university graduates. The challenges ahead include: privatizing industry, liberalizing the investment code to increase foreign investment, improving government efficiency, reducing the trade deficit, and reducing socioeconomic disparities in the impoverished south and west.

Turkey Turkey's economy is increasingly driven by its industry and service sectors, although its traditional agriculture sector still accounts for about 30% of employment. An aggressive privatization program has reduced state involvement in basic industry, banking, transport, and communication, and an emerging cadre of middle-class entrepreneurs is adding a dynamism to the economy. Turkey's traditional textiles and clothing sectors still account for one-third of industrial employment, despite stiff competition in international markets that resulted from the end of the global quota system. Other sectors, notably the automotive, construction, and electronics industries, are rising in importance and have surpassed textiles within Turkey's export mix. Oil began to flow through the Baku-Tbilisi-Ceyhan pipeline in May 2006, marking a major milestone that will bring up to 1 million barrels per day from the Caspian to market. Several gas pipelines also are being planned to help move Central Asian gas to Europe via Turkey, which will help address Turkey's dependence on energy imports over the long term. After Turkey experienced a severe financial crisis in 2001, Ankara adopted financial and fiscal reforms as part of an IMF program. The reforms strengthened the country's economic fundamentals and ushered in an era of strong growth - averaging more than 6% annually until 2009, when global economic conditions and tighter fiscal policy slowed growth to 4.7%, reduced inflation to 6.5% - a 34-year low - and cut the public sector debt-to-GPD ratio below 50%. Turkey's well-regulated financial markets and banking system weathered the global financial

crisis and GDP rebounded strongly to 7.3% in 2010, as exports returned to normal levels following the recession. The economy, however, continues to be burdened by a high current account deficit and remains dependent on often volatile, short-term investment to finance its trade deficit. The stock value of FDI stood at \$174 billion at year-end 2010, but inflows have slowed considerably in light of continuing economic turmoil in Europe, the source of much of Turkey's FDI. Further economic and judicial reforms and prospective EU membership are expected to boost Turkey's attractiveness to foreign investors. However, Turkey's relatively high current account deficit, uncertainty related to policy-making, and fiscal imbalances leave the economy vulnerable to destabilizing shifts in investor confidence.

Turkmenistan Turkmenistan is largely a desert country with intensive agriculture in irrigated oases and sizeable gas and oil resources. The two largest crops are cotton, most of which is produced for export, and wheat, which is domestically consumed. Although agriculture accounts for roughly 10% of GDP, it continues to employ nearly half of the country's workforce. With an authoritarian ex-Communist regime in power and a tribally based social structure, Turkmenistan has taken a cautious approach to economic reform, hoping to use gas and cotton export revenues to sustain its inefficient economy. Privatization goals remain limited. From 1998-2005, Turkmenistan suffered from the continued lack of adequate export routes for natural gas and from obligations on extensive short-term external debt. At the same time, however, total exports rose by an average of roughly 15% per year from 2003-08, largely because of higher international oil and gas prices. New pipelines to China and Iran, that began operation in late 2009 and early 2010, have given Turkmenistan additional export routes for its gas, although these new routes have not offset the sharp drop in export revenue since early 2009 from decreased gas exports to Russia. Overall prospects in the near future are discouraging because of widespread internal poverty, endemic corruption, a poor educational system, government misuse of oil and gas revenues, and Ashgabat's reluctance to adopt market-oriented reforms. In the past, Turkmenistan's economic statistics were state secrets. The new government has established a State Agency for Statistics, but GDP numbers and other figures are subject to wide margins of error. In particular, the rate of GDP growth is uncertain. Since his election, President BERDIMUHAMEDOW unified the country's dual currency exchange rate, ordered the redenomination of the manat, reduced state subsidies for gasoline, and initiated development of a special tourism zone on the Caspian Sea. Although foreign investment is encouraged, numerous bureaucratic obstacles impede international business activity.

Turks and Caicos Islands

The Turks and Caicos economy is based on tourism, offshore financial services, and fishing. Most capital goods and food for domestic consumption are imported. The US is the leading source of tourists, accounting for more than three-quarters of the 175,000 visitors that arrived in 2004. Major sources of government revenue also include fees from offshore financial activities and customs receipts.

Tuvalu Tuvalu consists of a densely populated, scattered group of nine coral atolls with poor soil. The country has no known mineral resources and few exports and is almost entirely dependent upon imported food and fuel. Subsistence farming and fishing are the primary economic activities. Fewer

than 1,000 tourists, on average, visit Tuvalu annually. Job opportunities are scarce and public sector workers make up most of those employed. About 15% of the adult male population work as seamen on merchant ships abroad, and remittances are a vital source of income contributing around \$2 million in 2007. Substantial income is received annually from the Tuvalu Trust Fund (TTF) an international trust fund established in 1987 by Australia, NZ, and the UK and supported also by Japan and South Korea. Thanks to wise investments and conservative withdrawals, this fund grew from an initial \$17 million to an estimated value of \$77 million in 2006. The TTF contributed nearly \$9 million towards the government budget in 2006 and is an important cushion for meeting shortfalls in the government's budget. The US Government is also a major revenue source for Tuvalu because of payments from a 1988 treaty on fisheries. In an effort to ensure financial stability and sustainability, the government is pursuing public sector reforms, including privatization of some government functions and personnel cuts. Tuvalu also derives royalties from the lease of its ".tv" Internet domain name with revenue of more than \$2 million in 2006. A minor source of government revenue comes from the sale of stamps and coins. With merchandise exports only a fraction of merchandise imports, continued reliance must be placed on fishing and telecommunications license fees, remittances from overseas workers, official transfers, and income from overseas investments. Growing income disparities and the vulnerability of the country to climatic change are among leading concerns for the nation.

Uganda Uganda has substantial natural resources, including fertile soils, regular rainfall, small deposits of copper, gold, and other minerals, and recently discovered oil. Uganda has never conducted a national minerals survey. Agriculture is the most important sector of the economy, employing over 80% of the work force. Coffee accounts for the bulk of export revenues. Since 1986, the government - with the support of foreign countries and international agencies - has acted to rehabilitate and stabilize the economy by undertaking currency reform, raising producer prices on export crops, increasing prices of petroleum products, and improving civil service wages. The policy changes are especially aimed at dampening inflation and boosting production and export earnings. Since 1990 economic reforms ushered in an era of solid economic growth based on continued investment in infrastructure, improved incentives for production and exports, lower inflation, better domestic security, and the return of exiled Indian-Ugandan entrepreneurs. Uganda has received about \$2 billion in multilateral and bilateral debt relief. In 2007 Uganda received \$10 million for a Millennium Challenge Account Threshold Program. The global economic downturn has hurt Uganda's exports; however, Uganda's GDP growth is still relatively strong due to past reforms and sound management of the downturn. Oil revenues and taxes will become a larger source of government funding as oil comes on line in the next few years. Instability in southern Sudan is the biggest risk for the Ugandan economy in 2011 because Uganda's main export partner is Sudan and Uganda is a key destination for Sudanese refugees.

Ukraine After Russia, the Ukrainian republic was far and away the most important economic component of the former Soviet Union, producing about four times the output of the next-ranking republic. Its fertile black soil generated more than one-fourth of Soviet agricultural output, and its farms provided substantial quantities of meat, milk, grain, and vegetables to other republics. Likewise, its diversified heavy industry supplied the unique equipment (for example, large diameter pipes) and raw materials to industrial and mining sites (vertical drilling apparatus) in other regions of the former USSR. Shortly after independence in August 1991, the Ukrainian Government liberalized most prices and erected a legal framework for privatization, but widespread resistance to reform within the government and the legislature soon stalled reform efforts and led to some backtracking. Output by 1999 had fallen to less than 40% of the 1991 level. Ukraine's dependence on Russia for energy supplies and the lack of significant structural reform have made the Ukrainian economy vulnerable to external shocks. Ukraine depends on imports to meet about three-fourths of its annual oil and natural gas requirements and 100% of its nuclear fuel needs. After a two-week dispute that saw gas supplies cutoff to Europe, Ukraine agreed to ten-year gas supply and transit contracts with Russia in January 2009 that brought gas prices to "world" levels. The strict terms of the contracts have further hobbled Ukraine's cash-strapped state gas company, Naftohaz. Outside institutions - particularly the IMF - have encouraged Ukraine to quicken the pace and scope of reforms. Ukrainian Government officials eliminated most tax and customs privileges in a March 2005 budget law, bringing more economic activity out of Ukraine's large shadow economy, but more improvements are needed, including fighting corruption, developing capital markets, and improving the legislative framework. Ukraine's economy was buoyant despite political turmoil between the prime minister and president until mid-2008. Real GDP growth exceeded 7% in 2006-07, fueled by high global prices for steel - Ukraine's top export - and by strong domestic consumption, spurred by rising pensions and wages. Ukraine reached an agreement with the IMF for a \$16.4 billion Stand-By Arrangement in November 2008 to deal with the economic crisis, but the Ukrainian Government's lack of progress in implementing reforms has twice delayed the release of IMF assistance funds. The drop in steel prices

and Ukraine's exposure to the global financial crisis due to aggressive foreign borrowing lowered growth in 2008 and the economy contracted more than 15% in 2009, among the worst economic performances in the world; growth resumed in 2010, buoyed by exports. External conditions are likely to hamper efforts for economic recovery in 2011.

United Arab Emirates

The UAE has an open economy with a high per capita income and a sizable annual trade surplus. Successful efforts at economic diversification have reduced the portion of GDP based on oil and gas output to 25%. Since the discovery of oil in the UAE more than 30 years ago, the UAE has undergone a profound transformation from an impoverished region of small desert principalities to a modern state with a high standard of living. The government has increased spending on job creation and infrastructure expansion and is opening up utilities to greater private sector involvement. In April 2004, the UAE signed a Trade and Investment Framework Agreement with Washington and in November 2004 agreed to undertake negotiations toward a Free Trade Agreement with the US, however, those talks have not moved forward. The country's Free Trade Zones - offering 100% foreign ownership and zero taxes - are helping to attract foreign investors. The global financial crisis, tight international credit, and deflated asset prices slowed GDP growth in 2010. UAE authorities tried to blunt the crisis by increasing spending and boosting liquidity in the banking sector. The crisis hit Dubai hardest, as it was heavily exposed to depressed real estate prices. Dubai lacked sufficient cash to meet its debt obligations, prompting global concern about its solvency. The UAE Central Bank and Abu Dhabi-based banks bought the largest shares. In December 2009 Dubai received an additional \$10 billion loan from the emirate of Abu Dhabi. The economy is expected to continue a slow rebound. Dependence on oil, a large expatriate workforce, and growing inflation pressures are significant long-term challenges. The UAE's strategic plan for the next few years focuses on diversification and creating more opportunities for nationals through improved education and increased private sector employment.

United Kingdom

The UK, a leading trading power and financial center, is the third largest economy in Europe after Germany and France. Over the past two decades, the government has greatly reduced public ownership and contained the growth of social welfare programs. Agriculture is intensive, highly mechanized, and efficient by European standards, producing about 60% of food needs with less than 2% of the labor force. The UK has large coal, natural gas, and oil resources, but its oil and natural gas reserves are declining and

the UK became a net importer of energy in 2005. Services, particularly banking, insurance, and business services, account by far for the largest proportion of GDP while industry continues to decline in importance. After emerging from recession in 1992, Britain's economy enjoyed the longest period of expansion on record during which time growth outpaced most of Western Europe. In 2008, however, the global financial crisis hit the economy particularly hard, due to the importance of its financial sector. Sharply declining home prices, high consumer debt, and the global economic slowdown compounded Britain's economic problems, pushing the economy into recession in the latter half of 2008 and prompting the then BROWN government to implement a number of measures to stimulate the economy and stabilize the financial markets; these include nationalizing parts of the banking system, cutting taxes, suspending public sector borrowing rules, and moving forward public spending on capital projects. Facing burgeoning public deficits and debt levels, the CAMERON government in 2010 initiated a five-year austerity program, which aims to lower London's budget deficit from over 11% of GDP in 2010 to nearly 1% by 2015. The Bank of England periodically coordinates interest rate moves with the European Central Bank, but Britain remains outside the European Economic and Monetary Union (EMU).

United States The US has the largest and most technologically powerful economy in the world, with a per capita GDP of \$47,400. In this market-oriented economy, private individuals and business firms make most of the decisions, and the federal and state governments buy needed goods and services predominantly in the private marketplace. US business firms enjoy greater flexibility than their counterparts in Western Europe and Japan in decisions to expand capital plant, to lay off surplus workers, and to develop new products. At the same time, they face higher barriers to enter their rivals' home markets than foreign firms face entering US markets. US firms are at or near the forefront in technological advances, especially in computers and in medical, aerospace, and military equipment; their advantage has narrowed since the end of World War II. The onrush of technology largely explains the gradual development of a "two-tier labor market" in which those at the bottom lack the education and the professional/technical skills of those at the top and, more and more, fail to get comparable pay raises, health insurance coverage, and other benefits. Since 1975, practically all the gains in household income have gone to the top 20% of households. The war in March-April 2003 between a US-led coalition and Iraq, and the subsequent occupation of Iraq, required major shifts in national resources to the military. Soaring oil prices between 2005 and the first half of 2008 threatened inflation and unemployment, as higher gasoline prices ate into consumers' budgets. Imported oil accounts for about 60% of US consumption. Long-term problems include inadequate investment in economic infrastructure, rapidly rising medical and pension costs of an aging population, sizable trade and budget deficits, and stagnation of family income in the lower economic groups. The merchandise trade deficit reached a record \$840 billion in 2008 before shrinking to \$506 billion in 2009, and ramping back up to \$630 billion in 2010. The global economic downturn, the sub-prime mortgage crisis, investment bank failures, falling home prices, and tight credit pushed the

United States into a recession by mid-2008. GDP contracted until the third quarter of 2009, making this the deepest and longest downturn since the Great Depression. To help stabilize financial markets, the US Congress established a \$700 billion Troubled Asset Relief Program (TARP) in October 2008. The government used some of these funds to purchase equity in US banks and other industrial corporations, much of which had been returned to the government by early 2011. In January 2009 the US Congress passed and President Barack OBAMA signed a bill providing an additional \$787 billion fiscal stimulus to be used over 10 years - two-thirds on additional spending and one-third on tax cuts - to create jobs and to help the economy recover. Approximately two-thirds of these funds were injected into the economy by the end of 2010. In March 2010, President OBAMA signed a health insurance reform bill into law that will extend coverage to an additional 32 million American citizens by 2016, through private health insurance for the general population and Medicaid for the impoverished. In July 2010, the president signed the DODD-FRANK Wall Street Reform and Consumer Protection Act, a bill designed to promote financial stability by protecting consumers from financial abuses, ending taxpayer bailouts of financial firms, dealing with troubled banks that are "too big to fail," and improving accountability and transparency in the financial system - in particular, by requiring certain financial derivatives to be traded in markets that are subject to government regulation and oversight. In late 2010, the US Federal Reserve Bank (The Fed) announced that it would purchase \$600 billion worth of US Government bonds by June 2011, in an attempt to keep interest rates from rising and snuffing out the nascent recovery.

United States Pacific Island Wildlife Refuges
no economic activity

Uruguay

Uruguay's economy is characterized by an export-oriented agricultural sector, a well-educated work force, and high levels of social spending. After averaging growth of 5% annually during 1996-98, in 1999-2002 the economy suffered a major downturn, stemming largely from the spillover effects of the economic problems of its large neighbors, Argentina and Brazil. In 2001-02, Argentine citizens made massive withdrawals of dollars deposited in Uruguayan banks after bank deposits in Argentina were frozen, which led to a plunge in the Uruguayan peso, a banking crisis, and a sharp economic contraction. Real GDP fell in four years by nearly 20%, with 2002 the worst year. The unemployment rate rose, inflation surged, and the burden of external debt doubled. Financial assistance from the IMF helped stem the damage. Uruguay restructured its external debt in 2003 without asking creditors to accept a reduction on the principal. Economic growth for Uruguay resumed, and averaged 8% annually during the period 2004-08. The 2008-09 global financial crisis put a brake on Uruguay's vigorous growth, which decelerated to 2.9% in 2009. Nevertheless, the country managed to avoid a recession and keep positive growth rates, mainly through higher public expenditure and investment, and GDP growth exceeded 7% in 2010.

Uzbekistan Uzbekistan is a dry, landlocked country; 11% of the land is intensely cultivated, in irrigated river valleys. More than 60% of the population lives in densely populated rural communities. Export of hydrocarbons, including natural gas and petroleum, provided about 40% of foreign exchange earnings in 2009. Other major export earners include gold and cotton. Uzbekistan is now the world's second-largest cotton exporter and fifth largest producer; it has come under increasing international criticism for the use of child labor in its annual cotton harvest. Nevertheless, Uzbekistan enjoyed a bumper cotton crop in 2010 amidst record high prices. Following independence in September 1991, the government sought to prop up its Soviet-style command economy with subsidies and tight controls on production and prices. While aware of the need to improve the investment climate, the government still sponsors measures that often increase, not decrease, its control over business decisions. A sharp increase in the inequality of income distribution has hurt the lower ranks of society since independence. In 2003, the government accepted Article VIII obligations under the IMF, providing for full currency convertibility. However, strict currency controls and tightening of borders have lessened the effects of convertibility and have also led to some shortages that have further stifled economic activity. The Central Bank often delays or restricts convertibility, especially for consumer goods. Potential investment by Russia and China in Uzbekistan's gas and oil industry, as well as increased cooperation with South Korea in the realm of civil aviation, may boost growth prospects. However, decreased demand for natural gas in Europe and Russia in the wake of the global financial crisis could reduce energy-related revenues in the near term. In November 2005, Russian President Vladimir PUTIN and Uzbekistan President KARIMOV signed an "alliance," which included provisions for economic and business cooperation. Russian businesses have shown increased interest in Uzbekistan, especially in mining, telecom, and oil and gas. In 2006, Uzbekistan took steps to rejoin the Collective Security Treaty Organization (CSTO) and the Eurasian Economic Community (EurASEC), which it subsequently left in 2008, both organizations dominated by Russia. In the past Uzbek authorities had accused US and other foreign companies operating in Uzbekistan of violating Uzbek tax laws and have frozen their assets, but no new expropriations occurred in 2008-09. Instead, the Uzbek Government has actively courted several major U.S. and international corporations, offering attractive financing and tax advantages, and has landed a significant US investment in the automotive industry. Although growth slowed in 2009-10, Uzbekistan has seen few other effects from the global economic downturn, primarily due to its relative isolation from the global financial markets.

Vanuatu

This South Pacific island economy is based primarily on small-scale agriculture, which provides a living for about two-thirds of the population. Fishing, offshore financial services, and tourism, with nearly 197,000 visitors in 2008, are other mainstays of the economy. Mineral deposits are negligible; the country has no known petroleum deposits. A small light industry sector caters to the local market. Tax revenues come mainly from import duties. Economic development is hindered by dependence on relatively few commodity exports, vulnerability to natural disasters, and long distances from main markets and between constituent islands. In response to foreign concerns, the government has promised to tighten regulation of its offshore financial center.

In mid-2002, the government stepped up efforts to boost tourism through improved air connections, resort development, and cruise ship facilities. Agriculture, especially livestock farming, is a second target for growth. Australia and New Zealand are the main suppliers of tourists and foreign aid.

Venezuela Venezuela remains highly dependent on oil revenues, which account for roughly 95% of export earnings, about 55% of the federal budget revenues, and around 30% of GDP. A nationwide strike between December 2002 and February 2003 had far-reaching economic consequences - real GDP declined by around 9% in 2002 and 8% in 2003 - but economic output since then has recovered strongly. Fueled by high oil prices, record government spending helped to boost GDP by about 10% in 2006, 8% in 2007, and nearly 5% in 2008, before a sharp drop in oil prices caused a contraction in 2009-10. This spending, combined with recent minimum wage hikes and improved access to domestic credit, has created a consumption boom but has come at the cost of higher inflation - roughly 32% in 2008, and slowing only slightly to 30% in 2010, despite the lengthy downturn. Imports also jumped significantly before the recession of 2009. President Hugo CHAVEZ's continued efforts to increase the government's control of the economy by nationalizing firms in the agribusiness, financial, construction, oil, and steel sectors have hurt the private investment environment, reduced productive capacity, and slowed non-petroleum exports. In the first half of 2010 Venezuela faced the prospect of lengthy nationwide blackouts when its main hydroelectric power plant - which provides more than 35% of the country's electricity - nearly shut down. In January, 2010, CHAVEZ announced a dual exchange rate system for the bolivar and closed the unofficial foreign exchange market - the "parallel" market - in an effort to stem inflation and slow the currency's depreciation. The foreign exchange system offers a 2.6 bolivar per dollar rate for imports of essentials, including food, medicine, and industrial machinery, and a 4.3 bolivar per dollar rate for imports of other products, including cars and telephones.

Vietnam Vietnam is a densely-populated developing country that in the last 30 years has had to recover from the ravages of war, the loss of financial support from the old Soviet Bloc, and the rigidities of a centrally-planned economy. Vietnamese authorities have reaffirmed their commitment to economic liberalization and international integration. They have moved to implement the structural reforms needed to modernize the economy and to produce more competitive export-driven industries. Vietnam joined the WTO in January 2007 following more than a decade-long negotiation process. WTO membership has provided Vietnam an anchor to the global market and reinforced the domestic economic reform process. Agriculture's share of economic output has continued to shrink from about 25% in 2000 to about 21% in 2009. Deep poverty has declined significantly and Vietnam is working to create jobs to meet the challenge of a labor force that is growing by more than one million people every year. The global recession has hurt Vietnam's export-oriented economy with GDP growing less than the 7% per annum average achieved during the last decade. In 2009 exports fell nearly 10% year-on-year, prompting the government to consider adjustments to tariffs to limit the trade deficit. The government has used stimulus spending, including a subsidized lending program, to help the economy through the global financial crisis. Vietnam's managed currency, the dong, faced downward pressure during the recession and the government devalued it by nearly 7% in December 2009. Foreign donors pledged \$8 billion in new development assistance for 2010. Export growth resumed in 2010, driving GDP upward. However, Hanoi has struggled to control one of the region's highest

inflation rates, which stands at 11.1% with interest hikes and multiple devaluations of the dong. Vietnam's economy faces higher lending rates, additional IMF scrutiny, domestic inflationary pressures, and an underperforming stock market.

Virgin Islands

Tourism is the primary economic activity, accounting for 80% of GDP and employment. The islands hosted 2.4 million visitors in 2008. The manufacturing sector consists of petroleum refining, rum distilling, textiles, electronics, pharmaceuticals, and watch assembly. One of the world's largest petroleum refineries is at Saint Croix. The agricultural sector is small, with most food being imported. International business and financial services are small but growing components of the economy. The islands are vulnerable to substantial damage from storms. The government is working to improve fiscal discipline, to support construction projects in the private sector, to expand tourist facilities, to reduce crime, and to protect the environment.

Wake Island

Economic activity is limited to providing services to military personnel and contractors located on the island. All food and manufactured goods must be imported.

Wallis and Futuna

The economy is limited to traditional subsistence agriculture, with about 80% of labor force earnings from agriculture (coconuts and vegetables), livestock (mostly pigs), and fishing. About 4% of the population is employed in government. Revenues come from French Government subsidies, licensing of fishing rights to Japan and South Korea, import taxes, and remittances from expatriate workers in New Caledonia.

West Bank

The West Bank - the larger of the two areas comprising the Palestinian territories - experienced a high single-digit economic growth rate in 2010 as a result of inflows of donor aid, the Palestinian Authority's (PA) implementation of economic and security reforms, and the easing of some movement and access restrictions by the Israeli Government. Nevertheless, overall standard-of-living measures remain near levels seen prior to the start of the second intifada in 2000. The almost decade-long downturn largely has been a result of Israeli closure policies - a steady increase in movement and access restrictions across the West Bank in response to Israeli security concerns which have disrupted labor and trade flows, industrial capacity, and basic commerce, both external and internal.

Since 2008, the PA under President Mahmoud ABBAS and Prime Minister Salam FAYYAD has implemented a largely successful campaign of institutional reforms that has contributed to increased security and economic performance, supported by more than \$3 billion in direct foreign donor assistance to the PA's budget since 2007. An easing of some Israeli restrictions on West Bank movement and access since 2008 also has contributed to an uptick in retail activity in larger cities. The biggest impediments to economic improvements in the West Bank remain Palestinians' lack of access to land and resources in Israeli-controlled areas, import and export restrictions, and a high-cost capital structure. Absent robust private sector growth, the PA will continue to rely heavily on donor aid for its budgetary needs.

Western Sahara

Western Sahara has a small market-based economy whose main industries are fishing, phosphate mining, and pastoral nomadism. The territory's arid desert climate makes sedentary agriculture difficult, and Western Sahara imports much of its food. The Moroccan Government administers Western Sahara's economy and is a source of employment, infrastructure development, and social spending in the territory. Western Sahara's unresolved legal status makes the exploitation of its natural resources a contentious issue between Morocco and the Polisario. Morocco and the EU in July 2006 signed a four-year agreement allowing European vessels to fish off the coast of Morocco, including the disputed waters off the coast of Western Sahara. Oil has never been found in Western Sahara in commercially significant quantities, but Morocco and the Polisario have quarreled over who has the right to authorize and benefit from oil exploration in the territory. Western Sahara's main long-term economic challenge is the development of a more diverse set of industries capable of providing greater employment and income to the territory.

World In 2010, world output - and per capita income - began to recover from the 2008-09 recession, the first global downturn since 1946. Gross World Product (GWP) grew 4.6%, largely on the strength of rebounding exports, which rose about 20% from the level of 2009. Growth was not evenly distributed across countries, however. Lower income countries - those with per capita incomes below \$30,000 per year - averaged 6.3% growth, while higher income countries - with per capita incomes above \$30,000 - averaged just 2.8% growth. And countries with current account surpluses averaged 6.0% growth, while those with current account deficits averaged just 3.4% growth. Among large economies, China (+10.1%), Taiwan (+8.3%), India (+8.3%), Brazil (+7.5%), and South Korea (+6.1%) recorded the biggest GDP gains - China also became the world's largest exporter. Continuing uncertainties in mortgage and financial markets resulted in slower growth in Japan (+3.0%), the US (+2.8%), and the European Union (+1.7%). In 2010, global unemployment continued to creep upwards, reaching 8.8% - underemployment, especially in the developing world, remained

much higher. Global gross fixed investment stabilized at about 23% of GWP, after a significant drop in 2009. World trade appears to be returning to pre-2009 patterns, with current account surpluses or deficits rising for a majority of countries. World external debt, however, dropped again in 2010 - about 5% from the 2009 level, as many countries reduced borrowing. Many, if not most, countries pursued expansionary monetary and fiscal policies. The global money supply, both narrowly and broadly defined, increased roughly 10%, as countries tried to keep interest rates low; the global budget deficit stabilized at roughly \$3.5 trillion, as countries tried to rein in spending and slow the rise of public debt. The international financial crisis of 2008-09 presents the world economy with a major new challenge, together with several long-standing ones. The fiscal stimulus packages put in place in 2009-10 required most countries to run budget deficits - government balances have deteriorated for 14 out of every 15 countries. Treasuries issued new public debt - totaling \$5.5 trillion since 2008 - to pay for the additional expenditures. To keep interest rates low, many central banks monetized that debt, injecting large sums of money into the economies. As economic activity picks up, central banks will face the difficult task of containing inflation without raising interest rates so high they snuff out further growth. At the same time, governments will face the difficult task of spurring current growth and employment without saddling their economies with so much debt that they sacrifice long-term growth and financial stability. Long-standing challenges the world faces are several. The addition of 80 million people each year to an already overcrowded globe is exacerbating the problems of underemployment, pollution, waste-disposal, epidemics, water-shortages, famine, over-fishing of oceans, deforestation, desertification, and depletion of non-renewable resources. The nation-state, as a bedrock economic-political institution, is steadily losing control over international flows of people, goods, funds, and technology. Internally, central governments often find their control over resources slipping as separatist regional movements - typically based on ethnicity - gain momentum, e.g., in many of the successor states of the former Soviet Union, in the former Yugoslavia, in India, in Iraq, in Indonesia, and in Canada. Externally, central governments are losing decisionmaking powers to international bodies, most notably the EU. The introduction of the euro as the common currency of much of Western Europe in January 1999, while paving the way for an integrated economic powerhouse, poses economic risks because the participating nations are culturally and politically diverse and have varying levels and rates of growth of income, and hence, differing needs for monetary and fiscal policies. In Western Europe, governments face the difficult political problem of channeling resources away from welfare programs in order to increase investment and strengthen incentives to seek employment. Because of their own internal problems and priorities, the industrialized countries devote insufficient resources to deal effectively with the poorer areas of the world, which, at least from an economic point of view, are becoming further marginalized. The terrorist attacks on the US on 11 September 2001 accentuated a growing risk to global prosperity, illustrated, for example, by the reallocation of resources away from investment to anti-terrorist programs. Wars in Iraq and Afghanistan added new uncertainties to global economic prospects. Despite these challenges, the world economy also shows great promise. Technology has made possible further advances in all fields, from agriculture, to medicine, alternative energy, metallurgy, and transportation. Improved global communications have greatly reduced the costs of international trade, helping the world gain from the international division of labor, raise living standards, and reduce income disparities among nations. Much of the resilience of the world economy in the aftermath of the financial crisis resulted from government leaders around the globe working in concert to stem the financial onslaught, knowing well the lessons of past economic failures.

Yemen

Yemen is a low income country that is highly dependent on declining oil resources for revenue. Petroleum accounts for roughly 25% of GDP and 70% of government revenue. Yemen has tried to counter the effects of its declining oil resources by diversifying its economy through an economic reform program initiated in 2006 that is designed to bolster non-oil sectors of the economy and foreign investment. In October 2009, Yemen exported its first liquefied natural gas as part of this diversification effort. In January 2010, the international community established the Friends of Yemen group that aims to support Yemen's efforts towards economic and political reform, and in August 2010 the IMF approved a three-year \$370 million program to further this effort. Despite these ambitious endeavors, Yemen continues to face difficult long term challenges, including declining water resources and a high population growth rate.

Zambia

Zambia's economy has experienced strong growth in recent years, with real GDP growth in 2005-08 about 6% per year. Privatization of government-owned copper mines in the 1990s relieved the government from covering mammoth losses generated by the industry and greatly improved the chances for copper mining to return to profitability and spur economic growth. Copper output has increased steadily since 2004, due to higher copper prices and foreign investment. In 2005, Zambia qualified for debt relief under the Highly Indebted Poor Country Initiative, consisting of approximately USD 6 billion in debt relief. Poverty remains a significant problem in Zambia, despite a stronger economy. Declining world commodity prices and demand slowed GDP growth in 2008, but a sharp rebound in copper prices and a bumper maize crop helped Zambia recover. Lack of economic diversity subjects Zambia to fluctuations in copper prices and in the weather.

Zimbabwe

The government of Zimbabwe faces a wide variety of difficult economic problems. Its 1998-2002 involvement in the war in the Democratic Republic of the Congo drained hundreds of millions of dollars from the economy. The government's land reform program, characterized by chaos and violence, has badly damaged the commercial farming sector, the traditional source of exports and foreign exchange and the provider of 400,000 jobs, turning Zimbabwe into a net importer of food products. The EU and the US provide food aid on humanitarian grounds. Until early 2009, the Reserve Bank of Zimbabwe routinely printed money to fund the budget deficit, causing

hyperinflation. The power-sharing government formed in February 2009 has led to some economic improvements, including the cessation of hyperinflation by eliminating the use of the Zimbabwe dollar and removing price controls. The economy is registering its first growth in a decade, but will be reliant on further political improvement for greater growth.

Field Listing :: Pipelines

This entry gives the lengths and types of pipelines for transporting products like natural gas, crude oil, or petroleum products. Country

Pipelines(km)

Afghanistan
gas 466 km (2009)

Albania
gas 339 km; oil 207 km (2009)

Algeria
condensate 1,937 km; gas 14,648 km; liquid petroleum gas 2,933 km; oil 7,579 km (2009)

Angola
gas 2 km; oil 87 km (2009)

Argentina
gas 28,248 km; liquid petroleum gas 41 km; oil 5,977 km; refined products 3,636 km (2009)

Armenia
gas 2,233 km (2009)

Australia
gas 27,105 km; liquid petroleum gas 240 km; oil 3,258 km;

oil/gas/water 1 km (2009)

Austria

gas 2,721 km; oil 663 km; refined products 157 km (2009)

Azerbaijan

condensate 1 km; gas 3,361 km; oil 1,424 km (2009)

Bahrain

gas 20 km; oil 32 km (2009)

Bangladesh

gas 2,597 km (2009)

Belarus

gas 5,250 km; oil 1,528 km; refined products 1,730 km (2009)

Belgium

gas 1,330 km; oil 158 km; refined products 535 km (2009)

Bolivia

gas 5,192 km; liquid petroleum gas 51 km; oil 2,488 km;
refined products 1,590 km (2009)

Brazil

condensate/gas 62 km; gas 9,989 km; liquid petroleum gas 353
km; oil 4,517 km; refined products 4,465 km (2009)

Brunei

gas 37 km; oil 18 km (2009)

Bulgaria

gas 2,926 km; oil 339 km; refined products 156 km (2009)

Burma

gas 2,228 km; oil 558 km (2009)

Cameroon

oil 889 km (2009)

Canada

crude and refined oil 23,564 km; liquid petroleum gas 74,980
km (2009)

Chad

oil 250 km (2009)

Chile
gas 2,673 km; liquid petroleum gas 519 km; oil 892 km; refined products 769 km (2009)

China
gas 32,545 km; oil 20,097 km; refined products 10,915 km (2009)

Colombia
gas 4,567 km; oil 6,097 km; refined products 3,382 km (2009)

Congo, Democratic Republic of the gas 37 km; oil 39 km; refined products 756 km (2009)

Congo, Republic of the
gas 7 km; oil 211 km (2009)

Costa Rica
refined products 796 km (2009)

This entry includes a listing of significant political organizations and their leaders.

Country

Political parties and leaders

Afghanistan

Afghanistan Peoples' Treaty Party [Sayyed Amir TAHSEEN]; Afghanistan's Islamic Mission Organization [Abdul Rasoul SAYYAF]; Afghanistan's Islamic Nation Party [Toran Noor Aqa Ahmad ZAI]; Afghanistan's National Islamic Party [Rohullah LOUDIN]; Afghanistan's Welfare Party [Meer Asef ZAEEFI]; Afghan Social Democratic Party [Anwarul Haq AHADI]; Afghan Society for the Call to the Koran and Sunna [Mawlawee Samiullah NAJEEBEE]; Comprehensive Movement of Democracy and Development of Afghanistan Party [Sher Mohammad BAZGAR]; Democratic Party of Afghanistan [Al-hajj Mohammad Tawos ARAB]; Democratic Party of Afghanistan [Abdul Kabir RANJBAR]; Elites People of Afghanistan Party [Abdul Hamid JAWAD]; Freedom and Democracy Movement of Afghanistan [Abdul Raqib Jawid KOHISTANEE]; Freedom Party of Afghanistan [Abdul MALEK]; Freedom Party of Afghanistan [Dr. Ghulam Farooq NEJRABEE]; Hizullah-e-Afghanistan [Qari Ahmad ALI]; Human Rights Protection and Development Party of Afghanistan [Baryalai NASRATI]; Islamic Justice Party of Afghanistan [Mohammad Kabir MARZBAN]; Islamic Movement of Afghanistan [Mohammad Ali JAWID]; Islamic Movement of Afghanistan Party [Mohammad Mukhtar MUFLEH]; Islamic Party of Afghanistan [Mohammad Khalid FAROOQI, Abdul Hadi ARGHANDIWAL]; Islamic Party of the Afghan Land [Mohammad Hassan FEROKHEL]; Islamic People's Movement of Afghanistan [Al-haj Said Hussain ANWARY]; Islamic Society of Afghanistan [Ustad RABBANI]; Islamic Unity of the Nation of Afghanistan Party [Qurban Ali URFANI]; Islamic Unity Party of Afghanistan [Mohammad Karim KHALILI]; Islamic Unity Party of the People of Afghanistan [Haji Mohammad MOHAQQEQ]; Labor and Progress of Afghanistan Party [Zulfiqar OMID]; Muslim People of Afghanistan Party [Besmellah JOYAN]; Muslim Unity Movement Party of Afghanistan [Wazir Mohammad WAHDAT]; National and Islamic Sovereignty Movement Party of Afghanistan [Ahmad Shah AHMADZAI]; National Congress Party of Afghanistan [Abdul Latif PEDRAM]; National Country Party [Ghulam MOHAMMAD]; National Development Party of Afghanistan [Dr. Assef BAKTASH]; National Freedom Seekers Party [Abdul Hadi DABEER]; National Independence Party of Afghanistan [Taj Mohammad WARDAK]; National Islamic Fighters Party of Afghanistan [Amanat NINGARHAREE]; National Islamic Front of Afghanistan [Pir Sayed Ahmad GAILANEE]; National Islamic Moderation Party of Afghanistan [Qara Baik

IZADYAR]; National Islamic Movement of Afghanistan [Sayed NOORULLAH]; National Islamic Unity Party of Afghanistan [Mohammad AKBAREE]; National Movement of Afghanistan [Ahmad Wali MASOUD]; National Party of Afghanistan [Abdul Rashid ARYAN]; National Patch of Afghanistan Party [Sayed Kamal SADAT]; National Peace Islamic Party of Afghanistan [Shah Mohammood Popal ZAI]; National Peace & Islamic Party of the Tribes of Afghanistan [Abdul Qaher SHARIATEE]; National Peace & Unity Party of Afghanistan [Abdul Qader IMAMI]; National Prosperity and Islamic Party of Afghanistan [Mohammad Osman SALEKZADA]; National Prosperity Party [Mohammad Hassan JAHFAREE]; National Solidarity Movement of Afghanistan [Pir Sayed Eshaq GAILANEE]; National Solidarity Party of Afghanistan [Sayed Mansoor NADREEI]; National Sovereignty Party [Sayed Mustafa KAZEMI]; National Stability Party [Mohammad Same KHAROTI]; National Stance Party [Habibullah JANEBDAR]; National Tribal Unity Islamic Party of Afghanistan [Mohammad Shah KHOGYANI]; National Unity Movement [Sultan Mohammad GHAZI]; National Unity Movement of Afghanistan [Mohammad Nadir AATASH]; National Unity Party of Afghanistan [Abdul Rashid JALILI]; New Afghanistan Party [Mohammad Yunis QANUNI]; Peace and National Welfare Activists Society [Shamsul al-Haq Noor SHAMS]; Peace Movement [Shahnawaz TANAI]; People's Aspirations Party of Afghanistan [Ilhaj Saraj-u-din ZAFAREE]; People's Freedom Seekers Party of Afghanistan [Feda Mohammad EHSAS]; People's Liberal Freedom Seekers Party of Afghanistan [Ajmal SUHAIL]; People's Message Party of Afghanistan [Noor Aqa WAINEE]; People's Movement of the National Unity of Afghanistan [Abdul Hakim NOORZAI]; People's Party of Afghanistan [Ahmad Shah ASAR]; People's Prosperity Party of Afghanistan [Ustad Mohammad ZAREEF]; People's Sovereignty Movement of Afghanistan [Hayatullah SUBHANEI]; People's Uprising Party of Afghanistan [Sayed Zahir Qayedam Al-BELADI]; People's Welfare Party of Afghanistan [Miagul WASIQ]; People's Welfare Party of Afghanistan [Mohammad Zubair PAIROZ]; Progressive Democratic Party of Afghanistan [Mohammad Wali ARYA]; Republican Party [Sebghatullah SANJAR]; Solidarity Party of Afghanistan [Abdul Khaleq NEMAT]; The Afghanistan's Mujahid Nation's Islamic Unity Movement [Saeedullah SAEED]; The People of Afghanistan's Democratic Movement [Mohammad Sharif NAZARI]; Tribes Solidarity Party of Afghanistan [Mohammad Zarif NASERI]; Understanding and Democracy Party of Afghanistan [Ahamad SHAHEEN]; United Afghanistan Party [Mohammad Wasil RAHIMEE]; United Islamic Party of Afghanistan [Wahidullah SABAWOON]; Young Afghanistan's Islamic Organization [Sayed Jawad HUSSINEE]; Youth Solidarity Party of Afghanistan [Mohammad Jamil KARZAI]; note - includes only political parties approved by the Ministry of Justice

Albania

Democratic Party or PD [Sali BERISHA]; Party for Justice and Integration or PDI [Tahir MUCHEDINI]; Republican Party or PR [Fatmir MEDIU]; Socialist Movement for Integration or LSI [Ilir META]; Socialist Party or PS [Edi RAMA]; Unity for Human Rights Party or PBDNJ [Vangjel DULE]

Algeria

Ahd 54 [Ali Fauzi REBAINE]; Algerian National Front or FNA [Moussa TOUATI]; National Democratic Rally (Rassemblement National Democratique) or RND [Ahmed OUYAHIA]; National Liberation Front or FLN [Abdelaziz BELKHADEM, secretary general]; National Reform Movement or Islah [Ahmed ABDESLAM] (formerly MRN); Rally for Culture and Democracy or RCD [Said SADI]; Renaissance Movement or EnNahda Movement [Fatah RABEI]; Socialist Forces Front or FFS [Hocine Ait AHMED]; Society of Peace Movement or MSP [Boudjerra SOLTANI]; Workers Party or PT [Louisa HANOUNE]

note: a law banning political parties based on religion was enacted in March 1997

American Samoa

Democratic Party [Oreta M. TOGAFUA]; Republican Party [Tautai A. F. FAALEVAO]

Andorra

Andorra for Change [Juan Eusebio NOMEN CALVET]; Greens of Andorra [Isabel LOZANO MUNOZ]; Liberal Party of Andorra or PLA [Joan GABRIEL i ESTANY] (formerly Liberal Union or UL); New Center [Vicenc MATEU] (formerly Andorran Democratic Center Party); Reformist Coalition [Joan GABRIEL i ESTANY] (includes the Liberal Party and New Center); Social Democratic Party or PS [Jaume BARTUMEU CASSANY] (formerly part of National Democratic Group or AND)

Angola

National Front for the Liberation of Angola or FNLA [Ngola KABANGU]; National Union for the Total Independence of Angola or UNITA [Isaias SAMAKUVA] (largest opposition party); New Democracy Electoral Union or ND [Quintino de MOREIRA]; Popular Movement for the Liberation of Angola or MPLA [Jose Eduardo DOS SANTOS] (ruling party in power since 1975); Social Renewal Party or PRS [Eduardo KUANGANA]

note: nine other parties participated in the legislative election in September 2008 but won no seats

Anguilla

Anguilla Progressive Party or APP [Roy ROGERS]; Anguilla

Strategic Alternative or ANSA [Edison BAIRD]; Anguilla United Front or AUF [Osbourne FLEMING, Victor BANKS] (a coalition of the Anguilla Democratic Party or ADP and the Anguilla National Alliance or ANA); Anguilla United Movement or AUM [Hubert HUGHES]

Antigua and Barbuda

Antigua Labor Party or ALP [Lester Bryant BIRD]; Barbuda People's Movement or BPM [Thomas H. FRANK]; Barbuda People's Movement for Change [Arthur NIBBS]; Barbudans for a Better Barbuda [Ordrick SAMUEL]; United Progressive Party or UPP [Baldwin SPENCER] (a coalition of three parties - Antigua Caribbean Liberation Movement or ACLM, Progressive Labor Movement or PLM, United National Democratic Party or UNDP)

Argentina

Civic and Social Accord or ACyS (a broad center-left alliance-including the CC, UCR, and Socialist parties-created ahead of the 2009 legislative elections); Civic Coalition or CC (a broad coalition loosely affiliated with Elisa CARRIO); Dissident Peronists or PJ Disidente (a sector of the Justicialist Party opposed to the Kirchners); Front for Victory or FpV (a broad coalition, including elements of the UCR and numerous provincial parties) [Cristina FERNANDEZ DE KIRCHNER]; Interbloque Federal or IF (a broad coalition of approximately 12 parties including PRO); Justicialist Party or PJ [Daniel SCIOLI]; Radical Civic Union or UCR [Ernesto SANZ]; Republican Proposal or PRO [Mauricio MACRI] (including Federal Recreate Movement or RECREAR [Esteban BULLRICH]; Socialist Party or PS [Ruben GIUSTINIANI]; Union For All [Patricia BULLRICH] (associated with the Civic Coalition); numerous provincial parties

Armenia

Armenian National Congress or ANC (bloc of independent and opposition parties) [Levon TER-PETROSSIAN]; Armenian National Movement or ANM [Ararat ZURABIAN]; Armenian Revolutionary Federation ("Dashnak" Party) or ARF [Hrant MARKARIAN]; Heritage Party [Raffi HOVHANNISIAN]; People's Party of Armenia [Stepan DEMIRCHIAN]; Prosperous Armenia [Gagik TSARUKIAN]; Republican Party of Armenia or HHK [Serzh SARGSIAN]; Rule of Law Party (Orinats Yerkir) [Artur BAGHDASARIAN]

Aruba

Aliansa/Aruban Social Movement or MSA [Robert WEVER]; Aruban Liberal Organization or OLA [Glenbert CROES]; Aruban Patriotic Movement or MPA [Monica ARENDS-KOCK]; Aruban Patriotic Party or PPA [Benny NISBET]; Aruban People's Party or AVP [Mike EMAN]; People's

Electoral Movement Party or MEP [Nelson O. ODUBER]; Real Democracy or PDR [Andin BIKKER]; RED [Rudy LAMPE]; Workers Political Platform or PTT [Gregorio WOLFF]

Australia

Australian Greens [Bob BROWN]; Australian Labor Party [Julia GILLARD]; Family First Party [Steve FIELDING]; Liberal Party [Tony ABBOTT]; The Nationals [Warren TRUSS]

Austria

Alliance for the Future of Austria or BZOe [Josef BUCHER]; Austrian People's Party or OeVP [Josef PROELL]; Freedom Party of Austria or FPÖe [Heinz Christian STRACHE]; Social Democratic Party of Austria or SPOe [Werner FAYMANN]; The Greens [Eva GLAWISCHNIG]

Azerbaijan

Iran

formal political parties are a relatively new phenomenon in Iran and most conservatives still prefer to work through political pressure groups rather than parties; often political parties or coalitions are formed prior to elections and disbanded soon thereafter; a loose pro-reform coalition called the 2nd Khordad Front, which includes political parties as well as less formal groups and organizations, achieved considerable success in elections for the sixth Majles in early 2000; groups in the coalition included the Islamic Iran Participation Front (IIPF), Executives of Construction Party (Kargozaran), Solidarity Party, Islamic Labor Party, Mardom Salari, Mojahedin of the Islamic Revolution Organization (MIRO), and Militant Clerics Society (Ruhaniyun); the coalition participated in the seventh Majles elections in early 2004; following his defeat in the 2005 presidential elections, former MCS Secretary General and sixth Majles Speaker Mehdi KARUBI formed the National Trust Party; a new conservative group, Islamic Iran Developers Coalition (Abadgaran), took a leading position in the new Majles after winning a majority of the seats in February 2004; following the 2004 Majles elections, traditional and hardline conservatives have attempted to close ranks under the United Front of Principlists and the Broad Popular Coalition of Principlists; several reformist groups, such as the Mujahadin of the Islamic Revolution, came together as a reformist coalition in advance of the 2008 Majles elections; the IIPF has repeatedly complained that the

overwhelming majority of its candidates have been unfairly disqualified from the 2008 elections

Iraq

Badr Organization [Hadi al-AMIRI]; Da'wa al-Islamiya Party [Prime Minister Nuri al-MALIKI]; Da'wa Tanzim [Hashim al-MUSAWI branch]; Da-wa Tanzim [Abd al-Karim al-ANZI branch]; Fadilah Party [Hashim al-HASHIMI]; Hadba Gathering [Athil al-NUJAYFI]; Iraqi Charter Assembly [Ahmad Abd al-Ghafur al-SAMARRAI]; Iraqi Constitutional Party [Jawad al-BULANI]; Iraqi Front for National Dialogue [Salih al-MUTLAQ]; Iraqi Islamic Party or IIP [Usama al-TIKRITI]; Iraqi Justice and Reform Movement [Shaykh Abdallah al-YAWR]; Iraqi National Congress or INC [Ahmad CHALABI]; Iraqi National Accord or INA [former Prime Minister Ayad ALLAWI]; Islamic Supreme Council of Iraq or ISCI [Ammar al-HAKIM]; Kurdistan Democratic Party or KDP [Kurdistan Regional Government President Masud BARZANI]; National Gathering [Deputy Prime Minister Rafi al-ISSAWI]; National Movement for Reform and Development [Jamal al-KARBULI]; National Reform Trend [former Prime Minister Ibrahim al-JAFARI]; Patriotic Union of Kurdistan or PUK [Jalal TALABANI]; Renewal List [Vice President Tariq al-HASHIMI]; Sadrist Trend [Muqtada al-SADR]; Sahawa al-Iraq [Ahmad al-RISHAWI]; Tawafuq Front
note: numerous smaller local, tribal, and minority parties

African National Party or ANP [Egypt DZINEMUNHENZVA]; Movement for Democratic Change or MDC [Morgan TSVANGIRAI]; Movement for Democratic Change - Mutambara or MDC-M [Arthur MUTAMBARA] (splinter faction of the MDC); Peace Action is Freedom for All or PAFA; United Parties [Abel MUZOREWA]; United People's Party or UPP [Daniel SHUMBA]; Zimbabwe African National Union-Ndonga or ZANU-Ndonga [Wilson KUMBULA]; Zimbabwe African National Union-Patriotic Front or ZANU-PF [Robert Gabriel MUGABE]; Zimbabwe African Peoples Union or ZAPU [Agrippa MADLELA]; Zimbabwe Youth in Alliance or ZIYA

@2119

Field Listing :: Population

This entry gives an estimate from the US Bureau of the Census based on statistics from population censuses, vital statistics registration systems, or sample surveys pertaining to the recent past and on assumptions about future trends. The total population presents one overall measure of the potential impact of the country on the world and within its region. Note: Starting with the 1993 Factbook, demographic estimates for some countries (mostly African) have explicitly taken into account the effects of the growing impact of the HIV/AIDS epidemic. These countries are currently: The Bahamas, Benin, Botswana, Brazil, Burkina Faso, Burma, Burundi, Cambodia, Cameroon, Central African Republic, Democratic Republic of the Congo, Republic of the Congo, Cote d'Ivoire, Ethiopia, Gabon, Ghana, Guyana, Haiti, Honduras, Kenya, Lesotho, Malawi, Mozambique, Namibia, Nigeria, Rwanda, South Africa, Swaziland, Tanzania, Thailand, Togo,

Population

Afghanistan

29,121,286

note: this is a significantly revised figure; the previous estimate of 33,609,937 was extrapolated from the last Afghan census held in 1979, which was never completed because of the Soviet invasion; a new Afghan census is scheduled to take place in 2010 (July 2010 est.)

Akrotiri

approximately 15,700 live on the Sovereign Base Areas of Akrotiri and Dhekelia including 7,700 Cypriots, 3,600 Service and UK-based contract personnel, and 4,400 dependents

Albania

2,986,952 (July 2010 est.)

Algeria

34,586,184 (July 2010 est.)

American Samoa

66,432 (July 2010 est.)

Andorra

84,525 (July 2010 est.)

Angola

13,068,161 (July 2010 est.)

Anguilla

14,766 (July 2010 est.)

Antarctica

no indigenous inhabitants, but there are both permanent and summer-only staffed research stations

note: 29 nations, all signatory to the Antarctic Treaty, operate through their National Antarctic Program a number of seasonal-only (summer) and year-round research stations on the continent and its nearby islands south of 60 degrees south latitude (the region covered by the Antarctic Treaty); the population doing and supporting science or engaged in the management and protection of the Antarctic region varies from approximately 4,400 in summer to 1,100 in winter; in addition, approximately 1,000 personnel,

including ship's crew and scientists doing onboard research, are present in the waters of the treaty region; peak summer (December-February) population - 4,490 total; Argentina 667, Australia 200, Australia and Romania jointly 13, Belgium 20, Brazil 40, Bulgaria 18, Chile 359, China 90, Czech Republic 20, Ecuador 26, Finland 20, France 125, France and Italy jointly 60, Germany 90, India 65, Italy 102, Japan 125, South Korea 70, NZ 85, Norway 44, Peru 28, Poland 40, Russia 429, South Africa 80, Spain 50, Sweden 20, Ukraine 24, UK 217, US 1,293, Uruguay 70 (2008-2009); winter (June-August) station population - 1,106 total; Argentina 176, Australia 62, Brazil 12, Chile 114, China 29, France 26, France and Italy jointly 13, Germany 9, India 25, Japan 40, South Korea 18, NZ 10, Norway 7, Poland 12, Russia 148, South Africa 10, Ukraine 12, UK 37, US 337, Uruguay 9 (2009); research stations operated within the Antarctic Treaty area (south of 60 degrees south latitude) by National Antarctic Programs: year-round stations - 40 total; Argentina 6, Australia 3, Brazil 1, Chile 6, China 2, France 1, France and Italy jointly 1, Germany 1, India 1, Japan 1, South Korea 1, NZ 1, Norway 1, Poland 1, Russia 5, South Africa 1, Ukraine 1, UK 2, US 3, Uruguay 1 (2009); a range of seasonal-only (summer) stations, camps, and refuges - Argentina, Australia, Belgium, Bulgaria, Brazil, Chile, China, Czech Republic, Ecuador, Finland, France, Germany, India, Italy, Japan, South Korea, New Zealand, Norway, Peru, Poland, Romania (with Australia), Russia, South Africa, Spain, Sweden, Ukraine, UK, US, and Uruguay (2008-2009); in addition, during the austral summer some nations have numerous occupied locations such as tent camps, summer-long temporary facilities, and mobile traverses in support of research (May 2009 est.)

Antigua and Barbuda
86,754 (July 2010 est.)

Argentina
41,343,201 (July 2010 est.)

Armenia
2,966,802 (July 2010 est.)

Aruba
104,589
note: estimate based on a revision of the base population, fertility, and mortality numbers, as well as a revision of 1985-99 migration estimates from outmigration to immigration, which is assumed to continue into the future; the new results are consistent

with the 2000 census (July 2010 est.)

Ashmore and Cartier Islands no indigenous inhabitants note: Indonesian fishermen are allowed access to the lagoon and fresh water at Ashmore Reef's West Island; access to East and Middle Islands is by permit only

Australia

21,515,754 (July 2010 est.)

Austria

8,214,160 (July 2010 est.)

Azerbaijan

8,303,512 (July 2010 est.)

Bahamas, The

310,426

note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

Bahrain 738,004 note: includes 235,108 non-nationals (July 2010 est.)

Bangladesh

156,118,464 (July 2010 est.)

Barbados

285,653 (July 2010 est.)

Belarus

9,612,632 (July 2010 est.)

Belgium

10,423,493 (July 2010 est.)

Belize

314,522 (July 2010 est.)

Benin

9,056,010

note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of

population by age and sex than would otherwise be expected (July 2010 est.)

Bermuda

68,265 (July 2010 est.)

Bhutan

699,847

note: the Factbook population estimate is consistent with the first modern census of Bhutan, conducted in 2005; previous Factbook population estimates for this country, which were on the order of three times the total population reported here, were based on Bhutanese government publications that did not include the census (July 2010 est.)

Bolivia

9,947,418 (July 2010 est.)

Bosnia and Herzegovina

4,621,598 (July 2010 est.)

Botswana

2,029,307

note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

Bouvet Island

uninhabited

Brazil

201,103,330

note: Brazil conducted a census in August 2000, which reported a population of 169,872,855; that figure was about 3.8% lower than projections by the US Census Bureau, and is close to the implied underenumeration of 4.6% for the 1991 census (July 2010 est.)

British Indian Ocean Territory

no indigenous inhabitants

note: approximately 1,200 former agricultural workers resident in the Chagos Archipelago, often referred to as Chagossians or Ilois, were relocated to Mauritius and the Seychelles in the 1960s and 1970s; in November 2004, approximately 4,000 UK and US military

personnel and civilian contractors were living on the island of
Diego Garcia

British Virgin Islands
24,939 (July 2010 est.)

Brunei
395,027 (July 2010 est.)

Bulgaria
7,148,785 (July 2010 est.)

Burkina Faso
16,241,811
note: estimates for this country explicitly take into account the
effects of excess mortality due to AIDS; this can result in lower
life expectancy, higher infant mortality, higher death rates, lower
population growth rates, and changes in the distribution of
population by age and sex than would otherwise be expected (July
2010 est.)

Burma

53,414,374

note: estimates for this country take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

Burundi

9,863,117

note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

Cambodia

14,453,680

note: estimates for this country take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

Cameroon

19,294,149

note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

Canada

33,759,742 (July 2010 est.)

Cape Verde

508,659 (July 2010 est.)

Cayman Islands

50,209

note: most of the population lives on Grand Cayman (July 2010 est.)

Central African Republic

4,844,927

note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

Pakistan

184,404,791 (July 2010 est.)

Palau

20,879 (July 2010 est.)

Panama

3,410,676 (July 2010 est.)

Papua New Guinea

6,064,515 (July 2010 est.)

Paracel Islands no indigenous inhabitants note: there are scattered Chinese garrisons

Paraguay

6,375,830 (July 2010 est.)

Peru

29,907,003 (July 2010 est.)

Philippines

99,900,177 (July 2010 est.)

Pitcairn Islands

48 (July 2010 est.)

Poland

38,463,689 (July 2010 est.)

Portugal

10,735,765 (July 2010 est.)

Puerto Rico

3,978,702 (July 2010 est.)

Qatar

840,926 (July 2010 est.)

Romania

21,959,278 (July 2010 est.)

Russia

139,390,205 (July 2010 est.)

Rwanda

11,055,976

note: estimates for this country explicitly take into account the

effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

Saint Barthelemy

7,406 (July 2010 est.)

Saint Helena, Ascension, and Tristan da Cunha

7,670

note: only Saint Helena, Ascension, and Tristan da Cunha islands are inhabited (July 2010 est.)

Saint Kitts and Nevis

49,898 (July 2010 est.)

Saint Lucia

160,922 (July 2010 est.)

Saint Martin

30,235 (July 2010 est.)

Saint Pierre and Miquelon

5,943 (July 2010 est.)

Saint Vincent and the Grenadines

104,217 (July 2010 est.)

Samoa

192,001

note: prior estimates used official net migration data by sex, but a highly unusual pattern for 1993 lead to a significant imbalance in the sex ratios (more men and fewer women) and a seeming reduction in the female population; the revised total was calculated using a 1993 number that was an average of the 1992 and 1994 migration figures (July 2010 est.)

San Marino

31,477 (July 2010 est.)

Sao Tome and Principe

175,808 (July 2010 est.)

Saudi Arabia 25,731,776 note: includes 5,576,076 non-nationals (July 2010 est.)

Senegal 12,323,252 (July 2010 est.)

Serbia 7,344,847 note: does not include the population of Kosovo (July 2010 est.)

Seychelles
88,340 (July 2010 est.)

Sierra Leone
5,245,695 (July 2010 est.)

Singapore
4,701,069 (July 2010 est.)

Sint Maarten
37,429 (January 2010 est.)

Slovakia
5,470,306 (July 2010 est.)

Slovenia
2,003,136 (July 2010 est.)

Solomon Islands
559,198 (July 2010 est.)

Somalia
10,112,453
note: this estimate was derived from an official census taken in 1975 by the Somali Government; population counting in Somalia is complicated by the large number of nomads and by refugee movements in response to famine and clan warfare (July 2010 est.)

South Africa
49,109,107
note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

South Georgia and South Sandwich Islands no indigenous inhabitants note: the small military garrison on South Georgia withdrew in March 2001 replaced by a permanent group of scientists of the British Antarctic Survey, which also has a biological station on Bird Island; the South Sandwich Islands are uninhabited

Spain

46,505,963 (July 2010 est.)

Spratly Islands

no indigenous inhabitants

note: there are scattered garrisons occupied by personnel of several claimant states

Sri Lanka

21,513,990

note: since the outbreak of hostilities between the government and armed Tamil separatists in the mid-1980s, several hundred thousand Tamil civilians have fled the island and more than 200,000 Tamils have sought refuge in the West (July 2010 est.)

Sudan

43,939,598 (July 2010 est.)

Suriname

486,618 (July 2010 est.)

Svalbard

2,067 (July 2010 est.)

Swaziland

1,354,051

note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

Sweden

9,074,055 (July 2010 est.)

Switzerland

7,623,438 (July 2010 est.)

Syria

22,198,110 (July 2010 est.)

note: approximately 19,100 Israeli settlers live in the Golan Heights (2008 est.)

Taiwan

23,024,956 (July 2010 est.)

Tajikistan

7,487,489 (July 2010 est.)

Tanzania

41,892,895

note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

Thailand

67,089,500

note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

Timor-Leste

1,154,625

note: other estimates range as low as 800,000 (July 2010 est.)

Togo

6,587,239

note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

Tokelau

1,400 (July 2010 est.)

Tonga

122,580 (July 2010 est.)

Trinidad and Tobago

1,228,691 (July 2010 est.)

Tunisia

10,589,025 (July 2010 est.)

Turkey
77,804,122 (July 2010 est.)

Turkmenistan
4,940,916 (July 2010 est.)

Turks and Caicos Islands
23,528 (July 2010 est.)

Tuvalu
10,472 (July 2010 est.)

Uganda
33,398,682
note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

Ukraine
45,415,596 (July 2010 est.)

United Arab Emirates
4,975,593
note: estimate is based on the results of the 2005 census that included a significantly higher estimate of net immigration of non-citizens than previous estimates (July 2010 est.)

United Kingdom
62,348,447 (July 2010 est.)

United States
310,232,863 (July 2010 est.)

United States Pacific Island Wildlife Refuges
no indigenous inhabitants
note: public entry is by special-use permit from US Fish and Wildlife Service only and generally restricted to scientists and educators; visited annually by US Fish and Wildlife Service
Johnston Atoll: in previous years, an average of 1,100 US military and civilian contractor personnel were present; as of May 2005, all US government personnel had left the island
Midway Islands: approximately 40 people make up the staff of US Fish

and Wildlife Service and their services contractor living at the
atoll

Palmyra Atoll: four to 20 Nature Conservancy, US Fish and Wildlife
staff, and researchers

Uruguay
3,510,386 (July 2010 est.)

Uzbekistan
27,865,738 (July 2010 est.)

Vanuatu
221,552 (July 2010 est.)

Venezuela
27,223,228 (July 2010 est.)

Vietnam
89,571,130 (July 2010 est.)

Virgin Islands
109,750 (July 2010 est.)

Wake Island
no indigenous inhabitants
note: approximately 150 military personnel and civilian contractors
maintain and operate the airfield and communications facilities
(2009)

Wallis and Futuna
15,343 (July 2010 est.)

West Bank
2,514,845 (July 2010 est.)
note: approximately 296,700 Israeli settlers live in the West Bank
(2009 est.); approximately 192,800 Israeli settlers live in East
Jerusalem (2008 est.)

Western Sahara
491,519
note: estimate is based on projections by age, sex, fertility,
mortality, and migration; fertility and mortality are based on data
from neighboring countries (July 2010 est.)

World
6,768,181,146 (July 2010 est.)

Yemen

23,495,361 (July 2010 est.)

Zambia

13,460,305

note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

Zimbabwe

11,651,858

note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2010 est.)

@2120

Field Listing :: Ports and terminals

This entry lists major ports and terminals primarily on the basis of the amount of cargo tonnage shipped through the facilities on an annual basis. In some instances, the number of containers handled or ship visits were also considered. Country

Ports and terminals

Afghanistan

Kheyraabad, Shir Khan

Albania

Durres, Sarande, Shengjin, Vlore

Algeria

Algiers, Annaba, Arzew, Bejaia, Djendjene, Jijel,

Aruba

Barcadera, Oranjestad, Sint Nicolaas

Ashmore and Cartier Islands

none; offshore anchorage only

Atlantic Ocean

Alexandria (Egypt), Algiers (Algeria), Antwerp
(Belgium), Barcelona (Spain), Buenos Aires (Argentina), Casablanca
(Morocco), Colon (Panama), Copenhagen (Denmark), Dakar (Senegal),
Gdansk (Poland), Hamburg (Germany), Helsinki (Finland), Las Palmas
(Canary Islands, Spain), Le Havre (France), Lisbon (Portugal),
London (UK), Marseille (France), Montevideo (Uruguay), Montreal
(Canada), Naples (Italy), New Orleans (US), New York (US), Oran
(Algeria), Oslo (Norway), Peiraiefs or Piraeus (Greece), Rio de
Janeiro (Brazil), Rotterdam (Netherlands), Saint Petersburg
(Russia), Stockholm (Sweden)

Australia

Brisbane, Cairns, Dampier, Darwin, Fremantle, Gladstone,
Geelong, Hay Point, Hobart, Jervis Bay, Melbourne, Newcastle, Port
Adelaide, Port Dalrymple, Port Hedland, Port Kembla, Port Lincoln,
Port Walcott, Sydney

Austria

Enns, Krems, Linz, Vienna

Azerbaijan

Baku (Baki)

Bahamas, The

Freeport, Nassau, South Riding Point

Bahrain

Mina' Salman, Sitrah

Bangladesh

Chittagong, Mongla Port

Barbados

Bridgetown

Belarus

Mazyr

Belgium

cargo ports (tonnage): Antwerp, Gent, Liege, Zeebrugge

container ports (TEUs): Antwerp (8,662,891), Zeebrugge (2,209,715)

Belize

Belize City, Big Creek

Benin

Cotonou

Bermuda

Hamilton, Ireland Island, Saint George

Bolivia

Puerto Aguirre (inland port on the Paraguay/Parana waterway
at the Bolivia/Brazil border); Bolivia has free port privileges in
maritime ports in Argentina, Brazil, Chile, and Paraguay

Bosnia and Herzegovina

Bosanska Gradiska, Bosanski Brod, Bosanski

Samac, and Brcko (all inland waterway ports on the Sava River),
Orasje

Bouvet Island

none; offshore anchorage only

Brazil

cargo ports (tonnage): Ilha Grande (Gebig), Paranagua, Rio Grande, Santos, Sao Sebastiao, Tubarao

container ports (TEUs): Santos (2,677,839), Itajai (693,580)

British Indian Ocean Territory

Diego Garcia

British Virgin Islands

Road Harbor

Brunei

Lumut, Muara, Seria

Bulgaria

Burgas, Varna

Burma

Moulmein, Rangoon, Sittwe

Burundi

Bujumbura

Cambodia

Phnom Penh, Kampong Saom (Sihanoukville)

Cameroon

Douala, Garoua, Limboh Terminal

Canada

Fraser River Port, Halifax, Hamilton, Montreal, Port-Cartier, Quebec City, Saint John (New Brunswick), Sept-Isles, Vancouver

Cape Verde

Porto Grande

Cayman Islands

Cayman Brac, George Town

Central African Republic

Bangui, Nola, Salo, Nzinga

Chile
Coronel, Huasco, Lirquen, Puerto Ventanas, San Antonio, San Vicente, Valparaiso

China
Dalian, Guangzhou, Ningbo, Qingdao, Qinhuangdao, Shanghai, Shenzhen, Tianjin

Christmas Island
Flying Fish Cove

Clipperton Island
none; offshore anchorage only

Cocos (Keeling) Islands
Port Refuge

Colombia
Barranquilla, Buenaventura, Cartagena, Puerto Bolivar, Santa Marta, Turbo

Comoros
Mayotte, Mutsamudu

Congo, Democratic Republic of the
Banana, Boma, Bukavu, Bumba, Goma, Kalemie, Kindu, Kinshasa, Kisangani, Matadi, Mbandaka

Congo, Republic of the
Brazzaville, Djeno, Impfondo, Ouesso, Oyo, Pointe-Noire

Cook Islands
Avatiu

Coral Sea Islands
none; offshore anchorage only

Costa Rica
Caldera, Puerto Limon

Cote d'Ivoire
Abidjan, Espoir, San-Pedro

Croatia
Omisaalj, Ploce, Rijeka, Sibernik, Split, Vukovar (on Danube River)

Cuba
Antilla, Cienfuegos, Guantanamo, Havana, Matanzas, Mariel,
Nuevitas Bay, Santiago de Cuba, Tanamo

Curacao
Bullen Baai, Fuik Bay, Willemstad

Cyprus
area under government control: Larnaca, Limassol, Vasilikos;;
area administered by Turkish Cypriots: Famagusta, Kyrenia

Czech Republic
Decin, Prague, Usti nad Labem

Denmark
Aalborg, Aarhus, Copenhagen, Ensted, Esbjerg, Fredericia,
Kalundborg

Djibouti
Djibouti

Dominica
Portsmouth, Roseau

Dominican Republic
Andres (Boca Chica), Puerto Haina, Puerto Plata,
Santo Domingo

Ecuador
Esmeraldas, Guayaquil, Manta, Puerto Bolivar

Egypt
Ayn Sukhnah, Alexandria, Damietta, El Dekheila, Port Said,
Sidi Kurayr, Suez

El Salvador
Acajutla, Puerto Cutuco

Equatorial Guinea
Bata, Luba, Malabo (2010)

Eritrea
Assab, Massawa

Estonia
Kuivastu, Kunda, Muuga, Parnu Reid, Sillamae, Tallinn

Ethiopia

Ethiopia is landlocked and uses ports of Djibouti in Djibouti and Berbera in Somalia

European Union

Antwerp (Belgium), Barcelona (Spain), Braila (Romania), Bremen (Germany), Burgas (Bulgaria), Constanta (Romania), Copenhagen (Denmark), Galati (Romania), Gdansk (Poland), Hamburg (Germany), Helsinki (Finland), Las Palmas (Canary Islands, Spain), Le Havre (France), Lisbon (Portugal), London (UK), Marseille (France), Naples (Italy), Peiraiefs or Piraeus (Greece), Riga (Latvia), Rotterdam (Netherlands), Stockholm (Sweden), Tallinn (Estonia), Tulcea (Romania), Varna (Bulgaria)

Falkland Islands (Islas Malvinas)

Stanley

Faroe Islands

Fuglafjordur, Torshavn, Vagur

Fiji

Lautoka, Levuka, Suva

Finland

Helsinki, Kotka, Naantali, Porvoo, Rauma, Rauma

France

Calais, Dunkerque, Le Havre, Marseille, Nantes, Paris, Rouen

French Polynesia

Papeete

French Southern and Antarctic Lands

none; offshore anchorage only

Gabon

Gamba, Libreville, Lucinda, Owendo, Port-Gentil

Gambia, The

Banjul

Gaza Strip

Gaza

Georgia

Bat'umi, P'ot'i

Germany
Bremen, Bremerhaven, Duisburg, Hamburg, Karlsruhe, Lubeck,
Neuss-Dusseldorf, Rostock, Wilhemshaven

Ghana
Takoradi, Tema

Gibraltar
Gibraltar

Greece
Agioi Theodoroi, Aspropyrgos, Pachi, Piraeus, Thessaloniki

Greenland
Sisimiut

Grenada
Saint George's

Guam
Apra Harbor

Guatemala
Puerto Quetzal, Santo Tomas de Castilla

Guernsey
Braye Bay, Saint Peter Port

Guinea
Conakry, Kamsar

Guinea-Bissau
Bissau, Buba, Cacheu, Farim

Guyana
Georgetown

Haiti
Cap-Haitien, Gonaives, Jacmel, Port-au-Prince

Heard Island and McDonald Islands
none; offshore anchorage only

Honduras
La Ceiba, Puerto Cortes, San Lorenzo, Tela

Hong Kong

Hong Kong

Hungary

Budapest, Dunaujvaros, Gyor-Gonyu, Csepel, Baja, Mohacs

Iceland

Grundartangi, Hafnarfjordur, Reykjavik

India

Chennai, Jawaharal Nehru, Kandla, Kolkata (Calcutta), Mumbai (Bombay), Sikka, Vishakhapatnam

Indian Ocean

Chennai (Madras; India), Colombo (Sri Lanka), Durban (South Africa), Jakarta (Indonesia), Kolkata (Calcutta; India) Melbourne (Australia), Mumbai (Bombay; India), Richards Bay (South Africa)

Indonesia

Banjarmasin, Belawan, Kotabaru, Krueg Geukueh, Palembang, Panjang, Sungai Pakning, Tanjung Perak, Tanjung Priok

Iran

Assaluyeh, Bandar Abbas, Bandar-e-Eman Khomeyni

Iraq

Al Basrah, Khawr az Zubayr, Umm Qasr

Ireland

Cork, Dublin, Shannon Foynes, Waterford

Isle of Man

Douglas, Ramsey

Israel

Ashdod, Elat (Eilat), Hadera, Haifa

Italy

Augusta, Cagliari, Genoa, Livorno, Santa Panagia (Melilli), Taranto, Trieste, Venice

Jamaica

Discovery Bay (Port Rhoades), Kingston, Montego Bay, Port Antonio, Port Esquivel, Port Kaiser, Rocky Point

Jan Mayen

none; offshore anchorage only

Japan
Chiba, Kawasaki, Kobe, Mizushima, Moji, Nagoya, Osaka, Tokyo,
Tomakomai, Yokohama

Jersey
Gorey, Saint Aubin, Saint Helier

Jordan
Al 'Aqabah

Kazakhstan
Aqtau (Shevchenko), Atyrau (Gur'yev), Oskemen
(Ust-Kamenogorsk), Pavlodar, Semey (Semipalatinsk)

Kenya
Kisumu, Mombasa

Kiribati
Betio (Tarawa Atoll), Canton Island, English Harbor

Korea, North
Ch'ongjin, Haeju, Hungnam (Hamhung), Namp'o, Senbong,
Songnim, Sonbong (formerly Unggi), Wonsan

Korea, South
Inch'on, P'ohang, Pusan, Ulsan, Yosu

Kuwait
Ash Shu'aybah, Ash Shuwaykh, Az Zawr (Mina' Sa'ud), Mina'
'Abd Allah, Mina' al Ahmadi

Kyrgyzstan
Balykchy (Ysyk-Kol or Rybach'ye)

Latvia
Riga, Ventspils

Lebanon
Beirut, Tripoli

Liberia
Buchanan, Monrovia

Libya
Marsa al Burayqah, Ra's Lanuf, Tripoli

Lithuania

Butinge, Klaipeda

Luxembourg

Mertert

Macau

Macau

Madagascar

Antsiranana (Diego Suarez), Mahajanga, Toamasina, Toliara
(Tulear)

Malawi

Chipoka, Monkey Bay, Nkhata Bay, Nkhotakota, Chilumba

Malaysia

Bintulu, Johor Bahru, George Town (Penang), Port Kelang
(Port Klang), Tanjung Pelepas

Maldives

Male

Mali

Koulikoro

Malta

Marsaxlokk (Malta Freeport), Valletta

Marshall Islands

Enitwetak Island, Kwajalein, Majuro

Mauritania

Nouadhibou, Nouakchott

Mauritius

Port Louis

Mayotte

Dzaoudzi

Mexico

Altamira, Coatzacoalcos, Lazaro Cardenas, Manzanillo, Salina
Cruz, Veracruz

Micronesia, Federated States of

Colonia (Tomil Harbor), Lele Harbor,
Pohnepi Harbor

Monaco
Monaco

Montenegro
Bar

Montserrat
Little Bay, Plymouth

Morocco
Casablanca, Jorf Lasfar, Mohammedia, Safi, Tangier

Mozambique
Beira, Maputo, Nacala

Namibia
Luderitz, Walvis Bay

Nauru
Nauru

Navassa Island
none; offshore anchorage only

Netherlands
Amsterdam, IJmuiden, Moerdijk, Rotterdam, Terneuzen,
Vlissingen

New Caledonia
Noumea

New Zealand
Auckland, Lyttelton, Manukau Harbor, Marsden Point,
Tauranga, Wellington

Nicaragua
Bluefields, Corinto

Nigeria
Bonny Inshore Terminal, Calabar, Lagos

Niue
Alofi

Norfolk Island
Kingston

Northern Mariana Islands

Saipan, Tinian, Rota

Norway

Bergen, Haugesund, Maaloy, Mongstad, Narvik, Sture

Oman

Mina' Qabus, Salalah, Suhar

Pacific Ocean

Bangkok (Thailand), Hong Kong (China), Kao-hsiung (Taiwan), Los Angeles (US), Manila (Philippines), Pusan (South Korea), San Francisco (US), Seattle (US), Shanghai (China), Singapore, Sydney (Australia), Vladivostok (Russia), Wellington (NZ), Yokohama (Japan)

Pakistan

Karachi, Port Muhammad Bin Qasim

Palau

Koror

Panama

Balboa, Colon, Cristobal

Papua New Guinea

Kimbe, Lae, Madang, Rabaul, Wewak

Paracel Islands

small Chinese port facilities on Woody Island and Duncan Island

Paraguay

Asuncion, Villeta, San Antonio, Encarnacion

Peru

Callao, Iquitos, Matarani, Paita, Pucallpa, Yurimaguas; note - Iquitos, Pucallpa, and Yurimaguas are on the upper reaches of the Amazon and its tributaries

Philippines

Batangas, Cagayan de Oro, Cebu, Davao, Liman, Manila

Pitcairn Islands

Adamstown (on Bounty Bay)

Poland

Gdansk, Gdynia, Swinoujscie, Szczecin

Portugal

Leixoes, Lisbon, Setubal, Sines

Puerto Rico

Ensenada Honda, Mayaguez, Playa de Guayanilla, Playa de Ponce, San Juan

Qatar

Doha, Mesaieed (Umaieed), Ra's Laffan

Romania

Braila, Constanta, Galati (Galatz), Mancanului (Giurgiu), Midia, Tulcea

Russia

Kaliningrad, Kavkaz, Nakhodka, Novorossiysk, Primorsk, Saint Petersburg, Vostochnyy

Rwanda

Cyangugu, Gisenyi, Kibuye

Saint Barthelemy

Gustavia

Saint Helena, Ascension, and Tristan da Cunha

Saint Helena: Jamestown

Ascension Island: Georgetown

Tristan da Cunha: Calshot Harbor (Edinburgh)

Saint Kitts and Nevis

Basseterre, Charlestown

Saint Lucia

Castries, Cul-de-Sac, Vieux-Fort

Saint Pierre and Miquelon

Saint-Pierre

Saint Vincent and the Grenadines

Kingstown

Samoa

Apia

Sao Tome and Principe

Sao Tome

Saudi Arabia

Ad Dammam, Al Jubayl, Jiddah, Yanbu' al Sinaiyah

Senegal

Dakar

Seychelles

Victoria

Sierra Leone

Freetown, Pepel, Sherbro Islands

Singapore

Singapore

Sint Maarten

Philipsburg

Slovakia

Bratislava, Komarno

Slovenia

Koper

Solomon Islands

Honiara, Malloco Bay, Viru Harbor, Tulaghi

Somalia

Berbera, Kismaayo

South Africa

Cape Town, Durban, Port Elizabeth, Richards Bay,
Saldanha Bay

South Georgia and South Sandwich Islands

Grytviken

Southern Ocean

McMurdo, Palmer, and offshore anchorages in Antarctica
note: few ports or harbors exist on the southern side of the
Southern Ocean; ice conditions limit use of most to short periods in
midsummer; even then some cannot be entered without icebreaker
escort; most Antarctic ports are operated by government research
stations and, except in an emergency, are not open to commercial or
private vessels

Spain
Algeciras, Barcelona, Bilbao, Cartagena, Huelva, Tarragona,
Valencia (Spain); Las Palmas, Santa Cruz de Tenerife (Canary Islands)

Spratly Islands
none; offshore anchorage only

Sri Lanka

Field Listing :: Railways

This entry states the total route length of the railway network and of its component parts by gauge: broad, standard, narrow, and dual.

Other gauges are listed under note.

Country Comparison to the World

Country

Railways(km)

Albania total: 896 km standard gauge: 896 km 1.435-m gauge (2008)

Algeria

total: 3,973 km

standard gauge: 2,888 km 1.435-m gauge (283 km electrified)

narrow gauge: 1,085 km 1.055-m gauge (2008)

Angola

total: 2,764 km

narrow gauge: 2,641 km 1.067-m gauge; 123 km 0.600-m gauge (2008)

Argentina

total: 31,409 km

broad gauge: 27,301 km 1.676-m gauge (94 km electrified)

standard gauge: 2,780 km 1.435-m gauge (26 km electrified)

narrow gauge: 1,328 km 1.000-m gauge (2008)

Armenia

total: 845 km

broad gauge: 845 km 1.520-m gauge (818 km electrified)

note: some lines are out of service (2008)

Australia

total: 37,855 km

broad gauge: 142 km 1.600-m gauge

standard gauge: 24,409 km 1.435-m gauge (1,094 km electrified)

narrow gauge: 13,304 km 1.067-m gauge (1,193 km electrified) (2008)

Austria

total: 6,399 km

standard gauge: 5,927 km 1.435-m gauge (3,688 km electrified)

narrow gauge: 384 km 1.000-m gauge (15 km electrified); 88 km

0.760-m gauge (10 km electrified) (2008)

Azerbaijan

total: 2,918 km

broad gauge: 2,918 km 1.520-m gauge (1,278 km electrified) (2009)

Bangladesh

total: 2,768 km

broad gauge: 946 km 1.676-m gauge

narrow gauge: 1,822 km 1.000-m gauge (2008)

Belarus

total: 5,537 km

broad gauge: 5,512 km 1.520-m gauge (874 km electrified)

standard gauge: 25 km 1.435-m gauge (2008)

Belgium

total: 3,233 km

standard gauge: 3,233 km 1.435-m gauge (2,950 km electrified) (2008)

Benin

total: 578 km

narrow gauge: 578 km 1.000-m gauge (2008)

Bolivia

total: 3,504 km

narrow gauge: 3,504 km 1.000-m gauge (2008)

Bosnia and Herzegovina

total: 1,000 km

standard gauge: 1,000 km 1.435-m gauge (590 km electrified) (2008)

Botswana

total: 888 km

narrow gauge: 888 km 1.067-m gauge (2008)

Brazil

total: 28,857 km

broad gauge: 5,709 km 1.600-m gauge (459 km electrified)

standard gauge: 194 km 1.440-m gauge

narrow gauge: 22,954 km 1.000-m gauge (2008)

Bulgaria

total: 4,294 km

standard gauge: 4,049 km 1.435-m gauge (2,880 km electrified)

narrow gauge: 245 km 0.760-m gauge (2008)

Burkina Faso

total: 622 km

narrow gauge: 622 km 1.000-m gauge

note: another 660 km of this railway extends into Cote d'Ivoire (2008)

Burma

total: 3,955 km

narrow gauge: 3,955 km 1.000-m gauge (2008)

Cambodia

total: 690 km

narrow gauge: 690 km 1.000-m gauge

note: under restoration (2010)

Cameroon

total: 987 km

narrow gauge: 987 km 1.000-m gauge (2008)

Canada

total: 46,688 km

standard gauge: 46,688 km 1.435-m gauge (2008)

Chile

total: 5,483 km

broad gauge: 1,706 km 1.676-m gauge (850 km electrified)

narrow gauge: 3,777 km 1.000-m gauge (2008)

China

total: 77,834 km

standard gauge: 77,084 km 1.435-m gauge (24,433 km electrified)

narrow gauge: 750 km 0.750-m gauge (2008)

Christmas Island

total: 18 km

standard gauge: 18 km 1.435-m (not in operation) (2010)

Colombia

total: 3,802 km

standard gauge: 150 km 1.435-m gauge

narrow gauge: 3,652 km 0.914-m gauge (2008)

Congo, Democratic Republic of the

total: 4,007 km

narrow gauge: 3,882 km 1.067-m gauge (858 km electrified); 125 km 1.000-m gauge (2008)

Congo, Republic of the

total: 795 km

narrow gauge: 795 km 1.067-m gauge (2008)

Costa Rica

total: 278 km

narrow gauge: 278 km 1.067-m gauge

note: none of the railway network is in use (2008)

Cote d'Ivoire

total: 660 km

narrow gauge: 660 km 1.000 meter gauge

note: an additional 622 km of this railroad extends into Burkina Faso (2008)

Croatia

total: 2,722 km

standard gauge: 2,722 km 1.435-m gauge (985 km electrified) (2009)

Cuba

total: 8,598 km

standard gauge: 8,322 km 1.435-m gauge (176 km electrified)

narrow gauge: 276 km 1.000-gauge

note: 4,533 km of the track is used by sugar plantations; 4,257 km is standard gauge; 276 km is narrow gauge (2006)

Czech Republic

total: 9,620 km

standard gauge: 9,521 km 1.435-m gauge (3,013 km electrified)

narrow gauge: 99 km 0.750-m gauge (2008)

Denmark

total: 2,667 km

standard gauge: 2,667 km 1.435-m gauge (640 km electrified) (2008)

Djibouti

total: 100 km (Djibouti segment of the 781 km Addis Ababa-Djibouti railway)

narrow gauge: 100 km 1.000-m gauge

note: railway is under joint control of Djibouti and Ethiopia but is largely inoperable (2008)

Dominican Republic

total: 1,784 km

standard gauge: 375 km 1.435-m gauge

narrow gauge: 1,409 km 1.076-m, 0.889-m, and 0.762-m gauges

note: 1,226 km operated by sugar companies in 1.076 m, 0.889 m, and 0.762-m gauges (2008)

Ecuador

total: 965 km

narrow gauge: 965 km 1.067-m gauge (2008)

Egypt

total: 5,500 km

standard gauge: 5,500 km 1.435-m gauge (62 km electrified) (2009)

El Salvador

total: 283 km

narrow gauge: 283 km 0.914-m gauge

note: railways have been inoperable since 2005 because of disuse and high costs that led to a lack of maintenance (2008)

Eritrea

total: 306 km

narrow gauge: 306 km 0.950-m gauge (2008)

Estonia

total: 1,196 km

broad gauge: 1,196 km 1.520 m/1.524-m gauge (131 km electrified) (2008)

Ethiopia

total: 681 km (Ethiopian segment of the 781 km Addis Ababa-Djibouti railroad)

narrow gauge: 681 km 1.000-m gauge

note: railway is under joint control of Djibouti and Ethiopia but is

largely inoperable (2008)

European Union

total: 229,450 km (2008)

Fiji

total: 597 km

narrow gauge: 597 km 0.600-m gauge

note: belongs to the government-owned Fiji Sugar Corporation; used to haul sugarcane during the harvest season, which runs from May to December (2008)

Finland

total: 5,794 km

broad gauge: 5,794 km 1.524-m gauge (3,047 km electrified) (2008)

France

total: 29,213 km

standard gauge: 29,046 km 1.435-m gauge (15,164 km electrified)

narrow gauge: 167 km 1.000-m gauge (2008)

Gabon

total: 814 km

standard gauge: 814 km 1.435-m gauge (2008)

Georgia

total: 1,612 km

broad gauge: 1,575 km 1.520-m gauge (1,575 electrified)

narrow gauge: 37 km 0.912-m gauge (37 electrified) (2008)

Germany

total: 41,896 km

standard gauge: 41,641 km 1.435-m gauge (20,053 km electrified)

narrow gauge: 75 km 1.000-m gauge (75 km electrified); 180 km 0.750-m gauge (24 km electrified) (2008)

Ghana

total: 947 km

narrow gauge: 947 km 1.067-m gauge (2008)

Greece

total: 2,548 km

standard gauge: 1,565 km 1.435-m gauge (764 km electrified)

narrow gauge: 961 km 1.000-m gauge; 22 km 0.750-m gauge (2008)

Guatemala

total: 332 km
narrow gauge: 332 km 0.914-m gauge (2008)

Guinea

total: 1,185 km
standard gauge: 238 km 1.435-m gauge
narrow gauge: 947 km 1.000-m gauge (2008)

Honduras

total: 75 km
narrow gauge: 75 km 1.067-m gauge (2009)

Hungary

total: 8,057 km
broad gauge: 36 km 1.524-m gauge
standard gauge: 7,802 km 1.435-m gauge (2,628 km electrified)

Field Listing :: Religions

This entry is an ordered listing of religions by adherents starting with the largest group and sometimes includes the percent of total population. The core characteristics and beliefs of the world's major religions are described below. Baha'i - Founded by Mirza Husayn-Ali (known as Baha'u'llah) in Iran in 1852, Baha'i faith emphasizes monotheism and believes in one eternal

transcendent God. Its guiding focus is to encourage the unity of all peoples on the earth so that justice and peace may be achieved on earth. Baha'i revelation contends the prophets of major world religions reflect some truth or element of the divine, believes all were manifestations of God given to specific communities in specific times, and that Baha'u'llah is an additional prophet meant to call all humankind. Bahais are an open community, located worldwide, with the greatest concentration of believers in South Asia.

Buddhism - Religion or philosophy inspired by the 5th century B.C. teachings of Siddhartha Gautama (also known as Gautama Buddha "the enlightened one"). Buddhism focuses on the goal of spiritual enlightenment centered on an understanding of Gautama Buddha's Four Noble Truths on the nature of suffering, and on the Eightfold Path of spiritual and moral practice, to break the cycle of suffering of which we are a part. Buddhism ascribes to a karmic system of rebirth. Several schools and sects of Buddhism exist, differing often on the nature of the Buddha, the extent to which enlightenment can be achieved - for one or for all, and by whom - religious orders or laity.

Basic Groupings Theravada Buddhism: The oldest Buddhist school, Theravada is practiced mostly in Sri Lanka, Cambodia, Laos, Burma, and Thailand, with minority representation elsewhere in Asia and the West. Theravadans follow the Pali Canon of Buddha's teachings, and believe that one may escape the cycle of rebirth, worldly attachment, and suffering for oneself; this process may take one or several lifetimes.

Mahayana Buddhism, including subsets Zen and Tibetan Buddhism: Forms of Mahayana Buddhism are common in East Asia and Tibet, and parts of the West. Mahayanas have additional scriptures beyond the Pali Canon and believe the Buddha is eternal and still teaching. Unlike Theravada Buddhism, Mahayana schools maintain the Buddha-nature is present in all beings and all will ultimately achieve enlightenment.

Christianity - Descending from Judaism, Christianity's central belief maintains Jesus of Nazareth is the promised messiah of the Hebrew Scriptures, and that his life, death, and resurrection are salvific for the world. Christianity is one of the three monotheistic Abrahamic faiths, along with Islam and Judaism, which traces its spiritual lineage to Abraham of the Hebrew Scriptures. Its sacred texts include the Hebrew Bible and the New Testament (or the Christian Gospels).

Basic Groupings Catholicism (or Roman Catholicism): This is the oldest established western Christian church and the world's largest single religious body. It is supranational, and recognizes a hierarchical structure with the Pope, or Bishop of Rome, as its head, located at the Vatican. Catholics believe the Pope is the divinely ordered head of the Church from a direct spiritual legacy of Jesus' apostle Peter. Catholicism is comprised of 23 particular Churches, or Rites - one Western (Roman or Latin-Rite) and 22 Eastern. The Latin Rite is by far the largest, making up about 98% of Catholic membership. Eastern-Rite Churches, such as the Maronite Church and the Ukrainian Catholic Church, are in communion with Rome although they preserve their own worship traditions and their immediate hierarchy consists of clergy within their own rite. The Catholic Church has a comprehensive theological and moral doctrine specified for believers in its catechism, which makes it unique among most forms of Christianity.

Mormonism (including the Church of Jesus Christ of Latter-Day Saints): Originating in 1830 in the United States under Joseph Smith, Mormonism is not characterized as a form of Protestant Christianity because it claims additional revealed Christian scriptures after the Hebrew Bible and New Testament. The Book of Mormon maintains there was an appearance of Jesus in the New World following the Christian account of his resurrection, and that the Americas are uniquely blessed continents. Mormonism believes earlier Christian traditions, such as the Roman Catholic, Orthodox, and Protestant reform faiths, are apostasies and that Joseph Smith's revelation of the Book of Mormon is a restoration of true Christianity. Mormons have a

hierarchical religious leadership structure, and actively proselytize their faith; they are located primarily in the Americas and in a number of other Western countries.

Orthodox Christianity: The oldest established eastern form of Christianity, the Holy Orthodox Church, has a ceremonial head in the Bishop of Constantinople (Istanbul), also known as a Patriarch, but its various regional forms (e.g., Greek Orthodox, Russian Orthodox, Serbian Orthodox, Ukrainian Orthodox) are autocephalous (independent of Constantinople's authority, and have their own Patriarchs). Orthodox churches are highly nationalist and ethnic. The Orthodox Christian faith shares many theological tenets with the Roman Catholic Church, but diverges on some key premises and does not recognize the governing authority of the Pope.

Protestant Christianity: Protestant Christianity originated in the 16th century as an attempt to reform Roman Catholicism's practices, dogma, and theology. It encompasses several forms or denominations which are extremely varied in structure, beliefs, relationship to state, clergy, and governance. Many protestant theologies emphasize the primary role of scripture in their faith, advocating individual interpretation of Christian texts without the mediation of a final religious authority such as the Roman Pope. The oldest Protestant Christianities include Lutheranism, Calvinism (Presbyterians), and Anglican Christianity (Episcopalians), which have established liturgies, governing structure, and formal clergy. Other variants on Protestant Christianity, including Pentecostal movements and independent churches, may lack one or more of these elements, and their leadership and beliefs are individualized and dynamic.

Hinduism - Originating in the Vedic civilization of India (second and first millennium B.C.), Hinduism is an extremely diverse set of beliefs and practices with no single founder or religious authority. Hinduism has many scriptures; the Vedas, the Upanishads, and the Bhagavad-Gita are among some of the most important. Hindus may worship one or many deities, usually with prayer rituals within their own home. The most common figures of devotion are the gods Vishnu, Shiva, and a mother goddess, Devi. Most Hindus believe the soul, or atman, is eternal, and goes through a cycle of birth, death, and rebirth (samsara) determined by one's positive or negative karma, or the consequences of one's actions. The goal of religious life is to learn to act so as to finally achieve liberation (moksha) of one's soul, escaping the rebirth cycle.

Islam - The third of the monotheistic Abrahamic faiths, Islam originated with the teachings of Muhammad in the 7th century. Muslims believe Muhammad is the final of all religious prophets (beginning with Abraham) and that the Qu'ran, which is the Islamic scripture, was revealed to him by God. Islam derives from the word submission, and obedience to God is a primary theme in this religion. In order to live an Islamic life, believers must follow the five pillars, or tenets, of Islam, which are the testimony of faith (shahada), daily prayer (salah), giving alms (zakah), fasting during Ramadan (sawm), and the pilgrimage to Mecca (hajj).

Basic Groupings The two primary branches of Islam are Sunni and Shia, which split from each other over a religio-political leadership dispute about the rightful successor to Muhammad. The Shia believe Muhammad's cousin and son-in-law, Ali, was the only divinely ordained Imam (religious leader), while the Sunni maintain the first three caliphs after Muhammad were also legitimate authorities. In modern Islam, Sunnis and Shia continue to have different views of acceptable schools of Islamic jurisprudence, and who is a proper Islamic religious authority. Islam also has an active mystical branch, Sufism, with various Sunni and Shia subsets. Sunni Islam accounts for over 75% of the world's Muslim population. It recognizes the Abu Bakr as the first caliph after Muhammad. Sunni has four schools of Islamic doctrine and law - Hanafi, Maliki, Shafi'i, and Hanbali - which uniquely interpret the Hadith, or recorded oral traditions of Muhammad. A Sunni Muslim may elect to follow any one of these schools, as all are considered equally valid. Shia Islam represents 10-20% of Muslims

worldwide, and its distinguishing feature is its reverence for Ali as an infallible, divinely inspired leader, and as the first Imam of the Muslim community after Muhammad. A majority of Shia are known as "Twelvers," because they believe that the 11 familial successor imams after Muhammad culminate in a 12th Imam (al-Mahdi) who is hidden in the world and will reappear at its end to redeem the righteous. Variants Ismaili faith: A sect of Shia Islam, its adherents are also known as "Seveners," because they believe that the rightful seventh Imam in Islamic leadership was Isma'il, the elder son of Imam Jafar al-Sadiq. Ismaili tradition awaits the return of the seventh Imam as the Mahdi, or Islamic messianic figure. Ismailis are located in various parts of the world, particularly South Asia and the Levant. Alawi faith: Another Shia sect of Islam, the name reflects followers' devotion to the religious authority of Ali. Alawites are a closed, secretive religious group who assert they are Shia Muslims, although outside scholars speculate their beliefs may have a syncretic mix with other faiths originating in the Middle East. Alawis live mostly in Syria, Lebanon, and Turkey. Druze faith: A highly secretive tradition and a closed community that derives from the Ismaili sect of Islam; its core beliefs are thought to emphasize a combination of Gnostic principles believing that the Fatimid caliph, al-Hakin, is the one who embodies the key aspects of goodness of the universe, which are, the intellect, the word, the soul, the preceptor, and the follower. The Druze have a key presence in Syria, Lebanon, and Israel.

Jainism - Originating in India, Jain spiritual philosophy believes in an eternal human soul, the eternal universe, and a principle of "the own nature of things." It emphasizes compassion for all living things, seeks liberation of the human soul from reincarnation through enlightenment, and values personal responsibility due to the belief in the immediate consequences of one's behavior. Jain philosophy teaches non-violence and prescribes vegetarianism for monks and laity alike; its adherents are a highly influential religious minority in Indian society.

Judaism - One of the first known monotheistic religions, likely dating to between 2000-1500 B.C., Judaism is the native faith of the Jewish people, based upon the belief in a covenant of responsibility between a sole omnipotent creator God and Abraham, the patriarch of Judaism's Hebrew Bible, or Tanakh. Divine revelation of principles and prohibitions in the Hebrew Scriptures form the basis of Jewish law, or halakhah, which is a key component of the faith. While there are extensive traditions of Jewish halakhic and theological discourse, there is no final dogmatic authority in the tradition. Local communities have their own religious leadership. Modern Judaism has three basic categories of faith: Orthodox, Conservative, and Reform/Liberal. These differ in their views and observance of Jewish law, with the Orthodox representing the most traditional practice, and Reform/Liberal communities the most accommodating of individualized interpretations of Jewish identity and faith.

Shintoism - A native animist tradition of Japan, Shinto practice is based upon the premise that every being and object has its own spirit or kami. Shinto practitioners worship several particular kamis, including the kamis of nature, and families often have shrines to their ancestors' kamis. Shintoism has no fixed tradition of prayers or prescribed dogma, but is characterized by individual ritual. Respect for the kamis in nature is a key Shinto value. Prior to the end of World War II, Shinto was the state religion of Japan, and bolstered the cult of the Japanese emperor.

Sikhism - Founded by the Guru Nanak (born 1469), Sikhism believes in a non-anthropomorphic, supreme, eternal, creator God; centering one's devotion to God is seen as a means of escaping the cycle of rebirth. Sikhs follow the teachings of Nanak and nine subsequent gurus. Their scripture, the Guru Granth Sahib - also known as the Adi Granth - is considered the living Guru, or final authority of Sikh faith and theology. Sikhism emphasizes equality of humankind and disavows caste, class, or gender discrimination.

Taoism - Chinese

philosophy or religion based upon Lao Tzu's Tao Te Ching, which centers on belief in the Tao, or the way, as the flow of the universe and the nature of things. Taoism encourages a principle of non-force, or wu-wei, as the means to live harmoniously with the Tao. Taoists believe the esoteric world is made up of a perfect harmonious balance and nature, while in the manifest world - particularly in the body - balance is distorted. The Three Jewels of the Tao - compassion, simplicity, and humility - serve as the basis for Taoist ethics. Zoroastrianism - Originating from the teachings of Zoroaster in about the 9th or 10th century B.C., Zoroastrianism may be the oldest continuing creedal religion. Its key beliefs center on a transcendent creator God, Ahura Mazda, and the concept of free will. The key ethical tenets of Zoroastrianism expressed in its scripture, the Avesta, are based on a dualistic worldview where one may prevent chaos if one chooses to serve God and exercises good thoughts, good words, and good deeds. Zoroastrianism is generally a closed religion and members are almost always born to Zoroastrian parents. Prior to the spread of Islam, Zoroastrianism dominated greater Iran. Today, though a minority, Zoroastrians remain primarily in Iran, India, and Pakistan. Country

Religions(%)

Afghanistan

Sunni Muslim 80%, Shia Muslim 19%, other 1%

Albania

Muslim 70%, Albanian Orthodox 20%, Roman Catholic 10%

note: percentages are estimates; there are no available current statistics on religious affiliation; all mosques and churches were closed in 1967 and religious observances prohibited; in November 1990, Albania began allowing private religious practice

Church of Melanesia 32.8%, Roman Catholic 19%, South Seas Evangelical 17%, Seventh-Day Adventist 11.2%, United Church 10.3%, Christian Fellowship Church 2.4%, other Christian 4.4%, other 2.4%, unspecified 0.3%, none 0.2% (1999 census)

Somalia

Sunni Muslim

South Africa

Zion Christian 11.1%, Pentecostal/Charismatic 8.2%,

Catholic 7.1%, Methodist 6.8%, Dutch Reformed 6.7%, Anglican 3.8%, Muslim 1.5%, other Christian 36%, other 2.3%, unspecified 1.4%, none 15.1% (2001 census)

Spain

Roman Catholic 94%, other 6%

Sri Lanka

Buddhist 69.1%, Muslim 7.6%, Hindu 7.1%, Christian 6.2%, unspecified 10% (2001 census provisional data)

Sudan

Sunni Muslim 70% (in north), Christian 5% (mostly in south and Khartoum), indigenous beliefs 25%

Suriname

Hindu 27.4%, Protestant 25.2% (predominantly Moravian), Roman Catholic 22.8%, Muslim 19.6%, indigenous beliefs 5%

Swaziland

Zionist 40% (a blend of Christianity and indigenous ancestral worship), Roman Catholic 20%, Muslim 10%, other (includes Anglican, Bahai, Methodist, Mormon, Jewish) 30%

Sweden

Lutheran 87%, other (includes Roman Catholic, Orthodox, Baptist, Muslim, Jewish, and Buddhist) 13%

Switzerland

Roman Catholic 41.8%, Protestant 35.3%, Muslim 4.3%, Orthodox 1.8%, other Christian 0.4%, other 1%, unspecified 4.3%, none 11.1% (2000 census)

Syria

Sunni Muslim 74%, other Muslim (includes Alawite, Druze) 16%, Christian (various denominations) 10%, Jewish (tiny communities in Damascus, Al Qamishli, and Aleppo)

Taiwan

mixture of Buddhist and Taoist 93%, Christian 4.5%, other 2.5%

Tajikistan

Sunni Muslim 85%, Shia Muslim 5%, other 10% (2003 est.)

Tanzania

mainland - Christian 30%, Muslim 35%, indigenous beliefs

35%; Zanzibar - more than 99% Muslim

Thailand

Buddhist 94.6%, Muslim 4.6%, Christian 0.7%, other 0.1%
(2000 census)

Timor-Leste

Roman Catholic 98%, Muslim 1%, Protestant 1% (2005)

Togo

Christian 29%, Muslim 20%, indigenous beliefs 51%

Tokelau

Congregational Christian Church 70%, Roman Catholic 28%,
other 2%

note: on Atafu, all Congregational Christian Church of Samoa; on
Nukunonu, all Roman Catholic; on Fakaofu, both denominations, with
the Congregational Christian Church predominant

Tonga

Christian (Free Wesleyan Church claims over 30,000 adherents)

Trinidad and Tobago

Roman Catholic 26%, Hindu 22.5%, Anglican 7.8%,
Baptist 7.2%, Pentecostal 6.8%, Muslim 5.8%, Seventh Day Adventist
4%, other Christian 5.8%, other 10.8%, unspecified 1.4%, none 1.9%
(2000 census)

Tunisia

Muslim 98%, Christian 1%, Jewish and other 1%

Turkey

Muslim 99.8% (mostly Sunni), other 0.2% (mostly Christians
and Jews)

Turkmenistan

Muslim 89%, Eastern Orthodox 9%, unknown 2%

Turks and Caicos Islands

Baptist 40%, Anglican 18%, Methodist 16%,
Church of God 12%, other 14% (1990)

Tuvalu

Church of Tuvalu (Congregationalist) 97%, Seventh-Day
Adventist 1.4%, Baha'i 1%, other 0.6%

Uganda

Roman Catholic 41.9%, Protestant 42% (Anglican 35.9%, Pentecostal 4.6%, Seventh Day Adventist 1.5%), Muslim 12.1%, other 3.1%, none 0.9% (2002 census)

Ukraine

Ukrainian Orthodox - Kyiv Patriarchate 50.4%, Ukrainian Orthodox - Moscow Patriarchate 26.1%, Ukrainian Greek Catholic 8%, Ukrainian Autocephalous Orthodox 7.2%, Roman Catholic 2.2%, Protestant 2.2%, Jewish 0.6%, other 3.2% (2006 est.)

United Arab Emirates

Muslim 96% (Shia 16%), other (includes Christian, Hindu) 4%

United Kingdom

Christian (Anglican, Roman Catholic, Presbyterian, Methodist) 71.6%, Muslim 2.7%, Hindu 1%, other 1.6%, unspecified or none 23.1% (2001 census)

United States

Protestant 51.3%, Roman Catholic 23.9%, Mormon 1.7%, other Christian 1.6%, Jewish 1.7%, Buddhist 0.7%, Muslim 0.6%, other or unspecified 2.5%, unaffiliated 12.1%, none 4% (2007 est.)

Uruguay

Roman Catholic 47.1%, non-Catholic Christians 11.1%, nondenominational 23.2%, Jewish 0.3%, atheist or agnostic 17.2%, other 1.1% (2006)

Uzbekistan

Muslim 88% (mostly Sunnis), Eastern Orthodox 9%, other 3%

Vanuatu

Presbyterian 31.4%, Anglican 13.4%, Roman Catholic 13.1%, Seventh-Day Adventist 10.8%, other Christian 13.8%, indigenous beliefs 5.6% (including Jon Frum cargo cult), other 9.6%, none 1%, unspecified 1.3% (1999 Census)

Venezuela

nominally Roman Catholic 96%, Protestant 2%, other 2%

Vietnam

Buddhist 9.3%, Catholic 6.7%, Hoa Hao 1.5%, Cao Dai 1.1%, Protestant 0.5%, Muslim 0.1%, none 80.8% (1999 census)

Virgin Islands

Baptist 42%, Roman Catholic 34%, Episcopalian 17%,
other 7%

Wallis and Futuna

Roman Catholic 99%, other 1%

West Bank

Muslim 75% (predominantly Sunni), Jewish 17%, Christian
and other 8%

Western Sahara

Muslim

World

Christians 33.32% (of which Roman Catholics 16.99%,
Protestants 5.78%, Orthodox 3.53%, Anglicans 1.25%), Muslims 21.01%,
Hindus 13.26%, Buddhists 5.84%, Sikhs 0.35%, Jews 0.23%, Baha'is
0.12%, other religions 11.78%, non-religious 11.77%, atheists 2.32%
(2007 est.)

Yemen

Muslim including Shaf'i (Sunni) and Zaydi (Shia), small
numbers of Jewish, Christian, and Hindu

Zambia

Christian 50%-75%, Muslim and Hindu 24%-49%, indigenous
beliefs 1%

Zimbabwe

syncretic (part Christian, part indigenous beliefs) 50%,
Christian 25%, indigenous beliefs 24%, Muslim and other 1%

16 years of age; universal

Guinea
18 years of age; universal

Guinea-Bissau
18 years of age; universal

Guyana
18 years of age; universal

Haiti
18 years of age; universal

Holy See (Vatican City)

limited to cardinals less than 80 years old

Honduras

18 years of age; universal and compulsory

Hong Kong

direct election - 18 years of age for half the legislature and a majority of seats in 18 district councils; universal for permanent residents living in the territory of Hong Kong for the past seven years

indirect election - limited to about 220,000 members of functional constituencies for the other half of the legislature and an 800-member election committee for the chief executive drawn from broad sectoral groupings, central government bodies, and municipal organizations

Hungary

18 years of age; universal

Iceland

18 years of age; universal

India

18 years of age; universal

Indonesia

17 years of age; universal and married persons regardless of age

Iran

18 years of age; universal

Iraq

18 years of age; universal

Ireland

18 years of age; universal

Isle of Man

16 years of age; universal

Israel

18 years of age; universal

Italy

18 years of age; universal (except in senatorial elections, where minimum age is 25)

Jamaica
18 years of age; universal

Japan
20 years of age; universal

Jersey
16 years of age; universal

Jordan
18 years of age; universal

Kazakhstan
18 years of age; universal

Kenya
18 years of age; universal

Kiribati
18 years of age; universal

Korea, North
17 years of age; universal

Korea, South
19 years of age; universal

Kosovo
18 years of age; universal

Kuwait
21 years of age; universal (adult); note - males in the military or police are not allowed to vote; adult females were allowed to vote as of 16 May 2005; all voters must have been citizens for 20 years

Kyrgyzstan
18 years of age; universal

Laos
18 years of age; universal

Latvia
18 years of age; universal for Latvian citizens

Lebanon

21 years of age; compulsory for all males; authorized for women at age 21 with elementary education; excludes military personnel

Lesotho

18 years of age; universal

Liberia

18 years of age; universal

Libya

18 years of age; universal and technically compulsory

Liechtenstein

18 years of age; universal

Lithuania

18 years of age; universal

Luxembourg

18 years of age; universal and compulsory

Macau

direct election 18 years of age for some non-executive positions, universal for permanent residents living in Macau for the past seven years; indirect election limited to organizations registered as "corporate voters" (257 are currently registered) and a 300-member Election Committee drawn from broad regional groupings, municipal organizations, and central government bodies

Macedonia

18 years of age; universal

Madagascar

18 years of age; universal

Malawi

18 years of age; universal

Malaysia

21 years of age; universal

Maldives

18 years of age; universal

Mali

18 years of age; universal

Malta
18 years of age; universal

Marshall Islands
18 years of age; universal

Mauritania
18 years of age; universal

Mauritius
18 years of age; universal

Mayotte
18 years of age; universal

Mexico
18 years of age; universal and compulsory (but not enforced)

Micronesia, Federated States of
18 years of age; universal

Moldova
18 years of age; universal

Field Listing :: Telephone system

This entry includes a brief general assessment of the system with details on the domestic and international components. The following terms and abbreviations are used throughout the entry: Arabsat - Arab Satellite Communications Organization (Riyadh, Saudi Arabia). Autodin - Automatic Digital Network (US Department of Defense). CB - citizen's band mobile radio

communications. Cellular telephone system - the telephones in this system are radio transceivers, with each instrument having its own private radio frequency and sufficient radiated power to reach the booster station in its area (cell), from which the telephone signal is fed to a telephone exchange. Central American Microwave System - a trunk microwave radio relay system that links the countries of Central America and Mexico with each other. Coaxial cable - a multichannel communication cable consisting of a central conducting wire, surrounded by and insulated from a cylindrical conducting shell; a large number of telephone channels can be made available within the insulated space by the use of a large number of carrier frequencies. Comsat - Communications Satellite Corporation (US). DSN - Defense Switched Network (formerly Automatic Voice Network or Autovon); basic general-purpose, switched voice network of the Defense Communications System (US Department of Defense). Eutelsat - European Telecommunications Satellite Organization (Paris). Fiber-optic cable - a multichannel communications cable using a thread of optical glass fibers as a transmission medium in which the signal (voice, video, etc.) is in the form of a coded pulse of light. GSM - a global system for mobile (cellular) communications devised by the Groupe Special Mobile of the pan-European standardization organization, Conference Europeenne des Posts et Telecommunications (CEPT) in 1982. HF - high frequency; any radio frequency in the 3,000- to 30,000-kHz range. Inmarsat - International Maritime Satellite Organization (London); provider of global mobile satellite communications for commercial, distress, and safety applications at sea, in the air, and on land. Intelsat - International Telecommunications Satellite Organization (Washington, DC). Intersputnik - International Organization of Space Communications (Moscow); first established in the former Soviet Union and the East European countries, it is now marketing its services worldwide with earth stations in North America, Africa, and East Asia. Landline - communication wire or cable of any sort that is installed on poles or buried in the ground. Marecs - Maritime European Communications Satellite used in the Inmarsat system on lease from the European Space Agency. Marisat - satellites of the Comsat Corporation that participate in the Inmarsat system. Medarabtel - the Middle East Telecommunications Project of the International Telecommunications Union (ITU) providing a modern telecommunications network, primarily by microwave radio relay, linking Algeria, Djibouti, Egypt, Jordan, Libya, Morocco, Saudi Arabia, Somalia, Sudan, Syria, Tunisia, and Yemen; it was initially started in Morocco in 1970 by the Arab Telecommunications Union (ATU) and was known at that time as the Middle East Mediterranean Telecommunications Network. Microwave radio relay - transmission of long distance telephone calls and television programs by highly directional radio microwaves that are received and sent on from one booster station to another on an optical path. NMT - Nordic Mobile Telephone; an analog cellular telephone system that was developed jointly by the national telecommunications authorities of the Nordic countries (Denmark, Finland, Iceland, Norway, and Sweden). Orbita - a Russian television service; also the trade name of a packet-switched digital telephone network. Radiotelephone communications - the two-way transmission and reception of sounds by broadcast radio on authorized frequencies using telephone handsets. PanAmSat - PanAmSat Corporation (Greenwich, CT). SAFE - South African Far East Cable Satellite communication system - a communication system consisting of two or more earth stations and at least one satellite that provide long distance transmission of voice, data, and television; the system usually serves as a trunk connection between telephone exchanges; if the earth stations are in the same country, it is a domestic system. Satellite earth station - a communications facility with a microwave radio transmitting and receiving antenna and required receiving and transmitting

equipment for communicating with satellites. Satellite link - a radio connection between a satellite and an earth station permitting communication between them, either one-way (down link from satellite to earth station - television receive-only transmission) or two-way (telephone channels). SHF - super high frequency; any radio frequency in the 3,000- to 30,000-MHz range. Shortwave - radio frequencies (from 1.605 to 30 MHz) that fall above the commercial broadcast band and are used for communication over long distances. Solidaridad - geosynchronous satellites in Mexico's system of international telecommunications in the Western Hemisphere. Stationar - Russia's geostationary system for satellite telecommunications. Submarine cable - a cable designed for service under water. TAT - Trans-Atlantic Telephone; any of a number of high-capacity submarine coaxial telephone cables linking Europe with North America. Telefax - facsimile service between subscriber stations via the public switched telephone network or the international Datel network. Telegraph - a telecommunications system designed for unmodulated electric impulse transmission. Telex - a communication service involving teletypewriters connected by wire through automatic exchanges. Tropospheric scatter - a form of microwave radio transmission in which the troposphere is used to scatter and reflect a fraction of the incident radio waves back to earth; powerful, highly directional antennas are used to transmit and receive the microwave signals; reliable over-the-horizon communications are realized for distances up to 600 miles in a single hop; additional hops can extend the range of this system for very long distances. Trunk network - a network of switching centers, connected by multichannel trunk lines. UHF - ultra high frequency; any radio frequency in the 300- to 3,000-MHz range. VHF - very high frequency; any radio frequency in the 30- to 300-MHz range. Country

Telephone system

Afghanistan

general assessment: limited fixed-line telephone service; an increasing number of Afghans utilize mobile-cellular phone networks
domestic: aided by the presence of multiple providers, mobile-cellular telephone service continues to improve rapidly
international: country code - 93; multiple VSAT's provide international and domestic voice and data connectivity (2009)

Albania

general assessment: despite new investment in fixed lines teledensity remains low with roughly 10 fixed lines per 100 people; mobile-cellular telephone use is widespread and generally effective; combined fixed-line and mobile-cellular teledensity is now exceeds 100 per 100 persons
domestic: offsetting the shortage of fixed line capacity, mobile-cellular phone service has been available since 1996; by 2003, two companies were providing mobile services at a greater teledensity than some of Albania's neighbors; Internet broadband services initiated in 2005; Internet cafes are popular in Tirana and

have started to spread outside the capital
international: country code - 355; submarine cable provides connectivity to Italy, Croatia, and Greece; the Trans-Balkan Line, a combination submarine cable and land fiber-optic system, provides additional connectivity to Bulgaria, Macedonia, and Turkey; international traffic carried by fiber-optic cable and, when necessary, by microwave radio relay from the Tirana exchange to Italy and Greece (2009)

Algeria

general assessment: privatization of Algeria's telecommunications sector began in 2000; three mobile cellular licenses have been issued and, in 2005, a consortium led by Egypt's Orascom Telecom won a 15-year license to build and operate a fixed-line network in Algeria; the license will allow Orascom to develop high-speed data and other specialized services and contribute to meeting the large unfulfilled demand for basic residential telephony; Internet broadband services began in 2003

domestic: a limited network of fixed lines with a teledensity of less than 10 telephones per 100 persons is offset by the rapid increase in mobile-cellular subscribership; in 2009, combined fixed-line and mobile-cellular teledensity was roughly 100 telephones per 100 persons

international: country code - 213; landing point for the SEA-ME-WE-4 fiber-optic submarine cable system that provides links to Europe, the Middle East, and Asia; microwave radio relay to Italy, France, Spain, Morocco, and Tunisia; coaxial cable to Morocco and Tunisia; participant in Medarabtel; satellite earth stations - 51 (Intelsat, Intersputnik, and Arabsat) (2009)

American Samoa

general assessment: NA

domestic: good telex, telegraph, facsimile, and cellular telephone services; domestic satellite system with 1 Comsat earth station

international: country code - 1-684; satellite earth station - 1 (Intelsat-Pacific Ocean)

Andorra

general assessment: NA

domestic: modern system with microwave radio relay connections between exchanges

international: country code - 376; landline circuits to France and Spain

Angola

general assessment: limited system; state-owned telecom had monopoly for fixed-lines until 2005; demand outstripped capacity, prices were high, and services poor; Telecom Namibia, through an Angolan company, became the first private licensed operator in Angola's fixed-line telephone network; by 2010, the number of fixed-line providers had expanded to 5; Angola Telecom established mobile-cellular service in Luanda in 1993 and the network has been extended to larger towns; a privately-owned, mobile-cellular service provider began operations in 2001

domestic: only about two fixed-lines per 100 persons; combined fixed-line and mobile-cellular teledensity about 65 telephones per 100 persons in 2009

international: country code - 244; landing point for the SAT-3/WASC fiber-optic submarine cable that provides connectivity to Europe and Asia; satellite earth stations - 29 (2009)

Anguilla

general assessment: NA

domestic: modern internal telephone system

international: country code - 1-264; landing point for the East Caribbean Fiber System (ECFS) submarine cable with links to 13 other islands in the eastern Caribbean extending from the British Virgin Islands to Trinidad; microwave radio relay to island of Saint Martin/Sint Maarten (2007)

Antarctica

general assessment: local systems at some research stations

domestic: commercial cellular networks operating in a small number of locations

international: country code - none allocated; via satellite (including mobile Inmarsat and Iridium systems) to and from all research stations, ships, aircraft, and most field parties (2007)

Antigua and Barbuda

general assessment: NA

domestic: good automatic telephone system

international: country code - 1-268; landing points for the East Caribbean Fiber System (ECFS) and the Global Caribbean Network (GCN) submarine cable systems with links to other islands in the eastern Caribbean extending from the British Virgin Islands to Trinidad; satellite earth stations - 2; tropospheric scatter to Saba (Netherlands) and Guadeloupe (France) (2007)

Argentina

general assessment: the "Telecommunications Liberalization Plan of 1998" opened the telecommunications market to competition and foreign investment encouraging the growth of modern telecommunications technology; fiber-optic cable trunk lines are being installed between all major cities; major networks are entirely digital and the availability of telephone service is improving

domestic: microwave radio relay, fiber-optic cable, and a domestic satellite system with 40 earth stations serve the trunk network; fixed-line teledensity is increasing gradually and mobile-cellular subscribership is increasing rapidly; broadband Internet services are gaining ground

international: country code - 54; landing point for the Atlantis-2, UNISUR, South America-1, and South American Crossing/Latin American Nautilus submarine cable systems that provide links to Europe, Africa, South and Central America, and US; satellite earth stations - 112; 2 international gateways near Buenos Aires (2009)

Armenia

general assessment: telecommunications investments have made major inroads in modernizing and upgrading the outdated telecommunications network inherited from the Soviet era; now 100% privately owned and undergoing modernization and expansion; mobile-cellular services monopoly terminated in late 2004 and a second provider began operations in mid-2005

domestic: reliable modern fixed-line and mobile-cellular services are available across Yerevan in major cities and towns; significant but ever-shrinking gaps remain in mobile-cellular coverage in rural areas

international: country code - 374; Yerevan is connected to the Trans-Asia-Europe fiber-optic cable through Iran; additional international service is available by microwave radio relay and landline connections to the other countries of the Commonwealth of Independent States, through the Moscow international switch, and by satellite to the rest of the world; satellite earth stations - 3 (2008)

Aruba

general assessment: modern fully automatic telecommunications system

domestic: increased competition through privatization; 3 mobile-cellular service providers are now licensed

international: country code - 297; landing site for the PAN-AM submarine telecommunications cable system that extends from the US Virgin Islands through Aruba to Venezuela, Colombia, Panama, and the

west coast of South America; extensive interisland microwave radio relay links (2007)

Australia

general assessment: excellent domestic and international service

domestic: domestic satellite system; significant use of radiotelephone in areas of low population density; rapid growth of mobile telephones

international: country code - 61; landing point for the SEA-ME-WE-3 optical telecommunications submarine cable with links to Asia, the Middle East, and Europe; the Southern Cross fiber optic submarine cable provides links to New Zealand and the United States; satellite earth stations - 19 (10 Intelsat - 4 Indian Ocean and 6 Pacific Ocean, 2 Inmarsat - Indian and Pacific Ocean regions, 2 Globalstar, 5 other) (2007)

Austria

general assessment: highly developed and efficient

domestic: fixed-line subscribership has been in decline since the mid-1990s with mobile-cellular subscribership eclipsing it by the late 1990s; the fiber-optic net is very extensive; all telephone applications and Internet services are available

international: country code - 43; satellite earth stations - 15; in addition, there are about 600 VSATs (very small aperture terminals) (2007)

Azerbaijan

general assessment: requires considerable expansion and modernization; fixed-line telephony and a broad range of other telecom services are controlled by a state-owned telecommunications monopoly and growth has been stagnant; more competition exists in the mobile-cellular market with four providers in 2009

domestic: teledensity of 17 fixed lines per 100 persons; mobile-cellular teledensity has increased and is rapidly approaching 100 telephones per 100 persons; satellite service connects Baku to a modern switch in its exclave of Nakhchivan

international: country code - 994; the Trans-Asia-Europe (TAE) fiber-optic link transits Azerbaijan providing international connectivity to neighboring countries; the old Soviet system of cable and microwave is still serviceable; satellite earth stations - 2 (2009)

Bahamas, The

general assessment: modern facilities

domestic: totally automatic system; highly developed; the Bahamas Domestic Submarine Network links 14 of the islands and is designed to satisfy increasing demand for voice and broadband internet services

international: country code - 1-242; landing point for the Americas Region Caribbean Ring System (ARCOS-1) fiber-optic submarine cable that provides links to South and Central America, parts of the Caribbean, and the US; satellite earth stations - 2 (2007)

Bahrain

general assessment: modern system

domestic: modern fiber-optic integrated services; digital network with rapidly growing use of mobile-cellular telephones

international: country code - 973; landing point for the Fiber-Optic Link Around the Globe (FLAG) submarine cable network that provides links to Asia, Middle East, Europe, and US; tropospheric scatter to Qatar and UAE; microwave radio relay to Saudi Arabia; satellite earth station - 1 (2007)

Bangladesh

general assessment: inadequate for a modern country;

introducing digital systems; trunk systems include VHF and UHF microwave radio relay links, and some fiber-optic cable in cities

domestic: fixed-line teledensity remains only about 1 per 100

persons; mobile-cellular telephone subscribership has been increasing rapidly and now exceeds 30 telephones per 100 persons

international: country code - 880; landing point for the SEA-ME-WE-4 fiber-optic submarine cable system that provides links to Europe, the Middle East, and Asia; satellite earth stations - 6;

international radiotelephone communications and landline service to neighboring countries (2009)

Barbados

general assessment: island-wide automatic telephone system

domestic: fixed-line teledensity of roughly 50 per 100 persons;

mobile-cellular telephone density approaching 125 per 100 persons

international: country code - 1-246; landing point for the East

Caribbean Fiber System (ECFS) submarine cable with links to 13 other islands in the eastern Caribbean extending from the British Virgin

Islands to Trinidad; satellite earth stations - 1 (Intelsat

-Atlantic Ocean); tropospheric scatter to Trinidad and Saint Lucia (2009)

Belarus

general assessment: Belarus lags behind its neighbors in

upgrading telecommunications infrastructure; modernization of the network progressing with roughly two-thirds of switching equipment now digital

domestic: state-owned Beltelcom is the sole provider of fixed-line local and long distance service; fixed-line teledensity is improving although rural areas continue to be underserved; multiple GSM mobile-cellular networks are experiencing rapid growth; mobile-cellular teledensity reached 100 telephones per 100 persons in 2009

international: country code - 375; Belarus is a member of the Trans-European Line (TEL), Trans-Asia-Europe (TAE) fiber-optic line, and has access to the Trans-Siberia Line (TSL); 3 fiber-optic segments provide connectivity to Latvia, Poland, Russia, and Ukraine; worldwide service is available to Belarus through this infrastructure; additional analog lines to Russia; Intelsat, Eutelsat, and Intersputnik earth stations (2008)

Belgium

general assessment: highly developed, technologically advanced, and completely automated domestic and international telephone and telegraph facilities

domestic: nationwide mobile-cellular telephone system; extensive cable network; limited microwave radio relay network

international: country code - 32; landing point for a number of submarine cables that provide links to Europe, the Middle East, and Asia; satellite earth stations - 7 (Intelsat - 3) (2007)

Belize

general assessment: above-average system; trunk network depends primarily on microwave radio relay

domestic: fixed-line teledensity of 10 per 100 persons; mobile-cellular teledensity roughly 55 per 100 persons

international: country code - 501; landing point for the Americas Region Caribbean Ring System (ARCOS-1) fiber-optic telecommunications submarine cable that provides links to South and Central America, parts of the Caribbean, and the US; satellite earth station - 8 (Intelsat - 2, unknown - 6) (2008)

Benin

general assessment: inadequate system of open-wire, microwave radio relay, and cellular connections; fixed-line network characterized by aging, deteriorating equipment

domestic: fixed-line teledensity only about 2 per 100 persons; spurred by the presence of multiple mobile-cellular providers, cellular telephone subscribership has been increasing rapidly

international: country code - 229; landing point for the SAT-3/WASC fiber-optic submarine cable that provides connectivity to Europe and Asia; long distance fiber-optic links with Togo, Burkina Faso, Niger, and Nigeria; satellite earth stations - 7 (Intelsat-Atlantic Ocean) (2008)

Bermuda

general assessment: good

domestic: fully automatic digital telephone system; fiber optic trunk lines

international: country code - 1-441; landing points for the GlobeNet, Gemini Bermuda, and the Challenger Bermuda-1 (CB-1) submarine cables; satellite earth stations - 3 (2007)

Bhutan

general assessment: urban towns and district headquarters

have telecommunications services

domestic: low teledensity; domestic service is poor especially in rural areas; mobile-cellular service available since 2003

international: country code - 975; international telephone and telegraph service via landline and microwave relay through India; satellite earth station - 1 Intelsat (2009)

Bolivia

general assessment: privatization begun in 1995; primary trunk system, which is being expanded, employs digital microwave radio relay; some areas are served by fiber-optic cable; overall reliability has steadily improved

domestic: most telephones are concentrated in La Paz and other cities; mobile-cellular telephone use expanding rapidly and, in 2009, teledensity reached 75 per 100 persons; fixed-line teledensity is low at less than 10 per 100 persons

international: country code - 591; satellite earth station - 1 Intelsat (Atlantic Ocean) (2009)

Bosnia and Herzegovina

general assessment: post-war reconstruction

of the telecommunications network, aided by a internationally sponsored program under EBRD, resulting in sharp increases in the number of fixed telephone lines available

domestic: fixed-line teledensity roughly 22 per 100 persons; mobile-cellular subscribership has been increasing rapidly and, in 2009, reached 70 telephones per 100 persons

international: country code - 387; no satellite earth stations (2009)

Botswana

general assessment: Botswana is participating in regional development efforts; expanding fully digital system with fiber-optic cables linking the major population centers in the east as well as a system of open-wire lines, microwave radio relays links, and radiotelephone communication stations

domestic: fixed-line teledensity has declined in recent years and now stands at roughly 7 telephones per 100 persons; mobile-cellular subscribership is rapidly approaching a teledensity of 100 telephones per 100 persons

international: country code - 267; international calls are made via satellite, using international direct dialing; 2 international exchanges; digital microwave radio relay links to Namibia, Zambia, Zimbabwe, and South Africa; satellite earth station - 1 Intelsat (Indian Ocean) (2008)

Brazil

general assessment: good working system including an extensive microwave radio relay system and a domestic satellite system with 64 earth stations; mobile-cellular usage has more than tripled in the past 5 years

domestic: fixed-line connections have remained relatively stable in recent years and stand at about 20 per 100 persons; less expensive mobile-cellular technology has been a major driver in expanding telephone service to the lower-income segments of the population with mobile-cellular teledensity approaching 90 per 100 persons in 2009

international: country code - 55; landing point for a number of submarine cables, including Americas-1, Americas-2, Atlantis-2, GlobeNet, South America-1, South American Crossing/Latin American Nautilus, and UNISUR that provide direct connectivity to South and Central America, the Caribbean, the US, Africa, and Europe; satellite earth stations - 3 Intelsat (Atlantic Ocean), 1 Inmarsat (Atlantic Ocean region east), connected by microwave relay system to Mercosur Brazilsat B3 satellite earth station (2009)

British Indian Ocean Territory general assessment: separate facilities for military and public needs are available domestic: all commercial telephone services are available, including connection to the Internet international: country code (Diego Garcia) - 246; international telephone service is carried by satellite (2000)

British Virgin Islands

general assessment: worldwide telephone service

domestic: fixed line connections exceed 80 per 100 persons and

mobile cellular subscribership is approaching 100 per 100 persons
international: country code - 1-284; connected via submarine cable
to Bermuda; the East Caribbean Fiber System (ECFS) submarine cable
provides connectivity to 13 other islands in the eastern Caribbean
(2008)

Brunei

general assessment: service throughout the country is good;
international service is good to Southeast Asia, Middle East,
Western Europe, and the US
domestic: every service available
international: country code - 673; landing point for the SEA-ME-WE-3
optical telecommunications submarine cable that provides links to
Asia, the Middle East, and Europe; the Asia-America Gateway
submarine cable network, scheduled for completion by late 2008, will
provide new links to Asia and the US; satellite earth stations - 2
Intelsat (1 Indian Ocean and 1 Pacific Ocean) (2009)

Bulgaria

general assessment: inherited an extensive but antiquated
telecommunications network from the Soviet era; quality has improved
with a modern digital trunk line now connecting switching centers in
most of the regions; remaining areas are connected by digital
microwave radio relay
domestic: the Bulgaria Telecommunications Company's fixed-line
monopoly terminated in 2005 in an effort to upgrade fixed-line
services; mobile-cellular teledensity, fostered by multiple service
providers, approached 150 telephones per 100 persons in 2009
international: country code - 359; submarine cable provides
connectivity to Ukraine and Russia; a combination submarine cable
and land fiber-optic system provides connectivity to Italy, Albania,
and Macedonia; satellite earth stations - 3 (1 Intersputnik in the
Atlantic Ocean region, 2 Intelsat in the Atlantic and Indian Ocean
regions) (2009)

Burkina Faso

general assessment: system includes microwave radio
relay, open-wire, and radiotelephone communication stations; in 2006
the government sold a 51 percent stake in the national telephone
company and ultimately plans to retain only a 23 percent stake in
the company
domestic: fixed-line connections stand at less than 1 per 100
persons; mobile-cellular usage, fostered by multiple providers, is
increasing rapidly from a low base
international: country code - 226; satellite earth station - 1

Intelsat (Atlantic Ocean) (2009)

Burma

general assessment: meets minimum requirements for local and intercity service for business and government
domestic: system barely capable of providing basic service;
mobile-cellular phone system is grossly underdeveloped with a subscribership base of only 1 per 100 persons
international: country code - 95; landing point for the SEA-ME-WE-3 optical telecommunications submarine cable that provides links to Asia, the Middle East, and Europe; satellite earth stations - 2, Intelsat (Indian Ocean) and ShinSat (2009)

Burundi

general assessment: sparse system of open-wire, radiotelephone communications, and low-capacity microwave radio relays
domestic: telephone density one of the lowest in the world; fixed-line connections stand at well less than 1 per 100 persons; mobile-cellular usage is increasing but remains at a meager 10 per 100 persons
international: country code - 257; satellite earth station - 1 Intelsat (Indian Ocean) (2009)

Cambodia

general assessment: adequate fixed-line and/or cellular service in Phnom Penh and other provincial cities; mobile-cellular phone systems are widely used in urban areas to bypass deficiencies in the fixed-line network; mobile-phone coverage is rapidly expanding in rural areas
domestic: fixed-line connections stand at well less than 1 per 100 persons; mobile-cellular usage, aided by increasing competition among service providers, is increasing and stands at 40 per 100 persons
international: country code - 855; adequate but expensive landline and cellular service available to all countries from Phnom Penh and major provincial cities; satellite earth station - 1 Intersputnik (Indian Ocean region) (2009)

Cameroon

general assessment: system includes cable, microwave radio relay, and tropospheric scatter; Camtel, the monopoly provider of fixed-line service, provides connections for only about 1 per 100 persons; equipment is old and outdated, and connections with many parts of the country are unreliable

domestic: mobile-cellular usage, in part a reflection of the poor condition and general inadequacy of the fixed-line network, has increased sharply, reaching a subscribership base of 40 per 100 persons

international: country code - 237; landing point for the SAT-3/WASC fiber-optic submarine cable that provides connectivity to Europe and Asia; satellite earth stations - 2 Intelsat (Atlantic Ocean) (2009)

Canada

general assessment: excellent service provided by modern technology

domestic: domestic satellite system with about 300 earth stations
international: country code - 1; submarine cables provide links to the US and Europe; satellite earth stations - 7 (5 Intelsat - 4 Atlantic Ocean and 1 Pacific Ocean, and 2 Intersputnik - Atlantic Ocean region) (2007)

Cape Verde

general assessment: effective system, extensive modernization from 1996-2000 following partial privatization in 1995

domestic: major service provider is Cabo Verde Telecom (CVT); fiber-optic ring, completed in 2001, links all islands providing Internet access and ISDN services; cellular service introduced in 1998; broadband services launched in 2004

international: country code - 238; landing point for the Atlantis-2 fiber-optic transatlantic telephone cable that provides links to South America, Senegal, and Europe; HF radiotelephone to Senegal and Guinea-Bissau; satellite earth station - 1 Intelsat (Atlantic Ocean) (2007)

Cayman Islands

general assessment: reasonably good system

domestic: liberalization of telecom market in 2003; introduction of competition in the mobile-cellular market in 2004

international: country code - 1-345; landing points for the MAYA-1, Eastern Caribbean Fiber System (ECFS), and the Cayman-Jamaica Fiber System submarine cables that provide links to the US and parts of Central and South America; satellite earth station - 1 Intelsat (Atlantic Ocean) (2007)

Central African Republic

general assessment: network consists

principally of microwave radio relay and low-capacity, low-powered radiotelephone communication

domestic: limited telephone service with less than 1 fixed-line

connection per 100 persons; spurred by the presence of multiple mobile-cellular service providers, cellular usage is increasing from a low base; most fixed-line and mobile-cellular telephone services are concentrated in Bangui
international: country code - 236; satellite earth station - 1
Intelsat (Atlantic Ocean) (2008)

Chad

general assessment: inadequate system of radiotelephone communication stations with high costs and low telephone density
domestic: fixed-line connections for only about 1 per 1000 persons coupled with mobile-cellular subscribership base of only about 25 per 100 persons
international: country code - 235; satellite earth station - 1
Intelsat (Atlantic Ocean) (2009)

Chile

general assessment: privatization begun in 1988; most advanced telecommunications infrastructure in South America; modern system based on extensive microwave radio relay facilities; domestic satellite system with 3 earth stations
domestic: number of fixed-line connections have stagnated in recent years as mobile-cellular usage continues to increase, reaching a level of 100 telephones per 100 persons
international: country code - 56; landing points for the Pan American, South America-1, and South American Crossing/Latin America Nautilus submarine cables providing links to the US and to Central and South America; satellite earth stations - 2
Intelsat (Atlantic Ocean) (2009)

China

general assessment: domestic and international services are increasingly available for private use; unevenly distributed domestic system serves principal cities, industrial centers, and many towns; China continues to develop its telecommunications infrastructure, and is partnering with foreign providers to expand its global reach; China in the summer of 2008 began a major restructuring of its telecommunications industry, resulting in the consolidation of its six telecom service operators to three, China Telecom, China Mobile and China Unicom, each providing both fixed-line and mobile services
domestic: interprovincial fiber-optic trunk lines and cellular telephone systems have been installed; mobile-cellular subscribership is increasing rapidly; the number of Internet users exceeded 250 million by summer 2008; a domestic satellite system

with 55 earth stations is in place
international: country code - 86; a number of submarine cables
provide connectivity to Asia, the Middle East, Europe, and the US;
satellite earth stations - 7 (5 Intelsat - 4 Pacific Ocean and 1
Indian Ocean; 1 Intersputnik - Indian Ocean region; and 1 Inmarsat -
Pacific and Indian Ocean regions) (2008)

Christmas Island

general assessment: service provided by the
Australian network

domestic: GSM mobile-cellular telephone service replaced older
analog system in February 2005

international: country code - 61-8; satellite earth station - 1
(Intelsat provides telephone and telex service) (2005)

Cocos (Keeling) Islands

general assessment: connected within
Australia's telecommunication system; a local mobile-cellular
network is in operation

domestic: NA

international: country code - 61; telephone, telex, and facsimile
communications with Australia and elsewhere via satellite; satellite
earth station - 1 (Intelsat) (2001)

Colombia

general assessment: modern system in many respects with a
nationwide microwave radio relay system, a domestic satellite system
with 41 earth stations, and a fiber-optic network linking 50 cities;
telecommunications sector liberalized during the 1990s; multiple
providers of both fixed-line and mobile-cellular services

domestic: fixed-line connections stand at about 15 per 100 persons;
mobile cellular telephone subscribership is about 90 per 100
persons; competition among cellular service providers is resulting
in falling local and international calling rates and contributing to
the steep decline in the market share of fixed line services

international: country code - 57; landing points for the ARCOS,
Colombia-Florida Subsea Fiber (CFX-1), Maya-1, Pan American, and the
South America-1 submarine cables providing links to the US, parts of
the Caribbean, and Central and South America; satellite earth
stations - 10 (6 Intelsat, 1 Inmarsat, 3 fully digitalized
international switching centers) (2009)

Comoros

general assessment: sparse system of microwave radio relay
and HF radiotelephone communication stations

domestic: fixed-line connections only about 3 per 100 persons;
mobile cellular usage about 15 per 100 persons
international: country code - 269; HF radiotelephone communications
to Madagascar and Reunion

Congo, Democratic Republic of the general assessment: barely adequate wire and microwave radio relay service in and between urban areas; domestic satellite system with 14 earth stations; inadequate fixed line infrastructure domestic: state-owned operator providing less than 1 fixed-line connection per 1000 persons; given the backdrop of a wholly inadequate fixed-line infrastructure, the use of mobile-cellular services has surged and subscribership in 2009 exceeded 10 million - roughly 15 per 100 persons international: country code - 243; satellite earth station - 1 Intelsat (Atlantic Ocean) (2009)

Congo, Republic of the
general assessment: primary network consists
of microwave radio relay and coaxial cable with services barely
adequate for government use; key exchanges are in Brazzaville,
Pointe-Noire, and Loubomo; intercity lines frequently out of order
domestic: fixed-line infrastructure inadequate providing less than 1
connection per 100 persons; in the absence of an adequate fixed line
infrastructure, mobile-cellular subscribership has surged and now
exceeds 50 per 100 persons
international: country code - 242; satellite earth station - 1
Intelsat (Atlantic Ocean) (2009)

Cook Islands
general assessment: Telecom Cook Islands offers
international direct dialing, Internet, email, fax, and Telex
domestic: individual islands are connected by a combination of
satellite earth stations, microwave systems, and VHF and HF
radiotelephone; within the islands, service is provided by small
exchanges connected to subscribers by open-wire, cable, and
fiber-optic cable
international: country code - 682; satellite earth station - 1
Intelsat (Pacific Ocean)

Costa Rica
general assessment: good domestic telephone service in
terms of breadth of coverage; under the terms of CAFTA-DR, the
state-run telecommunications monopoly scheduled to be opened to
competition from domestic and international firms, has been delayed
by the nation's telecommunications regulator.
domestic: point-to-point and point-to-multi-point microwave,
fiber-optic, and coaxial cable link rural areas; Internet service is
available

international: country code - 506; landing points for the Americas Region Caribbean Ring System (ARCOS-1), MAYA-1, and the Pan American Crossing submarine cables that provide links to South and Central America, parts of the Caribbean, and the US; connected to Central American Microwave System; satellite earth stations - 2 Intelsat (Atlantic Ocean) (2009)

Cote d'Ivoire

general assessment: well developed by African standards; telecommunications sector privatized in late 1990s and operational fixed-lines have increased since that time with two fixed-line providers operating over open-wire lines, microwave radio relay, and fiber-optics; 90% digitalized

domestic: with multiple mobile-cellular service providers competing in the market, usage has increased sharply to roughly 65 per 100 persons

international: country code - 225; landing point for the SAT-3/WASC fiber-optic submarine cable that provides connectivity to Europe and Asia; satellite earth stations - 2 Intelsat (1 Atlantic Ocean and 1 Indian Ocean) (2009)

Croatia

general assessment: the telecommunications network has improved steadily since the mid-1990s; local lines are digital
domestic: fixed-line teledensity holding steady at about 40 per 100 persons; mobile-cellular telephone subscriptions exceed the population

international: country code - 385; digital international service is provided through the main switch in Zagreb; Croatia participates in the Trans-Asia-Europe (TEL) fiber-optic project, which consists of 2 fiber-optic trunk connections with Slovenia and a fiber-optic trunk line from Rijeka to Split and Dubrovnik; the ADRIA-1 submarine cable provides connectivity to Albania and Greece (2009)

Cuba

general assessment: greater investment beginning in 1994 and the establishment of a new Ministry of Information Technology and Communications in 2000 has resulted in improvements in the system; national fiber-optic system under development; 95% of switches digitized by end of 2006; mobile-cellular telephone service is expensive and must be paid in convertible pesos, which effectively limits subscribership

domestic: fixed-line density remains low at less than 10 per 100 inhabitants; mobile-cellular service expanding but remains less than 5 per 100 persons

international: country code - 53; fiber-optic cable laid to but not linked to US network; satellite earth station - 1 Intersputnik (Atlantic Ocean region) (2009)

Cyprus

general assessment: excellent in both area under government control and area administered by Turkish Cypriots

domestic: open-wire, fiber-optic cable, and microwave radio relay

international: country code - 357 (area administered by Turkish Cypriots uses the country code of Turkey - 90); a number of submarine cables, including the SEA-ME-WE-3, combine to provide connectivity to Western Europe, the Middle East, and Asia; tropospheric scatter; satellite earth stations - 8 (3 Intelsat - 1 Atlantic Ocean and 2 Indian Ocean, 2 Eutelsat, 2 Intersputnik, and 1 Arabsat)

Czech Republic

general assessment: privatization and modernization

of the Czech telecommunication system got a late start but is advancing steadily; virtually all exchanges now digital; existing copper subscriber systems enhanced with Asymmetric Digital Subscriber Line (ADSL) equipment to accommodate Internet and other digital signals; trunk systems include fiber-optic cable and microwave radio relay

domestic: access to the fixed-line telephone network expanded throughout the 1990s but the number of fixed line connections has been dropping since then; mobile telephone usage increased sharply beginning in the mid-1990s and the number of cellular telephone subscriptions now greatly exceeds the population

international: country code - 420; satellite earth stations - 6 (2 Intersputnik - Atlantic and Indian Ocean regions, 1 Intelsat, 1 Eutelsat, 1 Inmarsat, 1 Globalstar) (2009)

Denmark

general assessment: excellent telephone and telegraph services

domestic: buried and submarine cables and microwave radio relay form trunk network, multiple cellular mobile communications systems

international: country code - 45; a series of fiber-optic submarine cables link Denmark with Canada, Faroe Islands, Germany, Iceland, Netherlands, Norway, Poland, Russia, Sweden, and UK; satellite earth stations - 18 (6 Intelsat, 10 Eutelsat, 1 Orion, 1 Inmarsat (Blaavand-Atlantic-East)); note - the Nordic countries (Denmark, Finland, Iceland, Norway, and Sweden) share the Danish earth station and the Eik, Norway, station for worldwide Inmarsat access (2008)

Djibouti

general assessment: telephone facilities in the city of Djibouti are adequate, as are the microwave radio relay connections to outlying areas of the country

domestic: Djibouti Telecom is the sole provider of telecommunications services and utilizes mostly a microwave radio relay network; fiber-optic cable is installed in the capital; rural areas connected via wireless local loop radio systems; mobile cellular coverage is primarily limited to the area in and around Djibouti city

international: country code - 253; landing point for the SEA-ME-WE-3 optical telecommunications submarine cable with links to Asia, the Middle East, and Europe; satellite earth stations - 2 (1 Intelsat - Indian Ocean and 1 Arabsat); Medarabtel regional microwave radio relay telephone network (2009)

Dominica

general assessment: fully automatic network

domestic: Fixed-line teledensity is roughly 25 per 100 persons; mobile-cellular teledensity approached 150 per 100 persons in 2009

international: country code - 1-767; landing points for the East Caribbean Fiber Optic System (ECFS) and the Global Caribbean Network (GCN) submarine cables providing connectivity to other islands in the eastern Caribbean extending from the British Virgin Islands to Trinidad; microwave radio relay and SHF radiotelephone links to Martinique and Guadeloupe; VHF and UHF radiotelephone links to Saint Lucia

Dominican Republic

general assessment: relatively efficient system

based on island-wide microwave radio relay network

domestic: fixed-line teledensity is about 10 per 100 persons; multiple providers of mobile-cellular service with a subscribership of roughly 75 per 100 persons

international: country code - 1-809; landing point for the Americas Region Caribbean Ring System (ARCOS-1), Antillas 1, and the Fibralink submarine cables that provide links to South and Central America, parts of the Caribbean, and US; satellite earth station - 1 Intelsat (Atlantic Ocean) (2009)

Ecuador

general assessment: generally elementary but being expanded

domestic: fixed-line services provided by multiple telecommunications operators; fixed-line teledensity stands at about 14 per 100 persons; mobile-cellular use has surged and

subscribership reached about 95 per 100 persons in 2009
international: country code - 593; landing points for the PAN-AM and South America-1 submarine cables that provide links to the west coast of South America, Panama, Colombia, Venezuela, and extending onward to Aruba and the US Virgin Islands in the Caribbean; satellite earth station - 1 Intelsat (Atlantic Ocean) (2009)

Egypt

general assessment: underwent extensive upgrading during 1990s; principal centers at Alexandria, Cairo, Al Mansurah, Ismailia, Suez, and Tanta are connected by coaxial cable and microwave radio relay
domestic: largest fixed-line system in the region; as of 2010 there were three mobile-cellular networks with a total of more than 55 million subscribers
international: country code - 20; landing point for Aletar, the SEA-ME-WE-3 and SEA-ME-WE-4 submarine cable networks, Link Around the Globe (FLAG) Falcon and FLAG FEA; satellite earth stations - 4 (2 Intelsat - Atlantic Ocean and Indian Ocean, 1 Arabsat, and 1 Inmarsat); tropospheric scatter to Sudan; microwave radio relay to Israel; a participant in Medarabtel (2009)

El Salvador

general assessment: multiple mobile-cellular providers are expanding services rapidly and in 2009 teledensity exceeded 100 per 100 persons; growth in fixed-line services has slowed in the face of mobile-cellular competition
domestic: nationwide microwave radio relay system
international: country code - 503; satellite earth station - 1 Intelsat (Atlantic Ocean); connected to Central American Microwave System (2009)

Equatorial Guinea

general assessment: digital fixed-line network in most major urban areas and good mobile coverage
domestic: fixed-line density is about 2 per 100 persons; mobile-cellular subscribership has been increasing and in 2009 stood at about 70 percent of the population
international: country code - 240; international communications from Bata and Malabo to African and European countries; satellite earth station - 1 Intelsat (Indian Ocean) (2009)

Eritrea

general assessment: inadequate; most telephones are in Asmara; government is seeking international tenders to improve the

system (2002)

domestic: combined fixed-line and mobile-cellular subscribership is only about 3 per 100 persons (2009)

international: country code - 291; note - international connections exist

Estonia

general assessment: foreign investment in the form of joint business ventures greatly improved telephone service with a wide range of high quality voice, data, and Internet services available

domestic: substantial fiber-optic cable systems carry telephone, TV, and radio traffic in the digital mode; Internet services are widely available; schools and libraries are connected to the Internet, a large percentage of the population files income-tax returns online, and online voting was used for the first time in the 2005 local elections

international: country code - 372; fiber-optic cables to Finland, Sweden, Latvia, and Russia provide worldwide packet-switched service; 2 international switches are located in Tallinn (2008)

Ethiopia

general assessment: inadequate telephone system with the Ethiopian Telecommunications Corporation (ETC) maintaining a monopoly over telecommunication services; open-wire, microwave radio relay; radio communication in the HF, VHF, and UHF frequencies; 2

domestic satellites provide the national trunk service

domestic: the number of fixed lines and mobile telephones is increasing from a small base; combined fixed and mobile-cellular teledensity is only about 5 per 100 persons

international: country code - 251; open-wire to Sudan and Djibouti; microwave radio relay to Kenya and Djibouti; satellite earth stations - 3 Intelsat (1 Atlantic Ocean and 2 Pacific Ocean) (2009)

European Union

note - see individual country entries of member states

Falkland Islands (Islas Malvinas)

general assessment: NA

domestic: government-operated radiotelephone and private VHF/CB radiotelephone networks provide effective service to almost all points on both islands

international: country code - 500; satellite earth station - 1 Intelsat (Atlantic Ocean) with links through London to other countries

Faroe Islands

general assessment: good international communications;
good domestic facilities
domestic: conversion to digital system completed in 1998; both NMT (analog) and GSM (digital) mobile telephone systems are installed
international: country code - 298; satellite earth stations - 1 Orion; 1 fiber-optic submarine cable to the Shetland Islands, linking the Faroe Islands with Denmark and Iceland; fiber-optic submarine cable connection to Canada-Europe cable

Fiji

general assessment: modern local, interisland, and international (wire/radio integrated) public and special-purpose telephone, telegraph, and teleprinter facilities; regional radio communications center
domestic: telephone or radio telephone links to almost all inhabited islands; most towns and large villages have automatic telephone exchanges and direct dialing; combined fixed and mobile-cellular teledensity is about 80 per 100 persons
international: country code - 679; access to important cable links between US and Canada as well as between NZ and Australia; satellite earth stations - 2 Inmarsat (Pacific Ocean) (2009)

Finland

general assessment: modern system with excellent service
domestic: digital fiber-optic fixed-line network and an extensive mobile-cellular network provide domestic needs
international: country code - 358; submarine cables provide links to Estonia and Sweden; satellite earth stations - access to Intelsat transmission service via a Swedish satellite earth station, 1 Inmarsat (Atlantic and Indian Ocean regions); note - Finland shares the Inmarsat earth station with the other Nordic countries (Denmark, Iceland, Norway, and Sweden)

France

general assessment: highly developed
domestic: extensive cable and microwave radio relay; extensive use of fiber-optic cable; domestic satellite system
international: country code - 33; numerous submarine cables provide links throughout Europe, Asia, Australia, the Middle East, and US; satellite earth stations - more than 3 (2 Intelsat (with total of 5 antennas - 2 for Indian Ocean and 3 for Atlantic Ocean), NA Eutelsat, 1 Inmarsat - Atlantic Ocean region); HF radiotelephone communications with more than 20 countries
overseas departments: country codes: French Guiana - 594; Guadeloupe - 590; Martinique - 596; Reunion - 262

French Polynesia

general assessment: NA

domestic: combined fixed and mobile-cellular density is roughly 90 per 100 persons

international: country code - 689; satellite earth station - 1 Intelsat (Pacific Ocean) (2009)

Gabon

general assessment: adequate system of cable, microwave radio relay, tropospheric scatter, radiotelephone communication stations, and a domestic satellite system with 12 earth stations

domestic: a growing mobile-cellular network with multiple providers is making telephone service more widely available; subscribership reached 90 per 100 persons in 2009

international: country code - 241; landing point for the SAT-3/WASC fiber-optic submarine cable that provides connectivity to Europe and Asia; satellite earth stations - 3 Intelsat (Atlantic Ocean) (2009)

Gambia, The

general assessment: adequate microwave radio relay and open-wire network; state-owned Gambia Telecommunications partially privatized in 2007

domestic: combined fixed-line and mobile-cellular teledensity, aided by multiple mobile-cellular providers, approached 85 per 100 persons in 2009

international: country code - 220; microwave radio relay links to Senegal and Guinea-Bissau; a landing station for the Africa Coast to Europe (ACE) undersea fiber-optic cable is scheduled for completion in 2011; satellite earth station - 1 Intelsat (Atlantic Ocean) (2009)

Gaza Strip

general assessment: Gaza continues to repair the damage to its telecommunications infrastructure caused by fighting in 2009

domestic: Israeli company BEZEK and the Palestinian company PALTEL are responsible for fixed line services; the Palestinian JAWWAL company provides cellular services

international: country code - 970 (2009)

Georgia

general assessment: fixed-line telecommunications network has only limited coverage outside Tbilisi; long list of people waiting for fixed line connections; multiple mobile-cellular providers provide services to an increasing subscribership throughout the country

domestic: cellular telephone networks cover the entire country;

mobile-cellular teledensity roughly 60 per 100 people; urban fixed-line telephone density is about 20 per 100 people; rural telephone density is about 4 per 100 people; intercity facilities include a fiber-optic line between T'bilisi and K'ut'aisi; nationwide pager service is available
international: country code - 995; the Georgia-Russia fiber optic submarine cable provides connectivity to Russia; international service is available by microwave, landline, and satellite through the Moscow switch; international electronic mail and telex service are available

Germany

general assessment: Germany has one of the world's most technologically advanced telecommunications systems; as a result of intensive capital expenditures since reunification, the formerly backward system of the eastern part of the country, dating back to World War II, has been modernized and integrated with that of the western part

domestic: Germany is served by an extensive system of automatic telephone exchanges connected by modern networks of fiber-optic cable, coaxial cable, microwave radio relay, and a domestic satellite system; cellular telephone service is widely available, expanding rapidly, and includes roaming service to many foreign countries

international: country code - 49; Germany's international service is excellent worldwide, consisting of extensive land and undersea cable facilities as well as earth stations in the Inmarsat, Intelsat, Eutelsat, and Intersputnik satellite systems (2001)

Ghana

general assessment: primarily microwave radio relay; wireless local loop has been installed; outdated and unreliable fixed-line infrastructure heavily concentrated in Accra

domestic: competition among multiple mobile-cellular providers has spurred growth with a subscribership of more than 60 per 100 persons and rising

international: country code - 233; landing point for the SAT-3/WASC, Main One, and GLO-1 fiber-optic submarine cables that provide connectivity to South Africa, Europe, and Asia; satellite earth stations - 4 Intelsat (Atlantic Ocean); microwave radio relay link to Panaftel system connects Ghana to its neighbors (2009)

Gibraltar

general assessment: adequate, automatic domestic system and adequate international facilities

domestic: automatic exchange facilities

international: country code - 350; radiotelephone; microwave radio relay; satellite earth station - 1 Intelsat (Atlantic Ocean)

Greece

general assessment: adequate, modern networks reach all areas; good mobile telephone and international service

domestic: microwave radio relay trunk system; extensive open-wire connections; submarine cable to offshore islands

international: country code - 30; landing point for the SEA-ME-WE-3

optical telecommunications submarine cable that provides links to Europe, Middle East, and Asia; a number of smaller submarine cables

provide connectivity to various parts of Europe, the Middle East,

and Cyprus; tropospheric scatter; satellite earth stations - 4 (2

Intelsat - 1 Atlantic Ocean and 1 Indian Ocean, 1 Eutelsat, and 1

Inmarsat - Indian Ocean region)

Greenland

general assessment: adequate domestic and international

service provided by satellite, cables and microwave radio relay;

totally digital since 1995

domestic: microwave radio relay and satellite

international: country code - 299; satellite earth stations - 15 (12

Intelsat, 1 Eutelsat, 2 Americom GE-2 (all Atlantic Ocean)) (2000)

Grenada

general assessment: automatic, island-wide telephone system

domestic: interisland VHF and UHF radiotelephone links

international: country code - 1-473; landing point for the East

Caribbean Fiber Optic System (ECFS) submarine cable with links to 13

other islands in the eastern Caribbean extending from the British

Virgin Islands to Trinidad; SHF radiotelephone links to Trinidad and

Tobago and Saint Vincent; VHF and UHF radio links to Trinidad

Guam

general assessment: modern system, integrated with US

facilities for direct dialing, including free use of 800 numbers

domestic: digital system, including mobile-cellular service and

local access to the Internet

international: country code - 1-671; major landing point for

submarine cables between Asia and the US (Guam is a trans-Pacific

communications hub for major carriers linking the US and Asia);

satellite earth stations - 2 Intelsat (Pacific Ocean)

Guatemala

general assessment: fairly modern network centered in the

city of Guatemala

domestic: state-owned telecommunications company privatized in the late 1990s opening the way for competition; fixed-line teledensity roughly 10 per 100 persons; fixed-line investments are being concentrated on improving rural connectivity; mobile-cellular teledensity exceeds 100 per 100 persons

international: country code - 502; landing point for both the Americas Region Caribbean Ring System (ARCOS-1) and the SAM-1 fiber optic submarine cable system that together provide connectivity to South and Central America, parts of the Caribbean, and the US; connected to Central American Microwave System; satellite earth station - 1 Intelsat (Atlantic Ocean) (2008)

Guernsey

general assessment: NA

domestic: fixed-line and mobile-cellular services widely available; combined fixed and mobile-cellular teledensity exceeds 100 per 100 persons

international: country code - 44; 1 submarine cable

Guinea

general assessment: inadequate system of open-wire lines, small radiotelephone communication stations, and new microwave radio relay system

domestic: Conakry reasonably well served; coverage elsewhere remains inadequate and large companies tend to rely on their own systems for nationwide links; fixed-line teledensity less than 1 per 100 persons; mobile-cellular subscribership is expanding and exceeded 50 per 100 persons in 2009

international: country code - 224; satellite earth station - 1 Intelsat (Atlantic Ocean)

Guinea-Bissau

general assessment: small system including a combination of microwave radio relay, open-wire lines, radiotelephone, and mobile-cellular communications

domestic: fixed-line teledensity less than 1 per 100 persons; mobile-cellular teledensity reached 35 per 100 in 2009

international: country code - 245 (2008)

Guyana

general assessment: fair system for long-distance service; microwave radio relay network for trunk lines; many areas still lack fixed-line telephone services

domestic: fixed-line teledensity is about 15 per 100 persons; ;

mobile-cellular teledensity about 35 per 100 persons in 2005
international: country code - 592; tropospheric scatter to Trinidad;
satellite earth station - 1 Intelsat (Atlantic Ocean)

Haiti

general assessment: telecommunications infrastructure is among the least developed in Latin America and the Caribbean; domestic facilities barely adequate; international facilities slightly better
domestic: mobile-cellular telephone services are expanding rapidly due, in part, to the introduction of low-cost GSM phones;
mobile-cellular teledensity reached 40 per 100 persons in 2009
international: country code - 509; satellite earth station - 1 Intelsat (Atlantic Ocean)

Holy See (Vatican City)

general assessment: automatic digital exchange
domestic: connected via fiber optic cable to Telecom Italia network
international: country code - 39; uses Italian system

Honduras

general assessment: the number of fixed-line connections are increasing but still limited; competition among multiple providers of mobile-cellular services is contributing to a sharp increase in the number of subscribers
domestic: beginning in 2003, private sub-operators allowed to provide fixed-lines in order to expand telephone coverage contributing to an increase in fixed-line teledensity to roughly 10 per 100 persons; mobile-cellular subscribership reached 100 per 100 persons in 2009
international: country code - 504; landing point for both the Americas Region Caribbean Ring System (ARCOS-1) and the MAYA-1 fiber optic submarine cable system that together provide connectivity to South and Central America, parts of the Caribbean, and the US; satellite earth stations - 2 Intelsat (Atlantic Ocean); connected to Central American Microwave System

Hong Kong

general assessment: modern facilities provide excellent domestic and international services
domestic: microwave radio relay links and extensive fiber-optic network
international: country code - 852; multiple international submarine cables provide connections to Asia, US, Australia, the Middle East, and Western Europe; satellite earth stations - 3 Intelsat (1 Pacific

Ocean and 2 Indian Ocean); coaxial cable to Guangzhou, China

Hungary

general assessment: the telephone system has been modernized; the system is digital and highly automated; trunk services are carried by fiber-optic cable and digital microwave radio relay; a program for fiber-optic subscriber connections was initiated in 1996

domestic: competition among mobile-cellular service providers has led to a sharp increase in the use of mobile-cellular phones since 2000 and a decrease in the number of fixed-line connections

international: country code - 36; Hungary has fiber-optic cable connections with all neighboring countries; the international switch is in Budapest; satellite earth stations - 2 Intelsat (Atlantic Ocean and Indian Ocean regions), 1 Inmarsat, 1 very small aperture terminal (VSAT) system of ground terminals

Iceland

general assessment: telecommunications infrastructure is modern and fully digitized, with satellite-earth stations, fiber-optic cables, and an extensive broadband network

domestic: liberalization of the telecommunications sector beginning in the late 1990s has led to increased competition especially in the mobile services segment of the market

international: country code - 354; the CANTAT-3 and FARICE-1 submarine cable systems provide connectivity to Canada, the Faroe Islands, UK, Denmark, and Germany; a planned new section of the Hibernia-Atlantic submarine cable will provide additional connectivity to Canada, US, and Ireland; satellite earth stations - 2 Intelsat (Atlantic Ocean), 1 Inmarsat (Atlantic and Indian Ocean regions); note - Iceland shares the Inmarsat earth station with the other Nordic countries (Denmark, Finland, Norway, and Sweden)

India

general assessment: supported by recent deregulation and liberalization of telecommunications laws and policies, India has emerged as one of the fastest growing telecom markets in the world; total telephone subscribership base reached 700 million, an overall teledensity of 60%, and subscribership is currently growing more than 15 million per month; urban teledensity has reached 100% and rural teledensity is about 20% and steadily growing

domestic: mobile cellular service introduced in 1994 and organized nationwide into four metropolitan areas and 19 telecom circles each with multiple private service providers and one or more state-owned service providers; in recent years significant trunk capacity added

in the form of fiber-optic cable and one of the world's largest domestic satellite systems, the Indian National Satellite system (INSAT), with 6 satellites supporting 33,000 very small aperture terminals (VSAT)

international: country code - 91; a number of major international submarine cable systems, including Sea-Me-We-3 with landing sites at Cochin and Mumbai (Bombay), Sea-Me-We-4 with a landing site at Chennai, Fiber-Optic Link Around the Globe (FLAG) with a landing site at Mumbai (Bombay), South Africa - Far East (SAFE) with a landing site at Cochin, the i2i cable network linking to Singapore with landing sites at Mumbai (Bombay) and Chennai (Madras), and Tata Indicom linking Singapore and Chennai (Madras), provide a significant increase in the bandwidth available for both voice and data traffic; satellite earth stations - 8 Intelsat (Indian Ocean) and 1 Inmarsat (Indian Ocean region); 9 gateway exchanges operating from Mumbai (Bombay), New Delhi, Kolkata (Calcutta), Chennai (Madras), Jalandhar, Kanpur, Gandhinagar, Hyderabad, and Ernakulam (2010)

Indonesia

general assessment: domestic service includes an interisland microwave system, an HF radio police net, and a domestic satellite communications system; international service good
domestic: coverage provided by existing network has been expanded by use of over 200,000 telephone kiosks many located in remote areas; mobile-cellular subscribership growing rapidly
international: country code - 62; landing point for both the SEA-ME-WE-3 and SEA-ME-WE-4 submarine cable networks that provide links throughout Asia, the Middle East, and Europe; satellite earth stations - 2 Intelsat (1 Indian Ocean and 1 Pacific Ocean)

Iran

general assessment: currently being modernized and expanded with the goal of not only improving the efficiency and increasing the volume of the urban service but also bringing telephone service to several thousand villages, not presently connected
domestic: the addition of new fiber cables and modern switching and exchange systems installed by Iran's state-owned telecom company have improved and expanded the fixed-line network greatly; fixed-line availability has more than doubled to nearly 26 million lines since 2000; additionally, mobile-cellular service has increased dramatically serving more than 50 million subscribers in 2009; combined fixed and mobile-cellular subscribership now exceeds 100 per 100 persons
international: country code - 98; submarine fiber-optic cable to UAE

with access to Fiber-Optic Link Around the Globe (FLAG); Trans-Asia-Europe (TAE) fiber-optic line runs from Azerbaijan through the northern portion of Iran to Turkmenistan with expansion to Georgia and Azerbaijan; HF radio and microwave radio relay to Turkey, Azerbaijan, Pakistan, Afghanistan, Turkmenistan, Syria, Kuwait, Tajikistan, and Uzbekistan; satellite earth stations - 13 (9 Intelsat and 4 Inmarsat) (2009)

Iraq

general assessment: the 2003 liberation of Iraq severely disrupted telecommunications throughout Iraq including international connections; widespread government efforts to rebuild domestic and international communications through fiber optic links are in progress; the mobile cellular market has expanded rapidly and its subscribership base is expected to continue increasing rapidly
domestic: repairs to switches and lines destroyed during 2003 continue; additional switching capacity is improving access; mobile-cellular service is available and centered on 3 GSM networks which are being expanded beyond their regional roots, improving country-wide connectivity; wireless local loop is available in some metropolitan areas and additional licenses have been issued with the hope of overcoming the lack of fixed-line infrastructure
international: country code - 964; satellite earth stations - 4 (2 Intelsat - 1 Atlantic Ocean and 1 Indian Ocean, 1 Intersputnik - Atlantic Ocean region, and 1 Arabsat (inoperative)); local microwave radio relay connects border regions to Jordan, Kuwait, Syria, and Turkey; international terrestrial fiber-optic connections have been established with Saudi Arabia, Turkey, and Kuwait with planned connections to Iran and Jordan; a link to the Fiber-Optic Link Around the Globe (FLAG) submarine fiber-optic cable is planned (2009)

Ireland

general assessment: modern digital system using cable and microwave radio relay
domestic: system privatized but dominated by former state monopoly operator; increasing levels of broadband access
international: country code - 353; landing point for the Hibernia-Atlantic submarine cable with links to the US, Canada, and UK; satellite earth station - 1 Intelsat (Atlantic Ocean)

Isle of Man

general assessment: NA
domestic: landline, telefax, mobile cellular telephone system
international: country code - 44; fiber-optic cable, microwave radio relay, satellite earth station, submarine cable

Israel

general assessment: most highly developed system in the Middle East although not the largest

domestic: good system of coaxial cable and microwave radio relay; all systems are digital; four privately-owned mobile-cellular service providers with countrywide coverage

international: country code - 972; submarine cables provide links to Europe, Cyprus, and parts of the Middle East; satellite earth stations - 3 Intelsat (2 Atlantic Ocean and 1 Indian Ocean) (2008)

Italy

general assessment: modern, well developed, fast; fully automated telephone, telex, and data services

domestic: high-capacity cable and microwave radio relay trunks

international: country code - 39; a series of submarine cables provide links to Asia, Middle East, Europe, North Africa, and US; satellite earth stations - 3 Intelsat (with a total of 5 antennas - 3 for Atlantic Ocean and 2 for Indian Ocean), 1 Inmarsat (Atlantic Ocean region), and NA Eutelsat

Jamaica

general assessment: fully automatic domestic telephone network

domestic: the 1999 agreement to open the market for telecommunications services resulted in rapid growth in mobile-cellular telephone usage while the number of fixed-lines in use has declined; combined mobile-cellular teledensity exceeded 110 per 100 persons in 2009

international: country code - 1-876; the Fibralink submarine cable network provides enhanced delivery of business and broadband traffic and is linked to the Americas Region Caribbean Ring System (ARCOS-1) submarine cable in the Dominican Republic; the link to ARCOS-1 provides seamless connectivity to US, parts of the Caribbean, Central America, and South America; satellite earth stations - 2 Intelsat (Atlantic Ocean) (2008)

Japan

general assessment: excellent domestic and international service

domestic: high level of modern technology and excellent service of every kind

international: country code - 81; numerous submarine cables provide links throughout Asia, Australia, the Middle East, Europe, and US; satellite earth stations - 7 Intelsat (Pacific and Indian Oceans), 1 Intersputnik (Indian Ocean region), 3 Inmarsat (Pacific and Indian

Ocean regions), and 8 SkyPerfect JSAT (2008)

Jersey

general assessment: state-owned, partially-competitive

market; increasingly modern, with some broadband access

domestic: digital telephone system launch announced in 2006 and

currently being implemented; fixed-line and mobile-cellular services

widely available; combined fixed and mobile-cellular density exceeds

100 per 100 persons

international: country code - 44; submarine cable connectivity to

Guernsey, the UK, and France (2008)

Jordan

general assessment: service has improved recently with

increased use of digital switching equipment; microwave radio relay

transmission and coaxial and fiber-optic cable are employed on trunk

lines; growing mobile-cellular usage in both urban and rural areas

is reducing use of fixed-line services; Internet penetration remains

modest and slow-growing

domestic: 1995 telecommunications law opened all non-fixed-line

services to private competition; in 2005, monopoly over fixed-line

services terminated and the entire telecommunications sector was

opened to competition; currently multiple mobile-cellular providers

with subscribership rapidly approaching 100 per 100 persons

international: country code - 962; landing point for the Fiber-Optic

Link Around the Globe (FLAG) FEA and FLAG Falcon submarine cable

networks; satellite earth stations - 33 (3 Intelsat, 1 Arabsat, and

29 land and maritime Inmarsat terminals); fiber-optic cable to Saudi

Arabia and microwave radio relay link with Egypt and Syria;

participant in Medarabtel (2010)

Kazakhstan

general assessment: inherited an outdated

telecommunications network from the Soviet era requiring

modernization

domestic: intercity by landline and microwave radio relay; number of

fixed-line connections is gradually increasing and fixed-line

teledensity now roughly 25 per 100 persons; mobile-cellular usage is

increasing and the subscriber base now is roughly 100 per 100 persons

international: country code - 7; international traffic with other

former Soviet republics and China carried by landline and microwave

radio relay and with other countries by satellite and by the

Trans-Asia-Europe (TAE) fiber-optic cable; satellite earth stations

- 2 Intelsat (2008)

Kenya

general assessment: inadequate; fixed-line telephone system is small and inefficient; trunks are primarily microwave radio relay; business data commonly transferred by a very small aperture terminal (VSAT) system

domestic: sole fixed-line provider, Telkom Kenya, is slated for privatization; multiple providers in the mobile-cellular segment of the market fostering a boom in mobile-cellular telephone usage with teledensity reaching 50 per 100 persons in 2009

international: country code - 254; The East Africa Marine System (TEAMS) and the SEACOM undersea fiber-optic cable systems; satellite earth stations - 4 Intelsat

Kiribati

general assessment: generally good quality national and international service

domestic: wire line service available on Tarawa and Kiritimati (Christmas Island); connections to outer islands by HF/VHF radiotelephone; wireless service available in Tarawa since 1999

international: country code - 686; Kiribati is being linked to the Pacific Ocean Cooperative Telecommunications Network, which should improve telephone service; satellite earth station - 1 Intelsat (Pacific Ocean)

Korea, North

general assessment: adequate system; nationwide fiber-optic network; mobile-cellular service expanding beyond Pyongyang

domestic: fiber-optic links installed down to the county level; telephone directories unavailable; mobile-cellular service, initiated in 2002, suspended in 2004; Orascom Telecom, an Egyptian company, launched mobile service on December 15, 2008 for the Pyongyang area with plans to expand nationwide

international: country code - 850; satellite earth stations - 2 (1 Intelsat - Indian Ocean, 1 Russian - Indian Ocean region); other international connections through Moscow and Beijing (2009)

Korea, South

general assessment: excellent domestic and international services featuring rapid incorporation of new technologies

domestic: fixed-line and mobile-cellular services widely available with a combined telephone subscribership of roughly 140 per 100 persons; rapid assimilation of a full range of telecommunications technologies leading to a boom in e-commerce

international: country code - 82; numerous submarine cables provide links throughout Asia, Australia, the Middle East, Europe, and US; satellite earth stations - 66

Kuwait

general assessment: the quality of service is excellent

domestic: new telephone exchanges provide a large capacity for new subscribers; trunk traffic is carried by microwave radio relay, coaxial cable, and open-wire and fiber-optic cable; a mobile-cellular telephone system operates throughout Kuwait, and the country is well supplied with pay telephones

international: country code - 965; linked to international submarine cable Fiber-Optic Link Around the Globe (FLAG); linked to Bahrain, Qatar, UAE via the Fiber-Optic Gulf (FOG) cable; coaxial cable and microwave radio relay to Saudi Arabia; satellite earth stations - 6 (3 Intelsat - 1 Atlantic Ocean and 2 Indian Ocean, 1 Inmarsat - Atlantic Ocean, and 2 Arabsat)

Kyrgyzstan

general assessment: telecommunications infrastructure is being upgraded; loans from the European Bank for Reconstruction and Development (EBRD) are being used to install a digital network, digital radio-relay stations, and fiber-optic links

domestic: fixed-line penetration remains low and concentrated in urban areas; multiple mobile-cellular service providers with growing coverage; mobile-cellular subscribership exceeded 80 per 100 persons in 2009

international: country code - 996; connections with other CIS countries by landline or microwave radio relay and with other countries by leased connections with Moscow international gateway switch and by satellite; satellite earth stations - 2 (1 Intersputnik, 1 Intelsat); connected internationally by the Trans-Asia-Europe (TAE) fiber-optic line

Laos

general assessment: service to general public is poor but improving; the government relies on a radiotelephone network to communicate with remote areas

domestic: multiple service providers; mobile cellular usage growing very rapidly

international: country code - 856; satellite earth station - 1 Intersputnik (Indian Ocean region) and a second to be developed by China (2008)

Latvia

general assessment: recent efforts focused on bringing competition to the telecommunications sector; the number of fixed lines is decreasing as mobile-cellular telephone service expands
domestic: number of telecommunications operators has grown rapidly since the fixed-line market opened to competition in 2003; combined fixed-line and mobile-cellular subscribership exceeds 125 per 100 persons
international: country code - 371; the Latvian network is now connected via fiber optic cable to Estonia, Finland, and Sweden (2008)

Lebanon

general assessment: repair of the telecommunications system, severely damaged during the civil war, now complete
domestic: two mobile-cellular networks provide good service; combined fixed-line and mobile-cellular subscribership exceeds 55 per 100 persons
international: country code - 961; submarine cable links to Cyprus, Egypt, and Syria; satellite earth stations - 2 Intelsat (1 Indian Ocean and 1 Atlantic Ocean); coaxial cable to Syria (2009)

Lesotho

general assessment: rudimentary system consisting of a modest number of landlines, a small microwave radio relay system, and a small radiotelephone communication system; mobile-cellular telephone system is expanding
domestic: privatized in 2001, Telecom Lesotho was tasked with providing an additional 50,000 fixed-line connections within five years, a target not met; mobile-cellular service dominates the market and is expanding with a subscribership exceeding 30 per 100 persons in 2009; rural services are scant
international: country code - 266; satellite earth station - 1 Intelsat (Atlantic Ocean) (2009)

Liberia

general assessment: the limited services available are found almost exclusively in the capital Monrovia; fixed-line service stagnant and extremely limited; telephone coverage extended to a number of other towns and rural areas by four mobile-cellular network operators
domestic: mobile-cellular subscription base growing and teledensity reached 25 per 100 persons in 2009
international: country code - 231; satellite earth station - 1 Intelsat (Atlantic Ocean) (2009)

Libya

general assessment: telecommunications system is state-owned and service is poor, but investment is being made to upgrade; state retains monopoly in fixed-line services; mobile-cellular telephone system became operational in 1996

domestic: multiple providers for a mobile telephone system that is growing rapidly; combined fixed-line and mobile-cellular teledensity is approaching 100 telephones per 100 persons

international: country code - 218; satellite earth stations - 4

Intelsat, NA Arabsat, and NA Intersputnik; submarine cable to France and Italy; microwave radio relay to Tunisia and Egypt; tropospheric scatter to Greece; participant in Medarabtel (2009)

Liechtenstein

general assessment: automatic telephone system

domestic: fixed-line and mobile-cellular services widely available;

combined telephone service subscribership exceeds 150 per 100 persons

international: country code - 423; linked to Swiss networks by cable and microwave radio relay (2008)

Lithuania

general assessment: adequate; being modernized to provide

improved international capability and better residential access

domestic: rapid expansion of mobile-cellular services has resulted in a steady decline in the number of fixed-line connections;

mobile-cellular teledensity stands at about 140 per 100 persons

international: country code - 370; major international connections to Denmark, Sweden, and Norway by submarine cable for further transmission by satellite; landline connections to Latvia and Poland (2008)

Luxembourg

general assessment: highly developed, completely automated and efficient system, mainly buried cables

domestic: fixed line teledensity over 50 per 100 persons; nationwide mobile-cellular telephone system with market for mobile-cellular phones virtually saturated

international: country code - 352 (2008)

Macau

general assessment: fairly modern communication facilities

maintained for domestic and international services

domestic: termination of monopoly over mobile-cellular telephone

services in 2001 spurred sharp increase in subscriptions with mobile-cellular teledensity approaching 200 per 100 persons in 2010;

fixed-line subscribership appears to have peaked and is now in decline

international: country code - 853; landing point for the SEA-ME-WE-3 submarine cable network that provides links to Asia, the Middle East, and Europe; HF radiotelephone communication facility; satellite earth station - 1 Intelsat (Indian Ocean) (2010)

Macedonia

general assessment: competition from the mobile-cellular

segment of the telecommunications market has led to a drop in fixed-line telephone subscriptions

domestic: combined fixed-line and mobile-cellular telephone subscribership about 115 per 100 persons

international: country code - 389 (2009)

Madagascar

general assessment: system is above average for the region; Antananarivo's main telephone exchange modernized in the late 1990s, but the rest of the analogue-based telephone system is poorly developed; have been adding fixed line connections since 2005
domestic: combined fixed-line and mobile-cellular teledensity about 30 per 100 persons

international: country code - 261; SEACOM undersea fiber-optic cable and the Lion undersea cable connecting to Reunion and Mauritius; satellite earth stations - 2 (1 Intelsat - Indian Ocean, 1 Intersputnik - Atlantic Ocean region) (2009)

Malawi

general assessment: rudimentary; privatization of Malawi Telecommunications (MTL), a necessary step in bringing improvement to telecommunications services, completed in 2006

domestic: limited fixed-line subscribership of about 1 per 100 persons; mobile-cellular services are expanding but network coverage is limited and is based around the main urban areas; mobile-cellular subscribership about 15 per 100 persons

international: country code - 265; satellite earth stations - 2 Intelsat (1 Indian Ocean, 1 Atlantic Ocean) (2009)

Malaysia

general assessment: modern system featuring good intercity service on Peninsular Malaysia provided mainly by microwave radio relay and an adequate intercity microwave radio relay network between Sabah and Sarawak via Brunei; international service excellent

domestic: domestic satellite system with 2 earth stations; combined fixed-line and mobile-cellular teledensity 135 per 100 persons

international: country code - 60; landing point for several major international submarine cable networks that provide connectivity to Asia, Middle East, and Europe; satellite earth stations - 2 Intelsat (1 Indian Ocean, 1 Pacific Ocean) (2008)

Maldives

general assessment: telephone services have improved; interatoll communication through microwave links; all inhabited islands and resorts are connected with telephone and fax service
domestic: each island now has at least 1 public telephone, and there are mobile-cellular networks with a rapidly expanding subscribership that exceeds 100 per 100 persons

international: country code - 960; linked to international submarine

cable Fiber-Optic Link Around the Globe (FLAG); satellite earth station - 3 Intelsat (Indian Ocean) (2009)

Mali

general assessment: domestic system unreliable but improving; increasing use of local radio loops to extend network coverage to remote areas

domestic: fixed-line subscribership remains less than 1 per 100 persons; mobile-cellular subscribership has increased sharply to nearly 30 per 100 persons

international: country code - 223; satellite communications center and fiber-optic links to neighboring countries; satellite earth stations - 2 Intelsat (1 Atlantic Ocean, 1 Indian Ocean) (2008)

Malta

general assessment: automatic system featuring submarine cable and microwave radio relay between islands

domestic: combined fixed-line and mobile-cellular subscribership exceeds 165 per 100 persons

international: country code - 356; submarine cable connects to Italy; satellite earth station - 1 Intelsat (Atlantic Ocean) (2008)

Marshall Islands

general assessment: digital switching equipment;

modern services include telex, cellular, Internet, international calling, caller ID, and leased data circuits

domestic: Majuro Atoll and Ebeye and Kwajalein islands have regular, seven-digit, direct-dial telephones; other islands interconnected by high frequency radiotelephone (used mostly for government purposes) and mini-satellite telephones

international: country code - 692; satellite earth stations - 2 Intelsat (Pacific Ocean); US Government satellite communications system on Kwajalein (2005)

Mauritania

general assessment: limited system of cable and open-wire lines, minor microwave radio relay links, and radiotelephone communications stations; mobile-cellular services expanding rapidly

domestic: Mauritel, the national telecommunications company, was privatized in 2001 but remains the monopoly provider of fixed-line services; fixed-line teledensity 2 per 100 persons; mobile-cellular network coverage extends mainly to urban areas with a teledensity of 70 per 100 persons; mostly cable and open-wire lines; a domestic satellite telecommunications system links Nouakchott with regional capitals

international: country code - 222; satellite earth stations - 3 (1 Intelsat - Atlantic Ocean, 2 Arabsat); optical-fiber and Asymmetric Digital Subscriber Line (ADSL) cables for internet access (2008)

Mauritius

general assessment: small system with good service
domestic: monopoly over fixed-line services terminated in 2005; fixed-line teledensity roughly 30 per 100 persons; mobile-cellular services launched in 1989 with teledensity in 2009 reaching 85 per 100 persons

international: country code - 230; landing point for the SAFE submarine cable that provides links to Asia and South Africa where it connects to the SAT-3/WASC submarine cable that provides further links to parts of East Africa, and Europe; satellite earth station - 1 Intelsat (Indian Ocean); new microwave link to Reunion; HF radiotelephone links to several countries (2009)

Mayotte

general assessment: small system administered by French Department of Posts and Telecommunications

domestic: NA

international: country code - 262; microwave radio relay and HF radiotelephone communications to Comoros

Mexico

general assessment: adequate telephone service for business and government; improving quality and increasing mobile cellular availability, with mobile subscribers far outnumbering fixed-line subscribers; domestic satellite system with 120 earth stations; extensive microwave radio relay network; considerable use of fiber-optic cable and coaxial cable

domestic: despite the opening to competition in January 1997, Telmex remains dominant; Fixed-line teledensity is less than 20 per 100 persons; mobile-cellular teledensity reached 75 per 100 persons in 2009

international: country code - 52; Columbus-2 fiber-optic submarine cable with access to the US, Virgin Islands, Canary Islands, Spain, and Italy; the Americas Region Caribbean Ring System (ARCOS-1) and the MAYA-1 submarine cable system together provide access to Central America, parts of South America and the Caribbean, and the US; satellite earth stations - 120 (32 Intelsat, 2 Solidaridad (giving Mexico improved access to South America, Central America, and much of the US as well as enhancing domestic communications), 1 Panamsat, numerous Inmarsat mobile earth stations); linked to Central American Microwave System of trunk connections (2009)

Micronesia, Federated States of general assessment: adequate system domestic: islands interconnected by shortwave radiotelephone (used mostly for government purposes), satellite (Intelsat) ground stations, and some coaxial and fiber-optic cable; mobile-cellular service available on Kosrae, Pohnpei, and Yap international: country code - 691; satellite earth stations - 5 Intelsat (Pacific Ocean) (2002)

Moldova

general assessment: poor service outside Chisinau; some modernization is under way
domestic: depending on location, new subscribers may face long wait for service; multiple private operators of GSM mobile-cellular telephone service are operating; GPRS system is being introduced; a CDMA mobile telephone network began operations in 2007; combined fixed-line and mobile-cellular teledensity 90 per 100 persons
international: country code - 373; service through Romania and Russia via landline; satellite earth stations - at least 3 (Intelsat, Eutelsat, and Intersputnik) (2009)

Monaco

general assessment: modern automatic telephone system; the country's sole fixed line operator offers a full range of services to residential and business customers
domestic: combined fixed-line and mobile-cellular teledensity exceeds 100%
international: country code - 377; no satellite earth stations; connected by cable into the French communications system

Mongolia

general assessment: network is improving with international direct dialing available in many areas; a fiber-optic network has been installed that is improving broadband and communication services between major urban centers with multiple companies providing inter-city fiber-optic cable services
domestic: very low fixed-line teledensity; there are multiple mobile-cellular providers and subscribership is increasing rapidly;
international: country code - 976; satellite earth stations - 7

Montenegro

general assessment: modern telecommunications system with access to European satellites
domestic: GSM mobile-cellular service, available through multiple providers with national coverage, is growing
international: country code - 382; 2 international switches connect the national system

Montserrat

general assessment: modern and fully digitalized
domestic: fixed-line and mobile-cellular telephone systems available
international: country code - 1-664; landing point for the East Caribbean Fiber System (ECFS) optic submarine cable with links to 13 other islands in the eastern Caribbean extending from the British Virgin Islands to Trinidad

Morocco

general assessment: good system composed of open-wire lines, cables, and microwave radio relay links; principal switching centers are Casablanca and Rabat; national network nearly 100% digital using fiber-optic links; improved rural service employs microwave radio relay; Internet available but expensive
domestic: fixed-line teledensity is roughly 10 per 100 persons; mobile-cellular subscribership approached 75 per 100 persons in 2009
international: country code - 212; landing point for the Atlas Offshore, Estepona-Tetouan, Euroafrica, Spain-Morocco, and SEA-ME-WE-3 fiber-optical telecommunications undersea cables that provide connectivity to Asia, the Middle East, and Europe; satellite earth stations - 2 Intelsat (Atlantic Ocean) and 1 Arabsat; microwave radio relay to Gibraltar, Spain, and Western Sahara; coaxial cable and microwave radio relay to Algeria; participant in Medarabtel; fiber-optic cable link from Agadir to Algeria and Tunisia (2009)

Mozambique

general assessment: a fair telecommunications system that is shackled with a heavy state presence, lack of competition, and high operating costs and charges
domestic: stagnation in the fixed-line network contrasts with rapid growth in the mobile-cellular network; mobile-cellular coverage now includes all the main cities and key roads, including those from Maputo to the South African and Swaziland borders, the national highway through Gaza and Inhambane provinces, the Beira corridor, and from Nampula to Nacala; extremely low fixed-line teledensity; despite significant growth in mobile-cellular services, teledensity remains low at about 25 per 100 persons
international: country code - 258; satellite earth stations - 5 Intelsat (2 Atlantic Ocean and 3 Indian Ocean); landing point for the SEACOM fiber-optic cable

Namibia

general assessment: good system; core fiber-optic network links most centers and connections are now digital
domestic: multiple mobile-cellular providers with a combined

subscribership of nearly 60 telephones per 100 persons; combined fixed-line and mobile-cellular teledensity about 65 per 100 persons
international: country code - 264; fiber-optic cable to South Africa, microwave radio relay link to Botswana, direct links to other neighboring countries; connected to the South African Far East (SAFE) submarine cable through South Africa; satellite earth stations - 4 Intelsat (2008)

Nauru

general assessment: adequate local and international radiotelephone communication provided via Australian facilities
domestic: NA
international: country code - 674; satellite earth station - 1 Intelsat (Pacific Ocean)

Nepal

general assessment: poor telephone and telegraph service; fair radiotelephone communication service and mobile-cellular telephone network
domestic: combined fixed-line and mobile-cellular telephone service subscribership base only about 30 per 100 persons
international: country code - 977; radiotelephone communications; microwave landline to India; satellite earth station - 1 Intelsat (Indian Ocean) (2008)

Netherlands

general assessment: highly developed and well maintained
domestic: extensive fixed-line fiber-optic network; large cellular telephone system with 5 major operators utilizing the third generation of the Global System for Mobile Communications (GSM) technology; one in five households now use Voice over the Internet Protocol (VoIP) services
international: country code - 31; submarine cables provide links to the US and Europe; satellite earth stations - 5 (3 Intelsat - 1 Indian Ocean and 2 Atlantic Ocean, 1 Eutelsat, and 1 Inmarsat (2007)

New Caledonia

general assessment: a submarine cable network connection between New Caledonia and Australia, completed in 2007, is expected to significantly increase network capacity and improve high-speed connectivity and access to international networks
domestic: combined fixed-line and mobile-cellular telephone subscribership exceeds 100 per 100 persons
international: country code - 687; satellite earth station - 1 Intelsat (Pacific Ocean) (2008)

New Zealand

general assessment: excellent domestic and international systems

domestic: combined fixed-line and mobile-cellular telephone subscribership exceeds 150 per 100 persons

international: country code - 64; the Southern Cross submarine cable system provides links to Australia, Fiji, and the US; satellite earth stations - 8 (1 Inmarsat - Pacific Ocean, 7 other)

Nicaragua

general assessment: system being upgraded by foreign investment; nearly all installed telecommunications capacity now uses digital technology, owing to investments since privatization of the formerly state-owned telecommunications company

domestic: since privatization, access to fixed-line and mobile-cellular services has improved but teledensity still lags behind other Central American countries; fixed-line teledensity roughly 5 per 100 persons; mobile-cellular telephone subscribership is increasing and reached 55 per 100 persons in 2009; connected to Central American Microwave System

international: country code - 505; the Americas Region Caribbean Ring System (ARCOS-1) fiber optic submarine cable provides connectivity to South and Central America, parts of the Caribbean, and the US; satellite earth stations - 1 Intersputnik (Atlantic Ocean region) and 1 Intelsat (Atlantic Ocean) (2009)

Niger

general assessment: inadequate; small system of wire, radio telephone communications, and microwave radio relay links concentrated in the southwestern area of Niger

domestic: combined fixed-line and mobile-cellular teledensity remains less than 20 per 100 persons despite a rapidly increasing cellular subscribership base; domestic satellite system with 3 earth stations and 1 planned

international: country code - 227; satellite earth stations - 2 Intelsat (1 Atlantic Ocean and 1 Indian Ocean) (2009)

Nigeria

general assessment: further expansion and modernization of the fixed-line telephone network is needed; network quality remains a problem

domestic: the addition of a second fixed-line provider in 2002 resulted in faster growth but subscribership remains only about 1 per 100 persons; mobile-cellular services growing rapidly, in part responding to the shortcomings of the fixed-line network; multiple

cellular providers operate nationally with subscribership reaching 50 per 100 persons in 2009

international: country code - 234; landing point for the SAT-3/WASC fiber-optic submarine cable that provides connectivity to Europe and Asia; satellite earth stations - 3 Intelsat (2 Atlantic Ocean and 1 Indian Ocean) (2009)

Niue

domestic: single-line telephone system connects all villages on island

international: country code - 683 (2001)

Norfolk Island

general assessment: adequate

domestic: free local calls

international: country code - 672; undersea coaxial cable links with Australia and New Zealand; satellite earth station - 1

Northern Mariana Islands

general assessment: NA

domestic: NA

international: country code - 1-670; satellite earth stations - 2 Intelsat (Pacific Ocean)

Norway

general assessment: modern in all respects; one of the most advanced telecommunications networks in Europe

domestic: Norway has a domestic satellite system; the prevalence of rural areas encourages the wide use of mobile-cellular systems

international: country code - 47; 2 buried coaxial cable systems; submarine cables provide links to other Nordic countries and Europe; satellite earth stations - NA Eutelsat, NA Intelsat (Atlantic Ocean), and 1 Inmarsat (Atlantic and Indian Ocean regions); note - Norway shares the Inmarsat earth station with the other Nordic countries (Denmark, Finland, Iceland, and Sweden) (1999)

Oman

general assessment: modern system consisting of open-wire, microwave, and radiotelephone communication stations; limited coaxial cable; domestic satellite system with 8 earth stations

domestic: fixed-line and mobile-cellular subscribership both increasing with fixed-line phone service gradually being introduced to remote villages using wireless local loop systems

international: country code - 968; the Fiber-Optic Link Around the Globe (FLAG) and the SEA-ME-WE-3 submarine cable provide connectivity to Asia, the Middle East, and Europe; satellite earth

stations - 2 Intelsat (Indian Ocean), 1 Arabsat (2008)

Pakistan

general assessment: the telecommunications infrastructure is improving dramatically with foreign and domestic investments in fixed-line and mobile-cellular networks; system consists of microwave radio relay, coaxial cable, fiber-optic cable, cellular, and satellite networks;

domestic: mobile-cellular subscribership has skyrocketed, exceeding 100 million in 2009, up from only about 300,000 in 2000;

approximately 90 percent of Pakistanis live within areas that have cell phone coverage and more than half of all Pakistanis have access to a cell phone; fiber systems are being constructed throughout the country to aid in network growth; fixed line availability has risen only marginally over the same period and there are still difficulties getting fixed-line service to rural areas

international: country code - 92; landing point for the SEA-ME-WE-3 and SEA-ME-WE-4 submarine cable systems that provide links to Asia, the Middle East, and Europe; satellite earth stations - 3 Intelsat (1 Atlantic Ocean and 2 Indian Ocean); 3 operational international gateway exchanges (1 at Karachi and 2 at Islamabad); microwave radio relay to neighboring countries (2009)

Palau

general assessment: NA

domestic: fixed-line and mobile-cellular services available with a combined subscribership of roughly 100 per 100 persons

international: country code - 680; satellite earth station - 1 Intelsat (Pacific Ocean) (2008)

Panama

general assessment: domestic and international facilities well developed

domestic: mobile-cellular telephone subscribership has increased rapidly

international: country code - 507; landing point for the Americas Region Caribbean Ring System (ARCOS-1), the MAYA-1, and PAN-AM submarine cable systems that together provide links to the US and parts of the Caribbean, Central America, and South America; satellite earth stations - 2 Intelsat (Atlantic Ocean); connected to the Central American Microwave System (2008)

Papua New Guinea

general assessment: services are minimal;

facilities provide radiotelephone and telegraph, coastal radio,

aeronautical radio, and international radio communication services
domestic: access to telephone services is not widely available;
combined fixed-line and mobile-cellular teledensity is about 15 per
100 persons
international: country code - 675; submarine cables to Australia and
Guam; satellite earth station - 1 Intelsat (Pacific Ocean);
international radio communication service (2009)

Paraguay

general assessment: the fixed-line market is a state
monopoly and fixed-line telephone service is meager; principal
switching center is in Asuncion
domestic: deficiencies in provision of fixed-line service have
resulted in a rapid expansion of mobile-cellular services fostered
by competition among multiple providers
international: country code - 595; satellite earth station - 1
Intelsat (Atlantic Ocean) (2008)

Peru

general assessment: adequate for most requirements; nationwide
microwave radio relay system and a domestic satellite system with 12
earth stations
domestic: fixed-line teledensity is only about 10 per 100 persons;
mobile-cellular teledensity, spurred by competition among multiple
providers, has increased to roughly 85 telephones per 100 persons
international: country code - 51; the South America-1 (SAM-1) and
Pan American (PAN-AM) submarine cable systems provide links to parts
of Central and South America, the Caribbean, and US; satellite earth
stations - 2 Intelsat (Atlantic Ocean) (2009)

Philippines

general assessment: good international radiotelephone
and submarine cable services; domestic and interisland service
adequate
domestic: domestic satellite system with 11 earth stations;
mobile-cellular communications now dominate the industry; combined
fixed-line and mobile-cellular teledensity about 80 telephones per
100 persons
international: country code - 63; a series of submarine cables
together provide connectivity to Asia, US, the Middle East, and
Europe; multiple international gateways (2009)

Pitcairn Islands

general assessment: satellite phone services
domestic: domestic communication via radio (CB)

international: country code - 872; satellite earth station - 1
(Inmarsat)

Poland

general assessment: modernization of the telecommunications network has accelerated with market-based competition; fixed-line service, dominated by the former state-owned company, is dwarfed by the growth in mobile-cellular services

domestic: mobile-cellular service available since 1993 and provided by three nation-wide networks with a fourth provider beginning operations in late 2006; coverage is generally good with some gaps in the east; fixed-line service lags in rural areas

international: country code - 48; international direct dialing with automated exchanges; satellite earth station - 1 with access to Intelsat, Eutelsat, Inmarsat, and Intersputnik (2009)

Portugal

general assessment: Portugal's telephone system has a state-of-the-art network with broadband, high-speed capabilities

domestic: integrated network of coaxial cables, open-wire, microwave radio relay, and domestic satellite earth stations

international: country code - 351; a combination of submarine cables provide connectivity to Europe, North and East Africa, South Africa, the Middle East, Asia, and the US; satellite earth stations - 3 Intelsat (2 Atlantic Ocean and 1 Indian Ocean), NA Eutelsat; tropospheric scatter to Azores (2008)

Puerto Rico

general assessment: modern system integrated with that of the US by high-capacity submarine cable and Intelsat with high-speed data capability

domestic: digital telephone system; mobile-cellular services

international: country code - 1-787, 939; submarine cables provide connectivity to the US, Caribbean, Central and South America; satellite earth station - 1 Intelsat

Qatar

general assessment: modern system centered in Doha

domestic: combined fixed and mobile-cellular telephone subscribership exceeds 300 telephones per 100 persons

international: country code - 974; landing point for the Fiber-Optic Link Around the Globe (FLAG) submarine cable network that provides links to Asia, Middle East, Europe, and the US; tropospheric scatter to Bahrain; microwave radio relay to Saudi Arabia and the UAE; satellite earth stations - 2 Intelsat (1 Atlantic Ocean and 1 Indian

Ocean) and 1 Arabsat (2009)

Romania

general assessment: the telecommunications sector is being expanded and modernized; domestic and international service improving rapidly, especially mobile-cellular services
domestic: more than 90 percent of telephone network is automatic; fixed-line teledensity exceeds 20 telephones per 100 persons; mobile-cellular teledensity, expanding rapidly, roughly 115 telephones per 100 persons
international: country code - 40; the Black Sea Fiber Optic System provides connectivity to Bulgaria and Turkey; satellite earth stations - 10; digital, international, direct-dial exchanges operate in Bucharest (2009)

Russia

general assessment: the telephone system is experiencing significant changes; there are more than 1,000 companies licensed to offer communication services; access to digital lines has improved, particularly in urban centers; Internet and e-mail services are improving; Russia has made progress toward building the telecommunications infrastructure necessary for a market economy; the estimated number of mobile subscribers jumped from fewer than 1 million in 1998 to some 230 million in 2009; a large demand for fixed line service remains unsatisfied
domestic: cross-country digital trunk lines run from Saint Petersburg to Khabarovsk, and from Moscow to Novorossiysk; the telephone systems in 60 regional capitals have modern digital infrastructures; cellular services, both analog and digital, are available in many areas; in rural areas, the telephone services are still outdated, inadequate, and low density
international: country code - 7; Russia is connected internationally by undersea fiber optic cables; digital switches in several cities provide more than 50,000 lines for international calls; satellite earth stations provide access to Intelsat, Intersputnik, Eutelsat, Inmarsat, and Orbita systems (2008)

Rwanda

general assessment: small, inadequate telephone system primarily serves business, education, and government
domestic: the capital, Kigali, is connected to the centers of the provinces by microwave radio relay and, recently, by cellular telephone service; much of the network depends on wire and HF radiotelephone; combined fixed-line and mobile-cellular telephone density has increased to about 25 telephones per 100 persons

international: country code - 250; international connections employ microwave radio relay to neighboring countries and satellite communications to more distant countries; satellite earth stations - 1 Intelsat (Indian Ocean) in Kigali (includes telex and telefax service)

Saint Barthelemy

general assessment: fully integrated access
domestic: direct dial capability with both fixed and wireless systems
international: country code - 590; undersea fiber-optic cable provides voice and data connectivity to Puerto Rico and Guadeloupe

Saint Helena, Ascension, and Tristan da Cunha

general assessment:
can communicate worldwide
domestic: automatic digital network
international: country code (Saint Helena) - 290, (Ascension Island) - 247; international direct dialing; satellite voice and data communications; satellite earth stations - 5 (Ascension Island - 4, Saint Helena - 1)

Saint Kitts and Nevis

general assessment: good interisland and international connections
domestic: interisland links via Eastern Caribbean Fiber Optic cable; construction of enhanced wireless infrastructure launched in November 2004
international: country code - 1-869; connected internationally by the East Caribbean Fiber Optic System (ECFS) and Southern Caribbean fiber optic system (SCF) submarine cables

Saint Lucia

general assessment: adequate system
domestic: system is automatically switched
international: country code - 1-758; the East Caribbean Fiber Optic System (ECFS) and Southern Caribbean fiber optic system (SCF) submarine cables, along with Intelsat from Martinique, carry calls internationally; direct microwave radio relay link with Martinique and Saint Vincent and the Grenadines; tropospheric scatter to Barbados

Saint Martin

general assessment: fully integrated access
domestic: direct dial capability with both fixed and wireless systems
international: country code - 590; undersea fiber-optic cable provides voice and data connectivity to Puerto Rico and Guadeloupe

Saint Pierre and Miquelon

general assessment: adequate

domestic: NA

international: country code - 508; radiotelephone communication with most countries in the world; satellite earth station - 1 in French domestic satellite system

Saint Vincent and the Grenadines

general assessment: adequate system

domestic: islandwide, fully automatic telephone system; VHF/UHF radiotelephone from Saint Vincent to the other islands of the Grenadines; mobile-cellular teledensity exceeds 100 telephones per 100 persons

international: country code - 1-784; the East Caribbean Fiber Optic System (ECFS) and Southern Caribbean fiber optic system (SCF) submarine cables carry international calls; connectivity also provided by VHF/UHF radiotelephone from Saint Vincent to Barbados; SHF radiotelephone to Grenada and Saint Lucia; access to Intelsat earth station in Martinique through Saint Lucia

Samoa

general assessment: adequate

domestic: combined fixed-line and mobile-cellular teledensity roughly 85 telephones per 100 persons; coverage extended to roughly 95 percent of the country

international: country code - 685; satellite earth station - 1 Intelsat (Pacific Ocean)

San Marino

general assessment: automatic telephone system completely integrated into Italian system

domestic: combined fixed-line and mobile-cellular teledensity 150 telephones per 100 persons

international: country code - 378; connected to Italian international network

Sao Tome and Principe

general assessment: local telephone network of adequate quality with most lines connected to digital switches

domestic: combined fixed-line and mobile-cellular teledensity roughly 35 telephones per 100 persons

international: country code - 239; satellite earth station - 1 Intelsat (Atlantic Ocean) (2008)

Saudi Arabia

general assessment: modern system including a

combination of extensive microwave radio relays, coaxial cables, and fiber-optic cables

domestic: mobile-cellular subscribership has been increasing rapidly

international: country code - 966; landing point for the

international submarine cable Fiber-Optic Link Around the Globe

(FLAG) and for both the SEA-ME-WE-3 and SEA-ME-WE-4 submarine cable

networks providing connectivity to Asia, Middle East, Europe, and

US; microwave radio relay to Bahrain, Jordan, Kuwait, Qatar, UAE,

Yemen, and Sudan; coaxial cable to Kuwait and Jordan; satellite

earth stations - 5 Intelsat (3 Atlantic Ocean and 2 Indian Ocean), 1

Arabsat, and 1 Inmarsat (Indian Ocean region) (2008)

Senegal

general assessment: good system with microwave radio relay,

coaxial cable and fiber-optic cable in trunk system

domestic: above-average urban system with a fiber-optic network;

nearly two-thirds of all fixed-line connections are in Dakar where a

call-center industry is emerging; expansion of fixed-line services

in rural areas needed; mobile-cellular service is expanding rapidly

international: country code - 221; the SAT-3/WASC fiber optic cable

provides connectivity to Europe and Asia while Atlantis-2 provides

connectivity to South America; satellite earth station - 1 Intelsat

(Atlantic Ocean) (2007)

Serbia

general assessment: replacements of, and upgrades to,

telecommunications equipment damaged during the 1999 war has

resulted in a modern telecommunications system more than 95%

digitalized in 2009

domestic: wireless service, available through multiple providers

with national coverage, is growing very rapidly; best

telecommunications services are centered in urban centers; 3G mobile

network launched in 2007

international: country code - 381 (2009)

Seychelles

general assessment: effective system

domestic: combined fixed-line and mobile-cellular teledensity is 130

telephones per 100 persons; radiotelephone communications between

islands in the archipelago

international: country code - 248; direct radiotelephone

communications with adjacent island countries and African coastal

countries; satellite earth station - 1 Intelsat (Indian Ocean)

Sierra Leone

general assessment: marginal telephone service with

poor infrastructure

domestic: the national microwave radio relay trunk system connects Freetown to Bo and Kenema; while mobile-cellular service is growing rapidly from a small base, service area coverage remains limited

international: country code - 232; satellite earth station - 1

Intelsat (Atlantic Ocean) (2008)

Singapore

general assessment: excellent service

domestic: excellent domestic facilities; launched 3G wireless service in February 2005; combined fixed-line and mobile-cellular teledensity is more than 180 telephones per 100 persons

international: country code - 65; numerous submarine cables provide links throughout Asia, Australia, the Middle East, Europe, and US;

satellite earth stations - 4; supplemented by VSAT coverage (2008)

Sint Maarten

general assessment: generally adequate facilities

domestic: extensive interisland microwave radio relay links

international: country code - 599; the Americas Region Caribbean Ring System (ARCOS-1) and the Americas-2 submarine cable systems provide connectivity to Central America, parts of South America and the Caribbean, and the US; satellite earth stations - 2 Intelsat (Atlantic Ocean)

Slovakia

general assessment: Slovakia has a modern telecommunications system that has expanded dramatically in recent years with the growth in cellular services

domestic: analog system is now receiving digital equipment and is being enlarged with fiber-optic cable, especially in the larger cities; 3 companies provide nationwide cellular services

international: country code - 421; 3 international exchanges (1 in Bratislava and 2 in Banska Bystrica) are available; Slovakia is participating in several international telecommunications projects that will increase the availability of external services

Slovenia

general assessment: well-developed telecommunications infrastructure

domestic: combined fixed-line and mobile-cellular teledensity roughly 150 telephones per 100 persons

international: country code - 386

Solomon Islands

general assessment: NA

domestic: mobile-cellular telephone density is about 5 telephones per 100 persons

international: country code - 677; satellite earth station - 1 Intelsat (Pacific Ocean)

Somalia

general assessment: the public telecommunications system was almost completely destroyed or dismantled during the civil war; private companies offer limited local fixed-line service and private wireless companies offer service in most major cities while charging the lowest international rates on the continent

domestic: local cellular telephone systems have been established in Mogadishu and in several other population centers

international: country code - 252; international connections are available from Mogadishu by satellite

South Africa

general assessment: the system is the best developed and most modern in Africa

domestic: combined fixed-line and mobile-cellular teledensity roughly 105 telephones per 100 persons; consists of carrier-equipped open-wire lines, coaxial cables, microwave radio relay links, fiber-optic cable, radiotelephone communication stations, and wireless local loops; key centers are Bloemfontein, Cape Town, Durban, Johannesburg, Port Elizabeth, and Pretoria

international: country code - 27; the SAT-3/WASC and SAFE fiber optic cable systems connect South Africa to Europe and Asia; satellite earth stations - 3 Intelsat (1 Indian Ocean and 2 Atlantic Ocean)

South Georgia and South Sandwich Islands

general assessment: NA

domestic: NA

international: coastal radiotelephone station at Grytviken

Spain

general assessment: well developed, modern facilities;

fixed-line teledensity is roughly 50 per 100 persons

domestic: combined fixed-line and mobile-cellular teledensity is nearly 175 telephones per 100 persons

international: country code - 34; submarine cables provide connectivity to Europe, Middle East, Asia, and US; satellite earth stations - 2 Intelsat (1 Atlantic Ocean and 1 Indian Ocean), NA Eutelsat; tropospheric scatter to adjacent countries

Sri Lanka

general assessment: telephone services have improved

significantly and are available in most parts of the country

domestic: national trunk network consists mostly of digital microwave radio relay; fiber-optic links now in use in Colombo area and fixed wireless local loops have been installed; competition is strong in mobile cellular systems and mobile cellular subscribership is increasing

international: country code - 94; the SEA-ME-WE-3 and SEA-ME-WE-4 submarine cables provide connectivity to Asia, Australia, Middle East, Europe, US; satellite earth stations - 2 Intelsat (Indian Ocean)

Sudan

general assessment: well-equipped system by regional standards

and being upgraded; cellular communications started in 1996 and have expanded substantially with wide coverage of most major cities

domestic: consists of microwave radio relay, cable, fiber optic, radiotelephone communications, tropospheric scatter, and a domestic satellite system with 14 earth stations

international: country code - 249; linked to international submarine cable Fiber-Optic Link Around the Globe (FLAG); satellite earth stations - 1 Intelsat (Atlantic Ocean), 1 Arabsat (2000)

Suriname

general assessment: international facilities are good

domestic: combined fixed-line and mobile-cellular teledensity

roughly 175 telephones per 100 persons; microwave radio relay network

international: country code - 597; satellite earth stations - 2 Intelsat (Atlantic Ocean)

Svalbard

general assessment: probably adequate

domestic: local telephone service

international: country code - 47-790; satellite earth station - 1 of unknown type (for communication with Norwegian mainland only)

Swaziland

general assessment: a somewhat modern but not an advanced system

domestic: single source for mobile-cellular service with a

geographic coverage of about 90% and a rising subscribership base;

combined fixed-line and mobile cellular teledensity exceeded 60

telephones per 100 persons in 2009; telephone system consists of

carrier-equipped, open-wire lines and low-capacity, microwave radio

relay

international: country code - 268; satellite earth station - 1

Intelsat (Atlantic Ocean) (2009)

Sweden

general assessment: highly developed telecommunications

infrastructure; ranked among leading countries for fixed-line, mobile-cellular, Internet and broadband penetration

domestic: coaxial and multiconductor cables carry most of the voice traffic; parallel microwave radio relay systems carry some additional telephone channels

international: country code - 46; submarine cables provide links to other Nordic countries and Europe; satellite earth stations - 1

Intelsat (Atlantic Ocean), 1 Eutelsat, and 1 Inmarsat (Atlantic and Indian Ocean regions); note - Sweden shares the Inmarsat earth station with the other Nordic countries (Denmark, Finland, Iceland, and Norway)

Switzerland

general assessment: highly developed telecommunications

infrastructure with excellent domestic and international services

domestic: ranked among leading countries for fixed-line teledensity and infrastructure; mobile-cellular subscribership roughly 120 per 100 persons; extensive cable and microwave radio relay networks

international: country code - 41; satellite earth stations - 2

Intelsat (Atlantic Ocean and Indian Ocean)

Syria

general assessment: fair system currently undergoing

significant improvement and digital upgrades, including fiber-optic technology and expansion of the network to rural areas

domestic: the number of fixed-line connections has increased

markedly since 2000; mobile-cellular service growing with telephone subscribership reaching nearly 50 per 100 persons in 2009

international: country code - 963; submarine cable connection to

Egypt, Lebanon, and Cyprus; satellite earth stations - 1 Intelsat (Indian Ocean) and 1 Intersputnik (Atlantic Ocean region); coaxial cable and microwave radio relay to Iraq, Jordan, Lebanon, and Turkey; participant in Medarabtel

Taiwan

general assessment: provides telecommunications service for every business and private need

domestic: thoroughly modern; completely digitalized

international: country code - 886; roughly 15 submarine fiber cables

cables provide links throughout Asia, Australia, the Middle East, Europe, and the US; satellite earth stations - 2

Tajikistan

general assessment: foreign investment in the telephone system has resulted in major improvements; conversion of the existing fixed network from analogue to digital more than 90% complete by 2009

domestic: fixed line availability has not changed significantly since 1998 while mobile cellular subscribership, aided by competition among multiple operators, has expanded rapidly; coverage now extends to all major cities and towns

international: country code - 992; linked by cable and microwave radio relay to other CIS republics and by leased connections to the Moscow international gateway switch; Dushanbe linked by Intelsat to international gateway switch in Ankara (Turkey); satellite earth stations - 3 (2 Intelsat and 1 Orbita) (2009)

Tanzania

general assessment: telecommunications services are marginal; system operating below capacity and being modernized for better service; small aperture terminal (VSAT) system under construction

domestic: fixed-line telephone network inadequate with less than 1 connection per 100 persons; mobile-cellular service, aided by multiple providers, is increasing rapidly; trunk service provided by open-wire, microwave radio relay, tropospheric scatter, and fiber-optic cable; some links being made digital

international: country code - 255; satellite earth stations - 2 Intelsat (1 Indian Ocean, 1 Atlantic Ocean)

Thailand

general assessment: high quality system, especially in urban areas like Bangkok

domestic: fixed line system provided by both a government owned and commercial provider; wireless service expanding rapidly

international: country code - 66; connected to major submarine cable systems providing links throughout Asia, Australia, Middle East, Europe, and US; satellite earth stations - 2 Intelsat (1 Indian Ocean, 1 Pacific Ocean)

Timor-Leste

general assessment: rudimentary service limited to urban areas

domestic: system suffered significant damage during the violence

associated with independence; extremely limited fixed-line services; mobile-cellular services and coverage limited primarily to urban areas
international: country code - 670; international service is available in major urban centers

Togo

general assessment: fair system based on a network of microwave radio relay routes supplemented by open-wire lines and a mobile-cellular system
domestic: microwave radio relay and open-wire lines for conventional system; combined fixed-line and mobile-cellular teledensity roughly 40 telephones per 100 persons with mobile-cellular use predominating
international: country code - 228; satellite earth stations - 1 Intelsat (Atlantic Ocean), 1 Symphonie

Tokelau

general assessment: modern satellite-based communications system
domestic: radiotelephone service between islands
international: country code - 690; radiotelephone service to Samoa; government-regulated telephone service (TeleTok); satellite earth stations - 3

Tonga

general assessment: competition between Tonga Telecommunications Corporation (TCC) and Shoreline Communications Tonga (SCT) is accelerating expansion of telecommunications; SCT granted approval to introduce high-speed digital service for telephone, Internet, and television while TCC has exclusive rights to operate the mobile-phone network; international telecom services are provided by government-owned Tonga Telecommunications International (TTI)
domestic: combined fixed-line and mobile-cellular teledensity about 70 telephones per 100 persons; fully automatic switched network
international: country code - 676; satellite earth station - 1 Intelsat (Pacific Ocean) (2009)

Trinidad and Tobago

general assessment: excellent international service; good local service
domestic: mobile-cellular teledensity roughly 185 telephones per 100 persons
international: country code - 1-868; submarine cable systems provide connectivity to US and parts of the Caribbean and South America;

satellite earth station - 1 Intelsat (Atlantic Ocean); tropospheric scatter to Barbados and Guyana

Tunisia

general assessment: above the African average and continuing to be upgraded; key centers are Sfax, Sousse, Bizerte, and Tunis; telephone network is completely digitized; Internet access available throughout the country

domestic: in an effort to jumpstart expansion of the fixed-line network, the government has awarded a concession to build and operate a VSAT network with international connectivity; rural areas are served by wireless local loops; competition between the two mobile-cellular service providers has resulted in lower activation and usage charges and a strong surge in subscribership; a third mobile, fixed, and ISP operator was licensed in 2009 and will begin offering services in 2010; expansion of mobile-cellular services to include multimedia messaging and e-mail and Internet to mobile phone services also leading to a surge in subscribership; overall fixed-line and mobile-cellular teledensity is about 100 telephones per 100 persons

international: country code - 216; a landing point for the SEA-ME-WE-4 submarine cable system that provides links to Europe, Middle East, and Asia; satellite earth stations - 1 Intelsat (Atlantic Ocean) and 1 Arabsat; coaxial cable and microwave radio relay to Algeria and Libya; participant in Medarabtel; 2 international gateway digital switches

Turkey

general assessment: comprehensive telecommunications network undergoing rapid modernization and expansion especially in mobile-cellular services

domestic: additional digital exchanges are permitting a rapid increase in subscribers; the construction of a network of technologically advanced intercity trunk lines, using both fiber-optic cable and digital microwave radio relay, is facilitating communication between urban centers; remote areas are reached by a domestic satellite system; the number of subscribers to mobile-cellular telephone service is growing rapidly

international: country code - 90; international service is provided by the SEA-ME-WE-3 submarine cable and by submarine fiber-optic cables in the Mediterranean and Black Seas that link Turkey with Italy, Greece, Israel, Bulgaria, Romania, and Russia; satellite earth stations - 12 Intelsat; mobile satellite terminals - 328 in the Inmarsat and Eutelsat systems (2002)

Turkmenistan

general assessment: telecommunications network remains underdeveloped and progress toward improvement is slow; strict government control and censorship inhibits liberalization and modernization

domestic: Turkmentelekom, in cooperation with foreign partners, has installed high speed fiber-optic lines and has upgraded most of the country's telephone exchanges and switching centers with new digital technology; mobile telephone usage is expanding with Russia's Mobile Telesystems (MTS) the primary service provider; combined fixed-line and mobile teledensity is about 40 per 100 persons

international: country code - 993; linked by fiber-optic cable and microwave radio relay to other CIS republics and to other countries by leased connections to the Moscow international gateway switch; an exchange in Ashgabat switches international traffic through Turkey via Intelsat; satellite earth stations - 1 Orbita and 1 Intelsat (2008)

Turks and Caicos Islands

general assessment: fully digital system with international direct dialing

domestic: full range of services available; GSM wireless service available

international: country code - 1-649; the Americas Region Caribbean Ring System (ARCOS-1) fiber optic telecommunications submarine cable provides connectivity to South and Central America, parts of the Caribbean, and the US; satellite earth station - 1 Intelsat (Atlantic Ocean)

Tuvalu

general assessment: serves particular needs for internal communications

domestic: radiotelephone communications between islands

international: country code - 688; international calls can be made by satellite

Uganda

general assessment: mobile cellular service is increasing rapidly, but the number of main lines is still deficient; work underway on a national backbone information and communications technology infrastructure; international phone networks and Internet connectivity provided through satellite and VSAT applications

domestic: intercity traffic by wire, microwave radio relay, and radiotelephone communication stations, fixed and mobile-cellular systems for short-range traffic; mobile-cellular teledensity about

30 per 100 persons in 2009

international: country code - 256; satellite earth stations - 1

Intelsat (Atlantic Ocean) and 1 Inmarsat; analog links to Kenya and Tanzania

Ukraine

general assessment: Ukraine's telecommunication development plan emphasizes improving domestic trunk lines, international connections, and the mobile-cellular system

domestic: at independence in December 1991, Ukraine inherited a telephone system that was antiquated, inefficient, and in disrepair; more than 3.5 million applications for telephones could not be satisfied; telephone density is rising and the domestic trunk system is being improved; about one-third of Ukraine's networks are digital and a majority of regional centers now have digital switching stations; improvements in local networks and local exchanges continue to lag; the mobile-cellular telephone system's expansion has slowed, largely due to saturation of the market which has reached 120 mobile phones per 100 people

international: country code - 380; 2 new domestic trunk lines are a part of the fiber-optic Trans-Asia-Europe (TAE) system and 3 Ukrainian links have been installed in the fiber-optic

Trans-European Lines (TEL) project that connects 18 countries; additional international service is provided by the Italy-Turkey-Ukraine-Russia (ITUR) fiber-optic submarine cable and by an unknown number of earth stations in the Intelsat, Inmarsat, and Intersputnik satellite systems

United Arab Emirates

general assessment: modern fiber-optic

integrated services; digital network with rapidly growing use of mobile-cellular telephones; key centers are Abu Dhabi and Dubai

domestic: microwave radio relay, fiber optic and coaxial cable

international: country code - 971; linked to the international submarine cable FLAG (Fiber-Optic Link Around the Globe); landing point for both the SEA-ME-WE-3 and SEA-ME-WE-4 submarine cable networks; satellite earth stations - 3 Intelsat (1 Atlantic Ocean and 2 Indian Ocean) and 1 Arabsat; tropospheric scatter to Bahrain; microwave radio relay to Saudi Arabia

United Kingdom

general assessment: technologically advanced domestic and international system

domestic: equal mix of buried cables, microwave radio relay, and fiber-optic systems

international: country code - 44; numerous submarine cables provide links throughout Europe, Asia, Australia, the Middle East, and US; satellite earth stations - 10 Intelsat (7 Atlantic Ocean and 3 Indian Ocean), 1 Inmarsat (Atlantic Ocean region), and 1 Eutelsat; at least 8 large international switching centers

United States

general assessment: a large, technologically advanced, multipurpose communications system

domestic: a large system of fiber-optic cable, microwave radio relay, coaxial cable, and domestic satellites carries every form of telephone traffic; a rapidly growing cellular system carries mobile telephone traffic throughout the country

international: country code - 1; multiple ocean cable systems provide international connectivity; satellite earth stations - 61 Intelsat (45 Atlantic Ocean and 16 Pacific Ocean), 5 Intersputnik (Atlantic Ocean region), and 4 Inmarsat (Pacific and Atlantic Ocean regions) (2000)

Uruguay

general assessment: fully digitalized

domestic: most modern facilities concentrated in Montevideo; new nationwide microwave radio relay network; overall fixed-line and mobile-cellular teledensity is 135 telephones per 100 persons

international: country code - 598; the UNISOR submarine cable system provides direct connectivity to Brazil and Argentina; satellite earth stations - 2 Intelsat (Atlantic Ocean) (2009)

Uzbekistan

general assessment: digital exchanges in large cities but still antiquated and inadequate in rural areas

domestic: the state-owned telecommunications company, Uzbektelecom, owner of the fixed line telecommunications system, has used loans from the Japanese government and the China Development Bank to upgrade fixed-line services including conversion to digital exchanges; mobile-cellular services are growing rapidly, with the subscriber base exceeding 16 million in 2009

international: country code - 998; linked by fiber-optic cable or microwave radio relay with CIS member states and to other countries by leased connection via the Moscow international gateway switch; after the completion of the Uzbek link to the Trans-Asia-Europe (TAE) fiber-optic cable, Uzbekistan plans to establish a fiber-optic connection to Afghanistan (2009)

Vanuatu

general assessment: NA

domestic: NA

international: country code - 678; satellite earth station - 1

Intelsat (Pacific Ocean)

Venezuela

general assessment: modern and expanding

domestic: domestic satellite system with 3 earth stations; recent substantial improvement in telephone service in rural areas; substantial increase in digitalization of exchanges and trunk lines; installation of a national interurban fiber-optic network capable of digital multimedia services; combined fixed and mobile-cellular telephone subscribership 130 per 100 persons

international: country code - 58; submarine cable systems provide connectivity to the Caribbean, Central and South America, and US;

satellite earth stations - 1 Intelsat (Atlantic Ocean) and 1

PanAmSat; participating with Colombia, Ecuador, Peru, and Bolivia in the construction of an international fiber-optic network (2009)

Vietnam

general assessment: Vietnam is putting considerable effort

into modernization and expansion of its telecommunication system

domestic: all provincial exchanges are digitalized and connected to Hanoi, Da Nang, and Ho Chi Minh City by fiber-optic cable or microwave radio relay networks; main lines have been increased, and the use of mobile telephones is growing rapidly

international: country code - 84; a landing point for the

SEA-ME-WE-3, the C2C, and Thailand-Vietnam-Hong Kong submarine cable systems; the Asia-America Gateway submarine cable system, scheduled for completion by the end of 2008, will provide new access links to

Asia and the US; satellite earth stations - 2 Intersputnik (Indian Ocean region)

Virgin Islands

general assessment: modern system with total digital switching, uses fiber-optic cable and microwave radio relay
domestic: full range of services available
international: country code - 1-340; submarine cable connections to US, the Caribbean, Central and South America; satellite earth stations - NA

Wake Island

general assessment: satellite communications; 2 DSN circuits off the Overseas Telephone System (OTS); located in the Hawaii area code - 808
domestic: NA
international: NA

Wallis and Futuna

general assessment: NA
domestic: NA
international: country code - 681

West Bank

general assessment: continuing political and economic instability has impeded significant liberalization of the telecommunications industry
domestic: Israeli company BEZEK and the Palestinian company PALTEL are responsible for fixed line services; PALTEL plans to establish a fiber-optic connection to Jordan to route domestic mobile calls; the Palestinian JAWWAL company and WATANIYA PALESTINE provide cellular services
international: country code - 970; 1 international switch in Ramallah (2009) (2009)

Western Sahara

general assessment: sparse and limited system
domestic: NA
international: country code - 212; tied into Morocco's system by microwave radio relay, tropospheric scatter, and satellite; satellite earth stations - 2 Intelsat (Atlantic Ocean) linked to Rabat, Morocco

World

general assessment: NA
domestic: NA
international: NA

Yemen

general assessment: since unification in 1990, efforts have been made to create a national telecommunications network
domestic: the national network consists of microwave radio relay, cable, tropospheric scatter, GSM and CDMA mobile-cellular telephone systems; fixed-line and mobile-cellular teledensity remains low by regional standards

international: country code - 967; landing point for the international submarine cable Fiber-Optic Link Around the Globe (FLAG); satellite earth stations - 3 Intelsat (2 Indian Ocean and 1 Atlantic Ocean), 1 Intersputnik (Atlantic Ocean region), and 2 Arabsat; microwave radio relay to Saudi Arabia and Djibouti

Zambia

general assessment: among the best in Sub-Saharan Africa
domestic: high-capacity microwave radio relay connects most larger towns and cities; several cellular telephone services in operation and network coverage is improving; domestic satellite system being installed to improve telephone service in rural areas; Internet service is widely available; very small aperture terminal (VSAT) networks are operated by private firms

international: country code - 260; satellite earth stations - 2 Intelsat (1 Indian Ocean and 1 Atlantic Ocean), 3 owned by Zamtel

Zimbabwe

general assessment: system was once one of the best in Africa, but now suffers from poor maintenance

domestic: consists of microwave radio relay links, open-wire lines, radiotelephone communication stations, fixed wireless local loop installations, and a substantial mobile-cellular network; Internet connection is available in Harare and planned for all major towns and for some of the smaller ones

international: country code - 263; satellite earth stations - 2 Intelsat; 2 international digital gateway exchanges (in Harare and Gweru)

This entry contains a brief description of the topography.

Country

Terrain

Afghanistan

mostly rugged mountains; plains in north and southwest

Albania

mostly mountains and hills; small plains along coast

Algeria

mostly high plateau and desert; some mountains; narrow, discontinuous coastal plain

American Samoa

five volcanic islands with rugged peaks and limited coastal plains, two coral atolls (Rose Island, Swains Island)

Andorra

rugged mountains dissected by narrow valleys

Angola

narrow coastal plain rises abruptly to vast interior plateau

Anguilla

flat and low-lying island of coral and limestone

Antarctica

about 98% thick continental ice sheet and 2% barren rock, with average elevations between 2,000 and 4,000 meters; mountain ranges up to nearly 5,000 meters; ice-free coastal areas include parts of southern Victoria Land, Wilkes Land, the Antarctic Peninsula area, and parts of Ross Island on McMurdo Sound; glaciers form ice shelves along about half of the coastline, and floating ice shelves constitute 11% of the area of the continent

Antigua and Barbuda

mostly low-lying limestone and coral islands, with some higher volcanic areas

Arctic Ocean

central surface covered by a perennial drifting polar icepack that, on average, is about 3 meters thick, although pressure ridges may be three times that thickness; clockwise drift pattern in

the Beaufort Gyral Stream, but nearly straight-line movement from the New Siberian Islands (Russia) to Denmark Strait (between Greenland and Iceland); the icepack is surrounded by open seas during the summer, but more than doubles in size during the winter and extends to the encircling landmasses; the ocean floor is about 50% continental shelf (highest percentage of any ocean) with the remainder a central basin interrupted by three submarine ridges (Alpha Cordillera, Nansen Cordillera, and Lomonosov Ridge)

Argentina

rich plains of the Pampas in northern half, flat to rolling plateau of Patagonia in south, rugged Andes along western border

Armenia

Armenian Highland with mountains; little forest land; fast flowing rivers; good soil in Aras River valley

Aruba

flat with a few hills; scant vegetation

Ashmore and Cartier Islands

low with sand and coral

Atlantic Ocean

surface usually covered with sea ice in Labrador Sea, Denmark Strait, and coastal portions of the Baltic Sea from October to June; clockwise warm-water gyre (broad, circular system of currents) in the northern Atlantic, counterclockwise warm-water gyre in the southern Atlantic; the ocean floor is dominated by the Mid-Atlantic Ridge, a rugged north-south centerline for the entire Atlantic basin

Australia

mostly low plateau with deserts; fertile plain in southeast

Austria

in the west and south mostly mountains (Alps); along the eastern and northern margins mostly flat or gently sloping

Azerbaijan

large, flat Kur-Araz Ovaligi (Kura-Araks Lowland) (much of it below sea level) with Great Caucasus Mountains to the north, Qarabag Yaylasi (Karabakh Upland) in west; Baku lies on Abseron Yasaqligi (Apsheeron Peninsula) that juts into Caspian Sea

Bahamas, The
long, flat coral formations with some low rounded hills

Bahrain
mostly low desert plain rising gently to low central escarpment

Bangladesh
mostly flat alluvial plain; hilly in southeast

Barbados
relatively flat; rises gently to central highland region

Belarus
generally flat and contains much marshland

Belgium
flat coastal plains in northwest, central rolling hills, rugged mountains of Ardennes Forest in southeast

Belize
flat, swampy coastal plain; low mountains in south

Benin
mostly flat to undulating plain; some hills and low mountains

Bermuda
low hills separated by fertile depressions

Bhutan
mostly mountainous with some fertile valleys and savanna

Bolivia
rugged Andes Mountains with a highland plateau (Altiplano), hills, lowland plains of the Amazon Basin

Bosnia and Herzegovina
mountains and valleys

Botswana
predominantly flat to gently rolling tableland; Kalahari Desert in southwest

Bouvet Island
volcanic; coast is mostly inaccessible

Brazil

mostly flat to rolling lowlands in north; some plains, hills, mountains, and narrow coastal belt

British Indian Ocean Territory

flat and low (most areas do not exceed two meters in elevation)

British Virgin Islands

coral islands relatively flat; volcanic islands steep, hilly

Brunei

flat coastal plain rises to mountains in east; hilly lowland in west

Bulgaria

mostly mountains with lowlands in north and southeast

Burkina Faso

mostly flat to dissected, undulating plains; hills in west and southeast

Burma

central lowlands ringed by steep, rugged highlands

Burundi

hilly and mountainous, dropping to a plateau in east, some plains

Cambodia

mostly low, flat plains; mountains in southwest and north

Cameroon

diverse, with coastal plain in southwest, dissected plateau in center, mountains in west, plains in north

Canada

mostly plains with mountains in west and lowlands in southeast

Cape Verde

steep, rugged, rocky, volcanic

Cayman Islands

low-lying limestone base surrounded by coral reefs

Central African Republic

vast, flat to rolling, monotonous plateau;

scattered hills in northeast and southwest

Chad

broad, arid plains in center, desert in north, mountains in northwest, lowlands in south

Chile

low coastal mountains; fertile central valley; rugged Andes in east

China

mostly mountains, high plateaus, deserts in west; plains, deltas, and hills in east

Christmas Island

steep cliffs along coast rise abruptly to central plateau

Clipperton Island

coral atoll

Cocos (Keeling) Islands

flat, low-lying coral atolls

Colombia

flat coastal lowlands, central highlands, high Andes Mountains, eastern lowland plains

Comoros

volcanic islands, interiors vary from steep mountains to low hills

Congo, Democratic Republic of the

vast central basin is a low-lying plateau; mountains in east

Congo, Republic of the

coastal plain, southern basin, central plateau, northern basin

Cook Islands

low coral atolls in north; volcanic, hilly islands in south

Coral Sea Islands

sand and coral reefs and islands (or cays)

Costa Rica

coastal plains separated by rugged mountains including over 100 volcanic cones, of which several are major volcanoes

Cote d'Ivoire

mostly flat to undulating plains; mountains in northwest

Croatia

geographically diverse; flat plains along Hungarian border, low mountains and highlands near Adriatic coastline and islands

Cuba

mostly flat to rolling plains, with rugged hills and mountains in the southeast

Curacao

generally low, hilly terrain

Cyprus

central plain with mountains to north and south; scattered but significant plains along southern coast

Czech Republic

Bohemia in the west consists of rolling plains, hills, and plateaus surrounded by low mountains; Moravia in the east consists of very hilly country

Denmark

low and flat to gently rolling plains

Djibouti

coastal plain and plateau separated by central mountains

Dominica

rugged mountains of volcanic origin

Dominican Republic

rugged highlands and mountains with fertile valleys interspersed

Ecuador

coastal plain (costa), inter-Andean central highlands (sierra), and flat to rolling eastern jungle (oriente)

Egypt

vast desert plateau interrupted by Nile valley and delta

El Salvador

mostly mountains with narrow coastal belt and central plateau

Equatorial Guinea

coastal plains rise to interior hills; islands are volcanic

Eritrea

dominated by extension of Ethiopian north-south trending highlands, descending on the east to a coastal desert plain, on the northwest to hilly terrain and on the southwest to flat-to-rolling plains

Estonia

marshy, lowlands; flat in the north, hilly in the south

Ethiopia

high plateau with central mountain range divided by Great Rift Valley

European Union

fairly flat along the Baltic and Atlantic coast; mountainous in the central and southern areas

Falkland Islands (Islas Malvinas)

rocky, hilly, mountainous with some boggy, undulating plains

Faroe Islands

rugged, rocky, some low peaks; cliffs along most of coast

Fiji

mostly mountains of volcanic origin

Finland

mostly low, flat to rolling plains interspersed with lakes and low hills

France

metropolitan France: mostly flat plains or gently rolling hills in north and west; remainder is mountainous, especially Pyrenees in south, Alps in east
French Guiana: low-lying coastal plains rising to hills and small

mountains

Guadeloupe: Basse-Terre is volcanic in origin with interior mountains; Grande-Terre is low limestone formation; most of the seven other islands are volcanic in origin

Martinique: mountainous with indented coastline; dormant volcano

Reunion: mostly rugged and mountainous; fertile lowlands along coast

French Polynesia

mixture of rugged high islands and low islands with reefs

French Southern and Antarctic Lands

Ile Amsterdam (Ile Amsterdam et

Ile Saint-Paul): a volcanic island with steep coastal cliffs; the center floor of the volcano is a large plateau

Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul): triangular in shape, the island is the top of a volcano, rocky with steep cliffs on the eastern side; has active thermal springs

Iles Crozet: a large archipelago formed from the Crozet Plateau is divided into two groups of islands

Iles Kerguelen: the interior of the large island of Ile Kerguelen is composed of rugged terrain of high mountains, hills, valleys, and plains with a number of peninsulas stretching off its coasts

Bassas da India (Iles Eparses): atoll, awash at high tide; shallow (15 m) lagoon

Europa Island, Glorioso Islands, Juan de Nova Island: low, flat, and sandy

Tromelin Island (Iles Eparses): low, flat, sandy; likely volcanic seamount

Gabon

narrow coastal plain; hilly interior; savanna in east and south

Gambia, The

flood plain of the Gambia River flanked by some low hills

Gaza Strip

flat to rolling, sand- and dune-covered coastal plain

Georgia

largely mountainous with Great Caucasus Mountains in the north and Lesser Caucasus Mountains in the south; Kolkhet's Dablobi (Kolkhida Lowland) opens to the Black Sea in the west; Mtkvari River Basin in the east; good soils in river valley flood plains, foothills of Kolkhida Lowland

- Germany
lowlands in north, uplands in center, Bavarian Alps in south
- Ghana
mostly low plains with dissected plateau in south-central area
- Gibraltar
a narrow coastal lowland borders the Rock of Gibraltar
- Greece
mostly mountains with ranges extending into the sea as peninsulas or chains of islands
- Greenland
flat to gradually sloping icecap covers all but a narrow, mountainous, barren, rocky coast
- Grenada
volcanic in origin with central mountains
- Guam
volcanic origin, surrounded by coral reefs; relatively flat coralline limestone plateau (source of most fresh water), with steep coastal cliffs and narrow coastal plains in north, low hills in center, mountains in south
- Guatemala
mostly mountains with narrow coastal plains and rolling limestone plateau
- Guernsey
mostly level with low hills in southwest
- Guinea
generally flat coastal plain, hilly to mountainous interior
- Guinea-Bissau
mostly low coastal plain rising to savanna in east
- Guyana
mostly rolling highlands; low coastal plain; savanna in south
- Haiti
mostly rough and mountainous
- Heard Island and McDonald Islands
Heard Island - 80% ice-covered, bleak and mountainous, dominated by a large massif (Big Ben) and an active volcano (Mawson Peak); McDonald Islands -

small and rocky

Holy See (Vatican City)

urban; low hill

Honduras

mostly mountains in interior, narrow coastal plains

Hong Kong

hilly to mountainous with steep slopes; lowlands in north

Hungary

mostly flat to rolling plains; hills and low mountains on the Slovakian border

Iceland

mostly plateau interspersed with mountain peaks, icefields; coast deeply indented by bays and fiords

India

upland plain (Deccan Plateau) in south, flat to rolling plain along the Ganges, deserts in west, Himalayas in north

Indian Ocean

surface dominated by counterclockwise gyre (broad, circular system of currents) in the southern Indian Ocean; unique reversal of surface currents in the northern Indian Ocean; low atmospheric pressure over southwest Asia from hot, rising, summer air results in the southwest monsoon and southwest-to-northeast winds and currents, while high pressure over northern Asia from cold, falling, winter air results in the northeast monsoon and northeast-to-southwest winds and currents; ocean floor is dominated by the Mid-Indian Ocean Ridge and subdivided by the Southeast Indian Ocean Ridge, Southwest Indian Ocean Ridge, and Ninetyeast Ridge

Indonesia

mostly coastal lowlands; larger islands have interior mountains

Iran

rugged, mountainous rim; high, central basin with deserts, mountains; small, discontinuous plains along both coasts

Iraq

mostly broad plains; reedy marshes along Iranian border in south with large flooded areas; mountains along borders with Iran

and Turkey

Ireland

mostly level to rolling interior plain surrounded by rugged hills and low mountains; sea cliffs on west coast

Isle of Man

hills in north and south bisected by central valley

Israel

Negev desert in the south; low coastal plain; central mountains; Jordan Rift Valley

Italy

mostly rugged and mountainous; some plains, coastal lowlands

Jamaica

mostly mountains, with narrow, discontinuous coastal plain

Jan Mayen

volcanic island, partly covered by glaciers

Japan

mostly rugged and mountainous

Jersey

gently rolling plain with low, rugged hills along north coast

Jordan

mostly desert plateau in east, highland area in west; Great Rift Valley separates East and West Banks of the Jordan River

Kazakhstan

vast flat steppe extending from the Volga in the west to the Altai Mountains in the east and from the plains of western Siberia in the north to oases and deserts of Central Asia in the south

Kenya

low plains rise to central highlands bisected by Great Rift Valley; fertile plateau in west

Kiribati

mostly low-lying coral atolls surrounded by extensive reefs

Korea, North

mostly hills and mountains separated by deep, narrow

valleys; coastal plains wide in west, discontinuous in east

Korea, South

mostly hills and mountains; wide coastal plains in west and south

Kosovo

flat fluvial basin with an elevation of 400-700 m above sea level surrounded by several high mountain ranges with elevations of 2,000 to 2,500 m

Kuwait

flat to slightly undulating desert plain

Kyrgyzstan

peaks of Tien Shan and associated valleys and basins encompass entire nation

Laos

mostly rugged mountains; some plains and plateaus

Latvia

low plain

Lebanon

narrow coastal plain; El Beqaa (Bekaa Valley) separates Lebanon and Anti-Lebanon Mountains

Lesotho

mostly highland with plateaus, hills, and mountains

Liberia

mostly flat to rolling coastal plains rising to rolling plateau and low mountains in northeast

Libya

mostly barren, flat to undulating plains, plateaus, depressions

Liechtenstein

mostly mountainous (Alps) with Rhine Valley in western third

Lithuania

lowland, many scattered small lakes, fertile soil

Luxembourg

mostly gently rolling uplands with broad, shallow

valleys; uplands to slightly mountainous in the north; steep slope down to Moselle flood plain in the southeast

Macau
generally flat

Macedonia
mountainous territory covered with deep basins and valleys; three large lakes, each divided by a frontier line; country bisected by the Vardar River

Madagascar
narrow coastal plain, high plateau and mountains in center

Malawi
narrow elongated plateau with rolling plains, rounded hills, some mountains

Malaysia
coastal plains rising to hills and mountains

Maldives
flat, with white sandy beaches

Mali
mostly flat to rolling northern plains covered by sand; savanna in south, rugged hills in northeast

Malta
mostly low, rocky, flat to dissected plains; many coastal cliffs

Marshall Islands
low coral limestone and sand islands

Mauritania
mostly barren, flat plains of the Sahara; some central hills

Mauritius
small coastal plain rising to discontinuous mountains encircling central plateau

Mayotte
generally undulating, with deep ravines and ancient volcanic peaks

Mexico

high, rugged mountains; low coastal plains; high plateaus;
desert

Micronesia, Federated States of islands vary geologically from high mountainous islands to low, coral atolls; volcanic outcroppings on Pohnpei, Kosrae, and Chuuk

Moldova

rolling steppe, gradual slope south to Black Sea

Monaco

hilly, rugged, rocky

Mongolia

vast semidesert and desert plains, grassy steppe, mountains
in west and southwest; Gobi Desert in south-central

Montenegro

highly indented coastline with narrow coastal plain
backed by rugged high limestone mountains and plateaus

Montserrat

volcanic island, mostly mountainous, with small coastal
lowland

Morocco

northern coast and interior are mountainous with large areas
of bordering plateaus, intermontane valleys, and rich coastal plains

Mozambique

mostly coastal lowlands, uplands in center, high plateaus
in northwest, mountains in west

Namibia

mostly high plateau; Namib Desert along coast; Kalahari
Desert in east

Nauru

sandy beach rises to fertile ring around raised coral reefs
with phosphate plateau in center

Navassa Island

raised coral and limestone plateau, flat to
undulating; ringed by vertical white cliffs (9 to 15 m high)

Nepal

Tarai or flat river plain of the Ganges in south, central hill

region, rugged Himalayas in north

Netherlands

mostly coastal lowland and reclaimed land (polders);
some hills in southeast

New Caledonia

coastal plains with interior mountains

New Zealand

predominately mountainous with some large coastal plains

Nicaragua

extensive Atlantic coastal plains rising to central
interior mountains; narrow Pacific coastal plain interrupted by
volcanoes

Niger

predominately desert plains and sand dunes; flat to rolling
plains in south; hills in north

Nigeria

southern lowlands merge into central hills and plateaus;
mountains in southeast, plains in north

Niue

steep limestone cliffs along coast, central plateau

Norfolk Island

volcanic formation with mostly rolling plains

Northern Mariana Islands

southern islands are limestone with level
terraces and fringing coral reefs; northern islands are volcanic

Norway

glaciated; mostly high plateaus and rugged mountains broken
by fertile valleys; small, scattered plains; coastline deeply
indented by fjords; arctic tundra in north

Oman

central desert plain, rugged mountains in north and south

Pacific Ocean

surface currents in the northern Pacific are dominated
by a clockwise, warm-water gyre (broad circular system of currents)

and in the southern Pacific by a counterclockwise, cool-water gyre; in the northern Pacific, sea ice forms in the Bering Sea and Sea of Okhotsk in winter; in the southern Pacific, sea ice from Antarctica reaches its northernmost extent in October; the ocean floor in the eastern Pacific is dominated by the East Pacific Rise, while the western Pacific is dissected by deep trenches, including the Mariana Trench, which is the world's deepest

Pakistan

flat Indus plain in east; mountains in north and northwest; Balochistan plateau in west

Palau

varying geologically from the high, mountainous main island of Babelthup to low, coral islands usually fringed by large barrier reefs

Panama

interior mostly steep, rugged mountains and dissected, upland plains; coastal areas largely plains and rolling hills

Papua New Guinea

mostly mountains with coastal lowlands and rolling foothills

Paracel Islands

mostly low and flat

Paraguay

grassy plains and wooded hills east of Rio Paraguay; Gran Chaco region west of Rio Paraguay mostly low, marshy plain near the river, and dry forest and thorny scrub elsewhere

Peru

western coastal plain (costa), high and rugged Andes in center (sierra), eastern lowland jungle of Amazon Basin (selva)

Philippines

mostly mountains with narrow to extensive coastal lowlands

Pitcairn Islands

rugged volcanic formation; rocky coastline with cliffs

Poland

mostly flat plain; mountains along southern border

Portugal

mountainous north of the Tagus River, rolling plains in south

Puerto Rico

mostly mountains with coastal plain belt in north; mountains precipitous to sea on west coast; sandy beaches along most coastal areas

Qatar

mostly flat and barren desert covered with loose sand and gravel

Romania

central Transylvanian Basin is separated from the Moldavian Plateau on the east by the Eastern Carpathian Mountains and separated from the Walachian Plain on the south by the Transylvanian Alps

Russia

broad plain with low hills west of Urals; vast coniferous forest and tundra in Siberia; uplands and mountains along southern border regions

Rwanda

mostly grassy uplands and hills; relief is mountainous with altitude declining from west to east

Saint Barthelemy

hilly, almost completely surrounded by shallow-water reefs, with 20 beaches

Saint Helena, Ascension, and Tristan da Cunha

the islands of this

group result from volcanic activity associated with the Atlantic Mid-Ocean Ridge

Saint Helena: rugged, volcanic; small scattered plateaus and plains

Ascension: surface covered by lava flows and cinder cones of 44 dormant volcanoes; ground rises to the east

Tristan da Cunha: sheer cliffs line the coastline of the nearly circular island; the flanks of the central volcanic peak are deeply dissected; narrow coastal plain lies between The Peak and the coastal cliffs

Saint Kitts and Nevis

volcanic with mountainous interiors

Saint Lucia

volcanic and mountainous with some broad, fertile valleys

Saint Pierre and Miquelon

mostly barren rock

Saint Vincent and the Grenadines

volcanic, mountainous

Samoa

two main islands (Savaii, Upolu) and several smaller islands and uninhabited islets; narrow coastal plain with volcanic, rocky, rugged mountains in interior

San Marino

rugged mountains

Sao Tome and Principe

volcanic, mountainous

Saudi Arabia

mostly uninhabited, sandy desert

Senegal

generally low, rolling, plains rising to foothills in southeast

Serbia

extremely varied; to the north, rich fertile plains; to the east, limestone ranges and basins; to the southeast, ancient mountains and hills

Seychelles

Mahe Group is granitic, narrow coastal strip, rocky, hilly; others are coral, flat, elevated reefs

Sierra Leone

coastal belt of mangrove swamps, wooded hill country, upland plateau, mountains in east

Singapore

lowland; gently undulating central plateau contains water catchment area and nature preserve

Sint Maarten

low, hilly terrain, volcanic origin

Slovakia

rugged mountains in the central and northern part and lowlands in the south

Slovenia

a short coastal strip on the Adriatic, an alpine mountain region adjacent to Italy and Austria, mixed mountains and valleys with numerous rivers to the east

Solomon Islands

mostly rugged mountains with some low coral atolls

Somalia

mostly flat to undulating plateau rising to hills in north

South Africa

vast interior plateau rimmed by rugged hills and narrow coastal plain

South Georgia and South Sandwich Islands

most of the islands, rising steeply from the sea, are rugged and mountainous; South Georgia is largely barren and has steep, glacier-covered mountains; the South Sandwich Islands are of volcanic origin with some active volcanoes

Southern Ocean

the Southern Ocean is deep, 4,000 to 5,000 m over most of its extent with only limited areas of shallow water; the Antarctic continental shelf is generally narrow and unusually deep, its edge lying at depths of 400 to 800 m (the global mean is 133 m); the Antarctic icepack grows from an average minimum of 2.6 million sq km in March to about 18.8 million sq km in September, better than a sixfold increase in area; the Antarctic Circumpolar Current (21,000 km in length) moves perpetually eastward; it is the world's largest ocean current, transporting 130 million cubic meters of water per second - 100 times the flow of all the world's rivers

Spain

large, flat to dissected plateau surrounded by rugged hills; Pyrenees in north

Spratly Islands

flat

Sri Lanka

mostly low, flat to rolling plain; mountains in south-central interior

Sudan

generally flat, featureless plain; mountains in far south, northeast and west; desert dominates the north

Suriname

mostly rolling hills; narrow coastal plain with swamps

Svalbard

wild, rugged mountains; much of high land ice covered; west coast clear of ice about one-half of the year; fjords along west and north coasts

Swaziland

mostly mountains and hills; some moderately sloping plains

Sweden

mostly flat or gently rolling lowlands; mountains in west

Switzerland

mostly mountains (Alps in south, Jura in northwest) with a central plateau of rolling hills, plains, and large lakes

Syria

primarily semiarid and desert plateau; narrow coastal plain; mountains in west

Taiwan

eastern two-thirds mostly rugged mountains; flat to gently rolling plains in west

Tajikistan

Pamir and Alay Mountains dominate landscape; western Fergana Valley in north, Kofarnihon and Vakhsh Valleys in southwest

Tanzania

plains along coast; central plateau; highlands in north, south

Thailand

central plain; Khorat Plateau in the east; mountains elsewhere

Timor-Leste

mountainous

Togo
gently rolling savanna in north; central hills; southern plateau; low coastal plain with extensive lagoons and marshes

Tokelau
low-lying coral atolls enclosing large lagoons

Tonga
most islands have limestone base formed from uplifted coral formation; others have limestone overlying volcanic base

Trinidad and Tobago
mostly plains with some hills and low mountains

Tunisia
mountains in north; hot, dry central plain; semiarid south merges into the Sahara

Turkey
high central plateau (Anatolia); narrow coastal plain; several mountain ranges

Turkmenistan
flat-to-rolling sandy desert with dunes rising to mountains in the south; low mountains along border with Iran; borders Caspian Sea in west

Turks and Caicos Islands low, flat limestone; extensive marshes and mangrove swamps

Tuvalu
low-lying and narrow coral atolls

Uganda
mostly plateau with rim of mountains

Ukraine
most of Ukraine consists of fertile plains (steppes) and plateaus, mountains being found only in the west (the Carpathians), and in the Crimean Peninsula in the extreme south

United Arab Emirates
flat, barren coastal plain merging into rolling sand dunes of vast desert wasteland; mountains in east

United Kingdom

mostly rugged hills and low mountains; level to rolling plains in east and southeast

United States

vast central plain, mountains in west, hills and low mountains in east; rugged mountains and broad river valleys in Alaska; rugged, volcanic topography in Hawaii

United States Pacific Island Wildlife Refuges

low and nearly level sandy coral islands with narrow fringing reefs that have developed at the top of submerged volcanic mountains, which in most cases rise steeply from the ocean floor

Uruguay

mostly rolling plains and low hills; fertile coastal lowland

Uzbekistan

mostly flat-to-rolling sandy desert with dunes; broad, flat intensely irrigated river valleys along course of Amu Darya, Syr Darya (Sirdaryo), and Zarafshon; Fergana Valley in east surrounded by mountainous Tajikistan and Kyrgyzstan; shrinking Aral Sea in west

Vanuatu

mostly mountainous islands of volcanic origin; narrow coastal plains

Venezuela

Andes Mountains and Maracaibo Lowlands in northwest; central plains (llanos); Guiana Highlands in southeast

Vietnam

low, flat delta in south and north; central highlands; hilly, mountainous in far north and northwest

Virgin Islands

mostly hilly to rugged and mountainous with little level land

Wake Island

atoll of three low coral islands, Peale, Wake, and Wilkes, built up on an underwater volcano; central lagoon is former crater, islands are part of the rim

Wallis and Futuna

volcanic origin; low hills

West Bank

mostly rugged dissected upland, some vegetation in west,
but barren in east

Western Sahara

mostly low, flat desert with large areas of rocky or
sandy surfaces rising to small mountains in south and northeast

World

the greatest ocean depth is the Mariana Trench at 10,924 m in
the Pacific Ocean

Yemen

narrow coastal plain backed by flat-topped hills and rugged
mountains; dissected upland desert plains in center slope into the
desert interior of the Arabian Peninsula

Zambia

mostly high plateau with some hills and mountains

Zimbabwe

mostly high plateau with higher central plateau (high
veld); mountains in east

@2127

Field Listing :: Total fertility rate

This entry gives a figure for the average number of children that would be born per woman if all women lived to the end of their childbearing years and bore children according to a given fertility rate at each age. The total fertility rate (TFR) is a more direct measure of the level of fertility than the crude birth rate, since it refers to births per woman. This indicator shows the potential for population change in the country. A rate of two children per woman is considered the replacement rate for a population, resulting

in relative stability in terms of total numbers. Rates above two children indicate populations growing in size and whose median age is declining. Higher rates may also indicate difficulties for families, in some situations, to feed and educate their children and for women to enter the labor force. Rates below two children indicate populations decreasing in size and growing older. Global fertility rates are in general decline and this trend is most pronounced in industrialized countries, especially Western Europe, where populations are projected to decline dramatically over the next 50 years.

Country Comparison to the World

Country

Total fertility rate(children born/woman)

Afghanistan

5.5 children born/woman (2010 est.)

Albania

1.47 children born/woman (2010 est.)

Algeria

1.76 children born/woman (2010 est.)

American Samoa

Field Listing :: Government type

This entry gives the basic form of government. Definitions of the major governmental terms are as follows. (Note that for some countries more than one definition applies.): Absolute monarchy - a form of government where the monarch rules unhindered, i.e., without any laws, constitution, or legally organized opposition. Anarchy - a condition of lawlessness or political disorder brought about by the absence of governmental authority. Authoritarian - a form of government in which state authority is imposed onto many aspects of citizens' lives. Commonwealth - a nation, state, or other political entity founded on law and united by a compact of the people for the common good. Communist - a system of government in which the state plans and controls the economy and a single - often authoritarian - party holds power; state controls are imposed with the elimination of private ownership of property or capital while claiming to make progress toward a higher social order in which all goods are equally shared by the people (i.e., a classless society). Confederacy (Confederation) - a union by compact or treaty between states, provinces, or territories, that creates a central government with limited powers; the constituent entities retain supreme authority over all matters except those delegated to the central government. Constitutional - a government by or operating under an authoritative document (constitution) that sets forth the system of fundamental laws and principles that determines the nature, functions, and limits of that government. Constitutional democracy - a form of government in which the sovereign power of the people is spelled out in a governing constitution. Constitutional monarchy - a system of government in which a monarch is guided by a constitution whereby his/her rights, duties, and responsibilities are spelled out in written law or by custom. Democracy - a form of government in which the supreme power is retained by the people, but which is usually exercised indirectly through a system of representation and delegated authority periodically renewed. Democratic republic - a state in which the supreme power rests in the body of citizens entitled to vote for officers and representatives responsible to them. Dictatorship - a form of government in which a ruler or small clique wield absolute power (not restricted by a constitution or laws).

Ecclesiastical - a government administered by a church. Emirate - similar to a monarchy or sultanate, but a government in which the supreme power is in the hands of an emir (the ruler of a Muslim state); the emir may be an absolute overlord or a sovereign with constitutionally limited authority. Federal (Federation) - a form of government in which sovereign power is formally divided - usually by means of a constitution - between a central authority and a number of constituent regions (states, colonies, or provinces) so that each region retains some management of its internal affairs; differs from a confederacy in that the central government exerts influence directly upon both individuals as well as upon the regional units. Federal republic - a state in which the powers of the central government are restricted and in which the component parts (states, colonies, or provinces) retain a degree of self-government; ultimate sovereign power rests with the voters who chose their governmental representatives. Islamic republic - a particular form of government adopted by some Muslim states; although such a state is, in theory, a theocracy, it remains a republic, but its laws are required to be compatible with the laws of Islam. Maoism - the theory and practice of Marxism-Leninism developed in China by Mao Zedong (Mao Tse-tung), which states that a continuous revolution is necessary if the leaders of a communist state are to keep in touch with the people. Marxism - the political, economic, and social principles espoused by 19th century economist Karl Marx; he viewed the struggle of workers as a progression of historical forces that would proceed from a class struggle of the proletariat (workers) exploited by capitalists (business owners), to a socialist "dictatorship of the proletariat," to, finally, a classless society - Communism. Marxism-Leninism - an expanded form of communism developed by Lenin from doctrines of Karl Marx; Lenin saw imperialism as the final stage of capitalism and shifted the focus of workers' struggle from developed to underdeveloped countries. Monarchy - a government in which the supreme power is lodged in the hands of a monarch who reigns over a state or territory, usually for life and by hereditary right; the monarch may be either a sole absolute ruler or a sovereign - such as a king, queen, or prince - with constitutionally limited authority. Oligarchy - a government in which control is exercised by a small group of individuals whose authority generally is based on wealth or power. Parliamentary democracy - a political system in which the legislature (parliament) selects the government - a prime minister, premier, or chancellor along with the cabinet ministers - according to party strength as expressed in elections; by this system, the government acquires a dual responsibility: to the people as well as to the parliament. Parliamentary government (Cabinet-Parliamentary government) - a government in which members of an executive branch (the cabinet and its leader - a prime minister, premier, or chancellor) are nominated to their positions by a legislature or parliament, and are directly responsible to it; this type of government can be dissolved at will by the parliament (legislature) by means of a no confidence vote or the leader of the cabinet may dissolve the parliament if it can no longer function. Parliamentary monarchy - a state headed by a monarch who is not actively involved in policy formation or implementation (i.e., the exercise of sovereign powers by a monarch in a ceremonial capacity); true governmental leadership is carried out by a cabinet and its head - a prime minister, premier, or chancellor - who are drawn from a legislature (parliament). Presidential - a system of government where the executive branch exists separately from a legislature (to which it is generally not accountable). Republic - a representative democracy in which the people's elected deputies (representatives), not the people themselves, vote on legislation. Socialism - a government in which the means of planning, producing, and distributing goods is controlled by a central government that theoretically seeks a more just and equitable distribution of property and

labor; in actuality, most socialist governments have ended up being no more than dictatorships over workers by a ruling elite. Sultanate - similar to a monarchy, but a government in which the supreme power is in the hands of a sultan (the head of a Muslim state); the sultan may be an absolute ruler or a sovereign with constitutionally limited authority. Theocracy - a form of government in which a Deity is recognized as the supreme civil ruler, but the Deity's laws are interpreted by ecclesiastical authorities (bishops, mullahs, etc.); a government subject to religious authority. Totalitarian - a government that seeks to subordinate the individual to the state by controlling not only all political and economic matters, but also the attitudes, values, and beliefs of its population. Antarctica Antarctic Treaty Summary - the Antarctic region is governed by a system known as the Antarctic Treaty System; the system includes: 1. the Antarctic Treaty, signed on 1 December 1959 and entered into force on 23 June 1961, which establishes the legal framework for the management of Antarctica, 2. Recommendations and Measures adopted at meetings of Antarctic Treaty countries, 3. The Convention for the Conservation of Antarctic Seals (1972), 4. The Convention for the Conservation of Antarctic Marine Living Resources (1980), and 5. The Protocol on Environmental Protection to the Antarctic Treaty (1991); the 33rd Antarctic Treaty Consultative Meeting was held in Punta del Este, Uruguay in May 2010; at these periodic meetings, decisions are made by consensus (not by vote) of all consultative member nations; by April 2010, there were 48 treaty member nations:

28 consultative and 20 non-consultative; consultative (decision-making) members include the seven nations that claim portions of Antarctica as national territory (some claims overlap) and 21 non-claimant nations; the US and Russia have reserved the right to make claims; the US does not recognize the claims of others; Antarctica is administered through meetings of the consultative member nations; decisions from these meetings are carried out by these member nations (with respect to their own nationals and operations) in accordance with their own national laws; the years in parentheses indicate when a consultative member-nation acceded to the Treaty and when it was accepted as a consultative member, while no date indicates the country was an original 1959 treaty signatory; claimant nations are - Argentina, Australia, Chile, France, NZ, Norway, and the UK. Nonclaimant consultative nations are - Belgium, Brazil (1975/1983), Bulgaria (1978/1998) China (1983/1985), Ecuador (1987/1990), Finland (1984/1989), Germany (1979/1981), India (1983/1983), Italy (1981/1987), Japan, South Korea (1986/1989), Netherlands (1967/1990), Peru (1981/1989), Poland (1961/1977), Russia, South Africa, Spain (1982/1988), Sweden (1984/1988), Ukraine (1992/2004), Uruguay (1980/1985), and the US; non-consultative members, with year of accession in parentheses, are - Austria (1987), Belarus (2006), Canada (1988), Colombia (1989), Cuba (1984), Czech Republic (1962/1993), Denmark (1965), Estonia (2001), Greece (1987), Guatemala (1991), Hungary (1984), North Korea (1987), Monaco (2008), Papua New Guinea (1981), Portugal (2010), Romania (1971), Slovakia (1962/1993), Switzerland (1990), Turkey (1996), and Venezuela (1999); note - Czechoslovakia acceded to the Treaty in 1962 and separated into the Czech Republic and Slovakia in 1993; claimant nations are - Argentina, Australia, Chile, France, NZ, Norway, and the UK. Nonclaimant consultative nations are - Belgium, Brazil (1975/1983), Bulgaria (1978/1998) China (1983/1985), Ecuador (1987/1990), Finland (1984/1989), Germany (1979/1981), India (1983/1983), Italy (1981/1987), Japan, South Korea (1986/1989), Netherlands (1967/1990), Peru (1981/1989), Poland (1961/1977), Russia, South Africa, Spain (1982/1988), Sweden (1984/1988), Ukraine (1992/2004), Uruguay (1980/1985), and the US; non-consultative members, with year of accession in parentheses, are - Austria (1987), Belarus (2006), Canada (1988), Colombia (1989), Cuba (1984), Czech Republic (1962/1993), Denmark (1965), Estonia (2001), Greece (1987), Guatemala (1991), Hungary (1984), North Korea (1987), Monaco (2008), Papua New Guinea (1981), Portugal (2010), Romania (1971), Slovakia (1962/1993), Switzerland (1990), Turkey (1996), and Venezuela (1999); note - Czechoslovakia acceded to the Treaty in 1962 and separated into the Czech Republic and Slovakia in 1993; Article 1 - area to be used for peaceful purposes only; military activity, such as weapons testing, is prohibited, but military personnel and equipment may be used for scientific research or any other peaceful purpose; Article 2 - freedom of scientific investigation and cooperation shall continue; Article 3 - free exchange of information and personnel, cooperation with the UN and other international agencies; Article 4 - does not recognize, dispute, or establish territorial claims and no new claims shall be asserted while the treaty is in force; Article 5 - prohibits nuclear explosions or disposal of radioactive wastes; Article 6 - includes under the treaty all land and ice shelves south of 60 degrees 00 minutes south and reserves high seas rights; Article 7 - treaty-state observers have free access, including aerial observation, to any area and may inspect all stations, installations, and equipment; advance notice of all expeditions and of the introduction of military personnel must be given; Article 8 - allows for jurisdiction over observers and scientists by their own states; Article 9 - frequent consultative meetings take place among member nations; Article 10 - treaty states will discourage activities by any country in Antarctica that are contrary to the treaty; Article 11 - disputes to be settled peacefully by the parties concerned or, ultimately, by the ICJ; Articles 12, 13, 14 - deal with upholding, interpreting, and amending the treaty among involved

nations; other agreements - some 200 recommendations adopted at treaty consultative meetings and ratified by governments; a mineral resources agreement was signed in 1988 but remains unratified; the Protocol on Environmental Protection to the Antarctic Treaty was signed 4 October 1991 and entered into force 14 January 1998; this agreement provides for the protection of the Antarctic environment through six specific annexes: 1) environmental impact assessment, 2) conservation of Antarctic fauna and flora, 3) waste disposal and waste management, 4) prevention of marine pollution, 5) area protection and management and 6) liability arising from environmental emergencies; it prohibits all activities relating to mineral resources except scientific research; a permanent Antarctic Treaty Secretariat was established in 2004 in Buenos Aires, Argentina

legal status of territory and issue of sovereignty unresolved; territory contested by Morocco and Polisario Front (Popular Front for the Liberation of the Saguia el Hamra and Rio de Oro), which in February 1976 formally proclaimed a government-in-exile, the Sahrawi Arab Democratic Republic (SADR), near Tindouf, Algeria, led by President Mohamed ABDELAZIZ; territory partitioned between Morocco and Mauritania in April 1976 when Spain withdrew, with Morocco acquiring northern two-thirds; Mauritania, under pressure from Polisario guerrillas, abandoned all claims to its portion in August 1979; Morocco moved to occupy that sector shortly thereafter and has since asserted administrative control; the Polisario's government-in-exile was seated as an Organization of African Unity (OAU) member in 1984; Morocco between 1980 and 1987 built a fortified sand berm delineating the roughly 80 percent of

Western Sahara west of the barrier that currently is controlled by Morocco; guerrilla activities continued sporadically until a UN-monitored cease-fire was implemented on 6 September 1991 (Security Council Resolution 690) by the United Nations Mission for the Referendum in Western Sahara (MINURSO)

Field Listing :: Military - note

This entry includes miscellaneous military information of significance not included elsewhere.
Country

Military - note

Akrotiri
Akrotiri has a full RAF base, Headquarters for British

Forces Cyprus, and Episkopi Support Unit

American Samoa

defense is the responsibility of the US

Andorra

defense is the responsibility of France and Spain

Anguilla

defense is the responsibility of the UK

Antarctica

the Antarctic Treaty prohibits any measures of a military nature, such as the establishment of military bases and fortifications, the carrying out of military maneuvers, or the testing of any type of weapon; it permits the use of military personnel or equipment for scientific research or for any other peaceful purposes

Argentina

the Argentine military is a well-organized force constrained by the country's prolonged economic hardship; the country has recently experienced a strong recovery, and the military is implementing a modernization plan aimed at making the ground forces lighter and more responsive (2008)

Aruba

defense is the responsibility of the Kingdom of the Netherlands

Ashmore and Cartier Islands

defense is the responsibility of Australia; periodic visits by the Royal Australian Navy and Royal Australian Air Force

Barbados

the Royal Barbados Defense Force includes a land-based Troop Command and a small Coast Guard; the primary role of the land element is to defend the island against external aggression; the Command consists of a single, part-time battalion with a small regular cadre that is deployed throughout the island; it increasingly supports the police in patrolling the coastline to prevent smuggling and other illicit activities (2007)

Bermuda

defense is the responsibility of the UK

Bouvet Island

defense is the responsibility of Norway

British Indian Ocean Territory

defense is the responsibility of the UK; the US lease on Diego Garcia expires in 2016

British Virgin Islands

defense is the responsibility of the UK

Cayman Islands

defense is the responsibility of the UK

Christmas Island

defense is the responsibility of Australia

Clipperton Island

defense is the responsibility of France

Cocos (Keeling) Islands

defense is the responsibility of Australia; the territory has a five-person police force

Cook Islands

defense is the responsibility of New Zealand in consultation with the Cook Islands and at its request

Coral Sea Islands

defense is the responsibility of Australia

Cuba

the collapse of the Soviet Union deprived the Cuban military of its major economic and logistic support and had a significant impact on the state of Cuban equipment; the army remains well trained and professional in nature; while the lack of replacement parts for its existing equipment has increasingly affected operational capabilities, Cuba remains able to offer considerable resistance to any regional power (2010)

Curacao

defense is the responsibility of the Kingdom of the Netherlands

Dhekelia

includes Dhekelia Garrison and Ayios Nikolaos Station connected by a roadway

European Union

the five-nation Eurocorps - created in 1992 by France, Germany, Belgium, Spain, and Luxembourg - has deployed troops and police on peacekeeping missions to Bosnia-Herzegovina, Macedonia, and the Democratic Republic of the Congo and assumed command of the ISAF in Afghanistan in August 2004; Eurocorps directly commands the 5,000-man Franco-German Brigade, the Multinational Command Support Brigade, and EUFOR in Bosnia and Herzegovina; in November 2004, the EU Council of Ministers formally committed to creating 13 1,500-man battle groups by the end of 2007, to respond to international crises on a rotating basis; 22 of the EU's 27 nations have agreed to supply troops; France, Italy, and the UK formed the first of three battle groups in 2005; Norway, Sweden, Estonia, and Finland established the Nordic Battle Group effective 1 January 2008; nine other groups are to be formed; a rapid-reaction naval EU Maritime Task Group was stood up in March 2007 (2007)

Falkland Islands (Islas Malvinas) defense is the responsibility of the UK

Faroe Islands

defense is the responsibility of Denmark

French Polynesia

defense is the responsibility of France

French Southern and Antarctic Lands

defense is the responsibility of
France

Georgia

a CIS peacekeeping force of Russian troops is deployed in the Abkhazia region of Georgia together with a UN military observer group; a Russian peacekeeping battalion is deployed in South Ossetia

Gibraltar

defense is the responsibility of the UK; the Royal Gibraltar Regiment replaced the last British regular infantry forces in 1992

Greenland

defense is the responsibility of Denmark

Guam

defense is the responsibility of the US

Guernsey

defense is the responsibility of the UK

Heard Island and McDonald Islands

defense is the responsibility of
Australia; Australia conducts fisheries patrols

Holy See (Vatican City) defense is the responsibility of Italy; ceremonial and limited security duties performed by Pontifical Swiss Guard

Hong Kong

defense is the responsibility of China

Iceland

Iceland has no standing military force; under a 1951 bilateral agreement - still valid - its defense was provided by the US-manned Icelandic Defense Force (IDF) headquartered at Keflavik; however, all US military forces in Iceland were withdrawn as of October 2006; although wartime defense of Iceland remains a NATO commitment, in April 2007, Iceland and Norway signed a bilateral agreement providing for Norwegian aerial surveillance and defense of Icelandic airspace (2008)

Isle of Man

defense is the responsibility of the UK

Jan Mayen

defense is the responsibility of Norway

Jersey

defense is the responsibility of the UK

Kiribati

Kiribati does not have military forces; defense assistance is provided by Australia and NZ

Laos

serving one of the world's least developed countries, the Lao People's Armed Forces (LPAF) is small, poorly funded, and ineffectively resourced; its mission focus is border and internal security, primarily in countering ethnic Hmong insurgent groups; together with the Lao People's Revolutionary Party and the government, the Lao People's Army (LPA) is the third pillar of state machinery, and as such is expected to suppress political and civil unrest and similar national emergencies, but the LPA also has upgraded skills to respond to avian influenza outbreaks; there is no perceived external threat to the state and the LPA maintains strong

ties with the neighboring Vietnamese military (2008)

Lesotho

Lesotho's declared policy is maintenance of its independent sovereignty and preservation of internal security; in practice, external security is guaranteed by South Africa; restructuring of the Lesotho Defense Force (LDF) and Ministry of Defense and Public Service over the past five years has focused on subordinating the defense apparatus to civilian control and restoring the LDF's cohesion; the restructuring has considerably improved capabilities and professionalism, but the LDF is disproportionately large for a small, poor country; the government has outlined a reduction to a planned 1,500-man strength, but these plans have met with vociferous resistance from the political opposition and from inside the LDF (2008)

Liechtenstein

Liechtenstein has no military forces but is interested in European security policy and is an active member of the Organization for Security and Cooperation in Europe (OSCE)

Macau

defense is the responsibility of China

Maldives

the Maldives National Defense Force (MNDF), with its small size and with little serviceable equipment, is inadequate to prevent external aggression and is primarily tasked to reinforce the Maldives Police Service (MPS) and ensure security in the exclusive economic zone (2008)

Marshall Islands

defense is the responsibility of the US

Mayotte

defense is the responsibility of France; a small contingent of French forces is stationed on the island

Micronesia, Federated States of

defense is the responsibility of the US

Monaco

defense is the responsibility of France

Montserrat

defense is the responsibility of the UK

Nauru

Nauru maintains no defense forces; under an informal agreement, defense is the responsibility of Australia

Navassa Island

defense is the responsibility of the US

New Caledonia

defense is the responsibility of France

Niue

defense is the responsibility of New Zealand

Norfolk Island

defense is the responsibility of Australia

Northern Mariana Islands

defense is the responsibility of the US

Palau

defense is the responsibility of the US; under a Compact of Free Association between Palau and the US, the US military is granted access to the islands for 50 years, but it has not stationed any military forces there (2008)

Panama

on 10 February 1990, the government of then President ENDARA abolished Panama's military and reformed the security apparatus by creating the Panamanian Public Forces; in October 1994, Panama's Legislative Assembly approved a constitutional amendment prohibiting the creation of a standing military force but allowing the temporary establishment of special police units to counter acts of "external aggression"

Paracel Islands

occupied by China

Pitcairn Islands

defense is the responsibility of the UK

Puerto Rico

defense is the responsibility of the US

Saint Barthelemy

defense is the responsibility of France

Saint Helena, Ascension, and Tristan da Cunha defense is the responsibility of the UK

Saint Martin

defense is the responsibility of France

Saint Pierre and Miquelon

defense is the responsibility of France

Samoa

Samoa has no formal defense structure or regular armed forces; informal defense ties exist with NZ, which is required to consider any Samoan request for assistance under the 1962 Treaty of Friendship

San Marino

defense is the responsibility of Italy

Sao Tome and Principe

Sao Tome and Principe's army is a tiny force with almost no resources at its disposal and would be wholly ineffective operating unilaterally; infantry equipment is considered simple to operate and maintain but may require refurbishment or replacement after 25 years in tropical climates; poor pay, working conditions, and alleged nepotism in the promotion of officers have been problems in the past, as reflected in the 1995 and 2003 coups; these issues are being addressed with foreign assistance aimed at improving the army and its focus on realistic security concerns; command is exercised from the president, through the Minister of Defense, to the Chief of the Armed Forces staff (2005)

Sint Maarten

defense is the responsibility of the Kingdom of the Netherlands

South Africa

with the end of apartheid and the establishment of majority rule, former military, black homelands forces, and ex-opposition forces were integrated into the South African National Defense Force (SANDF); as of 2003 the integration process was considered complete

South Georgia and South Sandwich Islands

defense is the responsibility of the UK

Spratly Islands

Spratly Islands consist of more than 100 small islands or reefs of which about 45 are claimed and occupied by China, Malaysia, the Philippines, Taiwan, and Vietnam

Svalbard

Svalbard is a territory of Norway, demilitarized by treaty on 9 February 1920; Norwegian military activity is limited to fisheries surveillance by the Norwegian Coast Guard

Tokelau

defense is the responsibility of New Zealand

Turkey

a "National Security Policy Document" adopted in October 2005 increases the Turkish Armed Forces (TSK) role in internal security, augmenting the General Directorate of Security and Gendarmerie General Command (Jandarma); the TSK leadership continues to play a key role in politics and considers itself guardian of Turkey's secular state; in April 2007, it warned the ruling party about any pro-Islamic appointments; despite on-going negotiations on EU accession since October 2005, progress has been limited in establishing required civilian supremacy over the military; primary domestic threats are listed as fundamentalism (with the definition in some dispute with the civilian government), separatism (the Kurdish problem), and the extreme left wing; Ankara strongly opposed establishment of an autonomous Kurdish region; an overhaul of the Turkish Land Forces Command (TLFC) taking place under the "Force 2014" program is to produce 20-30% smaller, more highly trained forces characterized by greater mobility and firepower and capable of joint and combined operations; the TLFC has taken on increasing international peacekeeping responsibilities, and took charge of a NATO International Security Assistance Force (ISAF) command in Afghanistan in April 2007; the Turkish Navy is a regional naval power that wants to develop the capability to project power beyond Turkey's coastal waters; the Navy is heavily involved in NATO, multinational, and UN operations; its roles include control of territorial waters and security for sea lines of communications; the Turkish Air Force adopted an "Aerospace and Missile Defense Concept" in 2002 and has initiated project work on an integrated missile defense system; Air Force priorities include attaining a modern deployable, survivable, and sustainable force structure, and establishing a sustainable command and control system (2008)

Turks and Caicos Islands

defense is the responsibility of the UK

United States Pacific Island Wildlife Refuges defense is the responsibility of the US

Virgin Islands

defense is the responsibility of the US

Wake Island

defense is the responsibility of the US; the US Air

Force is responsible for overall administration and operation of the island facilities; the launch support facility is administered by the US Missile Defense Agency (MDA)

Wallis and Futuna

defense is the responsibility of France

Yemen

a Coast Guard was established in 2002

@2138

Field Listing :: Communications - note

This entry includes miscellaneous communications information of significance not included elsewhere. Country

Communications - note

Afghanistan

Internet access is growing through Internet cafes as well as public "telekiosks" in Kabul (2005)

Bouvet Island

automatic meteorological station

Coral Sea Islands there are automatic weather stations on many of the isles and reefs relaying data to the mainland

French Southern and Antarctic Lands one or more meteorological stations on each possession; note - meteorological station on Tromelin Island (Iles Eparses) is important for forecasting cyclones

Saint Helena, Ascension, and Tristan da Cunha South Africa maintains a meteorological station on Gough Island

@2140

Field Listing :: Government - note

This entry includes miscellaneous government information of significance not included elsewhere. Country

Government - note

French Polynesia

under certain acts of France, French Polynesia has acquired autonomy in all areas except those relating to police and justice, monetary policy, tertiary education, immigration, and defense and foreign affairs; the duties of its president are fashioned after those of the French prime minister

New Zealand

while not an official symbol, the Kiwi, a small native flightless bird, represents New Zealand

Solomon Islands

by the end of 2007, the Regional Assistance Mission to the Solomon Islands (RAMSI) - originally made up of police and troops from Australia, NZ, Fiji, Papua New Guinea, and Tonga - had been scaled back to 303 police officers, 197 civilian technical advisers, and 72 military advisers from 15 countries across the region

Somalia

although an interim government was created in 2004, other regional and local governing bodies continue to exist and control various regions of the country, including the self-declared Republic of Somaliland in northwestern Somalia and the semi-autonomous State of Puntland in northeastern Somalia

Field Listing :: Location

This entry identifies the country's regional location, neighboring countries, and adjacent bodies of water. Country

Location

Afghanistan

Southern Asia, north and west of Pakistan, east of Iran

Akrotiri

Eastern Mediterranean, peninsula on the southwest coast of Cyprus

Albania

Southeastern Europe, bordering the Adriatic Sea and Ionian Sea, between Greece in the south and Montenegro and Kosovo to the north

Algeria

Northern Africa, bordering the Mediterranean Sea, between Morocco and Tunisia

American Samoa

Oceania, group of islands in the South Pacific Ocean, about half way between Hawaii and New Zealand

Andorra

Southwestern Europe, between France and Spain

Angola

Southern Africa, bordering the South Atlantic Ocean, between

Namibia and Democratic Republic of the Congo

Anguilla

Caribbean, islands between the Caribbean Sea and North Atlantic Ocean, east of Puerto Rico

Antarctica

continent mostly south of the Antarctic Circle

Antigua and Barbuda

Caribbean, islands between the Caribbean Sea and the North Atlantic Ocean, east-southeast of Puerto Rico

Arctic Ocean

body of water between Europe, Asia, and North America, mostly north of the Arctic Circle

Argentina

Southern South America, bordering the South Atlantic Ocean, between Chile and Uruguay

Armenia

Southwestern Asia, east of Turkey

Aruba

Caribbean, island in the Caribbean Sea, north of Venezuela

Ashmore and Cartier Islands

Southeastern Asia, islands in the Indian Ocean, midway between northwestern Australia and Timor island

Atlantic Ocean

body of water between Africa, Europe, the Southern Ocean, and the Western Hemisphere

Australia

Oceania, continent between the Indian Ocean and the South Pacific Ocean

Austria

Central Europe, north of Italy and Slovenia

Azerbaijan

Southwestern Asia, bordering the Caspian Sea, between Iran and Russia, with a small European portion north of the Caucasus range

Bahamas, The

Caribbean, chain of islands in the North Atlantic Ocean, southeast of Florida, northeast of Cuba

Bahrain

Middle East, archipelago in the Persian Gulf, east of Saudi Arabia

Bangladesh

Southern Asia, bordering the Bay of Bengal, between Burma and India

Barbados

Caribbean, island in the North Atlantic Ocean, northeast of Venezuela

Belarus

Eastern Europe, east of Poland

Belgium

Western Europe, bordering the North Sea, between France and the Netherlands

Belize

Central America, bordering the Caribbean Sea, between Guatemala and Mexico

Benin

Western Africa, bordering the Bight of Benin, between Nigeria and Togo

Bermuda

North America, group of islands in the North Atlantic Ocean, east of South Carolina (US)

Bhutan

Southern Asia, between China and India

Bolivia

Central South America, southwest of Brazil

Bosnia and Herzegovina

Southeastern Europe, bordering the Adriatic Sea and Croatia

Botswana

Southern Africa, north of South Africa

Bouvet Island

island in the South Atlantic Ocean, southwest of the Cape of Good Hope (South Africa)

Brazil

Eastern South America, bordering the Atlantic Ocean

British Indian Ocean Territory

archipelago in the Indian Ocean, south of India, about halfway between Africa and Indonesia

British Virgin Islands

Caribbean, between the Caribbean Sea and the North Atlantic Ocean, east of Puerto Rico

Brunei

Southeastern Asia, bordering the South China Sea and Malaysia

Bulgaria

Southeastern Europe, bordering the Black Sea, between Romania and Turkey

Burkina Faso

Western Africa, north of Ghana

Burma

Southeastern Asia, bordering the Andaman Sea and the Bay of Bengal, between Bangladesh and Thailand

Burundi

Central Africa, east of Democratic Republic of the Congo

Cambodia

Southeastern Asia, bordering the Gulf of Thailand, between Thailand, Vietnam, and Laos

Cameroon

Western Africa, bordering the Bight of Biafra, between Equatorial Guinea and Nigeria

Canada

Northern North America, bordering the North Atlantic Ocean on the east, North Pacific Ocean on the west, and the Arctic Ocean on the north, north of the conterminous US

Cape Verde

Western Africa, group of islands in the North Atlantic Ocean, west of Senegal

Cayman Islands

Caribbean, three-island group (Grand Cayman, Cayman Brac, Little Cayman) in Caribbean Sea, 240 km south of Cuba and 268 km northwest of Jamaica

Central African Republic

Central Africa, north of Democratic Republic of the Congo

Chad

Central Africa, south of Libya

Chile

Southern South America, bordering the South Pacific Ocean, between Argentina and Peru

China

Eastern Asia, bordering the East China Sea, Korea Bay, Yellow Sea, and South China Sea, between North Korea and Vietnam

Christmas Island

Southeastern Asia, island in the Indian Ocean, south of Indonesia

Clipperton Island

Middle America, atoll in the North Pacific Ocean,

1,120 km southwest of Mexico

Cocos (Keeling) Islands

Southeastern Asia, group of islands in the Indian Ocean, southwest of Indonesia, about halfway from Australia to Sri Lanka

Colombia

Northern South America, bordering the Caribbean Sea, between Panama and Venezuela, and bordering the North Pacific Ocean, between Ecuador and Panama

Comoros

Southern Africa, group of islands at the northern mouth of the Mozambique Channel, about two-thirds of the way between northern Madagascar and northern Mozambique

Congo, Democratic Republic of the

Central Africa, northeast of Angola

Congo, Republic of the

Western Africa, bordering the South Atlantic Ocean, between Angola and Gabon

Cook Islands

Oceania, group of islands in the South Pacific Ocean, about half way between Hawaii and New Zealand

Coral Sea Islands

Oceania, islands in the Coral Sea, northeast of Australia

Costa Rica

Central America, bordering both the Caribbean Sea and the North Pacific Ocean, between Nicaragua and Panama

Cote d'Ivoire

Western Africa, bordering the North Atlantic Ocean, between Ghana and Liberia

Croatia

Southeastern Europe, bordering the Adriatic Sea, between Bosnia and Herzegovina and Slovenia

Cuba

Caribbean, island between the Caribbean Sea and the North

Atlantic Ocean, 150 km south of Key West, Florida

Curacao

Caribbean, an island in the Caribbean Sea - located 56.35 km off the coast of Venezuela

Cyprus

Middle East, island in the Mediterranean Sea, south of Turkey

Czech Republic

Central Europe, between Germany, Poland, Slovakia, and Austria

Denmark

Northern Europe, bordering the Baltic Sea and the North Sea, on a peninsula north of Germany (Jutland); also includes two major islands (Sjaelland and Fyn)

Dhekelia

Eastern Mediterranean, on the southeast coast of Cyprus near Famagusta

Djibouti

Eastern Africa, bordering the Gulf of Aden and the Red Sea, between Eritrea and Somalia

Dominica

Caribbean, island between the Caribbean Sea and the North Atlantic Ocean, about half way between Puerto Rico and Trinidad and Tobago

Dominican Republic

Caribbean, eastern two-thirds of the island of Hispaniola, between the Caribbean Sea and the North Atlantic Ocean, east of Haiti

Ecuador

Western South America, bordering the Pacific Ocean at the Equator, between Colombia and Peru

Egypt

Northern Africa, bordering the Mediterranean Sea, between Libya and the Gaza Strip, and the Red Sea north of Sudan, and includes the Asian Sinai Peninsula

El Salvador

Central America, bordering the North Pacific Ocean,
between Guatemala and Honduras

Equatorial Guinea

Western Africa, bordering the Bight of Biafra,
between Cameroon and Gabon

Eritrea

Eastern Africa, bordering the Red Sea, between Djibouti and
Sudan

Estonia

Eastern Europe, bordering the Baltic Sea and Gulf of
Finland, between Latvia and Russia

Ethiopia

Eastern Africa, west of Somalia

European Union

Europe between the North Atlantic Ocean in the west
and Russia, Belarus, and Ukraine to the east

Falkland Islands (Islas Malvinas)

Southern South America, islands in
the South Atlantic Ocean, east of southern Argentina

Faroe Islands

Northern Europe, island group between the Norwegian
Sea and the North Atlantic Ocean, about half way between Iceland and
Norway

Fiji

Oceania, island group in the South Pacific Ocean, about
two-thirds of the way from Hawaii to New Zealand

Finland

Northern Europe, bordering the Baltic Sea, Gulf of Bothnia,
and Gulf of Finland, between Sweden and Russia

France

metropolitan France: Western Europe, bordering the Bay of
Biscay and English Channel, between Belgium and Spain, southeast of
the UK; bordering the Mediterranean Sea, between Italy and Spain

French Guiana: Northern South America, bordering the North Atlantic
Ocean, between Brazil and Suriname

Guadeloupe: Caribbean, islands between the Caribbean Sea and the

North Atlantic Ocean, southeast of Puerto Rico

Martinique: Caribbean, island between the Caribbean Sea and North Atlantic Ocean, north of Trinidad and Tobago

Reunion: Southern Africa, island in the Indian Ocean, east of Madagascar

French Polynesia

Oceania, archipelagoes in the South Pacific Ocean about half way between South America and Australia

French Southern and Antarctic Lands southeast and east of Africa, islands in the southern Indian Ocean, some near Madagascar and others about equidistant between Africa, Antarctica, and Australia; note - French Southern and Antarctic Lands include Ile Amsterdam, Ile Saint-Paul, Iles Crozet, Iles Kerguelen, Bassas da India, Europa Island, Glorioso Islands, Juan de Nova Island, and Tromelin Island in the southern Indian Ocean, along with the French-claimed sector of Antarctica, "Adelie Land"; the US does not recognize the French claim to "Adelie Land"

Gabon

Western Africa, bordering the Atlantic Ocean at the Equator, between Republic of the Congo and Equatorial Guinea

Gambia, The

Western Africa, bordering the North Atlantic Ocean and Senegal

Gaza Strip

Middle East, bordering the Mediterranean Sea, between Egypt and Israel

Georgia

Southwestern Asia, bordering the Black Sea, between Turkey and Russia, with a sliver of land north of the Caucasus extending into Europe

Germany

Central Europe, bordering the Baltic Sea and the North Sea, between the Netherlands and Poland, south of Denmark

Ghana

Western Africa, bordering the Gulf of Guinea, between Cote d'Ivoire and Togo

Gibraltar

Southwestern Europe, bordering the Strait of Gibraltar, which links the Mediterranean Sea and the North Atlantic Ocean, on the southern coast of Spain

Greece

Southern Europe, bordering the Aegean Sea, Ionian Sea, and the Mediterranean Sea, between Albania and Turkey

Greenland

Northern North America, island between the Arctic Ocean and the North Atlantic Ocean, northeast of Canada

Grenada

Caribbean, island between the Caribbean Sea and Atlantic Ocean, north of Trinidad and Tobago

Guam

Oceania, island in the North Pacific Ocean, about three-quarters of the way from Hawaii to the Philippines

Guatemala

Central America, bordering the North Pacific Ocean, between El Salvador and Mexico, and bordering the Gulf of Honduras (Caribbean Sea) between Honduras and Belize

Guernsey

Western Europe, islands in the English Channel, northwest of France

Guinea

Western Africa, bordering the North Atlantic Ocean, between Guinea-Bissau and Sierra Leone

Guinea-Bissau

Western Africa, bordering the North Atlantic Ocean, between Guinea and Senegal

Guyana

Northern South America, bordering the North Atlantic Ocean, between Suriname and Venezuela

Haiti

Caribbean, western one-third of the island of Hispaniola, between the Caribbean Sea and the North Atlantic Ocean, west of the Dominican Republic

Heard Island and McDonald Islands

islands in the Indian Ocean, about two-thirds of the way from Madagascar to Antarctica

Holy See (Vatican City)

Southern Europe, an enclave of Rome (Italy)

Honduras

Central America, bordering the Caribbean Sea, between Guatemala and Nicaragua and bordering the Gulf of Fonseca (North Pacific Ocean), between El Salvador and Nicaragua

Hong Kong

Eastern Asia, bordering the South China Sea and China

Hungary

Central Europe, northwest of Romania

Iceland

Northern Europe, island between the Greenland Sea and the North Atlantic Ocean, northwest of the United Kingdom

India

Southern Asia, bordering the Arabian Sea and the Bay of Bengal, between Burma and Pakistan

Indian Ocean

body of water between Africa, the Southern Ocean, Asia, and Australia

Indonesia

Southeastern Asia, archipelago between the Indian Ocean and the Pacific Ocean

Iran

Middle East, bordering the Gulf of Oman, the Persian Gulf, and the Caspian Sea, between Iraq and Pakistan

Iraq

Middle East, bordering the Persian Gulf, between Iran and Kuwait

Ireland

Western Europe, occupying five-sixths of the island of Ireland in the North Atlantic Ocean, west of Great Britain

Isle of Man

Western Europe, island in the Irish Sea, between Great Britain and Ireland

Israel

Middle East, bordering the Mediterranean Sea, between Egypt

and Lebanon

Italy

Southern Europe, a peninsula extending into the central Mediterranean Sea, northeast of Tunisia

Jamaica

Caribbean, island in the Caribbean Sea, south of Cuba

Jan Mayen

Northern Europe, island between the Greenland Sea and the Norwegian Sea, northeast of Iceland

Japan

Eastern Asia, island chain between the North Pacific Ocean and the Sea of Japan, east of the Korean Peninsula

Jersey

Western Europe, island in the English Channel, northwest of France

Jordan

Middle East, northwest of Saudi Arabia

Kazakhstan

Central Asia, northwest of China; a small portion west of the Ural (Zhayyq) River in eastern-most Europe

Kenya

Eastern Africa, bordering the Indian Ocean, between Somalia and Tanzania

Kiribati

Oceania, group of 33 coral atolls in the Pacific Ocean, straddling the Equator; the capital Tarawa is about half way between Hawaii and Australia; note - on 1 January 1995, Kiribati proclaimed that all of its territory was in the same time zone as its Gilbert Islands group (UTC +12) even though the Phoenix Islands and the Line Islands under its jurisdiction were on the other side of the International Date Line

Korea, North

Eastern Asia, northern half of the Korean Peninsula bordering the Korea Bay and the Sea of Japan, between China and South Korea

Korea, South

Eastern Asia, southern half of the Korean Peninsula
bordering the Sea of Japan and the Yellow Sea

Kosovo

Southeast Europe, between Serbia and Macedonia

Kuwait

Middle East, bordering the Persian Gulf, between Iraq and
Saudi Arabia

Kyrgyzstan

Central Asia, west of China

Laos

Southeastern Asia, northeast of Thailand, west of Vietnam

Latvia

Eastern Europe, bordering the Baltic Sea, between Estonia and
Lithuania

Lebanon

Middle East, bordering the Mediterranean Sea, between Israel
and Syria

Lesotho

Southern Africa, an enclave of South Africa

Liberia

Western Africa, bordering the North Atlantic Ocean, between
Cote d'Ivoire and Sierra Leone

Libya

Northern Africa, bordering the Mediterranean Sea, between
Egypt and Tunisia

Liechtenstein

Central Europe, between Austria and Switzerland

Lithuania

Eastern Europe, bordering the Baltic Sea, between Latvia
and Russia

Luxembourg

Western Europe, between France and Germany

Macau

Eastern Asia, bordering the South China Sea and China

Macedonia

Southeastern Europe, north of Greece

Madagascar

Southern Africa, island in the Indian Ocean, east of Mozambique

Malawi

Southern Africa, east of Zambia

Malaysia

Southeastern Asia, peninsula bordering Thailand and northern one-third of the island of Borneo, bordering Indonesia, Brunei, and the South China Sea, south of Vietnam

Maldives

Southern Asia, group of atolls in the Indian Ocean, south-southwest of India

Mali

Western Africa, southwest of Algeria

Malta

Southern Europe, islands in the Mediterranean Sea, south of Sicily (Italy)

Marshall Islands

Oceania, two archipelagic island chains of 29 atolls, each made up of many small islets, and five single islands in the North Pacific Ocean, about half way between Hawaii and Australia

Mauritania

Northern Africa, bordering the North Atlantic Ocean, between Senegal and Western Sahara

Mauritius

Southern Africa, island in the Indian Ocean, east of Madagascar

Mayotte

Southern Indian Ocean, island in the Mozambique Channel, about half way between northern Madagascar and northern Mozambique

Mexico

Middle America, bordering the Caribbean Sea and the Gulf of Mexico, between Belize and the United States and bordering the North Pacific Ocean, between Guatemala and the United States

Micronesia, Federated States of
Oceania, island group in the North Pacific Ocean, about three-quarters of the way from Hawaii to Indonesia

Moldova
Eastern Europe, northeast of Romania

Monaco
Western Europe, bordering the Mediterranean Sea on the southern coast of France, near the border with Italy

Mongolia
Northern Asia, between China and Russia

Montenegro
Southeastern Europe, between the Adriatic Sea and Serbia

Montserrat
Caribbean, island in the Caribbean Sea, southeast of Puerto Rico

Morocco
Northern Africa, bordering the North Atlantic Ocean and the Mediterranean Sea, between Algeria and Western Sahara

Mozambique
Southeastern Africa, bordering the Mozambique Channel, between South Africa and Tanzania

Namibia
Southern Africa, bordering the South Atlantic Ocean, between Angola and South Africa

Nauru
Oceania, island in the South Pacific Ocean, south of the Marshall Islands

Navassa Island
Caribbean, island in the Caribbean Sea, 35 miles west of Tiburon Peninsula of Haiti

Nepal

Southern Asia, between China and India

Netherlands

Western Europe, bordering the North Sea, between Belgium and Germany

New Caledonia

Oceania, islands in the South Pacific Ocean, east of Australia

New Zealand

Oceania, islands in the South Pacific Ocean, southeast of Australia

Nicaragua

Central America, bordering both the Caribbean Sea and the North Pacific Ocean, between Costa Rica and Honduras

Niger

Western Africa, southeast of Algeria

Nigeria

Western Africa, bordering the Gulf of Guinea, between Benin and Cameroon

Niue

Oceania, island in the South Pacific Ocean, east of Tonga

Norfolk Island

Oceania, island in the South Pacific Ocean, east of Australia

Northern Mariana Islands

Oceania, islands in the North Pacific

Ocean, about three-quarters of the way from Hawaii to the Philippines

Norway

Northern Europe, bordering the North Sea and the North Atlantic Ocean, west of Sweden

Oman

Middle East, bordering the Arabian Sea, Gulf of Oman, and Persian Gulf, between Yemen and UAE

Pacific Ocean

body of water between the Southern Ocean, Asia,

Australia, and the Western Hemisphere

Pakistan

Southern Asia, bordering the Arabian Sea, between India on the east and Iran and Afghanistan on the west and China in the north

Palau

Oceania, group of islands in the North Pacific Ocean, southeast of the Philippines

Panama

Central America, bordering both the Caribbean Sea and the North Pacific Ocean, between Colombia and Costa Rica

Papua New Guinea

Oceania, group of islands including the eastern half of the island of New Guinea between the Coral Sea and the South Pacific Ocean, east of Indonesia

Paracel Islands

Southeastern Asia, group of small islands and reefs in the South China Sea, about one-third of the way from central Vietnam to the northern Philippines

Paraguay

Central South America, northeast of Argentina

Peru

Western South America, bordering the South Pacific Ocean, between Chile and Ecuador

Philippines

Southeastern Asia, archipelago between the Philippine Sea and the South China Sea, east of Vietnam

Pitcairn Islands

Oceania, islands in the South Pacific Ocean, about midway between Peru and New Zealand

Poland

Central Europe, east of Germany

Portugal

Southwestern Europe, bordering the North Atlantic Ocean, west of Spain

Puerto Rico

Caribbean, island between the Caribbean Sea and the North Atlantic Ocean, east of the Dominican Republic

Qatar

Middle East, peninsula bordering the Persian Gulf and Saudi Arabia

Romania

Southeastern Europe, bordering the Black Sea, between Bulgaria and Ukraine

Russia

Northern Asia (the area west of the Urals is considered part of Europe), bordering the Arctic Ocean, between Europe and the North Pacific Ocean

Rwanda

Central Africa, east of Democratic Republic of the Congo

Saint Barthelemy

located approximately 125 miles northwest of Guadeloupe

Saint Helena, Ascension, and Tristan da Cunha

islands in the South

Atlantic Ocean, about midway between South America and Africa; Ascension Island lies 700 nm northwest of Saint Helena; Tristan da Cunha lies 2,300 nm southwest of Saint Helena

Saint Kitts and Nevis

Caribbean, islands in the Caribbean Sea, about one-third of the way from Puerto Rico to Trinidad and Tobago

Saint Lucia

Caribbean, island between the Caribbean Sea and North Atlantic Ocean, north of Trinidad and Tobago

Saint Martin

island 300 km southeast of Puerto Rico

Saint Pierre and Miquelon

Northern North America, islands in the North Atlantic Ocean, south of Newfoundland (Canada)

Saint Vincent and the Grenadines

Caribbean, islands between the
Caribbean Sea and North Atlantic Ocean, north of Trinidad and Tobago

Samoa

Oceania, group of islands in the South Pacific Ocean, about
half way between Hawaii and New Zealand

San Marino

Southern Europe, an enclave in central Italy

Sao Tome and Principe

Western Africa, islands in the Gulf of Guinea,
straddling the Equator, west of Gabon

Saudi Arabia

Middle East, bordering the Persian Gulf and the Red
Sea, north of Yemen

Senegal

Western Africa, bordering the North Atlantic Ocean, between
Guinea-Bissau and Mauritania

Serbia

Southeastern Europe, between Macedonia and Hungary

Seychelles

archipelago in the Indian Ocean, northeast of Madagascar

Sierra Leone

Western Africa, bordering the North Atlantic Ocean,
between Guinea and Liberia

Singapore

Southeastern Asia, islands between Malaysia and Indonesia

Sint Maarten

Caribbean, located in the Leeward Islands (northern)
group; Dutch part of the island of Saint Martin in the Caribbean
Sea; Sint Maarten lies east of the US Virgin Islands

Slovakia

Central Europe, south of Poland

Slovenia

Central Europe, eastern Alps bordering the Adriatic Sea,
between Austria and Croatia

Solomon Islands

Oceania, group of islands in the South Pacific

Ocean, east of Papua New Guinea

Somalia

Eastern Africa, bordering the Gulf of Aden and the Indian

Ocean, east of Ethiopia

South Africa

Southern Africa, at the southern tip of the continent
of Africa

South Georgia and South Sandwich Islands

Southern South America,

islands in the South Atlantic Ocean, east of the tip of South America

Southern Ocean

body of water between 60 degrees south latitude and
Antarctica

Spain

Southwestern Europe, bordering the Bay of Biscay,

Mediterranean Sea, North Atlantic Ocean, and Pyrenees Mountains,
southwest of France

Spratly Islands

Southeastern Asia, group of reefs and islands in the

South China Sea, about two-thirds of the way from southern Vietnam
to the southern Philippines

Sri Lanka

Southern Asia, island in the Indian Ocean, south of India

Sudan

Northern Africa, bordering the Red Sea, between Egypt and

Eritrea

Suriname

Northern South America, bordering the North Atlantic Ocean,

between French Guiana and Guyana

Svalbard

Northern Europe, islands between the Arctic Ocean, Barents

Sea, Greenland Sea, and Norwegian Sea, north of Norway

Swaziland

Southern Africa, between Mozambique and South Africa

Sweden

Northern Europe, bordering the Baltic Sea, Gulf of Bothnia, Kattegat, and Skagerrak, between Finland and Norway

Switzerland

Central Europe, east of France, north of Italy

Syria

Middle East, bordering the Mediterranean Sea, between Lebanon and Turkey

Taiwan

Eastern Asia, islands bordering the East China Sea, Philippine Sea, South China Sea, and Taiwan Strait, north of the Philippines, off the southeastern coast of China

Tajikistan

Central Asia, west of China

Tanzania

Eastern Africa, bordering the Indian Ocean, between Kenya and Mozambique

Thailand

Southeastern Asia, bordering the Andaman Sea and the Gulf of Thailand, southeast of Burma

Timor-Leste

Southeastern Asia, northwest of Australia in the Lesser Sunda Islands at the eastern end of the Indonesian archipelago; note - Timor-Leste includes the eastern half of the island of Timor, the Oecussi (Ambeno) region on the northwest portion of the island of Timor, and the islands of Pulau Atauro and Pulau Jaco

Togo

Western Africa, bordering the Bight of Benin, between Benin and Ghana

Tokelau

Oceania, group of three atolls in the South Pacific Ocean, about one-half of the way from Hawaii to New Zealand

Tonga

Oceania, archipelago in the South Pacific Ocean, about

two-thirds of the way from Hawaii to New Zealand

Trinidad and Tobago

Caribbean, islands between the Caribbean Sea and the North Atlantic Ocean, northeast of Venezuela

Tunisia

Northern Africa, bordering the Mediterranean Sea, between Algeria and Libya

Turkey

Southeastern Europe and Southwestern Asia (that portion of Turkey west of the Bosphorus is geographically part of Europe), bordering the Black Sea, between Bulgaria and Georgia, and bordering the Aegean Sea and the Mediterranean Sea, between Greece and Syria

Turkmenistan

Central Asia, bordering the Caspian Sea, between Iran and Kazakhstan

Turks and Caicos Islands

Caribbean, two island groups in the North Atlantic Ocean, southeast of The Bahamas, north of Haiti

Tuvalu

Oceania, island group consisting of nine coral atolls in the South Pacific Ocean, about one-half of the way from Hawaii to Australia

Uganda

Eastern Africa, west of Kenya

Ukraine

Eastern Europe, bordering the Black Sea, between Poland, Romania, and Moldova in the west and Russia in the east

United Arab Emirates

Middle East, bordering the Gulf of Oman and the Persian Gulf, between Oman and Saudi Arabia

United Kingdom

Western Europe, islands including the northern one-sixth of the island of Ireland between the North Atlantic Ocean and the North Sea, northwest of France

United States

North America, bordering both the North Atlantic Ocean and the North Pacific Ocean, between Canada and Mexico

United States Pacific Island Wildlife Refuges

Oceania

Baker Island: atoll in the North Pacific Ocean 1,830 nm (3,389 km) southwest of Honolulu, about half way between Hawaii and Australia

Howland Island: island in the North Pacific Ocean 1,815 nm (3,361 km) southwest of Honolulu, about half way between Hawaii and Australia

Jarvis Island: island in the South Pacific Ocean 1,305 nm (2,417 km) south of Honolulu, about half way between Hawaii and Cook Islands

Johnston Atoll: atoll in the North Pacific Ocean 717 nm (1,328 km) southwest of Honolulu, about one-third of the way from Hawaii to the Marshall Islands

Kingman Reef: reef in the North Pacific Ocean 930 nm (1,722 km) south of Honolulu, about half way between Hawaii and American Samoa

Midway Islands: atoll in the North Pacific Ocean 1,260 nm (2,334 km) northwest of Honolulu near the end of the Hawaiian Archipelago, about one-third of the way from Honolulu to Tokyo

Palmyra Atoll: atoll in the North Pacific Ocean 960 nm (1,778 km) south of Honolulu, about half way between Hawaii and American Samoa

Uruguay

Southern South America, bordering the South Atlantic Ocean, between Argentina and Brazil

Uzbekistan

Central Asia, north of Afghanistan

Vanuatu

Oceania, group of islands in the South Pacific Ocean, about three-quarters of the way from Hawaii to Australia

Venezuela

Northern South America, bordering the Caribbean Sea and the North Atlantic Ocean, between Colombia and Guyana

Vietnam

Southeastern Asia, bordering the Gulf of Thailand, Gulf of Tonkin, and South China Sea, alongside China, Laos, and Cambodia

Virgin Islands

Caribbean, islands between the Caribbean Sea and the North Atlantic Ocean, east of Puerto Rico

Wake Island

Oceania, atoll in the North Pacific Ocean, about two-thirds of the way from Hawaii to the Northern Mariana Islands

Wallis and Futuna

Oceania, islands in the South Pacific Ocean, about two-thirds of the way from Hawaii to New Zealand

West Bank

Middle East, west of Jordan

Western Sahara

Northern Africa, bordering the North Atlantic Ocean, between Mauritania and Morocco

Yemen

Middle East, bordering the Arabian Sea, Gulf of Aden, and Red Sea, between Oman and Saudi Arabia

Zambia

Southern Africa, east of Angola

Zimbabwe

Southern Africa, between South Africa and Zambia

Field Listing :: Area

This entry includes three subfields. Total area is the sum of all land and water areas delimited by international boundaries and/or coastlines. Land area is the aggregate of all surfaces delimited by international boundaries and/or coastlines, excluding inland water bodies (lakes, reservoirs, rivers). Water area is the sum of the surfaces of all inland water bodies, such as lakes, reservoirs, or rivers, as delimited by international boundaries and/or coastlines. Country Comparison to the World Country

Area(sq km)

Afghanistan total: 652,230 sq km land: 652,230 sq km water: 0 sq km

Akrotiri total: 123 sq km note: includes a salt lake and wetlands

Albania

total: 28,748 sq km

land: 27,398 sq km

water: 1,350 sq km

Algeria

total: 2,381,741 sq km

land: 2,381,741 sq km

water: 0 sq km

American Samoa total: 199 sq km land: 199 sq km water: 0 sq km note: includes Rose Island and Swains Island

Andorra

total: 468 sq km

land: 468 sq km

water: 0 sq km

Angola

total: 1,246,700 sq km

land: 1,246,700 sq km

water: 0 sq km

Anguilla

total: 91 sq km

land: 91 sq km

water: 0 sq km

Antarctica

total: 14 million sq km

land: 14 million sq km (280,000 sq km ice-free, 13.72 million sq km ice-covered) (est.)

note: fifth-largest continent, following Asia, Africa, North America, and South America, but larger than Australia and the subcontinent of Europe

Antigua and Barbuda total: 442.6 sq km (Antigua 280 sq km; Barbuda 161 sq km) land: 442.6 sq km water: 0 sq km note: includes Redonda, 1.6 sq km

Arctic Ocean

total: 14.056 million sq km

note: includes Baffin Bay, Barents Sea, Beaufort Sea, Chukchi Sea, East Siberian Sea, Greenland Sea, Hudson Bay, Hudson Strait, Kara Sea, Laptev Sea, Northwest Passage, and other tributary water bodies

Argentina

total: 2,780,400 sq km

land: 2,736,690 sq km

water: 43,710 sq km

Armenia

total: 29,743 sq km

land: 28,203 sq km

water: 1,540 sq km

Aruba

total: 180 sq km

land: 180 sq km

water: 0 sq km

Ashmore and Cartier Islands

total: 5 sq km

land: 5 sq km

water: 0 sq km

note: includes Ashmore Reef (West, Middle, and East Islets) and Cartier Island

Atlantic Ocean

total: 76.762 million sq km

note: includes Baltic Sea, Black Sea, Caribbean Sea, Davis Strait, Denmark Strait, part of the Drake Passage, Gulf of Mexico, Labrador Sea, Mediterranean Sea, North Sea, Norwegian Sea, almost all of the Scotia Sea, and other tributary water bodies

Australia

total: 7,741,220 sq km

land: 7,682,300 sq km

water: 58,920 sq km

note: includes Lord Howe Island and Macquarie Island

Austria

total: 83,871 sq km

land: 82,445 sq km

water: 1,426 sq km

Azerbaijan

total: 86,600 sq km

land: 82,629 sq km

water: 3,971 sq km

note: includes the exclave of Naxcivan Autonomous Republic and the Nagorno-Karabakh region; the region's autonomy was abolished by Azerbaijani Supreme Soviet on 26 November 1991

Bahamas, The

total: 13,880 sq km

land: 10,010 sq km

water: 3,870 sq km

Bahrain

total: 760 sq km

land: 760 sq km

water: 0 sq km

Bangladesh

total: 143,998 sq km

land: 130,168 sq km

water: 13,830 sq km

Barbados

total: 430 sq km

land: 430 sq km

water: 0 sq km

Belarus

total: 207,600 sq km

land: 202,900 sq km

water: 4,700 sq km

Belgium

total: 30,528 sq km

land: 30,278 sq km

water: 250 sq km

Belize

total: 22,966 sq km

land: 22,806 sq km

water: 160 sq km

Benin

total: 112,622 sq km

land: 110,622 sq km

water: 2,000 sq km

Bermuda

total: 54 sq km

land: 54 sq km

water: 0 sq km

Bhutan

total: 38,394 sq km

land: 38,394 sq km

water: 0 sq km

Bolivia

total: 1,098,581 sq km

land: 1,083,301 sq km

water: 15,280 sq km

Bosnia and Herzegovina

total: 51,197 sq km

land: 51,187 sq km

water: 10 sq km

Botswana

total: 581,730 sq km

land: 566,730 sq km

water: 15,000 sq km

Bouvet Island

total: 49 sq km

land: 49 sq km

water: 0 sq km

Brazil

total: 8,514,877 sq km

land: 8,459,417 sq km

water: 55,460 sq km

note: includes Arquipelago de Fernando de Noronha, Atol das Rocas, Ilha da Trindade, Ilhas Martin Vaz, and Penedos de Sao Pedro e Sao Paulo

British Indian Ocean Territory total: 54,400 sq km land: 60 sq km; Diego Garcia 44 sq km water: 54,340 sq km note: includes the entire Chagos Archipelago of 55 islands

British Virgin Islands

total: 151 sq km

land: 151 sq km

water: 0 sq km

note: comprised of 16 inhabited and more than 20 uninhabited islands; includes the islands of Tortola, Anegada, Virgin Gorda, Jost van Dyke

Brunei

total: 5,765 sq km

land: 5,265 sq km

water: 500 sq km

Bulgaria

total: 110,879 sq km

land: 108,489 sq km

water: 2,390 sq km

Burkina Faso

total: 274,200 sq km

land: 273,800 sq km

water: 400 sq km

Burma

total: 676,578 sq km

land: 653,508 sq km

water: 23,070 sq km

Burundi

total: 27,830 sq km

land: 25,680 sq km

water: 2,150 sq km

Cambodia

total: 181,035 sq km

land: 176,515 sq km

water: 4,520 sq km

Cameroon

total: 475,440 sq km

land: 472,710 sq km

water: 2,730 sq km

Canada

total: 9,984,670 sq km

land: 9,093,507 sq km

water: 891,163 sq km

Cape Verde

total: 4,033 sq km

land: 4,033 sq km

water: 0 sq km

Cayman Islands

total: 264 sq km

land: 264 sq km

water: 0 sq km

Central African Republic

total: 622,984 sq km

land: 622,984 sq km

water: 0 sq km

Chad

total: 1.284 million sq km

land: 1,259,200 sq km

water: 24,800 sq km

Chile

total: 756,102 sq km

land: 743,812 sq km

water: 12,290 sq km

note: includes Easter Island (Isla de Pascua) and Isla Sala y Gomez

China

total: 9,596,961 sq km

land: 9,569,901 sq km

water: 27,060 sq km

Christmas Island

total: 135 sq km

land: 135 sq km

water: 0 sq km

Clipperton Island

total: 6 sq km

land: 6 sq km

water: 0 sq km

Cocos (Keeling) Islands

total: 14 sq km

land: 14 sq km

water: 0 sq km

note: includes the two main islands of West Island and Home Island

Colombia

total: 1,138,910 sq km

land: 1,038,700 sq km

water: 100,210 sq km

note: includes Isla de Malpelo, Roncador Cay, and Serrana Bank

Comoros

total: 2,235 sq km

land: 2,235 sq km

water: 0 sq km

Congo, Democratic Republic of the

total: 2,344,858 sq km

land: 2,267,048 sq km

water: 77,810 sq km

Congo, Republic of the

total: 342,000 sq km

land: 341,500 sq km

water: 500 sq km

Cook Islands

total: 236 sq km

land: 236 sq km

water: 0 sq km

Coral Sea Islands total: less than 3 sq km land: less than 3 sq km water: 0 sq km note: includes numerous small islands and reefs scattered over a sea area of about 780,000 sq km with the Willis Islets the most important

Costa Rica total: 51,100 sq km land: 51,060 sq km water: 40 sq km note: includes Isla del Coco

Cote d'Ivoire

total: 322,463 sq km

land: 318,003 sq km

water: 4,460 sq km

Croatia

total: 56,594 sq km

land: 55,974 sq km

water: 620 sq km

Cuba

total: 110,860 sq km

land: 109,820 sq km

water: 1,040 sq km

Curacao

total: 444 sq km

land: 444 sq km

water: 0 sq km

Cyprus

total: 9,251 sq km (of which 3,355 sq km are in north Cyprus)

land: 9,241 sq km

water: 10 sq km

Czech Republic

total: 78,867 sq km

land: 77,247 sq km

water: 1,620 sq km

Denmark

total: 43,094 sq km

land: 42,434 sq km

water: 660 sq km

note: includes the island of Bornholm in the Baltic Sea and the rest of metropolitan Denmark (the Jutland Peninsula, and the major islands of Sjaelland and Fyn), but excludes the Faroe Islands and Greenland

Dhekelia

total: 130.8 sq km

note: area surrounds three Cypriot enclaves

total: 23,200 sq km

land: 23,180 sq km

water: 20 sq km

Dominica

total: 751 sq km

land: 751 sq km

water: 0 sq km

Dominican Republic

total: 48,670 sq km

land: 48,320 sq km

water: 350 sq km

Ecuador

total: 283,561 sq km

land: 276,841 sq km

water: 6,720 sq km

note: includes Galapagos Islands

Egypt

total: 1,001,450 sq km

land: 995,450 sq km

water: 6,000 sq km

El Salvador

total: 21,041 sq km

land: 20,721 sq km

water: 320 sq km

Equatorial Guinea

total: 28,051 sq km

land: 28,051 sq km

water: 0 sq km

Eritrea

total: 117,600 sq km

land: 101,000 sq km

water: 16,600 sq km

Estonia

total: 45,228 sq km

land: 42,388 sq km

water: 2,840 sq km

note: includes 1,520 islands in the Baltic Sea

Ethiopia

total: 1,104,300 sq km

land: 1 million sq km

water: 104,300 sq km

European Union

total: 4,324,782 sq km

Falkland Islands (Islas Malvinas) total: 12,173 sq km land: 12,173 sq km water: 0 sq km note: includes the two main islands of East and West Falkland and about 200 small islands

Faroe Islands

total: 1,393 sq km

land: 1,393 sq km

water: 0 sq km (some lakes and streams)

Fiji

total: 18,274 sq km

land: 18,274 sq km

water: 0 sq km

Finland

total: 338,145 sq km

land: 303,815 sq km

water: 34,330 sq km

France

total: 643,427 sq km; 551,500 sq km (metropolitan France)

land: 640,053 sq km; 549,970 sq km (metropolitan France)

water: 3,374 sq km; 1,530 sq km (metropolitan France)

note: the first numbers include the overseas regions of French Guiana, Guadeloupe, Martinique, and Reunion

French Polynesia total: 4,167 sq km (118 islands and atolls) land: 3,827 sq km water: 340 sq km

French Southern and Antarctic Lands

Ile Amsterdam (Ile Amsterdam et

Ile Saint-Paul): total - 55 sq km; land - 55 sq km; water - 0 sq km

Ile Saint-Paul (Ile Amsterdam et Ile Saint-Paul): total - 7 sq km;

land - 7 sq km; water - 0 sq km

Iles Crozet: total - 352 sq km; land - 352 sq km; water - 0 sq km

Iles Kerguelen: total - 7,215 sq km; land - 7,215 sq km; water - 0 sq km

Bassas da India (Iles Eparses): total - 80 sq km; land - 0.2 sq km; water - 79.8 sq km (lagoon)

Europa Island (Iles Eparses): total - 28 sq km; land - 28 sq km; water - 0 sq km

Glorioso Islands (Iles Eparses): total - 5 sq km; land - 5 sq km; water - 0 sq km

Juan de Nova Island (Iles Eparses): total - 4.4 sq km; land - 4.4 sq km; water - 0 sq km

Tromelin Island (Iles Eparses): total - 1 sq km; land - 1 sq km;
water - 0 sq km
note: excludes "Adelie Land" claim of about 500,000 sq km in
Antarctica that is not recognized by the US

Gabon
total: 267,667 sq km

Field Listing :: Diplomatic representation in the US

This entry includes the chief of mission, chancery, telephone, FAX, consulate general locations, and consulate locations. Country

Diplomatic representation in the US

Afghanistan

chief of mission: Ambassador (vacant); Charge d'Affaires

Khojesta F. EBRAHIMKHEL

chancery: 2341 Wyoming Avenue NW, Washington, DC 20008

telephone: [1] (202) 483-6410

FAX: [1] (202) 483-6488

consulate(s) general: Los Angeles, New York

Akrotiri

none (overseas territory of the UK)

Albania

chief of mission: Ambassador Gilbert GALANXHI

chancery: 2100 S Street NW, Washington, DC 20008

telephone: [1] (202) 223-4942

FAX: [1] (202) 628-7342

consulate(s) general: New York

Algeria

chief of mission: Ambassador Abdallah BAALI

chancery: 2118 Kalorama Road NW, Washington, DC 20008

telephone: [1] (202) 265-2800

FAX: [1] (202) 667-2174

American Samoa

none (territory of the US)

Andorra

chief of mission: Ambassador Narcis CASAL Fonsdeviela

chancery: 2 United Nations Plaza, 27th Floor, New York, NY 10017

telephone: [1] (212) 750-8064

FAX: [1] (212) 750-6630

Angola

chief of mission: Ambassador Josefina Perpetua Pitra DIAKITE

chancery: 2108 16th Street NW, Washington, DC 20009

telephone: [1] (202) 785-1156

FAX: [1] (202) 785-1258

consulate(s) general: Houston, New York

Anguilla

none (overseas territory of the UK)

Antigua and Barbuda chief of mission: Ambassador Deborah Mae LOVELL chancery: 3216 New

Mexico Avenue NW, Washington, DC 20016 telephone: [1] (202) 362-5122 FAX: [1] (202) 362-5225 consulate(s) general: Miami, New York

Argentina

chief of mission: Ambassador (vacant)
chancery: 1600 New Hampshire Avenue NW, Washington, DC 20009
telephone: [1] (202) 238-6400
FAX: [1] (202) 332-3171
consulate(s) general: Atlanta, Chicago, Houston, Los Angeles, Miami, New York

Armenia

chief of mission: Ambassador Tatoul MARKARIAN
chancery: 2225 R Street NW, Washington, DC 20008
telephone: [1] (202) 319-1976
FAX: [1] (202) 319-2982
consulate(s) general: Los Angeles

Aruba

none (represented by the Kingdom of the Netherlands); note -
Mr. Henry BAARH, Minister Plenipotentiary for Aruba at the Embassy
of the Kingdom of the Netherlands

Ashmore and Cartier Islands

none (territory of Australia)

Australia

chief of mission: Ambassador Kim Christian BEAZLEY
chancery: 1601 Massachusetts Avenue NW, Washington, DC 20036
telephone: [1] (202) 797-3000
FAX: [1] (202) 797-3168
consulate(s) general: Atlanta, Chicago, Honolulu, Los Angeles, New York, San Francisco

Austria

chief of mission: Ambassador Christian PROSL
chancery: 3524 International Court NW, Washington, DC 20008-3035
telephone: [1] (202) 895-6700
FAX: [1] (202) 895-6750
consulate(s) general: Chicago, Los Angeles, New York

Azerbaijan

chief of mission: Ambassador Yashar ALIYEV
chancery: 2741 34th Street NW, Washington, DC 20008
telephone: [1] (202) 337-3500
FAX: [1] (202) 337-5911

Consulate(s) general: Los Angeles

Bahamas, The

chief of mission: Ambassador Cornelius A. SMITH
chancery: 2220 Massachusetts Avenue NW, Washington, DC 20008
telephone: [1] (202) 319-2660
FAX: [1] (202) 319-2668
consulate(s) general: Miami, New York

Bahrain

chief of mission: Ambassador Huda Azra Ibrahim NUNU

Field Listing :: Distribution of family income - Gini index

This index measures the degree of inequality in the distribution of family income in a country. The index is calculated from the Lorenz curve, in which cumulative family income is plotted against the number of families arranged from the poorest to the richest. The index is the ratio of (a) the area between a country's Lorenz curve and the 45 degree helping line to (b) the entire triangular area under the 45 degree line. The more nearly equal a country's income distribution, the closer its Lorenz curve to the 45 degree line and the lower its Gini index, e.g., a Scandinavian country with an index of 25. The more unequal a country's income distribution, the farther its Lorenz curve from the 45 degree line and the higher its Gini index, e.g., a Sub-Saharan country with an index of 50. If income were distributed with perfect equality, the Lorenz curve would coincide with the 45 degree line and the index would be zero; if income were distributed with perfect inequality, the Lorenz curve would coincide with the horizontal axis and the right vertical axis and the index would be 100.

Field Listing :: Oil - consumption

This entry is the total oil consumed in barrels per day (bbl/day). The discrepancy between the amount of oil produced and/or imported and the amount consumed and/or exported is due to the

omission of stock changes, refinery gains, and other complicating factors. Country Comparison to the World Country

Field Listing :: Median age

This entry is the age that divides a population into two numerically equal groups; that is, half the people are younger than this age and half are older. It is a single index that summarizes the age distribution of a population. Currently, the median age ranges from a low of about 15 in Uganda and Gaza Strip to 40 or more in several European countries and Japan. See the entry for "Age structure" for the importance of a young versus an older age structure and, by implication, a low versus a higher median age. Country

Median age(years)

Field Listing :: Natural gas - production

This entry is the total natural gas produced in cubic meters (cu m). The discrepancy between the amount of natural gas produced and/or imported and the amount consumed and/or exported is due to the omission of stock changes and other complicating factors. Country Comparison to the World Country

Field Listing :: Internet hosts

This entry lists the number of Internet hosts available within a country. An Internet host is a computer connected directly to the Internet; normally an Internet Service Provider's (ISP) computer is a host. Internet users may use either a hard-wired terminal, at an institution with a mainframe computer connected directly to the

Internet, or may connect remotely by way of a modem via telephone line, cable, or satellite to the Internet Service Provider's host computer. The number of hosts is one indicator of the extent of Internet connectivity.

Field Listing :: Investment (gross fixed)

This entry records total business spending on fixed assets, such as factories, machinery, equipment, dwellings, and inventories of raw materials, which provide the basis for future production. It is measured gross of the depreciation of the assets, i.e., it includes investment that merely replaces worn-out or scrapped capital. Country Comparison to the World Country

Field Listing :: Public debt

This entry records the cumulative total of all government borrowings less repayments that are denominated in a country's home currency. Public debt should not be confused with external debt, which reflects the foreign currency liabilities of both the private and public sector and must be financed out of foreign exchange earnings. Country Comparison to the World Country

Field Listing :: Current account balance

This entry records a country's net trade in goods and services, plus net earnings from rents, interest, profits, and dividends, and net transfer payments (such as pension funds and worker remittances) to and from the rest of the world during the period specified. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms. Country Comparison to the World Country

Field Listing :: Reserves of foreign exchange and gold

This entry gives the dollar value for the stock of all financial assets that are available to the central monetary authority for use in meeting a country's balance of payments needs as of the end-date of the period specified. This category includes not only foreign currency and gold, but also a country's holdings of Special Drawing Rights in the International Monetary Fund, and its reserve position in the Fund.

Preliminary statement

European Union

The evolution of the European Union (EU) from a regional economic agreement among six neighboring states in 1951 to today's supranational organization of 27 countries across the European continent stands as an unprecedented phenomenon in the annals of history. Dynastic unions for territorial consolidation were long the norm in Europe. On a few occasions even country-level unions were arranged - the Polish-Lithuanian Commonwealth and the Austro-Hungarian Empire were examples - but for such a large number of nation-states to cede some of their sovereignty to an overarching entity is truly unique.

Although the EU is not a federation in the strict sense, it is far more than a free-trade association such as ASEAN, NAFTA, or Mercosur, and it has many of the attributes associated with independent nations: its own flag, anthem, founding date, and currency, as well as an incipient common foreign and security policy in its dealings with other nations.

In the future, many of these nation-like characteristics are likely to be expanded. Thus, inclusion of basic intelligence on the EU has been deemed appropriate as a new, separate entity in The World Factbook. However, because of the EU's special status, this description is placed after the regular country entries.

@2193

Field Listing :: Major infectious diseases

This entry lists major infectious diseases likely to be encountered in countries where the risk of such diseases is assessed to be very high as compared to the United States. These infectious diseases represent risks to US government personnel traveling to the specified country for a period of less than three years. The degree of risk is assessed by considering the foreign nature of

these infectious diseases, their severity, and the probability of being affected by the diseases present. The diseases listed do not necessarily represent the total disease burden experienced by the local population. The risk to an individual traveler varies considerably by the specific location, visit duration, type of activities, type of accommodations, time of year, and other factors. Consultation with a travel medicine physician is needed to evaluate individual risk and recommend appropriate preventive measures such as vaccines. Diseases are organized into the following six exposure categories shown in italics and listed in typical descending order of risk. Note: The sequence of exposure categories listed in individual country entries may vary according to local conditions.

food or waterborne diseases acquired through eating or drinking on the local economy: Hepatitis A - viral disease that interferes with the functioning of the liver; spread through consumption of food or water contaminated with fecal matter, principally in areas of poor sanitation; victims exhibit fever, jaundice, and diarrhea; 15% of victims will experience prolonged symptoms over 6-9 months; vaccine available. Hepatitis E - water-borne viral disease that interferes with the functioning of the liver; most commonly spread through fecal contamination of drinking water; victims exhibit jaundice, fatigue, abdominal pain, and dark colored urine. Typhoid fever - bacterial disease spread through contact with food or water contaminated by fecal matter or sewage; victims exhibit sustained high fevers; left untreated, mortality rates can reach 20%.

vectorborne diseases acquired through the bite of an infected arthropod: Malaria - caused by single-cell parasitic protozoa Plasmodium; transmitted to humans via the bite of the female Anopheles mosquito; parasites multiply in the liver attacking red blood cells resulting in cycles of fever, chills, and sweats accompanied by anemia; death due to damage to vital organs and interruption of blood supply to the brain; endemic in 100, mostly tropical, countries with 90% of cases and the majority of 1.5-2.5 million estimated annual deaths occurring in sub-Saharan Africa. Dengue fever - mosquito-borne (Aedes aegypti) viral disease associated with urban environments; manifests as sudden onset of fever and severe headache; occasionally produces shock and hemorrhage leading to death in 5% of cases. Yellow fever - mosquito-borne viral disease; severity ranges from influenza-like symptoms to severe hepatitis and hemorrhagic fever; occurs only in tropical South America and sub-Saharan Africa, where most cases are reported; fatality rate is less than 20%. Japanese Encephalitis - mosquito-borne (Culex tritaeniorhynchus) viral disease associated with rural areas in Asia; acute encephalitis can progress to paralysis, coma, and death; fatality rates 30%. African Trypanosomiasis - caused by the parasitic protozoa Trypanosoma; transmitted to humans via the bite of bloodsucking Tsetse flies; infection leads to malaise and irregular fevers and, in advanced cases when the parasites invade the central nervous system, coma and death; endemic in 36 countries of sub-Saharan Africa; cattle and wild animals act as reservoir hosts for the parasites. Cutaneous Leishmaniasis - caused by the parasitic protozoa leishmania; transmitted to humans via the bite of sandflies; results in skin lesions that may become chronic; endemic in 88 countries; 90% of cases occur in Iran, Afghanistan, Syria, Saudi Arabia, Brazil, and Peru; wild and domesticated animals as well as humans can act as reservoirs of infection. Plague - bacterial disease transmitted by fleas normally associated with rats; person-to-person airborne transmission also possible; recent plague epidemics occurred in areas of Asia, Africa, and South America associated with rural areas or small towns and villages; manifests as fever, headache, and painfully swollen lymph nodes; disease progresses rapidly and without antibiotic treatment leads to pneumonic form with a death rate in excess of 50%. Crimean-Congo hemorrhagic fever - tick-borne viral disease; infection may also result from exposure to infected animal blood or tissue; geographic

distribution includes Africa, Asia, the Middle East, and Eastern Europe; sudden onset of fever, headache, and muscle aches followed by hemorrhaging in the bowels, urine, nose, and gums; mortality rate is approximately 30%. Rift Valley fever - viral disease affecting domesticated animals and humans; transmission is by mosquito and other biting insects; infection may also occur through handling of infected meat or contact with blood; geographic distribution includes eastern and southern Africa where cattle and sheep are raised; symptoms are generally mild with fever and some liver abnormalities, but the disease may progress to hemorrhagic fever, encephalitis, or ocular disease; fatality rates are low at about 1% of cases. Chikungunya - mosquito-borne (*Aedes aegypti*) viral disease associated with urban environments, similar to Dengue Fever; characterized by sudden onset of fever, rash, and severe joint pain usually lasting 3-7 days, some cases result in persistent arthritis. water contact diseases acquired through swimming or wading in freshwater lakes, streams, and rivers: Leptospirosis - bacterial disease that affects animals and humans; infection occurs through contact with water, food, or soil contaminated by animal urine; symptoms include high fever, severe headache, vomiting, jaundice, and diarrhea; untreated, the disease can result in kidney damage, liver failure, meningitis, or respiratory distress; fatality rates are low but left untreated recovery can take months. Schistosomiasis - caused by parasitic trematode flatworm *Schistosoma*; fresh water snails act as intermediate host and release larval form of parasite that penetrates the skin of people exposed to contaminated water; worms mature and reproduce in the blood vessels, liver, kidneys, and intestines releasing eggs, which become trapped in tissues triggering an immune response; may manifest as either urinary or intestinal disease resulting in decreased work or learning capacity; mortality, while generally low, may occur in advanced cases usually due to bladder cancer; endemic in 74 developing countries with 80% of infected people living in sub-Saharan Africa; humans act as the reservoir for this parasite. aerosolized dust or soil contact disease acquired through inhalation of aerosols contaminated with rodent urine: Lassa fever - viral disease carried by rats of the genus *Mastomys*; endemic in portions of West Africa; infection occurs through direct contact with or consumption of food contaminated by rodent urine or fecal matter containing virus particles; fatality rate can reach 50% in epidemic outbreaks. respiratory disease acquired through close contact with an infectious person: Meningococcal meningitis - bacterial disease causing an inflammation of the lining of the brain and spinal cord; one of the most important bacterial pathogens is *Neisseria meningitidis* because of its potential to cause epidemics; symptoms include stiff neck, high fever, headaches, and vomiting; bacteria are transmitted from person to person by respiratory droplets and facilitated by close and prolonged contact resulting from crowded living conditions, often with a seasonal distribution; death occurs in 5-15% of cases, typically within 24-48 hours of onset of symptoms; highest burden of meningococcal disease occurs in the hyperendemic region of sub-Saharan Africa known as the "Meningitis Belt" which stretches from Senegal east to Ethiopia. animal contact disease acquired through direct contact with local animals: Rabies - viral disease of mammals usually transmitted through the bite of an infected animal, most commonly dogs; virus affects the central nervous system causing brain alteration and death; symptoms initially are non-specific fever and headache progressing to neurological symptoms; death occurs within days of the onset of symptoms.

Country

Major infectious diseases

Afghanistan

degree of risk: high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever

vectorborne disease: malaria

animal contact disease: rabies

note: highly pathogenic H5N1 avian influenza has been identified in this country; it poses a negligible risk with extremely rare cases

possible among US citizens who have close contact with birds (2009)

Angola

degree of risk: very high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, typhoid fever

vectorborne diseases: malaria, African trypanosomiasis (sleeping sickness)

vectorborne disease: malaria

note: highly pathogenic H5N1 avian influenza has been identified in this country; it poses a negligible risk with extremely rare cases

possible among US citizens who have close contact with birds (2009)

Dominican Republic

degree of risk: high

food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: dengue fever and malaria

water contact disease: leptospirosis (2009)

Ecuador

degree of risk: high

food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: dengue fever and malaria

water contact disease: leptospirosis (2009)

Egypt

degree of risk: intermediate

food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever
vectorborne disease: Rift Valley fever
water contact disease: schistosomiasis
note: highly pathogenic H5N1 avian influenza has been identified in this country; it poses a negligible risk with extremely rare cases possible among US citizens who have close contact with birds (2009)

El Salvador

degree of risk: high
food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever
vectorborne diseases: dengue fever
water contact disease: leptospirosis (2009)

Equatorial Guinea

degree of risk: very high
food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever
vectorborne disease: malaria and yellow fever
animal contact disease: rabies (2009)

Eritrea

degree of risk: high
food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever
vectorborne disease: malaria (2009)

Estonia

degree of risk: intermediate
food or waterborne diseases: bacterial diarrhea
vectorborne disease: tickborne encephalitis (2009)

Ethiopia

degree of risk: high
food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A and E, and typhoid fever
vectorborne diseases: malaria
respiratory disease: meningococcal meningitis
animal contact disease: rabies
water contact disease: schistosomiasis (2009)

Gabon

degree of risk: very high
food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever

vectorborne disease: malaria and chikungunya

water contact disease: schistosomiasis

animal contact disease: rabies (2009)

Gambia, The

degree of risk: very high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: malaria

water contact disease: schistosomiasis

respiratory disease: meningococcal meningitis

animal contact disease: rabies (2009)

Ghana

degree of risk: very high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: malaria

water contact disease: schistosomiasis

respiratory disease: meningococcal meningitis

animal contact disease: rabies

note: highly pathogenic H5N1 avian influenza has been identified in this country; it poses a negligible risk with extremely rare cases

possible among US citizens who have close contact with birds (2009)

Guatemala

degree of risk: high

food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever

vectorborne disease: dengue fever and malaria

water contact disease: leptospirosis (2009)

Guinea

degree of risk: very high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: malaria and yellow fever

water contact disease: schistosomiasis

animal contact disease: rabies

aerosolized dust or soil contact disease: Lassa fever (2009)

Guinea-Bissau

degree of risk: very high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: malaria and yellow fever

water contact disease: schistosomiasis

animal contact disease: rabies (2009)

Guyana

degree of risk: high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: dengue fever and malaria

water contact disease: leptospirosis (2009)

Haiti

degree of risk: high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A and E, and typhoid fever

vectorborne diseases: dengue fever and malaria

water contact disease: leptospirosis (2009)

Honduras

degree of risk: high

food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: dengue fever and malaria

water contact disease: leptospirosis (2009)

Hungary

degree of risk: intermediate

food or waterborne diseases: bacterial diarrhea and hepatitis A

vectorborne diseases: tickborne encephalitis (2009)

India

degree of risk: high

food or waterborne diseases: bacterial diarrhea, hepatitis A and E, and typhoid fever

vectorborne diseases: chikungunya, dengue fever, Japanese encephalitis, and malaria

animal contact disease: rabies

water contact disease: leptospirosis

note: highly pathogenic H5N1 avian influenza has been identified in this country; it poses a negligible risk with extremely rare cases possible among US citizens who have close contact with birds (2009)

Indonesia

degree of risk: high

food or waterborne diseases: bacterial diarrhea, hepatitis A and E, and typhoid fever

vectorborne diseases: chikungunya, dengue fever, and malaria

note: highly pathogenic H5N1 avian influenza has been identified in this country; it poses a negligible risk with extremely rare cases possible among US citizens who have close contact with birds (2009)

Iran

degree of risk: intermediate

food or waterborne diseases: bacterial diarrhea

vectorborne diseases: Crimean Congo hemorrhagic fever and malaria

Kenya

degree of risk: high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever

vectorborne disease: malaria and Rift Valley fever

water contact disease: schistosomiasis

animal contact disease: rabies (2009)

Laos

degree of risk: very high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: dengue fever and malaria

note: highly pathogenic H5N1 avian influenza has been identified in this country; it poses a negligible risk with extremely rare cases possible among US citizens who have close contact with birds (2008) (2009)

Latvia

degree of risk: intermediate

food or waterborne diseases: bacterial diarrhea

vectorborne diseases: tickborne encephalitis (2009)

Liberia

degree of risk: very high

food or waterborne diseases: bacterial and protozoal diarrhea,

hepatitis A, and typhoid fever
vectorborne diseases: malaria and yellow fever
water contact disease: schistosomiasis
aerosolized dust or soil contact disease: Lassa fever
animal contact disease: rabies (2009)

Lithuania

degree of risk: intermediate
food or waterborne diseases: bacterial diarrhea
vectorborne diseases: tickborne encephalitis (2009)

Madagascar

degree of risk: very high
food or waterborne diseases: bacterial and protozoal diarrhea,
hepatitis A, and typhoid fever
vectorborne diseases: chikungunya, malaria, and plague
water contact disease: schistosomiasis (2009)

Malawi

degree of risk: very high
food or waterborne diseases: bacterial and protozoal diarrhea,
hepatitis A, and typhoid fever
vectorborne diseases: malaria and plague
water contact disease: schistosomiasis
animal contact disease: rabies (2009)

Malaysia

degree of risk: high
food or waterborne diseases: bacterial diarrhea
vectorborne diseases: dengue fever and malaria
note: highly pathogenic H5N1 avian influenza has been identified in
this country; it poses a negligible risk with extremely rare cases
possible among US citizens who have close contact with birds (2009)

Mali

degree of risk: very high
food or waterborne diseases: bacterial and protozoal diarrhea,
hepatitis A, and typhoid fever
vectorborne disease: malaria
water contact disease: schistosomiasis
respiratory disease: meningococcal meningitis (2009)

Mauritania

degree of risk: high
food or waterborne diseases: bacterial and protozoal diarrhea,
hepatitis A, and typhoid fever

vectorborne diseases: malaria and Rift Valley fever
respiratory disease: meningococcal meningitis
animal contact disease: rabies (2009)

Mexico

degree of risk: intermediate
food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever
vectorborne disease: dengue fever
water contact disease: leptospirosis (2009)

Montenegro

degree of risk: intermediate
food or waterborne diseases: bacterial diarrhea
vectorborne disease: Crimean Congo hemorrhagic fever (2009)

Mozambique

degree of risk: very high
food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever
vectorborne diseases: malaria and plague
water contact disease: schistosomiasis
animal contact disease: rabies (2009)

Namibia

degree of risk: high
food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever
vectorborne disease: malaria
water contact disease: schistosomiasis (2009)

Nepal

degree of risk: high
food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever
vectorborne disease: Japanese encephalitis, malaria, and dengue fever (2009)

Nicaragua

degree of risk: high
food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever
vectorborne disease: dengue fever and malaria
water contact disease: leptospirosis (2009)

Niger

degree of risk: very high

food or waterborne diseases: bacterial and protozoal diarrhea,

hepatitis A, and typhoid fever

vectorborne disease: malaria

water contact disease: schistosomiasis

animal contact disease: rabies

respiratory disease: meningococcal meningitis

note: highly pathogenic H5N1 avian influenza has been identified in

this country; it poses a negligible risk with extremely rare cases

possible among US citizens who have close contact with birds (2009)

Nigeria

degree of risk: very high

food or waterborne diseases: bacterial and protozoal diarrhea,

hepatitis A and E, and typhoid fever

vectorborne disease: malaria and yellow fever

respiratory disease: meningococcal meningitis

aerosolized dust or soil contact disease: one of the most highly

endemic areas for Lassa fever

water contact disease: leptospirosis and shistosomiasis

animal contact disease: rabies

note: highly pathogenic H5N1 avian influenza has been identified in

this country; it poses a negligible risk with extremely rare cases

possible among US citizens who have close contact with birds (2009)

Pakistan

degree of risk: high

food or waterborne diseases: bacterial diarrhea, hepatitis A and E,

and typhoid fever

vectorborne diseases: dengue fever and malaria

animal contact disease: rabies

note: highly pathogenic H5N1 avian influenza has been identified in

this country; it poses a negligible risk with extremely rare cases

possible among US citizens who have close contact with birds (2009)

Panama

degree of risk: intermediate

food or waterborne diseases: bacterial diarrhea

vectorborne disease: dengue fever and malaria (2009)

Papua New Guinea

degree of risk: very high

food or waterborne diseases: bacterial diarrhea, hepatitis A, and

typhoid fever

vectorborne diseases: dengue fever and malaria (2009)

Paraguay

degree of risk: intermediate

food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever

vectorborne disease: dengue fever and malaria (2009)

Peru

degree of risk: very high

food or waterborne diseases: bacterial, hepatitis A, and typhoid fever

vectorborne disease: dengue fever, malaria, and yellow fever

water contact disease: leptospirosis (2009)

Philippines

degree of risk: high

food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: dengue fever, malaria, and Japanese encephalitis

water contact disease: leptospirosis (2009)

Poland

degree of risk: intermediate

food or waterborne diseases: bacterial diarrhea

vectorborne disease: tickborne encephalitis

note: highly pathogenic H5N1 avian influenza has been identified in this country; it poses a negligible risk with extremely rare cases

possible among US citizens who have close contact with birds (2009)

Russia

degree of risk: intermediate

food or waterborne diseases: bacterial diarrhea

vectorborne disease: tickborne encephalitis

note: highly pathogenic H5N1 avian influenza has been identified in this country; it poses a negligible risk with extremely rare cases

possible among US citizens who have close contact with birds (2009)

Rwanda

degree of risk: very high

food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever

vectorborne disease: malaria

animal contact disease: rabies (2009)

Sao Tome and Principe

degree of risk: high

food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever
vectorborne disease: malaria
animal contact disease: rabies (2009)

Senegal

degree of risk: very high
food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever
vectorborne diseases: Crimean-Congo hemorrhagic fever, dengue fever, malaria, Rift Valley fever, and yellow fever
water contact disease: schistosomiasis
respiratory disease: meningococcal meningitis
animal contact disease: rabies (2009)

Serbia

degree of risk: intermediate
food or waterborne diseases: bacterial diarrhea
vectorborne disease: Crimean Congo hemorrhagic fever
note: highly pathogenic H5N1 avian influenza has been identified in this country; it poses a negligible risk with extremely rare cases possible among US citizens who have close contact with birds (2009)

Sierra Leone

degree of risk: very high
food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever
vectorborne diseases: malaria and yellow fever
water contact disease: schistosomiasis
aerosolized dust or soil contact disease: Lassa fever (2009)

Somalia

degree of risk: high
food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A and E, and typhoid fever
vectorborne diseases: dengue fever, malaria, and Rift Valley fever
water contact disease: schistosomiasis
animal contact disease: rabies (2009)

South Africa

degree of risk: intermediate
food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever
water contact disease: schistosomiasis (2009)

degree of risk: high

food or waterborne diseases: bacterial diarrhea and hepatitis A

vectorborne disease: dengue fever and chikungunya

water contact disease: leptospirosis

animal contact disease: rabies (2009)

Sudan

degree of risk: very high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A and E, and typhoid fever

vectorborne diseases: malaria, dengue fever, African trypanosomiasis (sleeping sickness)

water contact disease: schistosomiasis

respiratory disease: meningococcal meningitis

animal contact disease: rabies

note: highly pathogenic H5N1 avian influenza has been identified in this country; it poses a negligible risk with extremely rare cases

possible among US citizens who have close contact with birds (2009)

Suriname

degree of risk: high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever

vectorborne disease: dengue fever, Mayaro virus, and malaria

water contact disease: leptospirosis (2009)

Swaziland

degree of risk: high

food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever

vectorborne disease: malaria

water contact disease: schistosomiasis (2009)

Tajikistan

degree of risk: high

food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever

vectorborne disease: malaria (2009)

Tanzania

degree of risk: very high

food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: malaria and plague

water contact disease: schistosomiasis

animal contact disease: rabies (2009)

Thailand

degree of risk: high

food or waterborne diseases: bacterial diarrhea

vectorborne diseases: dengue fever, Japanese encephalitis, and malaria

animal contact disease: rabies

water contact disease: leptospirosis

note: highly pathogenic H5N1 avian influenza has been identified in

this country; it poses a negligible risk with extremely rare cases

possible among US citizens who have close contact with birds (2009)

Timor-Leste

degree of risk: very high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: chikungunya, dengue fever and malaria (2009)

Togo

degree of risk: very high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: malaria and yellow fever

water contact disease: schistosomiasis

respiratory disease: meningococcal meningitis

animal contact disease: rabies

note: highly pathogenic H5N1 avian influenza has been identified in

this country; it poses a negligible risk with extremely rare cases

possible among US citizens who have close contact with birds (2009)

Uganda

degree of risk: very high

food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: malaria, plague, and African trypanosomiasis (sleeping sickness)

water contact disease: schistosomiasis

animal contact disease: rabies (2009)

Venezuela

degree of risk: high

food or waterborne diseases: bacterial diarrhea

vectorborne disease: dengue fever and malaria (2009)

Vietnam

degree of risk: high

food or waterborne diseases: bacterial diarrhea, hepatitis A, and

typhoid fever

vectorborne diseases: dengue fever, malaria, Japanese encephalitis, and plague

water contact disease: leptospirosis

note: highly pathogenic H5N1 avian influenza has been identified in this country; it poses a negligible risk with extremely rare cases

possible among US citizens who have close contact with birds (2009)

Yemen

degree of risk: high

food or waterborne diseases: bacterial diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: dengue fever and malaria

water contact disease: schistosomiasis (2009)

Zambia

degree of risk: very high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever

vectorborne diseases: malaria and plague are high risks in some locations

water contact disease: schistosomiasis

animal contact disease: rabies (2009)

Zimbabwe

degree of risk: high

food or waterborne diseases: bacterial and protozoal diarrhea, hepatitis A, and typhoid fever

vectorborne disease: malaria

water contact disease: schistosomiasis

animal contact disease: rabies (2009)

Field Listing :: Refugees and internally displaced persons

This entry includes those persons residing in a country as refugees or internally displaced persons (IDPs). The definition of a refugee according to a United Nations Convention is "a person who is

outside his/her country of nationality or habitual residence; has a well-founded fear of persecution because of his/her race, religion, nationality, membership in a particular social group or political opinion; and is unable or unwilling to avail himself/herself of the protection of that country, or to return there, for fear of persecution." The UN established the Office of the UN High Commissioner for Refugees (UNHCR) in 1950 to handle refugee matters worldwide. The UN Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) has a different operational definition for a Palestinian refugee: "a person whose normal place of residence was Palestine during the period 1 June 1946 to 15 May 1948 and who lost both home and means of livelihood as a result of the 1948 conflict." However, UNHCR also assists some 400,000 Palestinian refugees not covered under the UNRWA definition. The term "internally displaced person" is not specifically covered in the UN Convention; it is used to describe people who have fled their homes for reasons similar to refugees, but who remain within their own national territory and are subject to the laws of that state. Country

Refugees and internally displaced persons

Afghanistan

IDPs: 132,246 (mostly Pashtuns and Kuchis displaced in south and west due to drought and instability) (2007)

Algeria

refugees (country of origin): 90,000 (Western Saharan Sahrawi, mostly living in Algerian-sponsored camps in the southwestern Algerian town of Tindouf)

IDPs: undetermined (civil war during 1990s) (2007)

Angola

refugees (country of origin): 12,615 (Democratic Republic of Congo)

IDPs: 61,700 (27-year civil war ending in 2002; 4 million IDPs already have returned) (2007)

Armenia

refugees (country of origin): 113,295 (Azerbaijan)

IDPs: 8,400 (conflict with Azerbaijan over Nagorno-Karabakh, majority have returned home since 1994 ceasefire) (2007)

Azerbaijan

refugees (country of origin): 2,400 (Russia)

IDPs: 580,000-690,000 (conflict with Armenia over Nagorno-Karabakh) (2007)

Bangladesh

refugees (country of origin): 26,268 (Burma)

IDPs: 65,000 (land conflicts, religious persecution) (2007)

Benin

refugees (country of origin): 9,444 (Togo) (2007)

Bosnia and Herzegovina

refugees (country of origin): 7,269 (Croatia)

IDPs: 131,600 (Bosnian Croats, Serbs, and Bosniaks displaced in 1992-95 war) (2007)

Burma

IDPs: 503,000 (government offensives against ethnic insurgent groups near the eastern borders; most IDPs are ethnic Karen, Karenni, Shan, Tavoyan, and Mon) (2007)

Burundi

refugees (country of origin): 9,849 (Democratic Republic of the Congo)

IDPs: 100,000 (armed conflict between government and rebels; most IDPs in northern and western Burundi) (2007)

Cameroon

refugees (country of origin): 20,000-30,000 (Chad); 3,000 (Nigeria); 24,000 (Central African Republic) (2007)

Central African Republic

refugees (country of origin): 7,900

(Sudan); 3,700 (Democratic Republic of the Congo); note - UNHCR resumed repatriation of Southern Sudanese refugees in 2006

IDPs: 197,000 (ongoing unrest following coup in 2003) (2007)

Chad

refugees (country of origin): 234,000 (Sudan); 54,200 (Central African Republic)

IDPs: 178,918 (2007)

China

refugees (country of origin): 300,897 (Vietnam); estimated 30,000-50,000 (North Korea)

IDPs: 90,000 (2007)

Colombia

IDPs: 1.8-3.5 million (conflict between government and illegal armed groups and drug traffickers) (2007)

Congo, Democratic Republic of the

refugees (country of origin):

132,295 (Angola); 37,313 (Rwanda); 17,777 (Burundi); 13,904

(Uganda); 6,181 (Sudan); 5,243 (Republic of Congo)

IDPs: 1.4 million (fighting between government forces and rebels since mid-1990s; most IDPs are in eastern provinces) (2007)

Congo, Republic of the

refugees (country of origin): 46,341

(Democratic Republic of Congo); 6,564 (Rwanda)

IDPs: 48,000 (multiple civil wars since 1992; most IDPs are ethnic Lari) (2007)

Costa Rica

refugees (country of origin): 9,699-11,500 (Colombia) (2007)

Cote d'Ivoire

refugees (country of origin): 25,615 (Liberia)

IDPs: 709,000 (2002 coup; most IDPs are in western regions) (2007)

Croatia

IDPs: 2,900-7,000 (Croats and Serbs displaced in 1992-95 war) (2007)

Cyprus

IDPs: 210,000 (both Turkish and Greek Cypriots; many displaced for over 30 years) (2007)

Djibouti

refugees (country of origin): 8,642 (Somalia) (2007)

Ecuador

refugees (country of origin): 11,526 (Colombia); note - UNHCR estimates as many as 250,000 Columbians are seeking asylum in Ecuador, many of whom do not register as refugees for fear of deportation (2007)

Egypt

refugees (country of origin): 60,000 - 80,000 (Iraq); 70,198 (Palestinian Territories); 12,157 (Sudan) (2007)

Eritrea

IDPs: 32,000 (border war with Ethiopia from 1998-2000; most IDPs are near the central border region) (2007)

Ethiopia

refugees (country of origin): 66,980 (Sudan); 16,576 (Somalia); 13,078 (Eritrea)

IDPs: 200,000 (border war with Eritrea from 1998-2000, ethnic clashes in Gambela, and ongoing Ethiopian military counterinsurgency in Somali region; most IDPs are in Tigray and Gambela Provinces) (2007)

Gabon

refugees (country of origin): 7,178 (Republic of Congo) (2007)

Gambia, The

refugees (country of origin): 5,955 (Sierra Leone) (2007)

Gaza Strip

refugees (country of origin): 1.017 million (Palestinian Refugees (UNRWA)) (2007)

Georgia

refugees (country of origin): 1,100 (Russia)

IDPs: 220,000-240,000 (displaced from Abkhazia and South Ossetia) (2007)

Ghana

refugees (country of origin): 35,653 (Liberia); 8,517 (Togo) (2007)

Guatemala

IDPs: undetermined (the UN does not estimate there are any IDPs, although some NGOs estimate over 200,000 IDPs as a result of over three decades of internal conflict that ended in 1996) (2007)

Guinea

refugees (country of origin): 21,856 (Liberia); 5,259 (Sierra Leone); 3,900 (Cote d'Ivoire)

IDPs: 19,000 (cross-border incursions from Cote d'Ivoire, Liberia, Sierra Leone) (2007)

Guinea-Bissau

refugees (country of origin): 7,454 (Senegal) (2007)

India

refugees (country of origin): 77,200 (Tibet/China); 69,609 (Sri Lanka); 9,472 (Afghanistan)

IDPs: at least 600,000 (about half are Kashmiri Pandits from Jammu and Kashmir) (2007)

Indonesia

IDPs: 200,000-350,000 (government offensives against

rebels in Aceh; most IDPs in Aceh, Central Kalimantan, Central Sulawesi Provinces, and Maluku) (2007)

Iran

refugees (country of origin): 914,268 (Afghanistan); 54,024 (Iraq) (2007)

Iraq

refugees (country of origin): 10,000-15,000 (Palestinian Territories); 11,773 (Iran); 16,832 (Turkey)
IDPs: 2.4 million (ongoing US-led war and ethno-sectarian violence) (2007)

Israel

IDPs: 150,000-420,000 (Arab villagers displaced from homes in northern Israel) (2007)

Jordan

refugees (country of origin): 1,835,704 (Palestinian Refugees (UNRWA)); 500,000 (Iraq)
IDPs: 160,000 (1967 Arab-Israeli War) (2007)

Kazakhstan

refugees (country of origin): 3,700 (Russia); 508 (Afghanistan) (2007)

Kenya

refugees (country of origin): 173,702 (Somalia); 73,004 (Sudan); 16,428 (Ethiopia)
IDPs: 250,000-400,000 (2007 post-election violence; KANU attacks on opposition tribal groups in 1990s) (2007)

Korea, North

IDPs: undetermined (flooding in mid-2007 and famine during mid-1990s) (2007)

Kosovo

IDP's: 21,000 (2007)

Lebanon

refugees (country of origin): 405,425 (Palestinian refugees (UNRWA)); 50,000-60,000 (Iraq)
IDPs: 17,000 (1975-90 civil war, Israeli invasions); 200,000 (July-August 2006 war) (2007)

Liberia

refugees (country of origin): 12,600 (Cote d'Ivoire)
IDPs: 13,000 (civil war from 1990-2004; IDP resettlement began in November 2004) (2007)

Libya

refugees (country of origin): 8,000 (Palestinian Territories)
(2007)

Macedonia

IDPs: fewer than 1,000 (ethnic conflict in 2001) (2007)

Malaysia

refugees (country of origin): 15,174 (Indonesia); 21,544
(Burma) (2007)

Maldives

IDPs: 1,000-10,000 (December 2004 tsunami victims) (2007)

Mali

refugees (country of origin): 6,300 (Mauritania) (2007)

Mexico

IDPs: 5,500-10,000 (government's quashing of Zapatista uprising in 1994 in eastern Chiapas Region) (2007)

Montenegro

refugees (country of origin): 7,000 (Kosovo); note -
mostly ethnic Serbs and Roma who fled Kosovo in 1999
IDPs: 16,192 (ethnic conflict in 1999 and riots in 2004) (2007)

Namibia

refugees (country of origin): 4,700 (Angola) (2007)

Nepal

refugees (country of origin): 107,803 (Bhutan); 20,153
(Tibet/China)
IDPs: 50,000-70,000 (remaining from ten-year Maoist insurgency that
officially ended in 2006; displacement spread across the country)
(2007)

Nigeria

refugees (country of origin): 5,778 (Liberia)
IDPs: undetermined (communal violence between Christians and Muslims
since President OBASANJO's election in 1999; displacement is mostly
short-term) (2007)

Pakistan

refugees (country of origin): 1,043,984 (Afghanistan)

IDPs: undetermined (government strikes on Islamic militants in South Waziristan); 34,000 (October 2005 earthquake; most of those displaced returned to their home villages in the spring of 2006) (2007)

Papua New Guinea

refugees (country of origin): 10,177 (Indonesia) (2007)

Peru

IDPs: 60,000-150,000 (civil war from 1980-2000; most IDPs are indigenous peasants in Andean and Amazonian regions) (2007)

Philippines

IDPs: 300,000 (fighting between government troops and MILF and Abu Sayyaf groups) (2007)

Russia

IDPs: 18,000-160,000 (displacement from Chechnya and North Ossetia) (2007)

Rwanda

refugees (country of origin): 46,272 (Democratic Republic of the Congo); 4,400 (Burundi) (2007)

Saudi Arabia

refugees (country of origin): 240,015 (Palestinian Territories) (2007)

Senegal

refugees (country of origin): 19,630 (Mauritania)

IDPs: 22,400 (approximately 65% of the IDP population returned in 2005, but new displacement is occurring due to clashes between government troops and separatists in Casamance region) (2007)

Serbia

refugees (country of origin): 71,111 (Croatia); 27,414 (Bosnia and Herzegovina); 206,000 (Kosovo), note - mostly ethnic Serbs and Roma who fled Kosovo in 1999 (2007)

Sierra Leone

refugees (country of origin): 27,311 (Liberia) (2007)

Solomon Islands

IDPs: 5,400 (displaced by tsunami on 2 April 2007)
(2007)

Somalia

IDPs: 1.1 million (civil war since 1988, clan-based competition for resources) (2007)

South Africa

refugees (country of origin): 10,772 (Democratic Republic of Congo); 7,818 (Somalia); 5,759 (Angola) (2007)

Sri Lanka

IDPs: 460,000 (both Tamils and non-Tamils displaced due to long-term civil war between the government and the separatist Liberation Tigers of Tamil Eelam (LTTE)) (2007)

Sudan

refugees (country of origin): 157,220 (Eritrea); 25,023 (Chad); 11,009 (Ethiopia); 7,895 (Uganda); 5,023 (Central African Republic)

IDPs: 5.3 - 6.2 million (civil war 1983-2005; ongoing conflict in Darfur region) (2007)

Syria

refugees (country of origin): 1-1.4 million (Iraq); 522,100 (Palestinian Refugees (UNRWA))

IDPs: 305,000 (most displaced from Golan Heights during 1967 Arab-Israeli War) (2007)

Tanzania

refugees (country of origin): 352,640 (Burundi); 127,973 (Democratic Republic of the Congo) (2007)

Thailand

refugees (country of origin): 132,241 (Burma) (2007)

Timor-Leste

IDPs: 100,000 (2007)

Togo

refugees (country of origin): 5,000 (Ghana)
IDPs: 1,500 (2007)

Turkey

IDPs: 1-1.2 million (fighting 1984-99 between Kurdish PKK and Turkish military; most IDPs in southeastern provinces) (2007)

Turkmenistan

refugees (country of origin): 11,173 (Tajikistan); less than 1,000 (Afghanistan) (2007)

Uganda

refugees (country of origin): 215,700 (Sudan); 28,880 (Democratic Republic of Congo); 24,900 (Rwanda)

IDPs: 1.27 million (350,000 IDPs returned in 2006 following ongoing peace talks between the Lord's Resistance Army (LRA) and the Government of Uganda) (2007)

United States

refugees (country of origin): the US admitted 62,643

refugees during FY04/05 including; 10,586 (Somalia); 8,549 (Laos); 6,666 (Russia); 6,479 (Cuba); 3,100 (Haiti); 2,136 (Iran) (2006)

Uzbekistan

refugees (country of origin): 39,202 (Tajikistan); 1,060 (Afghanistan)

IDPs: 3,400 (forced population transfers by government from villages near Tajikistan border) (2007)

West Bank

refugees (country of origin): 722,000 (Palestinian Refugees (UNRWA)) (2007)

World

the United Nations High Commissioner for Refugees (UNHCR) estimated that in December 2006 there was a global population of 8.8 million registered refugees and as many as 24.5 million IDPs in more than 50 countries; the actual global population of refugees is probably closer to 10 million given the estimated 1.5 million Iraqi refugees displaced throughout the Middle East (2007)

Yemen

refugees (country of origin): 91,587 (Somalia) (2007)

Zambia

refugees (country of origin): 42,565 (Angola); 60,874 (Democratic Republic of the Congo); 4,100 (Rwanda) (2007)

Zimbabwe

refugees (country of origin): 2,500 (Democratic Republic of Congo)

IDPs: 569,685 (MUGABE-led political violence, human rights violations, land reform, and economic collapse) (2007)

@2195

Field Listing :: GDP (official exchange rate)

This entry gives the gross domestic product (GDP) or value of all final goods and services produced within a nation in a given year. A nation's GDP at official exchange rates (OER) is the home-currency-denominated annual GDP figure divided by the bilateral average US exchange rate with that country in that year. The measure is simple to compute and gives a precise measure of the value of output. Many economists prefer this measure when gauging the economic power an economy maintains vis-a-vis its neighbors, judging that an exchange rate captures the purchasing power a nation enjoys in the international marketplace. Official exchange rates, however, can be artificially fixed and/or subject to manipulation - resulting in claims of the country having an under- or over-valued currency - and are not necessarily the equivalent of a market-determined exchange rate. Moreover, even if the official exchange rate is market-determined, market exchange rates are frequently established by a relatively small set of goods and services (the ones the country trades) and may not capture the value of the larger set of goods the country produces. Furthermore, OER-converted GDP is not well suited to comparing domestic GDP over time, since appreciation/depreciation from one year to the next will make the OER GDP value rise/fall regardless of whether home-currency-denominated GDP changed. Field Listing :: Trafficking in persons

Trafficking in persons is modern-day slavery, involving victims who are forced, defrauded, or coerced into labor or sexual exploitation. The International Labor Organization (ILO), the UN agency charged with addressing labor standards, employment, and social protection issues, estimates that 12.3 million people worldwide are enslaved in forced labor, bonded labor, forced

child labor, sexual servitude, and involuntary servitude at any given time. Human trafficking is a multi-dimensional threat, depriving people of their human rights and freedoms, risking global health, promoting social breakdown, inhibiting development by depriving countries of their human capital, and helping fuel the growth of organized crime. In 2000, the US Congress passed the Trafficking Victims Protection Act (TVPA), reauthorized in 2003 and 2005, which provides tools for the US to combat trafficking in persons, both domestically and abroad. One of the law's key components is the creation of the US Department of State's annual Trafficking in Persons Report, which assesses the government response (i.e., the current situation) in some 150 countries with a significant number of victims trafficked across their borders who are recruited, harbored, transported, provided, or obtained for forced labor or sexual exploitation. Countries in the annual report are rated in three tiers, based on government efforts to combat trafficking. The countries identified in this entry are those listed in the 2010 Trafficking in Persons Report as Tier 2 Watch List or Tier 3 based on the following tier rating definitions: Tier 2 Watch List countries do not fully comply with the minimum standards for the elimination of trafficking but are making significant efforts to do so, and meet one of the following criteria: 1. they display high or significantly increasing number of victims, 2. they have failed to provide evidence of increasing efforts to combat trafficking in persons, or, 3. they have committed to take action over the next year. Tier 3 countries neither satisfy the minimum standards for the elimination of trafficking nor demonstrate a significant effort to do so. Countries in this tier are subject to potential non-humanitarian and non-trade sanctions. Country

Trafficking in persons

Algeria

current situation: Algeria is a transit country for men and women trafficked from sub-Saharan Africa to Europe for the purposes of commercial sexual exploitation and involuntary servitude; criminal networks of sub-Saharan nationals in southern Algeria facilitate transit by arranging transportation, forged documents, and promises of employment

tier rating: Tier 2 Watch List - Algeria is placed on the Tier 2 Watch List because it does not fully comply with the minimum standards for the elimination of trafficking, however, it is making significant efforts to do so; in January 2009, the government approved new legislation that criminalizes trafficking in persons for the purposes of labor and sexual exploitation representing an important step toward complying with international standards; despite these efforts, the government did not show overall progress in punishing trafficking crimes and protecting trafficking victims and continued to lack adequate measures to protect victims and prevent trafficking (2009)

Azerbaijan

current situation: Azerbaijan is primarily a source and

transit country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; women and some children from Azerbaijan are trafficked to Turkey and the UAE for the purpose of sexual exploitation; men and boys are trafficked to Russia for the purpose of forced labor; Azerbaijan serves as a transit country for victims from Uzbekistan, Kyrgyzstan, Kazakhstan, and Moldova trafficked to Turkey and the UAE for sexual exploitation

tier rating: Tier 2 Watch List - Azerbaijan is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat trafficking in persons, particularly efforts to investigate, prosecute, and punish traffickers; to address complicity among law enforcement personnel; and to adequately identify and protect victims in Azerbaijan; the government has yet to develop a much-needed mechanism to identify potential trafficking victims and refer them to safety and care; poor treatment of trafficking victims in courtrooms continues to be a problem (2008)

Bangladesh

current situation: Bangladesh is a source and transit country for men, women, and children trafficked for the purposes of forced labor and commercial sexual exploitation; a significant share of Bangladesh's trafficking victims are men recruited for work overseas with fraudulent employment offers who are subsequently exploited under conditions of forced labor or debt bondage; children are trafficked within Bangladesh for commercial sexual exploitation, bonded labor, and forced labor; women and children from Bangladesh are also trafficked to India and Pakistan for sexual exploitation

tier rating: Bangladesh is placed on Tier 2 Watch List because it does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so, including some progress in addressing sex trafficking; the government did not demonstrate sufficient progress in criminally prosecuting and convicting labor trafficking offenders, particularly those responsible for the recruitment of Bangladeshi workers for the purpose of labor trafficking (2009)

Belize

current situation: Belize is a source, transit, and destination country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; the most common form of trafficking in Belize is the internal sex trafficking of minors; some Central American men, women, and children, particularly from Guatemala, Honduras, and El Salvador, migrate voluntarily to Belize in search of work but are subsequently

subjected to conditions of forced labor or forced prostitution
tier rating: Belize is placed on Tier 2 Watch List because it does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; despite efforts to raise public awareness of human trafficking and provide protection services for trafficking victims, the government did not show evidence of progress in convicting and sentencing trafficking offenders last year (2009)

Burma

current situation: Burma is a source country for women, children, and men trafficked for the purpose of forced labor and commercial sexual exploitation; Burmese women and children are trafficked to East and Southeast Asia for commercial sexual exploitation, domestic servitude, and forced labor; Burmese children are subjected to conditions of forced labor in Thailand as hawkers and beggars; women are trafficked for commercial sexual exploitation to Malaysia and China; some trafficking victims transit Burma from Bangladesh to Malaysia and from China to Thailand; Burma's internal trafficking remains the most serious concern occurring primarily from villages to urban centers and economic hubs for labor in industrial zones, agricultural estates, and commercial sexual exploitation; the Burmese military continues to engage in the unlawful conscription of child soldiers, and continues to be the main perpetrator of forced labor inside Burma; ethnic insurgent groups also used compulsory labor of adults and unlawful recruitment of children; the regime's widespread use of and lack of accountability in forced labor and recruitment of child soldiers is particularly worrying and represents the top causal factor for Burma's significant trafficking problem

tier rating: Tier 3 - serious problems remain in Burma, and in some areas, most notably in the area of forced labor, the Government of Burma is not making significant efforts to comply with the minimum standards for the elimination of trafficking, warranting a ranking of Tier 3; in other areas, particularly with regard to international sex trafficking of women and girls, the Government of Burma is making significant efforts (2010)

Cameroon

current situation: Cameroon is a source, transit, and destination country for women and children trafficked for the purposes of forced labor and commercial sexual exploitation; most victims are children trafficked within country, with girls primarily trafficked for domestic servitude and sexual exploitation; both boys and girls are also trafficked within Cameroon for forced labor in

sweatshops, bars, restaurants, and on tea and cocoa plantations; children are trafficked into Cameroon from neighboring states for forced labor in agriculture, fishing, street vending, and spare-parts shops; Cameroon is a transit country for children trafficked between Gabon and Nigeria, and from Nigeria to Saudi Arabia; it is a source country for women transported by sex-trafficking rings to Europe

tier rating: Tier 2 Watch List - Cameroon is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat human trafficking in 2007, particularly in terms of efforts to prosecute and convict trafficking offenders; while Cameroon reported some arrests of traffickers, none of them were prosecuted or punished; the government does not identify trafficking victims among vulnerable populations nor does it monitor the number of victims it intercepts (2008)

Central African Republic

current situation: Central African Republic

is a source, transit, and destination country for men, women, and children trafficked for the purposes of forced labor and sexual exploitation; the majority of victims are children trafficked within the country for sexual exploitation, domestic servitude, street vending, and forced agricultural, mine, market and restaurant labor; to a lesser extent, children are trafficked from the Central African Republic to Cameroon, Nigeria, and the Democratic Republic of Congo; rebels conscript children into armed forces within the country

tier rating: Tier 2 Watch List - Central African Republic is on the Tier 2 Watch List for the third consecutive year for its failure to show evidence of increasing efforts to combat trafficking in 2007; efforts to address trafficking through vigorous law enforcement measures and victim protection efforts were minimal, though awareness about trafficking appeared to be increasing in the country; the government does not actively investigate cases, work to identify trafficking victims among vulnerable populations, or rescue and provide care to victims; the government has not taken measures to reduce demand for commercial sex acts (2008)

Chad

current situation: Chad is a source, transit, and destination country for children trafficked for the purposes of forced labor and commercial sexual exploitation; the majority of children are trafficked within Chad for involuntary domestic servitude, forced cattle herding, forced begging, forced labor in petty commerce or the fishing industry, or for commercial sexual exploitation; to a lesser extent, Chadian children are also trafficked to Cameroon, the

Central African Republic, and Nigeria for cattle herding; children may also be trafficked from Cameroon and the Central African Republic to Chad's oil producing regions for sexual exploitation
tier rating: Tier 2 Watch List - the Government of Chad does not fully comply with the minimum standards for the elimination of trafficking and is not making any significant efforts to do so; although facing resource constraints, the government has the capacity to conduct basic anti-trafficking law enforcement efforts, yet did not do so during the last year; it showed no results in enforcing government policy prohibiting the recruitment of child soldiers; Chad has not ratified the 2000 UN TIP Protocol (2009)

China

current situation: China is a source, transit, and destination country for men, women, and children trafficked for the purposes of sexual exploitation and forced labor; the majority of trafficking in China occurs within the country's borders, but there is also considerable international trafficking of Chinese citizens to Africa, Asia, Europe, Latin America, the Middle East, and North America; Chinese women are lured abroad through false promises of legitimate employment, only to be forced into commercial sexual exploitation, largely in Taiwan, Thailand, Malaysia, and Japan; women and children are trafficked to China from Mongolia, Burma, North Korea, Russia, and Vietnam for forced labor, marriage, and prostitution; some North Korean women and children seeking to leave their country voluntarily cross the border into China and are then sold into prostitution, marriage, or forced labor

tier rating: Tier 2 Watch List - China is on the Tier 2 Watch List for the fourth consecutive year for its failure to provide evidence of increasing efforts to combat human trafficking, particularly in terms of punishment of trafficking crimes and the protection of Chinese and foreign victims of trafficking; victims are sometimes punished for unlawful acts that were committed as a direct result of their being trafficked, such as violations of prostitution or immigration/emigration controls; the Chinese Government continued to treat North Korean victims of trafficking solely as economic migrants, routinely deporting them back to horrendous conditions in North Korea; additional challenges facing the Chinese Government include the enormous size of its trafficking problem and the significant level of corruption and complicity in trafficking by some local government officials (2008)

Congo, Democratic Republic of the current situation: Democratic Republic of the Congo is a source and destination country for men, women, and children subjected to trafficking for the purposes of forced labor and forced prostitution; the majority of this trafficking is internal, and much of it is

perpetrated by armed groups and government forces outside government control within the country's unstable eastern provinces tier rating: Tier 3 - Government of the Democratic Republic of the Congo does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government did not show evidence of progress in prosecuting and punishing labor or sex trafficking offenders, including members of its own armed forces; providing protective services for the vast majority of trafficking victims; or raising public awareness of human trafficking; in addition, the government's anti-trafficking law enforcement efforts decreased during the reporting period (2010)

Congo, Republic of the

current situation: Republic of the Congo is a source and destination country for children trafficked for the purposes of forced labor and commercial sexual exploitation; girls are trafficked from rural areas within the country for commercial sexual exploitation, forced street vending, and domestic servitude; children are trafficked from other African countries for domestic servitude, forced market vending, and forced labor in the fishing industry

tier rating: Tier 2 Watch List - Republic of the Congo is on the Tier 2 Watch List for its failure to show evidence of increasing efforts to combat trafficking in persons in 2007; struggling to recover from six years of civil conflict that ended in 2003, the Republic of the Congo's capacity to address trafficking is handicapped; the government neither monitors its borders for trafficking activity nor provides specialized anti-trafficking training for law enforcement officials; the government does not encourage victims to assist in trafficking investigations or prosecutions, and has not taken measures to reduce demand for commercial sex acts in the Republic of the Congo (2008)

Cote d'Ivoire

Cote d'Ivoire is a source, transit, and destination country for women and children trafficked for forced labor and commercial sexual exploitation; trafficking within the country is more prevalent than international trafficking and the majority of victims are children; women and girls are trafficked from northern areas to southern cities for domestic servitude, restaurant labor, and sexual exploitation; boys are trafficked internally for agricultural and service labor and transnationally for forced labor in agriculture, mining, construction, and in the fishing industry; women and girls are trafficked to and from other West and Central African countries for domestic servitude and forced street vending tier rating: Tier 2 Watch List - Cote d'Ivoire is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to eliminate trafficking in 2007, particularly with regard to its

law enforcement efforts and protection of sex trafficking victims; in addition, Ivoirian law does not prohibit all forms of trafficking, and Cote d'Ivoire has not ratified the 2000 UN TIP Protocol (2008)

Cuba

current situation: Cuba is principally a source country for children subjected to trafficking in persons, specifically commercial sexual exploitation within the country; the scope of trafficking within Cuba is difficult to gauge due to the closed nature of the government and sparse non-governmental or independent reporting

tier rating: Tier 3 - Cuba does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; in a positive step, the Government of Cuba shared information about human trafficking and its efforts to address the issue; the government did not prohibit all forms of trafficking during the reporting period, nor did it provide specific evidence that it prosecuted and punished trafficking offenders, protected victims of all forms of trafficking, or implemented victim protection policies or programs to prevent human trafficking (2010)

Dominican Republic

current situation: the Dominican Republic is a source, transit, and destination country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; a large number of Dominican women are trafficked into prostitution and sexual exploitation in Western Europe, Australia, Central and South America, and Caribbean destinations; a significant number of women, boys, and girls are trafficked within the country for sexual exploitation and domestic servitude

tier rating: Tier 3 - for its failure to show evidence of increasing efforts to combat human trafficking, particularly in terms of not adequately investigating and prosecuting public officials who may be complicit with trafficking activity, and inadequate government efforts to protect trafficking victims; the government has taken measures to reduce demand for commercial sex acts with children through criminal prosecutions (2008)

Equatorial Guinea

current situation: Equatorial Guinea is primarily a destination country for children trafficked for the purpose of forced labor and possibly for the purpose of sexual exploitation; children have been trafficked from nearby countries for domestic

servitude, market labor, ambulant vending, and possibly sexual exploitation; women may also be trafficked to Equatorial Guinea from Cameroon, Benin, other neighboring countries, and China for sexual exploitation

tier rating: Tier 2 Watch List - Equatorial Guinea is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to eliminate trafficking, particularly in the areas of prosecuting and convicting trafficking offenders and failing to formalize mechanisms to provide assistance to victims; although the government made some effort to enforce laws against child labor exploitation, it failed to report any trafficking prosecutions or convictions in 2007; the government continued to lack shelters or formal procedures for providing care to victims (2008)

Eritrea

current situation: Eritrea is a source country for men, women, and children trafficked for the purposes of forced labor and commercial sexual exploitation; each year, large numbers of migrant workers depart Eritrea in search of work, particularly in the Gulf States, where some likely become victims of forced labor, including in domestic servitude, or commercial sexual exploitation; thousands of Eritreans flee the country illegally, mostly to Sudan, Ethiopia, and Kenya where their illegal status makes them vulnerable to situations of human trafficking; the government remains complicit in conscripting children into military service

tier rating: Tier 3 - the Government of Eritrea does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the Eritrean government does not operate with transparency and published neither data nor statistics regarding its efforts to combat human trafficking; it did not respond to requests to provide information for this report; the government made no known progress in prosecuting and punishing trafficking crimes over the reporting period and did not appear to provide any significant assistance to victims of trafficking during the reporting period (2009)

Fiji

current situation: Fiji is a source country for children trafficked for the purpose of commercial sexual exploitation and a destination country for a small number of women from China and India trafficked for the purposes of forced labor and commercial sexual exploitation

tier rating: Tier 2 Watch List - Fiji does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government has demonstrated

no action to investigate or prosecute traffickers, assist victims, take steps to reduce the demand for commercial sex acts, or support any anti-trafficking information or education campaigns; Fiji has not ratified the 2000 UN TIP Protocol (2009)

Gabon

current situation: Gabon is predominantly a destination country for children trafficked from other African countries for the purpose of forced labor; girls are primarily trafficked for domestic servitude, forced market vending, forced restaurant labor, and sexual exploitation, while boys are trafficked for forced street hawking and forced labor in small workshops

tier rating: Tier 2 Watch List - Gabon is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat human trafficking in 2007, particularly in terms of efforts to convict and punish trafficking offenders; the government has not reported the convictions or sentences of any trafficking offenders; the government did not take steps to reduce demand for commercial sex acts (2008)

Guatemala

current situation: Guatemala is a source, transit, and destination country for Guatemalans and Central Americans trafficked for the purposes of commercial sexual exploitation and forced labor; human trafficking is a significant and growing problem in the country; Guatemalan women and children are trafficked within the country for commercial sexual exploitation, primarily to Mexico and the United States; Guatemalan men, women, and children are also trafficked within the country, and to Mexico and the United States, for forced labor

tier rating: Tier 2 Watch List - for a second consecutive year, Guatemala is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat trafficking in persons, particularly with respect to ensuring that trafficking offenders are appropriately prosecuted for their crimes; while prosecutors initiated trafficking prosecutions, they continued to face problems in court with application of Guatemala's comprehensive anti-trafficking law; the government made modest improvements to its protection efforts, but assistance remained inadequate overall in 2007 (2008)

Guinea

current situation: Guinea is a source, transit, and destination country for men, women, and children trafficked for the purposes of forced labor and sexual exploitation; the majority of

victims are children, and internal trafficking is more prevalent than transnational trafficking; within the country, girls are trafficked primarily for domestic servitude and sexual exploitation, while boys are trafficked for forced agricultural labor, and as forced beggars, street vendors, shoe shiners, and laborers in gold and diamond mines; some Guinean men are also trafficked for agricultural labor within Guinea; transnationally, girls are trafficked into Guinea for domestic servitude and likely also for sexual exploitation

tier rating: Tier 2 Watch List - Guinea is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to eliminate trafficking over 2006; Guinea demonstrated minimal law enforcement efforts for a second year in a row, while protection efforts diminished over efforts in 2006; the government did not report any trafficking convictions in 2007; due to a lack of resources, the government does not provide shelter services for trafficking victims; the government took no measures to reduce the demand for commercial sexual exploitation (2008)

Guinea-Bissau

current situation: Guinea-Bissau is a source country for children trafficked primarily for forced begging and forced agricultural labor to other West African countries

tier rating: Tier 2 Watch List - for the second year in a row, Guinea-Bissau is on the Tier 2 Watch List for its failure to combat severe forms of trafficking in persons, as evidenced by the continued failure to pass an anti-trafficking law and inadequate efforts to investigate or prosecute trafficking crimes or convict and punish trafficking offenders (2008)

Guyana

current situation: Guyana is a source, transit, and destination country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; most trafficking appears to take place in remote mining camps in the country's interior; some women and girls are trafficked from northern Brazil; reporting from other nations suggests Guyanese women and girls are trafficked for sexual exploitation to neighboring countries and Guyanese men and boys are subject to labor exploitation in construction and agriculture; trafficking victims from Suriname, Brazil, and Venezuela transit Guyana en route to Caribbean destinations

tier rating: Tier 2 Watch List - for a second consecutive year, Guyana is on the Tier 2 Watch List for failing to provide evidence of increasing efforts to combat trafficking, particularly in the

area of law enforcement actions against trafficking offenders; the government has yet to produce an anti-trafficking conviction under the comprehensive Combating of Trafficking in Persons Act, which became law in 2005; the government operates no shelters for trafficking victims, but did include limited funding for anti-trafficking NGOs in its 2008 budget; the government did not make any effort to reduce demand for commercial sex acts during 2007 (2008)

India current situation: India is a source, destination, and transit country for men, women, and children trafficked for the purposes of forced labor and commercial sexual exploitation; internal forced labor may constitute India's largest trafficking problem; men, women, and children are held in debt bondage and face forced labor working in brick kilns, rice mills, agriculture, and embroidery factories; women and girls are trafficked within the country for the purposes of commercial sexual exploitation and forced marriage; children are subjected to forced labor as factory workers, domestic servants, beggars, and agriculture workers, and have been used as armed combatants by some terrorist and insurgent groups; India is also a destination for women and girls from Nepal and Bangladesh trafficked for the purpose of commercial sexual exploitation; Indian women are trafficked to the Middle East for commercial sexual exploitation; men and women from Bangladesh and Nepal are trafficked through India for forced labor and commercial sexual exploitation in the Middle East tier rating: Tier 2 Watch List - India is on the Tier 2 Watch List for a fifth consecutive year for its failure to provide evidence of increasing efforts to combat human trafficking in 2007; despite the reported extent of the trafficking crisis in India, government authorities made uneven efforts to prosecute traffickers and protect trafficking victims; government authorities continued to rescue victims of commercial sexual exploitation and forced child labor and child armed combatants, and began to show progress in law enforcement against these forms of trafficking; a critical challenge overall is the lack of punishment for traffickers, effectively resulting in impunity for acts of human trafficking; India has not ratified the 2000 UN TIP Protocol (2008)

Iran

current situation: Iran is a source, transit, and destination country for men, women, and children trafficked for the purposes of sexual exploitation and involuntary servitude; Iranian women are trafficked internally for the purpose of forced prostitution and for forced marriages to settle debts; Iranian and Afghan children living in Iran are trafficked internally for the purpose of forced marriages, commercial sexual exploitation and involuntary servitude as beggars or laborers to pay debts, provide income or support drug addiction of their families; press reports indicate that criminal organizations play a significant role in human trafficking to and from Iran, in connection with smuggling of migrants, drugs, and arms tier rating: Tier 3 - Iran did not provide evidence of law enforcement activities against trafficking, and credible reports indicate that Iranian authorities' response is not sufficient to penalize offenders, protect victims, and eliminate trafficking; some

aspects of Iranian law and policy hinder efforts to combat trafficking including punishment of victims and legal obstacles to punishing offenders; Iran has not ratified the 2000 UN TIP Protocol (2009)

Korea, North

current situation: North Korea is a source country for men, women, and children trafficked for the purposes of forced labor and commercial sexual exploitation; the most common form of trafficking involves North Korean women and girls who cross the border into China voluntarily; additionally, North Korean women and girls are lured out of North Korea to escape poor social and economic conditions by the promise of food, jobs, and freedom, only to be forced into prostitution, marriage, or exploitative labor arrangements once in China

tier rating: Tier 3 - North Korea does not fully comply with minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government does not acknowledge the existence of human rights abuses in the country or recognize trafficking, either within the country or transnationally; North Korea has not ratified the 2000 UN TIP Protocol (2008)

Kuwait

current situation: Kuwait is a destination country for men and women who migrate legally from South and Southeast Asia for domestic or low-skilled labor, but are subjected to conditions of involuntary servitude by employers in Kuwait including conditions of physical and sexual abuse, non-payment of wages, confinement to the home, and withholding of passports to restrict their freedom of movement; Kuwait is reportedly a transit point for South and East Asian workers recruited for low-skilled work in Iraq; some of these workers are deceived as to the true location and nature of this work, and others are subjected to conditions of involuntary servitude in Iraq

tier rating: Tier 3 - Kuwaiti government has shown an inability to define trafficking and has demonstrated insufficient political will to address human trafficking adequately; much of the human trafficking found in Kuwait involves domestic workers in private residences and the government is reluctant to prosecute Kuwaiti citizens; the government has not enacted legislation targeting human trafficking nor established a permanent shelter for victims of trafficking (2009)

Libya

current situation: Libya is a transit and destination country

for men and women from sub-Saharan Africa and Asia trafficked for the purposes of forced labor and commercial sexual exploitation
tier rating: Tier 2 Watch List - Libya is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to address trafficking in persons in 2007 when compared to 2006, particularly in the area of investigating and prosecuting trafficking offenses; Libya did not publicly release any data on investigations or punishment of any trafficking offenses (2008)

Malaysia

current situation: Malaysia is a destination and, to a lesser extent, a source and transit country for women and children trafficked for the purpose of commercial sexual exploitation, and men, women, and children for forced labor; Malaysia is mainly a destination country for men, women, and children who migrate willingly from South and Southeast Asia to work, some of whom are subjected to conditions of involuntary servitude by Malaysian employers in the domestic, agricultural, construction, plantation, and industrial sectors; to a lesser extent, some Malaysian women, primarily of Chinese ethnicity, are trafficked abroad for commercial sexual exploitation

tier rating: Tier 2 Watch List - the Government of Malaysia does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so, despite some progress in enforcing the 2007 comprehensive anti-trafficking law; it has yet to fully address labor trafficking in Malaysia; there are credible allegations of involvement of Malaysian immigration officials in trafficking and extorting Burmese refugees; the government did not develop mechanisms to effectively screen victims of trafficking in vulnerable groups and condones the confiscation of passports of migrant workers by employers (2009)

Mauritania

current situation: Mauritania is a source and destination country for children trafficked for forced labor and sexual exploitation; slavery-related practices, rooted in ancestral master-slave relationships, continue to exist in isolated parts of the country; Mauritanian boys called talibe are trafficked within the country by religious teachers for forced begging; children are also trafficked by street gangs within the country that force them to steal, beg, and sell drugs; girls are trafficked internally for domestic servitude and sexual exploitation; women and children from neighboring states are trafficked into Mauritania for purposes of forced begging, domestic servitude, and sexual exploitation

tier rating: Tier 3 - the Government of Mauritania does not fully

comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government did not show evidence of overall progress in prosecuting and punishing trafficking offenders, protecting trafficking victims, and preventing new incidents of trafficking during the past year; progress that the previous government demonstrated in 2007 through enactment of strengthened anti-slavery legislation and deepened political will to eliminate slavery and trafficking has stalled; law enforcement efforts to address human trafficking including traditional slavery practices decreased (2009)

Moldova

current situation: Moldova is a major source and, to a lesser extent, a transit country for women and girls trafficked for the purpose of commercial sexual exploitation; Moldovan women are trafficked to the Middle East, Eastern Europe, and Western Europe; girls and young women are trafficked within the country from rural areas to Chisinau; children are also trafficked to neighboring countries for forced labor and begging; labor trafficking of men to work in the construction, agriculture, and service sectors of Russia is increasingly a problem; according to an ILO report, Moldova's national Bureau of Statistics estimated that there were likely over 25,000 Moldovan victims of trafficking for forced labor in 2008

tier rating: Tier 2 Watch List - The Government of Moldova does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; despite initial efforts to combat trafficking-related complicity since the government's reassessment on the Tier 2 Watch List in September 2008, and increased victim assistance, the government did not demonstrate sufficiently meaningful efforts to curb trafficking-related corruption, which is a government-acknowledged problem in Moldova; the government improved victim protection efforts, deployed more law-enforcement officers in the effort and contributed direct financial assistance toward victim protection and assistance for the first time (2010)

Niger

current situation: Niger is a source, transit, and destination country for children and women trafficked for forced labor and sexual exploitation; caste-based slavery practices, rooted in ancestral master-slave relationships, continue in isolated areas of the country - an estimated 8,800 to 43,000 Nigeriens live under conditions of traditional slavery; children are trafficked within Niger for forced begging, forced labor in gold mines, domestic servitude, sexual exploitation, and possibly for forced labor in

agriculture and stone quarries; women and children from neighboring states are trafficked to and through Niger for domestic servitude, sexual exploitation, forced labor in mines and on farms, and as mechanics and welders

tier rating: Tier 2 Watch List - the Government of Niger does not fully comply with the minimum standards for the elimination of trafficking and is not making any significant efforts to do so; the government demonstrated marginal efforts to combat human trafficking, including traditional slavery, during the last year (2009)

Papua New Guinea

current situation: Papua New Guinea is a country of destination for women and children from Malaysia, the Philippines, Thailand, and China trafficked for the purpose of commercial sexual exploitation; internal trafficking of women and children for the purposes of sexual exploitation and involuntary domestic servitude occurs as well

tier rating: Tier 3 - Papua New Guinea does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the current legal framework does not contain elements of crimes that characterize trafficking; the government lacks victim protection services or a systematic procedure to identify victims of trafficking; the government did not prosecute anyone in 2007 for trafficking; Papua New Guinea has not ratified the 2000 UN TIP Protocol (2008)

Qatar

current situation: Qatar is a destination country for men and women from South and Southeast Asia who migrate willingly, but are subsequently trafficked into involuntary servitude as domestic workers and laborers, and, to a lesser extent, commercial sexual exploitation; the most common offense was forcing workers to accept worse contract terms than those under which they were recruited; other conditions include bonded labor, withholding of pay, restrictions on movement, arbitrary detention, and physical, mental, and sexual abuse

tier rating: Tier 2 Watch List - the Government of Qatar does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in February 2009, Qatar enacted a new migrant worker sponsorship law that criminalizes some practices commonly used by trafficking offenders, and it announced plans to use that law effectively to prevent human trafficking; punishment for offenses related to trafficking in persons remains lower than that for crimes such as

rape and kidnapping, and the Qatari government has yet to take significant action to investigate, prosecute, and punish trafficking offenses; the government continues to lack formal victim identification procedures and, as a result, victims of trafficking are likely punished for acts committed as a direct result of being trafficked (2009)

Russia

current situation: Russia is a source, transit, and destination country for men, women, and children trafficked for various purposes; it remains a significant source of women trafficked to over 50 countries for commercial sexual exploitation; Russia is also a transit and destination country for men and women trafficked from Central Asia, Eastern Europe, and North Korea to Central and Western Europe and the Middle East for purposes of forced labor and sexual exploitation; internal trafficking remains a problem in Russia with women trafficked from rural areas to urban centers for commercial sexual exploitation, and men trafficked internally and from Central Asia for forced labor in the construction and agricultural industries; debt bondage is common among trafficking victims, and child sex tourism remains a concern
tier rating: Tier 2 Watch List - Russia is on the Tier 2 Watch List for a fifth consecutive year for its failure to show evidence of increasing efforts to combat trafficking over the previous year, particularly in providing assistance to victims of trafficking; comprehensive trafficking victim assistance legislation, which would address key deficiencies, has been pending before the Duma since 2003 and was neither passed nor enacted in 2007 (2008)

Saudi Arabia

current situation: Saudi Arabia is a destination country for workers from South and Southeast Asia who are subjected to conditions that constitute involuntary servitude including being subjected to physical and sexual abuse, non-payment of wages, confinement, and withholding of passports as a restriction on their movement; domestic workers are particularly vulnerable because some are confined to the house in which they work unable to seek help; Saudi Arabia is also a destination country for Nigerian, Yemeni, Pakistani, Afghan, Somali, Malian, and Sudanese children trafficked for forced begging and involuntary servitude as street vendors; some Nigerian women were reportedly trafficked into Saudi Arabia for commercial sexual exploitation
tier rating: Tier 3 - Saudi Arabia does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government continues to

lack adequate anti-trafficking laws and, despite evidence of widespread trafficking abuses, did not report any criminal prosecutions, convictions, or prison sentences for trafficking crimes committed against foreign domestic workers (2008)

Sri Lanka

current situation: Sri Lanka is a source and destination country for men and women trafficked for the purposes of involuntary servitude and commercial sexual exploitation; Sri Lankan men and women migrate willingly to the Persian Gulf, Middle East, and East Asia to work as construction workers, domestic servants, or garment factory workers, where some find themselves in situations of involuntary servitude when faced with restrictions on movement, withholding of passports, threats, physical or sexual abuse, and debt bondage; children are trafficked internally for commercial sexual exploitation and, less frequently, for forced labor

tier rating: Tier 2 Watch List - for a fourth consecutive year, Sri Lanka is on the Tier 2 Watch List for failing to provide evidence of increasing efforts to combat severe forms of human trafficking, particularly in the area of law enforcement; the government failed to arrest, prosecute, or convict any person for trafficking offenses and continued to punish some victims of trafficking for crimes committed as a result of being trafficked; Sri Lanka has not ratified the 2000 UN TIP Protocol (2008)

Sudan

current situation: Sudan is a source country for men, women, and children trafficked internally for the purposes of forced labor and sexual exploitation; Sudan is also a transit and destination country for Ethiopian women trafficked abroad for domestic servitude; Sudanese women and girls are trafficked within the country as well as possibly to Middle Eastern countries for domestic servitude; the terrorist rebel organization, Lord's Resistance Army, continues to harbor small numbers of Sudanese and Ugandan children in the southern part of the country for use as cooks, porters, and combatants; some of these children are also trafficked across borders into Uganda or the Democratic Republic of the Congo; militia groups in Darfur, some of which are linked to the government, abduct women for short periods of forced labor and to perpetrate sexual violence; during the two decades-long north-south civil war, thousands of Dinka women and children were abducted and subsequently enslaved by members of the Missiriya and Rezeigat tribes; while there have been no known new abductions of Dinka by members of Baggara tribes in the last few years, inter-tribal abductions continue in southern Sudan

tier rating: Tier 3 - Sudan does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; combating human trafficking through law enforcement or prevention measures was not a priority for the government in 2007 (2008)

Swaziland

current situation: Swaziland is a source, destination, and transit country for women and children trafficked internally and transnationally for the purposes of commercial sexual exploitation, domestic servitude, and forced labor in agriculture; Swazi girls, particularly orphans, are trafficked internally for commercial sexual exploitation and domestic servitude, as well as to South Africa and Mozambique; Swazi boys are trafficked for forced labor in commercial agriculture and market vending; some Swazi women are forced into prostitution in South Africa and Mozambique after voluntarily migrating to these countries in search of work

tier rating: Tier 2 Watch List - the government of Swaziland does not comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government believes that trafficking probably does occur, but does not know the extent of the problem; the government does not judge trafficking to be an "important" problem and chooses to direct its limited resources towards other issues, a judgment which significantly limited the government's current efforts to eliminate human trafficking, or to plan anti-trafficking activities or initiatives for the future (2010)

Syria

current situation: Syria is a destination and transit country for women and children trafficked for commercial sexual exploitation and forced labor; a significant number of women and children in the large and expanding Iraqi refugee community in Syria are reportedly forced into commercial sexual exploitation by Iraqi gangs or, in some cases, their families; women from Indonesia, Sri Lanka, the Philippines, Ethiopia, and Sierra Leone are recruited for work in Syria as domestic servants, but some face conditions of involuntary servitude, including long hours, non-payment of wages, withholding of passports, restrictions on movement, threats, and physical or sexual abuse

tier rating: Tier 2 Watch List - Syria again failed to report any law enforcement efforts to punish trafficking offenses in 2007; in addition, the government did not offer protection services to victims of trafficking and may have arrested, prosecuted, or deported some victims for prostitution or immigration violations;

Syria has not ratified the 2000 UN TIP Protocol (2008)

Tajikistan

current situation: Tajikistan is a source country for women trafficked through Kyrgyzstan and Russia to the UAE, Turkey, and Russia for the purpose of commercial sexual exploitation; men are trafficked to Russia and Kazakhstan for the purpose of forced labor, primarily in the construction and agricultural industries; boys and girls are trafficked internally for various purposes, including forced labor and forced begging

tier rating: Tier 2 Watch List - Tajikistan is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat human trafficking, especially efforts to investigate, prosecute, convict, and sentence traffickers; despite evidence of low- and mid-level officials' complicity in trafficking, the government did not punish any public officials for trafficking complicity during 2007; lack of capacity and poor coordination between government institutions remained key obstacles to effective anti-trafficking efforts (2008)

Uzbekistan

current situation: Uzbekistan is a source country for women and girls trafficked to Kazakhstan, Russia, Middle East, and Asia for the purpose of commercial sexual exploitation; men are trafficked to Kazakhstan and Russia for purposes of forced labor in the construction, cotton, and tobacco industries; men and women are also trafficked internally for the purposes of domestic servitude, forced labor in the agricultural and construction industries, and for commercial sexual exploitation

tier rating: Tier 2 Watch List - Uzbekistan is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat severe forms of trafficking in 2007; the government did not amend its criminal code to increase penalties for convicted traffickers; in March 2008, Uzbekistan adopted ILO Conventions on minimum age of employment and on the elimination of the worst forms of child labor and is working with the ILO on implementation; the government also demonstrated its increasing commitment to combat trafficking in March 2008 by adopting a comprehensive anti-trafficking law; Uzbekistan has not ratified the 2000 UN TIP Protocol (2008)

Venezuela

current situation: Venezuela is a source, transit, and destination country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor;

Venezuelan women and girls are trafficked within the country for sexual exploitation, lured from the nation's interior to urban and tourist areas; child prostitution in urban areas and child sex tourism in resort destinations appear to be growing; Venezuelan women and girls are trafficked for commercial sexual exploitation to Western Europe, Mexico, and Caribbean destinations

tier rating: Tier 2 Watch List - Venezuela is placed on the Tier 2 Watch List, up from Tier 3, as it showed greater resolve to address trafficking through law enforcement measures and prevention efforts in 2007, although stringent punishment of offenders and victim assistance remain lacking (2008)

World

current situation: approximately 800,000 people, mostly women and children, are trafficked annually across national borders, not including millions trafficked within their own countries; at least 80% of the victims are female and up to 50% are minors; 75% of all victims are trafficked into commercial sexual exploitation; almost two-thirds of the global victims are trafficked intra-regionally within East Asia and the Pacific (260,000 to 280,000 people) and Europe and Eurasia (170,000 to 210,000 people)

Tier 2 Watch List: Algeria, Angola, Argentina, Azerbaijan, Bahrain, Bangladesh, Belize, Burundi, Cambodia, Cameroon, Central African Republic, China, Cote d'Ivoire, Democratic Republic of the Congo, Djibouti, Dominican Republic, Egypt, Equatorial Guinea, Federated States of Micronesia, Gabon, Ghana, Guatemala, Guinea, Guinea-Bissau, Guyana, India, Iraq, Latvia, Lebanon, Lesotho, Libya, Mali, Moldova, Montenegro, Nicaragua, Pakistan, Philippines, Qatar, Republic of the Congo, Russia, Saint Vincent and the Grenadines, Senegal, Sri Lanka, Tajikistan, Tunisia, Turkmenistan, Ukraine, United Arab Emirates, Uzbekistan, Venezuela, Yemen

Tier 3: Burma, Chad, Cuba, Eritrea, Fiji, Iran, Kuwait, Malaysia, Mauritania, Niger, North Korea, Papua New Guinea, Saudi Arabia, Sudan, Swaziland, Syria, Zimbabwe (2009)

Zimbabwe current situation: Zimbabwe is a source, transit, and destination country for men, women, and children trafficked for the purposes of forced labor and sexual exploitation; large scale migration of Zimbabweans to surrounding countries - as they flee a progressively more desperate situation at home - has increased; rural Zimbabwean men, women, and children are trafficked internally to farms for agricultural labor and domestic servitude and to cities for domestic labor and commercial sexual exploitation; NGOs believe internal trafficking increased during the year, largely due to the closure of schools, worsening political violence, and a faltering economy; young men and boys are trafficked to South Africa for farm work, often laboring for months in South Africa without pay before "employers" have them arrested and deported as illegal immigrants; young women and girls are lured abroad with false employment offers that result in involuntary domestic servitude or commercial sexual exploitation; men, women, and children from neighboring states are trafficked through Zimbabwe en route to South Africa tier rating: Tier 3 - the Government of Zimbabwe does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government made minimal progress in combating trafficking in 2008, and members of its military and the former ruling party's youth militias perpetrated acts of trafficking on local populations; anti-trafficking efforts were further weakened as it failed to address Zimbabwe's economic and social problems during the reporting period, thus increasing the population's vulnerability to trafficking within and outside of the country (2009)

Field Listing :: Stock of direct foreign investment - at home

This entry gives the cumulative US dollar value of all investments in the home country made directly by residents - primarily companies - of other countries as of the end of the time period indicated. Field Listing :: Market value of publicly traded shares

This entry gives the value of shares issued by publicly traded companies at a price determined in the national stock markets on the final day of the period indicated. It is simply the latest price per share multiplied by the total number of outstanding shares, cumulated over all companies listed on the particular exchange. Country Comparison to the World Country

Field Listing :: Total renewable water resources

This entry provides the long-term average water availability for a country in cubic kilometers of precipitation, recharged ground water, and surface inflows from surrounding countries. The values have been adjusted to account for overlap resulting from surface flow recharge of groundwater sources. Total renewable water resources provides the water total available to a country but does not include water resource totals that have been reserved for upstream or downstream countries through international agreements. Note that these values are averages and do not accurately reflect the total available in any given year. Annual available resources can vary greatly due to short-term and long-term climatic and weather variations.

Country

Field Listing :: Freshwater withdrawal

(domestic/industrial/agricultural)

This entry provides the annual quantity of water in cubic kilometers removed from available sources for use in any purpose. Water drawn-off is not necessarily entirely consumed and some portion may be returned for further use downstream. Domestic sector use refers to water supplied by public distribution systems. Note that some of this total may be used for small industrial and/or limited agricultural purposes. Industrial sector use is the quantity of water used by self-supplied industries not connected to a public distribution system. Agricultural sector use includes water used for irrigation and livestock watering, and does not account for agriculture directly dependent on rainfall. Included are figures for total annual water withdrawal and per capita water withdrawal. Country

Field Listing :: Geographic overview

Country

Geographic overview

World

The surface of the earth is approximately 70.9% water and 29.1% land. The former portion is divided into large water bodies termed oceans. The World Factbook recognizes and describes five oceans, which are in decreasing order of size: the Pacific Ocean, Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean. The land portion is generally divided into several, large, discrete landmasses termed continents. Depending on the convention used, the number of continents can vary from five to seven. The most common classification recognizes seven, which are (from largest to smallest): Asia, Africa, North America, South America, Antarctica, Europe, and Australia. Asia and Europe are sometimes lumped together into a Eurasian continent resulting in six continents.

Alternatively, North and South America are sometimes grouped as simply the Americas, resulting in a continent total of six (or five,

if the Eurasia designation is used).

North America is commonly understood to include the island of Greenland, the isles of the Caribbean, and to extend south all the way to the Isthmus of Panama. The easternmost extent of Europe is generally defined as being the Ural Mountains and the Ural River; on the southeast the Caspian Sea; and on the south the Caucasus Mountains, the Black Sea, and the Mediterranean. Portions of Azerbaijan, Georgia, Kazakhstan, Russia, and Turkey fall within both Europe and Asia, but in every instance the larger section is in Asia. These countries are considered part of both continents.

Armenia and Cyprus, which lie completely in Western Asia, are geopolitically European countries.

Asia usually incorporates all the islands of the Philippines, Malaysia, and Indonesia. The islands of the Pacific are often lumped with Australia into a "land mass" termed Oceania or Australasia.

Africa's northeast extremity is frequently delimited at the Isthmus of Suez, but for geopolitical purposes, the Egyptian Sinai Peninsula is often included as part of Africa.

Although the above groupings are the most common, different continental dispositions are recognized or taught in certain parts of the world, with some arrangements more heavily based on cultural spheres rather than physical geographic considerations.

Field Listing :: Economy of the area administered by Turkish Cypriots

Country

Economy of the area administered by Turkish Cypriots

Cyprus

Economy - overview: The Turkish Cypriot economy has roughly half the per capita GDP of the south, and economic growth tends to be volatile, given the north's relative isolation, bloated public sector, reliance on the Turkish lira, and small market size.

Agriculture and services, together, employ more than half of the

work force. The Turkish Cypriot economy grew around 10.6% in 2006, fueled by growth in the construction and education sectors, as well as increased employment of Turkish Cypriots in the area under government control. GDP declined about 2.0% in 2007. The Turkish Cypriots are heavily dependent on transfers from the Turkish Government. Ankara directly finances about one-third of the "TRNC's" budget. Aid from Turkey has exceeded \$400 million annually in recent years. The Turkish Cypriot economy experienced a sharp slowdown in 2008-09 due to the global financial crisis and, because of its reliance on British and Turkish tourism, which has declined due to the recession. Turkish Cypriot finances also deteriorated in 2009 as decreased state revenues and increased government expenditures on public sector salaries and social services led to a large budget deficit. As tourism and the world economy picked up, the economy grew about 0.6% in 2010.

GDP (purchasing power parity): \$1.829 billion (2007 est.)

GDP - real growth rate: -0.6% (2010 est.)

GDP - per capita: \$11,700 (2007 est.)

GDP - composition by sector: agriculture: 8.6%, industry: 22.5%, services: 69.1% (2006 est.)

Labor force: 95,030 (2007 est.)

Labor force - by occupation: agriculture: 14.5%, industry: 29%, services: 56.5% (2004)

Unemployment rate: 9.4% (2005 est.)

Population below poverty line: %NA

Inflation rate: 11.4% (2006)

Budget: revenues: \$2.5 billion, expenditures: \$2.5 billion (2006)

Agriculture - products: citrus fruit, dairy, potatoes, grapes, olives, poultry, lamb

Industries: foodstuffs, textiles, clothing, ship repair, clay, gypsum, copper, furniture

Industrial production growth rate: -0.3% (2007 est.)

Electricity production: 998.9 million kWh (2005)

Electricity consumption: 797.9 million kWh (2005)

Exports: \$68.1 million, f.o.b. (2007 est.)

Export - commodities: citrus, dairy, potatoes, textiles

Export - partners: Turkey 40%; direct trade between the area administered by Turkish Cypriots and the area under government control remains limited

Imports: \$1.2 billion, f.o.b. (2007 est.)

Import - commodities: vehicles, fuel, cigarettes, food, minerals, chemicals, machinery

Import - partners: Turkey 60%; direct trade between the area administered by Turkish Cypriots and the area under government control remains limited

Reserves of foreign exchange and gold: \$NA

Debt - external: \$NA

Field Listing :: School life expectancy (primary to tertiary
education)

School life expectancy (SLE) is the total number of years of schooling (primary to tertiary) that a child can expect to receive, assuming that the probability of his or her being enrolled in school at any particular future age is equal to the current enrollment ratio at that age. Caution must be maintained when utilizing this indicator in international comparisons. For example, a year or grade completed in one country is not necessarily the same in terms of educational content or quality as a year or grade completed in another country. SLE represents the expected number of years of schooling that will be completed, including years spent repeating one or more grades.

Field Listing :: Urbanization

This entry provides two measures of the degree of urbanization of a population. The first, urban population, describes the percentage of the total population living in urban areas, as defined by the country. The second, rate of urbanization, describes the projected average rate of change of the size of the urban population over the given period of time. Additionally, the World entry includes a list of the ten largest urban agglomerations. An urban agglomeration is defined as comprising the city or town proper and also the suburban fringe or thickly settled territory lying outside of, but adjacent to, the boundaries of the city. Country

Urbanization(%)

Afghanistan

urban population: 24% of total population (2008)
rate of urbanization: 5.4% annual rate of change (2005-10 est.)

Albania

urban population: 47% of total population (2008)
rate of urbanization: 1.9% annual rate of change (2005-10 est.)

Algeria

urban population: 65% of total population (2008)
rate of urbanization: 2.5% annual rate of change (2005-10 est.)

American Samoa

urban population: 92% of total population (2008)
rate of urbanization: 2.4% annual rate of change (2005-10 est.)

Andorra

urban population: 89% of total population (2008)
rate of urbanization: -0.2% annual rate of change (2005-10 est.)

Angola

urban population: 57% of total population (2008)
rate of urbanization: 4.4% annual rate of change (2005-10 est.)

Anguilla

urban population: 100% of total population (2008)
rate of urbanization: 1.4% annual rate of change (2005-10 est.)

Antigua and Barbuda

urban population: 30% of total population (2008)
rate of urbanization: 0.9% annual rate of change (2005-10 est.)

Argentina

urban population: 92% of total population (2008)
rate of urbanization: 1.2% annual rate of change (2005-10 est.)

Armenia

urban population: 64% of total population (2008)
rate of urbanization: -0.3% annual rate of change (2005-10 est.)

Aruba

urban population: 47% of total population (2008)
rate of urbanization: 0.1% annual rate of change (2005-10 est.)

Australia

urban population: 89% of total population (2008)
rate of urbanization: 1.2% annual rate of change (2005-10 est.)

Austria

urban population: 67% of total population (2008)
rate of urbanization: 0.7% annual rate of change (2005-10 est.)

Azerbaijan

urban population: 52% of total population (2008)
rate of urbanization: 1% annual rate of change (2005-10 est.)

Bahamas, The

urban population: 84% of total population (2008)
rate of urbanization: 1.4% annual rate of change (2005-10 est.)

Bahrain

urban population: 89% of total population (2008)
rate of urbanization: 1.8% annual rate of change (2005-10 est.)

Bangladesh

urban population: 27% of total population (2008)
rate of urbanization: 3.5% annual rate of change (2005-10 est.)

Barbados

urban population: 40% of total population (2008)
rate of urbanization: 1.5% annual rate of change (2005-10 est.)

Belarus

urban population: 73% of total population (2008)
rate of urbanization: 0% annual rate of change (2005-10 est.)

Belgium

urban population: 97% of total population (2008)
rate of urbanization: 0.3% annual rate of change (2005-10 est.)

Belize

urban population: 52% of total population (2008)
rate of urbanization: 3.1% annual rate of change (2005-10 est.)

Benin

urban population: 41% of total population (2008)
rate of urbanization: 4% annual rate of change (2005-10 est.)

Bermuda

urban population: 100% of total population (2008)
rate of urbanization: 0.3% annual rate of change (2005-10 est.)

Bhutan

urban population: 35% of total population (2008)
rate of urbanization: 4.9% annual rate of change (2005-10 est.)

Bolivia

urban population: 66% of total population (2008)
rate of urbanization: 2.5% annual rate of change (2005-10 est.)

Bosnia and Herzegovina

urban population: 47% of total population
(2008)
rate of urbanization: 1.4% annual rate of change (2005-10 est.)

Botswana

urban population: 60% of total population (2008)
rate of urbanization: 2.5% annual rate of change (2005-10 est.)

Brazil

urban population: 86% of total population (2008)
rate of urbanization: 1.8% annual rate of change (2005-10 est.)

British Virgin Islands

urban population: 40% of total population

(2008)

rate of urbanization: 1.7% annual rate of change (2005-10 est.)

Brunei

urban population: 75% of total population (2008)

rate of urbanization: 2.6% annual rate of change (2005-10 est.)

Bulgaria

urban population: 71% of total population (2008)

rate of urbanization: -0.3% annual rate of change (2005-10 est.)

Burkina Faso

urban population: 20% of total population (2008)

rate of urbanization: 5% annual rate of change (2005-10 est.)

Burma

urban population: 33% of total population (2008)

rate of urbanization: 2.9% annual rate of change (2005-10 est.)

Burundi

urban population: 10% of total population (2008)

rate of urbanization: 6.8% annual rate of change (2005-10 est.)

Cambodia

urban population: 22% of total population (2008)

rate of urbanization: 4.6% annual rate of change (2005-10 est.)

Cameroon

urban population: 57% of total population (2008)

rate of urbanization: 3.5% annual rate of change (2005-10 est.)

Canada

urban population: 80% of total population (2008)

rate of urbanization: 1% annual rate of change (2005-10 est.)

Cape Verde

urban population: 60% of total population (2008)

rate of urbanization: 3.5% annual rate of change (2005-10 est.)

Cayman Islands

urban population: 100% of total population (2008)

rate of urbanization: 1.5% annual rate of change (2005-10 est.)

Central African Republic

urban population: 39% of total population

(2008)

rate of urbanization: 2.3% annual rate of change (2005-10 est.)

Chad

urban population: 27% of total population (2008)

rate of urbanization: 4.7% annual rate of change (2005-10 est.)

Chile

urban population: 88% of total population (2008)

rate of urbanization: 1.3% annual rate of change (2005-10 est.)

China

urban population: 43% of total population (2008)

rate of urbanization: 2.7% annual rate of change (2005-10 est.)

Colombia

urban population: 74% of total population (2008)

rate of urbanization: 1.7% annual rate of change (2005-10 est.)

Comoros

urban population: 28% of total population (2008)

rate of urbanization: 2.7% annual rate of change (2005-10 est.)

Congo, Democratic Republic of the

urban population: 34% of total
population (2008)

urban population: 39% of total population (2008)
rate of urbanization: 2.8% annual rate of change (2005-10 est.)

Eritrea

urban population: 21% of total population (2008)

rate of urbanization: 5.4% annual rate of change (2005-10 est.)

Estonia

urban population: 69% of total population (2008)

rate of urbanization: -0.3% annual rate of change (2005-10 est.)

Ethiopia

urban population: 17% of total population (2008)

rate of urbanization: 4.3% annual rate of change (2005-10 est.)

Falkland Islands (Islas Malvinas) urban population: 92% of total population (2008) rate of urbanization: 1.2% annual rate of change (2005-10 est.)

Faroe Islands

urban population: 41% of total population (2008)

rate of urbanization: 2% annual rate of change (2005-10 est.)

Fiji

urban population: 52% of total population (2008)

rate of urbanization: 1.6% annual rate of change (2005-10 est.)

Finland

urban population: 63% of total population (2008)

rate of urbanization: 0.8% annual rate of change (2005-10 est.)

France

urban population: 77% of total population (2008)

rate of urbanization: 0.8% annual rate of change (2005-10 est.)

French Polynesia

urban population: 52% of total population (2008)

rate of urbanization: 1.3% annual rate of change (2005-10 est.)

Gabon

urban population: 85% of total population (2008)

rate of urbanization: 2.1% annual rate of change (2005-10 est.)

Gambia, The

urban population: 57% of total population (2008)

rate of urbanization: 4.2% annual rate of change (2005-10 est.)

Gaza Strip

urban population: 72% of total population (2008)

rate of urbanization: 3.3% annual rate of change (2005-10 est.)

Georgia

urban population: 53% of total population (2008)

rate of urbanization: -0.6% annual rate of change (2005-10 est.)

Germany

urban population: 74% of total population (2008)

rate of urbanization: 0.1% annual rate of change (2005-10 est.)

Ghana

urban population: 50% of total population (2008)

rate of urbanization: 3.5% annual rate of change (2005-10 est.)

Gibraltar

urban population: 100% of total population (2008)

rate of urbanization: 0.1% annual rate of change (2005-10 est.)

Greece

urban population: 61% of total population (2008)

rate of urbanization: 0.6% annual rate of change (2005-10 est.)

Greenland

urban population: 84% of total population (2008)

rate of urbanization: 0.9% annual rate of change (2005-10 est.)

Grenada

urban population: 31% of total population (2008)

rate of urbanization: 0.3% annual rate of change (2005-10 est.)

Guam

urban population: 93% of total population (2008)

rate of urbanization: 1.3% annual rate of change (2005-10 est.)

Guatemala

urban population: 49% of total population (2008)

rate of urbanization: 3.4% annual rate of change (2005-10 est.)

Guernsey

urban population: 31% of total population (2008)

rate of urbanization: 0.6% annual rate of change (2005-10 est.)

Guinea

urban population: 34% of total population (2008)

rate of urbanization: 3.5% annual rate of change (2005-10 est.)

Guinea-Bissau

urban population: 30% of total population (2008)

rate of urbanization: 3.2% annual rate of change (2005-10 est.)

Guyana

urban population: 28% of total population (2008)

rate of urbanization: 0% annual rate of change (2005-10 est.)

urban population: 37% of total population (2008)

rate of urbanization: 2.2% annual rate of change (2005-10 est.)

Field Listing :: Broadcast media

This entry provides information on the approximate number of public and private TV and radio stations in a country, as well as basic information on the availability of satellite and cable TV services. Country

Broadcast media

Afghanistan

state-owned broadcaster, Radio Television Afghanistan (RTA), operates a series of radio and television stations in Kabul and the provinces; an estimated 50 private radio stations, 8 TV networks, and about a dozen international broadcasters are available; more than 30 community-based radio stations broadcasting (2007)

Akrotiri

British Forces Broadcast Service (BFBS) provides multi-channel satellite TV service as well as BFBS radio broadcasts to the Akrotiri Sovereign Base (2009)

Albania

2 public television networks, one of which transmits by satellite to Albanian-language communities in neighboring countries; more than 60 private television stations operating; many viewers can pick up Italian and Greek TV broadcasts via terrestrial reception; cable TV service is available; 2 public radio networks and roughly 50 private radio stations; several international broadcasters are available (2008)

Algeria

state-run Radio-Télévision Algérienne operates the broadcast media and carries programming in Arabic, Berber dialects, and French; use of satellite dishes is widespread, providing easy access to European and Arab satellite stations; state-run radio operates several national networks and roughly 40 regional radio stations (2007)

American Samoa

3 television stations broadcasting; multi-channel pay-per-view television services are available; about a dozen radio stations, some of which are repeater stations (2009)

Andorra

1 public television station and 2 public radio stations; a few commercial radio stations operating; good reception of radio and TV broadcasts from stations in France and Spain (2008)

Angola

state controls all broadcast media with nationwide reach; state-owned Televisao Popular de Angola (TPA) provides terrestrial TV service on 2 channels; a third TPA channel is available via cable and satellite; TV subscription services are available; state-owned Radio Nacional de Angola (RNA) broadcasts on 5 stations; about a half dozen private radio stations broadcast locally (2008)

Anguilla

1 private television station; multi-channel cable TV subscription services are available; about 10 radio stations, one of which is government-owned (2007)

Antigua and Barbuda

state-controlled Antigua and Barbuda Broadcasting Service (ABS) operates 1 TV station; multi-channel cable TV subscription services are available; 1 radio station operated by ABS; roughly 15 radio stations, some broadcasting on multiple frequencies (2007)

Argentina

government owns a TV station and a radio network; more than 2 dozen TV stations and hundreds of privately-owned radio stations; high rate of cable TV subscription usage (2007)

Armenia

2 public television networks operating alongside more than 40 privately-owned television stations that provide local to near nationwide coverage; major Russian broadcast stations are widely available; subscription cable TV services are available in most regions; Public Radio of Armenia is a national, state-run broadcast network that operates alongside about 20 privately-owned radio stations; several major international broadcasters are available (2008)

Aruba

2 commercial television stations; cable TV subscription service provides access to foreign channels; about 20 commercial radio stations broadcast (2007)

Australia

the Australian Broadcasting Corporation (ABC) runs multiple national and local radio networks and TV stations, as well as Australia Network, a TV service that broadcasts throughout the Asia-Pacific region and is the main public broadcaster; Special Broadcasting Service (SBS), a second large public broadcaster, operates radio and TV networks broadcasting in multiple languages; several large national commercial TV networks, a large number of local commercial TV stations, and hundreds of commercial radio stations are accessible; cable and satellite systems are available (2008)

Austria

Austria's public broadcaster, ORF, was the main broadcast source until commercial radio and television service was introduced in the 1990s; cable and satellite TV are available, including German TV stations (2008)

Azerbaijan

1 state-run and 1 public television channel; 4 domestic commercial TV stations and about 15 regional TV stations; Turkish, Russian, and Iranian TV and radio broadcasts are available, especially in border regions; cable TV services are available in Baku; 1 state-run and 1 public radio network operating; a small number of private commercial radio stations broadcasting; local FM relays of Baku commercial stations are available in many localities; local relays of several international broadcasters had been available until late 2008 when their broadcasts were banned from FM frequencies (2008)

Bahamas, The

2 television stations operated by government-owned, commercially run Broadcasting Corporation of the Bahamas (BCB); multi-channel cable TV subscription service is available; about 15 radio stations operating with BCB operating a multi-channel radio broadcasting network alongside privately-owned radio stations (2007)

Bahrain

state-run broadcast media; Bahrain Radio and Television Corporation (BRTC) operates 5 terrestrial TV networks; satellite TV systems provide access to international broadcasts; state-run BRTC broadcasts over several radio stations; 1 private FM station directs broadcasts to Indian listeners; radio and TV broadcasts from countries in the region are available (2007)

Bangladesh

state-owned broadcaster (BTV) operates 1 terrestrial TV

station, 3 radio networks, and about 10 local stations; 8 private satellite TV stations and 3 private radio stations also broadcasting; foreign satellite TV stations are gaining audience share in the large cities; several international radio broadcasters are available (2007)

Barbados

government-owned Caribbean Broadcasting Corporation (CBC) operates the lone terrestrial television station; CBC also operates a multi-channel cable TV subscription service; roughly a dozen radio stations, consisting of a CBC-operated network alongside privately-owned radio stations, in operation (2007)

Belarus

4 state-controlled national TV channels; Polish and Russian TV broadcasts are available in some areas; state-run Belarusian Radio operates 3 national networks and an external service; Russian and Polish radio broadcasts are available (2007)

Belgium

a segmented market with the three major communities (Flemish, French, and German-speaking) each having responsibility for their own broadcast media; multiple TV channels exist for each community; additionally, in excess of 90% of households are connected to cable and can access broadcasts of TV stations from neighboring countries; each community has a public radio network co-existing with private broadcasters (2007)

Belize

8 privately-owned TV stations; multi-channel cable TV provides access to foreign stations; about 25 radio stations broadcasting on roughly 50 different frequencies; state-run radio was privatized in 1998 (2007)

Benin

state-run Office de Radiodiffusion et de Television du Benin (ORTB) operates a TV station with multiple channels giving it a wide broadcast reach; several privately-owned TV stations broadcast from Cotonou; satellite TV subscription service is available; state-owned radio, under ORTB control, includes a national station supplemented by a number of regional stations; substantial number of privately-owned radio broadcast stations; transmissions of a few international broadcasters are available on FM in Cotonou (2007)

Bermuda

3 television stations; cable and satellite TV subscription

services are available; roughly 10 radio stations operating (2007)

Bhutan

state-owned TV station established in 1999; cable TV service offers dozens of Indian and other international channels; first radio station, privately launched in 1973, is now state-owned; 1 private radio station began operations in 2006 (2007)

Bolivia

large number of radio and television broadcasting stations with private media outlets dominating; state-owned and private radio and television stations generally operating freely, although both pro-government and anti-government groups have attacked media outlets in response to their reporting (2007)

Bosnia and Herzegovina

3 public TV broadcasters: Radio and TV of Bosnia and Herzegovina, Federation TV (operating 2 networks), and Serb Republic Radio-TV; a local commercial network of 5 TV stations; 2 private, near-national TV stations and dozens of small independent TV stations broadcasting; 3 large public radio broadcasters and a large number of private radio stations (2007)

Botswana

2 TV stations - 1 state-owned and 1 privately-owned; privately-owned satellite TV subscription service is available; 2 state-owned national radio stations; 3 privately-owned radio stations broadcast locally (2007)

Brazil

state-run Radiobras operates a radio and a television network; more than 1,000 radio stations and more than 100 TV channels operating - mostly privately owned; private media ownership highly concentrated (2007)

British Indian Ocean Territory

Armed Forces Radio and Television Service (AFRTS) broadcasts over 3 separate frequencies for US and UK military personnel stationed on the islands (2009)

British Virgin Islands

1 private TV station; multi-channel TV is available from cable and satellite subscription services; about a half dozen private radio stations operating (2007)

Brunei

state-controlled Radio Television Brunei (RTB) operates 4 channels; 3 Malaysian TV stations are available; foreign TV broadcasts are available via satellite and cable systems; RTB operates 5 radio networks broadcasting on multiple frequencies; British Forces Broadcast Service (BFBS) provides radio broadcasts on 2 FM stations; some radio broadcast stations from Malaysia are available via repeaters (2009)

Bulgaria

4 national terrestrial television stations with 1 state-owned and 3 privately-owned; a vast array of TV stations are available from cable and satellite TV providers; state-owned national radio broadcasts over 3 networks; large number of private radio stations broadcasting, especially in urban areas (2007)

Burkina Faso

2 TV stations - 1 state-owned and 1 privately-owned; state-owned radio runs a national and regional network; substantial number of privately-owned radio broadcast stations; transmissions of several international broadcasters available in Ouagadougou (2007)

Burma

government controls all domestic broadcast media; 3 state-controlled television stations with 1 of the stations controlled by the armed forces; a fourth TV channel, a pay-TV station, is a joint state-private venture; access to satellite TV is limited with residents required to register and pay a fee for all satellite television receivers; 2 state-controlled domestic radio stations; transmissions of several international broadcasters are available in Burma; the opposition-backed station Democratic Voice of Burma broadcasts into Burma via shortwave (2009)

Burundi

state-controlled La Radiodiffusion et Television Nationale de Burundi (RTNB) operates the lone TV broadcast station and the only national radio network; about 10 privately-owned radio broadcast stations; transmissions of several international broadcasters are available in Bujumbura (2007)

Cambodia

mixture of state-owned, joint public-private, and privately-owned broadcast media; 9 TV broadcast stations with most operating on multiple channels, including 1 state-operated station broadcasting from multiple locations, 6 stations either jointly operated or privately-owned with some broadcasting from several locations, and 2 TV relay stations - one relaying a French

television station and the other relaying a Vietnamese television station; multi-channel cable and satellite systems are available; roughly 50 radio broadcast stations - 1 state-owned broadcaster with multiple stations and a large mixture of public and private broadcasters; several international broadcasters are available (2009)

Cameroon

government maintains tight control over broadcast media; state-owned Cameroon Radio Television (CRTV), broadcasting on both a television and radio network, was the only officially recognized and fully licensed broadcaster until August 2007 when the government finally issued licenses to 2 private TV broadcasters and 1 private radio broadcaster; about 70 privately-owned unlicensed radio stations operating but are subject to closure at any time; foreign news services required to partner with state-owned national station (2007)

Canada

2 public television broadcasting networks each with a large number of network affiliates; several private-commercial networks also with multiple network affiliates; overall, about 150 TV stations; multi-channel satellite and cable systems provide access to a wide range of stations including US stations; mix of public and commercial radio broadcasters with the Canadian Broadcasting Corporation (CBC), the public radio broadcaster, operating 4 radio networks, Radio Canada International, and radio services to indigenous populations in the north; roughly 2,000 licensed radio stations in Canada (2008)

state-run TV and radio broadcast network plus a growing number of private broadcasters; Portuguese public TV and radio services for Africa are available; transmissions of a few international broadcasters are obtainable (2007)

Cayman Islands

4 television stations; cable and satellite subscription services offer a variety of international programming; government-owned Radio Cayman operates 2 networks broadcasting on 5 stations; 10 privately-owned radio stations operate alongside Radio Cayman (2007)

Central African Republic

government-owned network, Radiodiffusion Television Centrafricaine, provides domestic TV broadcasting; licenses for 2 private TV stations are pending; state-owned radio

network is supplemented by a small number of privately-owned broadcast stations as well as a few community radio stations; transmissions of at least 2 international broadcasters are available (2007)

Chad

1 state-owned TV broadcast station; state-owned radio network, Radiodiffusion Nationale Tchadienne (RNT), operates national and regional stations; about 10 private radio stations; some stations rebroadcast programs from international broadcasters (2007)

Chile

national and local terrestrial television channels, coupled with extensive cable TV networks; the state-owned Television Nacional de Chile (TVN) network is self-financed through commercial advertising revenues and is not under direct government control; large number of privately-owned TV stations; about 250 radio stations (2007)

China

all broadcast media are owned by, or affiliated with, the Communist Party of China or a government agency; no privately-owned television or radio stations with state-run Chinese Central TV, provincial, and municipal stations offering more than 2,000 channels; the Central Propaganda Department lists subjects that are off limits to domestic broadcast media with the government maintaining authority to approve all programming; foreign-made TV programs must be approved prior to broadcast (2008)

Christmas Island

1 community radio station; broadcasts of several Australian radio and television stations are received via satellite (2009)

Cocos (Keeling) Islands

1 local radio station staffed by community volunteers; broadcasts of several Australian radio and TV stations are received via satellite (2009)

Colombia

combination of state-owned and privately-owned broadcast media provide service; more than 500 radio stations and large number of national, regional, and local TV stations (2007)

Comoros

national state-owned TV station and a TV station run by

Anjouan regional government; national state-owned radio; regional governments on the islands of Grande Comore and Anjouan each operate a radio station; a few independent and small community radio stations operate on the islands of Grande Comore and Moheli, and these two islands have access to Mayotte Radio and French TV (2007)

Congo, Democratic Republic of the
state-owned TV broadcast station
with near national coverage; more than a dozen privately-owned TV stations with 2 having near national coverage; 2 state-owned radio stations are supplemented by more than 100 private radio stations; transmissions of at least 2 international broadcasters are available (2007)

Congo, Republic of the
1 state-owned TV and 3 state-owned radio
stations; several privately-owned TV and radio stations; satellite TV service is available; rebroadcasts of several international
broadcasters are available (2007)

Cook Islands
1 privately-owned TV station broadcasts from Rarotonga
providing a mix of local news and overseas-sourced programs; a
satellite program package is available; 6 radio stations broadcast
with 1 reportedly reaching all of the islands (2009)

Costa Rica
multiple privately-owned television stations and 1
publicly-owned television station; cable network services are widely
available; more than 100 privately-owned radio stations and a public
radio network (2007)

Cote d'Ivoire
state-owned television operates 2 stations; no private
terrestrial TV stations, but satellite TV subscription service is
available; state-owned radio operates 2 stations; some private radio
stations; transmissions of several international broadcasters are
available (2007)

Croatia
the national state-owned public broadcaster, Croatian
Radiotelevision (HRT), operates 2 terrestrial TV networks, a
satellite channel that rebroadcasts programs for Croatians living
abroad, and 6 regional TV centers; 2 private broadcasters operate
national terrestrial networks; about 15 privately-owned regional TV
stations; multi-channel cable and satellite TV subscription services

are available; state-owned public broadcaster operates 3 national radio networks and a number of regional radio stations; 2 privately-owned national radio networks and a large number of regional, county, city, and community radio stations (2007)

Cuba

government owns and controls all broadcast media with private ownership of electronic media prohibited; government operates 4 national TV networks and many local TV stations; government operates 6 national radio networks, an international station, and many local radio stations; Radio-TV Marti is beamed from the US (2007)

Cyprus

mixture of state and privately-run television and radio services; the public broadcaster operates 2 TV channels and 4 radio stations; 6 private TV broadcasters, satellite and cable TV services including telecasts from Greece and Turkey, and a number of private radio stations are available; in areas administered by Turkish Cypriots, there are 2 public TV stations, 4 public radio stations, and privately-owned TV and radio broadcast stations (2007)

Czech Republic

roughly 130 television broadcasters operating some 350 television channels with 4 publicly operated and the remainder in private hands; 13 television stations have national coverage with 4 being publicly operated; cable and satellite TV subscription services are available; about 70 radio broadcasters are registered operating roughly 85 radio stations with 15 stations publicly operated; 16 radio stations provide national coverage with the remainder local or regional (2008)

Denmark

strong public-sector television presence with state-owned Danmarks Radio (DR) operating 4 channels and publicly-owned TV2 operating roughly a half dozen channels; broadcasts of privately-owned stations are available via satellite and cable feed; DR operates 4 nationwide FM radio stations, 15 digital audio broadcasting stations, and about 15 web-based radio stations; approximately 250 commercial and community radio stations are operational (2007)

Dhekelia

British Forces Broadcast Service (BFBS) provides multi-channel satellite TV service as well as BFBS radio broadcasts to the Dhekelia Sovereign Base (2009)

Djibouti

maintains restrictions on the licensing and operation of broadcast media; state-owned Radiodiffusion-Television de Djibouti (RTD) operates the sole terrestrial TV station as well as the only 2 domestic radio networks; no private TV or radio stations; transmissions of several international broadcasters are available (2007)

Dominica

no terrestrial television service available; subscription cable TV provider offers some locally produced programming plus channels from the US, Latin America, and the Caribbean; state-operated radio broadcasts on 6 stations; privately-owned radio broadcasts on about 15 stations (2007)

Dominican Republic

combination of state-owned and privately-owned broadcast media; 1 state-owned television network and a number of private TV networks; networks operate repeaters to extend signals throughout country; combination of state-owned and privately-owned radio stations; more than 300 radio stations operating (2007)

Ecuador private broadcast media dominate; all stations are privately-owned except for 1 government-controlled station; multiple television networks, a number of national TV channels, and a large number of local channels; more than 400 radio stations; broadcast media required by law to give the government free air time to broadcast programs produced by the state (2007)

the publicly-owned French Overseas Network (RFO), which operates in France's overseas departments and territories, broadcasts over the RFO Mayotte television and radio station (2008)

Mexico

large number of television stations and more than 1,400 radio stations, most are privately owned; the Televisa group once had a virtual monopoly in TV broadcasting, but new broadcasting groups and foreign satellite and cable operators are now available (2007)

Micronesia, Federated States of

no television broadcast stations; each state has a multi-channel cable service with television transmissions carrying roughly 95% imported programming and 5% local programming; about a half dozen radio stations in operation (2009)

Moldova

state-owned national radio-TV broadcaster operates 2 television and 2 radio stations; a total of nearly 40 terrestrial TV channels and some 50 radio stations are in operation; Russian and Romanian channels also are available (2007)

Monaco

TV Monte-Carlo (TMC) operates a TV network; Radio Monte-Carlo has both an Italian-language and a French-language network; a few private radio stations operating (2008)

Mongolia

following a law passed in 2005, Mongolia's state-run radio and TV provider converted to a public service provider; also available are private radio and TV broadcasters, as well as multi-channel satellite and cable TV providers; more than 100 radio stations, including some 20 via repeaters for the public broadcaster; transmissions of multiple international broadcasters are available (2008)

Montenegro

state-owned national radio-TV broadcaster operates 2 terrestrial television networks, 1 satellite TV channel, and 2 radio networks; roughly a dozen privately-owned TV broadcasters operate networks nationally, regionally, and locally; in addition to the 2 state-owned national radio networks, roughly 50 privately-owned radio stations and networks broadcast (2007)

Montserrat

Radio Montserrat, a public radio broadcaster, transmits on 1 station and has a repeater transmission to a second station; repeater transmissions from the GEM Radio Network of Trinidad and Tobago provide another 2 radio stations; cable and satellite TV are obtainable (2007)

Morocco

2 television broadcast networks with state-run Radio-Television Marocaine (RTM) operating one network and the state partially owning the other; foreign TV broadcasts are available via satellite dish; 3 radio broadcast networks with RTM operating one; the government-owned network includes 10 regional radio channels in addition to its national service (2007)

Mozambique

1 state-run TV station supplemented by private TV station; Portuguese state TV's African service, RTP Africa, and Brazilian-owned TV Miramar are available; state-run radio provides nearly 100% territorial coverage and broadcasts in multiple languages; a number of privately-owned and community-operated stations also broadcast; transmissions of multiple international broadcasters are available (2007)

Namibia

1 private and 1 state-run television station; satellite and cable TV service is available; state-run radio service broadcasts in multiple languages; about a dozen private radio stations operating; transmissions of multiple international broadcasters are available

(2007)

Nauru

1 government-owned television station broadcasting programs from New Zealand sent via satellite or on videotape; 1 government-owned radio station, broadcasting on AM and FM, utilizes Australian and British programs (2009)

Navassa Island

no television or radio broadcast stations (2009)

Nepal

state operates 2 television stations as well as national and regional radio stations; more than 60 independent radio stations and a small number of independent television stations (2007)

Netherlands

more than 90% of households are connected to cable or satellite TV systems that provide a wide range of domestic and foreign channels; public service broadcast system includes multiple broadcasters, 3 with a national reach and the remainder operating in regional and local markets; 2 major nationwide commercial television companies, each with 3 or more stations, and a large number of commercial TV stations in regional and local markets; nearly 600 radio stations operating with a mix of public and private stations providing national or regional coverage (2008)

New Caledonia

the publicly-owned French Overseas Network (RFO), which operates in France's overseas departments and territories, broadcasts over the RFO Nouvelle Calédonie television and radio stations; a small number of privately-owned radio stations also broadcast (2008)

New Zealand

state-owned Television New Zealand operates multiple television networks while state-owned Radio New Zealand operates 3 radio networks and an external shortwave radio service to the South Pacific region; a small number of national commercial television and radio stations and a large number of regional commercial television and radio stations are available; cable and satellite TV systems are accessible (2008)

Nicaragua

multiple privately-owned terrestrial television networks, supplemented by cable TV in most urban areas; of more than 100 radio

broadcast stations, nearly all are privately owned; Radio Nicaragua is government-owned and Radio Sandino is controlled by the Sandinista National Liberation Front (FSLN) (2007)

Niger

state-run TV station; 3 private TV stations provide a mix of local and foreign programming; only national radio station with national reach is state-run; about 30 private radio stations operate locally; as many as 100 community radio stations broadcast; transmissions of multiple international broadcasters are available (2007)

Nigeria

nearly 70 federal-government-controlled national and regional TV stations; all 36 states operate TV stations; several private TV stations operational; cable and satellite TV subscription services are available; network of federal-government-controlled national, regional, and state radio stations; roughly 40 state-government-owned radio stations typically carry their own programs except for news broadcasts; about 20 private radio stations also operate; transmissions of international broadcasters are available (2007)

Niue

1 government-owned television station with many of the programs supplied by Television New Zealand; 1 government-owned radio station broadcasting in AM and FM (2009)

Norfolk Island

1 local radio station; broadcasts of several Australian radio and television stations are received via satellite (2009)

Northern Mariana Islands

1 TV broadcast station on Saipan; multi-channel cable TV services are available on Saipan; 9 licensed radio broadcast stations (2009)

Norway

state-owned public radio-TV broadcaster operates 3 nationwide television stations, 3 nationwide radio stations, and 16 regional radio stations; roughly a dozen privately-owned television stations broadcast nationally and roughly another 25 local TV stations are available; nearly 75% of households have access to multi-channel cable or satellite TV systems; 2 privately-owned radio stations broadcast nationwide and another 240 stations operate locally (2008)

Oman

1 state-run TV broadcaster; TV stations transmitting from Saudi Arabia, the UAE, and Yemen are accessible via satellite TV; state-run radio operates multiple stations; first private radio station began operation in 2007 and 2 additional stations now operating (2007)

Pakistan

media is government regulated; 1 dominant state-owned TV broadcaster, Pakistan Television Corporation (PTV), operates a network consisting of 6 channels; private TV broadcasters are permitted and some foreign satellite channels are carried by cable TV operators; the state-owned radio network operates more than 40 stations; privately-owned radio stations mostly limit programming to music and talk shows (2007)

Palau

no television broadcast stations; a cable television network covers the major islands and provides access to rebroadcasts, on a delayed basis, of a number of US stations as well as access to a number of real-time satellite TV channels; about a half dozen radio stations with 1 government-owned (2009)

Panama

multiple privately-owned television networks and a government-owned educational TV station; multi-channel cable and satellite TV subscription services are available; more than 100 commercial radio stations (2007)

Papua New Guinea

2 television stations, 1 commercial station operating since the late 1980s and 1 state-run station launched in 2008; satellite and cable TV services are available; state-run National Broadcasting Corporation operates 3 radio networks with multiple repeaters and about 20 provincial stations; several commercial radio stations with multiple transmission points as well as several community stations; transmissions of several international broadcasters are accessible (2009)

Paraguay

5 privately-owned TV stations; about 75 commercial and community radio stations broadcasting; 1 state-owned radio network (2007)

Peru

6 major television networks of which only one, Television

Nacional de Peru, is state-owned; multi-channel cable TV services are available; more than 500 radio stations including a substantial number of indigenous language stations (2007)

Philippines

multiple national private TV and radio networks and a government-operated national TV and radio network; about 300 television stations and more than 1,000 radio stations; multi-channel satellite and cable TV systems are available (2008)

Pitcairn Islands

no local broadcast television or radio stations (2009)

Poland

state-run public television operates 2 national channels supplemented by 16 regional channels and several niche channels; privately-owned entities operate several national TV broadcast networks and a number of special interest channels; large number of privately-owned channels broadcasting locally; roughly half of all households are linked to either satellite or cable TV systems providing access to foreign television networks; state-run public radio operates 5 national networks and 17 regional radio stations; 2 privately-owned national radio networks, several commercial stations broadcasting to multiple cities, and a large number of privately-owned local radio stations (2007)

Portugal

the publicly-owned TV broadcaster operates 2 domestic channels and external service channels to Africa; overall, roughly 40 domestic TV stations; viewers have widespread access to international broadcasters with more than half of all households connected to multi-channel cable or satellite TV systems; publicly-owned radio operates 3 national networks and provides regional and external services; several privately-owned national radio stations and some 300 regional and local commercial radio stations (2008)

Puerto Rico

more than 30 television stations operating; cable TV subscription services are available; roughly 125 radio stations operating (2007)

Qatar

television and radio broadcast media are state controlled; home of the satellite TV channel Al-Jazeera, which was originally

owned and financed by the Qatari Government; Al-Jazeera claims editorial independence in broadcasting; transmissions of several international broadcasters are accessible on FM in Doha (2007)

Romania

a mixture of public and private TV stations; the public broadcaster operates multiple stations; roughly 100 private national, regional, and local stations operating; more than 75% of households are connected to multi-channel cable or satellite TV systems that provide access to Romanian, European, and international stations; state-owned public radio broadcaster operates 4 national networks and regional and local stations; more than 100 private radio stations broadcasting (2008)

Russia

6 national TV stations with the federal government owning 1 and holding a controlling interest in a second; state-owned Gazprom maintains a controlling interest in a third national channel; government-affiliated Bank Rossiya owns controlling interest in a fourth and fifth, while the sixth national channel is owned by the Moscow city administration; roughly 3,300 national, regional, and local TV stations operating with over two-thirds completely or partially controlled by the federal or local governments; satellite TV services are available; 2 state-run national radio networks with a third majority-owned by Gazprom; roughly 2,400 public and commercial radio stations (2007)

Rwanda

government owns and operates the only TV station; government-owned and operated Radio Rwanda has a national reach; 9 private radio stations; transmissions of multiple international broadcasters are available (2007)

Saint Barthelemy

no local TV broadcasters; 3 FM radio channels (2 via repeater)

Saint Helena, Ascension, and Tristan da Cunha

St. Helena has no local TV station; 2 local radio stations, one of which is relayed to Ascension Island; satellite TV stations rebroadcast terrestrially; Ascension Island has no local TV station, but has 1 local radio station and receives relays of broadcasts from 1 St. Helena radio station; broadcasts from the British Forces Broadcasting Service (BFBS) are available, as well as TV services for the US military; Tristan da Cunha has 1 local radio station and receives BFBS TV and

radio broadcasts (2007)

Saint Kitts and Nevis

the government operates a national television network that broadcasts on 2 channels; cable subscription services provide access to local and international channels; the government operates a national radio network; a mix of government-owned and privately-owned broadcasters operate roughly 15 radio stations (2007)

Saint Lucia

3 privately-owned television stations; 1 public television station operating on a cable network; multi-channel cable TV service is obtainable; a mix of state-owned and privately-owned broadcasters operate nearly 25 radio stations including repeater transmission stations (2007)

Saint Martin

1 local TV station; receives television broadcasts from the Netherlands Antilles; access to about 20 radio stations, including RFO Guadeloupe radio broadcasts via repeater (2008)

Saint Pierre and Miquelon 2 television stations with a third repeater station, all part of the French Overseas Network; has radio stations on St. Pierre and on Miquelon that are part of the French Overseas Network (2007)

Saint Vincent and the Grenadines St. Vincent and the Grenadines Broadcasting Corporation operates 1 television station and 5 repeater stations that give near total coverage to the multi-island state; multi-channel cable TV service is obtainable; a partially government-funded national radio service broadcasts on 1 station and has 2 repeater stations; about a dozen privately-owned radio stations and repeater stations operate (2007)

Samoa

state-owned television station privatized in 2008; 4 privately-owned television broadcast stations; about a half dozen privately-owned radio stations and one state-owned radio station; television and radio broadcasts of several stations from American Samoa are available (2009)

San Marino

state-owned public broadcaster operates 1 TV station and 2 radio stations; receives radio and TV broadcasts from Italy (2008)

Sao Tome and Principe

1 government-owned TV station; 1 government-owned radio station; 3 independent local radio stations authorized in 2005 with 2 operating at the end of 2006;

transmissions of multiple international broadcasters are available (2007)

Saudi Arabia

broadcast media are state-controlled; state-run TV operates 4 networks; Saudi Arabia is a major market for pan-Arab satellite TV broadcasters; state-run radio operates several networks; multiple international broadcasters are available (2007)

Senegal

state-run Radiodiffusion Television Senegalaise (RTS) operates 2 TV stations; a few private TV subscription channels rebroadcast foreign channels without providing any local news or programs; RTS operates a national radio network and a number of regional FM stations; a large number of community and private-broadcast radio stations are available; transmissions of at least 2 international broadcasters are accessible on FM in Dakar (2007)

Seychelles

the government operates the only terrestrial TV station, which provides local programming and airs broadcasts from international services; multi-channel cable and satellite TV are available via subscription; the government operates 1 AM and 1 FM radio station; transmissions of 2 international broadcasters are accessible in Victoria (2007)

Sierra Leone

1 government-owned TV station; 1 private TV station began operating in 2005; a pay-per-view TV service began operations in late 2007; 1 government-owned national radio broadcast station; about two dozen private radio stations primarily clustered in major cities; transmissions of several international broadcasters are available (2007)

Singapore

state controls broadcast media; 8 domestic TV stations operated by MediaCorp, wholly owned by a state investment company; broadcasts from Malaysian and Indonesian stations available; satellite dishes banned; multi-channel cable TV service is accessible; a total of 18 domestic radio stations broadcasting with MediaCorp operating more than a dozen and another 4 stations are closely linked to the ruling party or controlled by the Singapore Armed Forces Reservists Association; large number of Malaysian and Indonesian radio stations are available (2008)

Slovakia

state-owned public broadcaster, Slovak Television (STV), operates 3 national TV stations; roughly 35 privately-owned television broadcast stations operating nationally, regionally, and locally; about 40% of households are connected to multi-channel cable or satellite TV systems; channels from the Czech Republic and Hungary are widely viewed; state-owned public radio operates multiple national and regional networks; more than 20 privately-owned radio stations (2008)

Slovenia

public television broadcaster, Radiotelevizija Slovenija (RTV), operates a system of national and regional TV stations; 35 domestic commercial television stations operating nationally, regionally, and locally; about 60% of households are connected to multi-channel cable TV systems; public radio broadcaster operates 3 national and 4 regional stations; more than 75 regional and local commercial and non-commercial radio stations (2007)

Solomon Islands

Solomon Islands Broadcasting Corporation (SIBC) is the sole TV broadcaster with 1 station; multi-channel pay-TV is available; SIBC, the public service broadcaster, operates 2 national radio stations and 2 provincial stations; 2 local commercial radio stations operating; Radio Australia is obtainable via satellite feed (2009)

Somalia

2 private TV stations rebroadcast Al-Jazeera and CNN; Somaliland has 1 government-operated TV station and Puntland has 1 private TV station; Radio Mogadishu operated by the transitional government; 1 SW and roughly 10 private FM radio stations broadcast in Mogadishu; several radio stations operate in central and southern regions; Somaliland has 1 government-operated radio station; Puntland has roughly a half dozen private radio stations; transmissions of at least 2 international broadcasters are available (2007)

South Africa

the South African Broadcasting Corporation (SABC) operates 4 TV stations, 3 are free-to-air and 1 is pay TV; e.tv, a private station, is accessible to more than half the population; multiple subscription TV services provide a mix of local and international channels; well developed mix of public and private radio stations at the national, regional, and local levels; the SABC

radio network, state-owned and controlled but nominally independent, operates 18 stations, one for each of the 11 official languages, 4 community stations, and 3 commercial stations; more than 100 community-based stations extend coverage to rural areas (2007)

Spain

a mixture of both publicly-operated and privately-owned TV and radio stations broadcasting; overall, hundreds of TV channels are available including national, regional, local, public, and international channels; satellite and cable TV systems are accessible; multiple national radio networks, a large number of regional radio networks, and a larger number of local radio stations broadcasting; overall, hundreds of radio stations operating (2008)

Sri Lanka

government operates 2 television channels and a radio network; multi-channel satellite and cable TV subscription services are obtainable; 8 private TV stations and about a dozen private radio stations in operation (2008)

Sudan

in the north, the Sudanese Government directly controls TV and radio, requiring that both media reflect government policies; TV has a permanent military censor; a private radio station is in operation; in southern Sudan, TV is controlled by the regional government; several private FM stations are operational in southern Sudan; some foreign radio broadcasts are available (2007)

Suriname

2 state-owned TV stations; 1 state-owned radio station; multiple private radio and TV stations (2007)

Svalbard

the Norwegian Broadcasting Corporation (NRK) began direct television transmission to Svalbard via satellite in 1984; Longyearbyen households have access to 3 NRK radio and 2 television stations (2008)

Swaziland

state-owned TV station; satellite dishes are able to access South African providers; state-owned radio network with 3 channels; 1 private radio station (2007)

Sweden

publicly-owned television broadcaster operates 2 terrestrial networks plus regional stations; multiple privately-owned television

broadcasters operating nationally, regionally, and locally; about 50 local TV stations; widespread access to pan-Nordic and international broadcasters through multi-channel cable and satellite TV systems; publicly-owned radio broadcaster operates 3 national stations and a network of 25 regional channels; nearly a hundred privately-owned local radio stations with some consolidating into near national networks; an estimated 900 community and neighborhood radio stations broadcast intermittently (2008)

Switzerland

the publicly-owned radio and television broadcaster, Swiss Broadcasting Corporation (SRG/SSR), operates 7 national television networks, 3 broadcasting in German, 2 in Italian, and 2 in French; private commercial television stations broadcast regionally and locally; television broadcasts from stations in Germany, Italy, and France are widely accessed using multi-channel cable and satellite TV services; SRG/SSR operates 18 radio stations that, along with private broadcasters, provide national to local coverage (2008)

Syria

state-run television and radio broadcast networks; state operates 2 TV networks and a satellite channel; roughly two-thirds of Syrian homes have a satellite dish providing access to foreign TV broadcasts; 3 state-run radio channels; first private radio station launched in 2005; private radio broadcasters prohibited from transmitting news or political content (2007)

Taiwan

5 free-to-air nationwide television networks operating roughly 75 TV stations; about 85% of households utilize multi-channel cable TV; national and regional radio networks with about 170 radio stations broadcasting (2008)

Tajikistan

state-run television broadcaster transmits nationally on 4 stations and regionally on 4 stations; about 10 independent TV stations broadcast locally and regionally; some households are able to receive Russian and other foreign stations via cable and satellite; state-run radio broadcaster operates Radio Tajikistan, Voice of Dushanbe, and several regional stations; a small number of independent radio stations also broadcast (2008)

Tanzania

a state-owned TV station and multiple privately-owned TV stations; state-owned national radio station supplemented by more

than 40 privately-owned radio stations; transmissions of several international broadcasters are available (2007)

Thailand

6 terrestrial TV stations in Bangkok broadcast nationally via relay stations - 2 of the networks are owned by the military, the other 4 are government-owned or controlled, leased to private enterprise, and are all required to broadcast government-produced news programs twice a day; multi-channel satellite and cable TV subscription services are available; radio frequencies have been allotted for more than 500 government and commercial radio stations; many small community radio stations operate with low-power transmitters (2008)

Timor-Leste

1 public TV broadcast station broadcasting nationally and 1 public radio broadcaster with stations in each of the 13 administrative districts; a few commercial radio stations and roughly a dozen community radio stations (2009)

Togo

2 state-owned TV stations with multiple transmission sites; 5 private TV stations broadcast locally; cable TV service is available; state-owned radio network with multiple stations; several dozen private radio stations and a few community radio stations; transmissions of multiple international broadcasters are obtainable (2007)

Tokelau

no broadcast television stations; each atoll operates a radio service that provides shipping news and weather reports (2009)

Tonga

2 state-owned television stations and 2 privately-owned stations; satellite and cable TV services are available; 2 state-owned and 3 privately-owned radio stations; Radio Australia broadcasts obtainable via a satellite feed (2009)

Trinidad and Tobago

5 TV networks each broadcasting on multiple stations; one of the networks is state-owned; multiple cable TV subscription service providers; multiple radio networks, one state-owned, broadcast over about 35 stations (2007)

Tunisia

broadcast media is mainly government-controlled; the

state-run Tunisian Radio and Television Establishment (ERTT) operates 2 national television networks, several national radio networks, and a number of regional radio stations; 1 TV and 3 radio stations are privately-owned and report domestic news stories directly from the official Tunisian news agency; the state retains control of broadcast facilities and transmitters through L'Office National de la Telediffusion; Tunisians also have access to Egyptian, pan-Arab, and European satellite TV channels (2007)

Turkey

national public broadcaster Turkish Radio and Television Corporation (TRT) operates multiple TV and radio networks and stations; multiple privately-owned national television stations and up to 300 private regional and local television stations; multi-channel cable TV subscriptions are obtainable; more than 1,000 private radio broadcast stations (2009)

Turkmenistan

broadcast media is government controlled and censored; 4 state-owned TV and 4 state-owned radio networks; satellite dishes and programming provide an alternative to the state-run media; officials sometimes limit access to satellite TV by seizing satellite dishes (2007)

Turks and Caicos Islands

while there are no local terrestrial TV stations, broadcasts from the Bahamas can be received; multi-channel cable and satellite TV services are available; government-run radio network operates alongside private broadcasters with a total of about 15 stations broadcasting (2007)

Tuvalu

no television broadcast stations; many households use satellite dishes to watch foreign TV stations; 1 government-owned radio station, Radio Tuvalu, includes relays of programming from international broadcasters (2009)

Uganda

public broadcaster, Uganda Broadcasting Corporation (UBC), operates radio and television networks; Uganda first began licensing privately-owned stations in the 1990s; by 2007 there were nearly 150 radio and 35 TV stations, mostly based in and around Kampala; transmissions of multiple international broadcasters are available in Kampala (2007)

Ukraine

TV coverage is provided by Ukraine's state-controlled nationwide broadcast channel (UT1) and a number of privately-owned television broadcast networks; Russian television broadcasts have a small audience nationwide, but larger audiences in the eastern and southern regions; multi-channel cable and satellite TV services are available; Ukraine's radio broadcast market, a mix of independent and state-owned networks, is comprised of some 300 stations (2007)

United Arab Emirates

except for the many organizations now operating in Dubai's Media Free Zone, most television and radio stations remain government-owned; widespread use of satellite dishes provides access to pan-Arab and other international broadcasts (2007)

United Kingdom

public service broadcaster BBC is the largest broadcasting corporation in the world; BBC operates multiple TV networks with regional and local TV service; a mixed system of public and commercial TV broadcasters along with satellite and cable systems provide access to hundreds of TV stations throughout the world; BBC operates multiple national, regional, and local radio networks with multiple transmission sites; a large number of commercial radio stations as well as satellite radio services are available (2008)

United States

4 major terrestrial television networks with affiliate stations throughout the country, plus cable and satellite networks, independent stations, and a limited public broadcasting sector that is largely supported by private grants; overall, thousands of TV stations broadcasting; multiple national radio networks with large numbers of affiliate stations; while most stations are commercial, National Public Radio (NPR) has a network of some 600 member stations; satellite radio available; overall, nearly 15,000 radio stations operating (2008)

Uruguay

mixture of privately-owned and state-run broadcast media; more than 100 commercial radio stations and about 20 television channels broadcasting; cable TV is available; large number of community radio and TV stations (2007)

Uzbekistan

government controls media; 8 state-owned broadcasters - 4 TV and 4 radio - provide service to virtually the entire country; about 20 privately-owned TV stations, overseen by local officials,

broadcast to local markets; privately-owned TV stations are required to lease transmitters from the government-owned Republic TV and Radio Industry Corporation and are prohibited from broadcasting live; about 15 privately-owned radio broadcasters; programming content includes news updates, music, call-in talk shows, and other entertainment in a half-Russian, half-Uzbek format mandated for private radio (2007)

Vanuatu

1 state-owned television station; multi-channel pay TV is available; state-owned Radio Vanuatu operates 2 radio stations; 2 privately-owned radio broadcasters; programming from multiple international broadcasters is accessible (2008)

Venezuela

government supervises a mixture of state-run and private broadcast media; 1 state-run television network, 4 privately-owned TV networks, and a government-backed pan-American channel; state-run radio network includes 15 stations; large number of private broadcast radio stations (2007)

Vietnam

government controls all broadcast media exercising oversight through the Ministry of Information and Communication (MIC); government-controlled national television provider, Vietnam Television (VTV), operates a network of 9 channels with several regional broadcasting centers; programming is relayed nationwide via a network of provincial and municipal TV stations; law limits access to satellite TV but many households are able to access foreign programming via home satellite equipment; government-controlled Voice of Vietnam, the national radio broadcaster, broadcasts on 6 channels and is repeated on AM, FM, and shortwave stations throughout Vietnam (2008)

Virgin Islands

about a dozen television broadcast stations including 1 public TV station; multi-channel cable and satellite TV services are available; 24 radio stations broadcasting (2009)

Wake Island

American Armed Forces Radio and Television Service (AFRTS) provides satellite radio/television broadcasts (2009)

Wallis and Futuna

the publicly-owned French Overseas Network (RFO), which broadcasts to France's overseas departments and territories,

is carried on the RFO Wallis and Fortuna television and radio stations (2008)

West Bank

the Palestinian Authority operates 1 television and 1 radio station; about 30 independent TV and 25 radio stations operating; Jordanian TV is available; satellite TV is accessible (2008)

Western Sahara

Morocco's state-owned broadcaster, Radio-Television Marocaine (RTM), operates a radio service from Laayoune and relays TV service; a Polisario-backed radio station also broadcasts (2008)

Yemen

state-run TV with 2 stations; state-run radio with 2 national radio stations and 5 local stations; stations from Oman and Saudi Arabia can be accessed (2007)

Zambia

state-owned Zambia National Broadcasting Corporation (ZNBC) operates 1 TV station and is the principal local-content provider; several private TV stations are available; multi-channel subscription TV services are obtainable; ZNBC operates 3 radio networks; about 2 dozen private radio stations also broadcasting; relays of at least 2 international broadcasters are accessible in Lusaka and Kitwe (2007)

Zimbabwe

government owns all local radio and television stations; foreign shortwave broadcasts and satellite television are available to those who can afford antennas and receivers; in rural areas, access to television broadcasts is extremely limited (2007)

@2214

Field Listing :: Stock of narrow money

This entry, also known as "M1," comprises the total quantity of currency in circulation (notes and coins) plus demand deposits denominated in the national currency held by nonbank financial institutions, state and local governments, nonfinancial public enterprises, and the private sector of the economy, measured at a specific point in time. National currency units have been converted to US dollars at the closing exchange rate for the date of the information. Because of exchange rate movements, changes in money stocks measured in national currency units may vary significantly from those shown in US dollars, and caution is urged when making comparisons over time in US dollars. Narrow money consists of more liquid assets than broad money and the assets generally function as a "medium of exchange" for an economy. Country Comparison to the World Country

\$4.374 billion (31 December 2010 est)

\$3.524 billion (31 December 2009 est)

Bosnia and Herzegovina

\$4.098 billion (31 December 2010 est)

\$4.182 billion (31 December 2009 est)

Botswana

\$1.146 billion (31 December 2010 est)

\$939.1 million (31 December 2009 est)

Brazil

\$165.8 billion (31 December 2010 est)

\$125.3 billion (31 December 2009 est)

Brunei

\$3.374 billion (30 March 2009)

\$3.046 billion (31 December 2008)

Bulgaria

\$12.7 billion (31 December 2010 est)

\$12.91 billion (31 December 2009 est)

Burkina Faso

\$1.416 billion (31 December 2010 est)

\$1.303 billion (31 December 2009 est)

Burma

\$4.907 billion (31 December 2010 est)

\$4.038 billion (31 December 2009 est)

note: this number reflects the vastly overvalued official exchange rate of 5.38 kyat per dollar in 2007; at the unofficial black market rate of 1,305 kyat per dollar for 2007, the stock of kyats would equal only US\$2.465 billion and Burma's velocity of money (the number of times money turns over in the course of a year) would be six, in line with the velocity of money for other countries in the region; in 2009, the unofficial black market rate averaged 1,090 kyat per dollar.

\$22.4 trillion (31 December 2010 est)

\$20.87 trillion (31 December 2009 est)

Yemen

\$3.551 billion (31 December 2010 est)

\$3.74 billion (31 December 2009 est)

Zambia

\$1.234 billion (31 December 2010 est)

\$983.3 million (31 December 2009 est)

Zimbabwe

\$NA (31 December 2009 est.)

\$2.151 million (31 December 2008 est)

note: the money data for Zimbabwe for 2007 reflected the vastly overvalued official exchange rate of 30,000 Zimbabwe dollars per US dollar; at an unofficial rate of 800,000 Zimbabwe dollars per US dollar, the stock of Zimbabwe dollars, narrowly defined, would equal only about US\$500 million and Zimbabwe's velocity of money (the number of times money turns over in the course of a year) would be nine, in line with the velocity of money for other countries in the region

Field Listing :: Stock of broad money

This entry covers all of "Narrow money," plus the total quantity of time and savings deposits, credit union deposits, institutional money market funds, short-term repurchase agreements between the central bank and commercial deposit banks, and other large liquid assets held by nonbank financial institutions, state and local governments, nonfinancial public enterprises, and the private sector of the economy. National currency units have been converted to US dollars at the closing exchange rate for the date of the information. Because of exchange rate movements, changes in money stocks measured in national currency units may vary significantly from those shown in US dollars, and caution is urged when making comparisons over time in US dollars. In addition to serving as a medium of exchange, broad money includes assets that are slightly less liquid than narrow money and the assets tend to function as a "store of value" - a means of holding wealth. Country Comparison to the World Country

Country Comparison :: GDP (purchasing power parity)

This entry gives the gross domestic product (GDP) or value of all final goods and services produced within a nation in a given year. A nation's GDP at purchasing power parity (PPP) exchange rates is the sum value of all goods and services produced in the country valued at prices prevailing in the United States. This is the measure most economists prefer when looking at per-capita welfare and when comparing living conditions or use of resources across countries. The measure is difficult to compute, as a US dollar value has to be assigned to all goods and services in the country regardless of whether these goods and services have a direct equivalent in the United States (for example, the value of an ox-cart or non-US military equipment); as a result, PPP estimates for some countries are based on a small and sometimes different set of goods and services. In addition, many countries do not formally participate in the World Bank's PPP project that calculates these measures, so the resulting GDP estimates for these countries may lack precision. For many developing countries, PPP-based GDP measures are multiples of the official exchange rate (OER) measure. The differences between the OER- and PPP-denominated GDP values for most of the wealthy industrialized countries are generally much smaller.

Country Comparison :: Population growth rate

The average annual percent change in the population, resulting from a surplus (or deficit) of births over deaths and the balance of migrants entering and leaving a country. The rate may be positive or negative. The growth rate is a factor in determining how great a burden would be imposed on a country by the changing needs of its people for infrastructure (e.g., schools, hospitals, housing, roads), resources (e.g., food, water, electricity), and jobs. Rapid population growth can be seen as threatening by neighboring countries.

Rank code: 2005

Country Comparison :: Affiliation

Rank country Affiliation Date of Information

Rank code: 2006

Country Comparison :: Dependency status

This entry describes the formal relationship between a particular nonindependent entity and an independent state.

Rank country Dependency status Date of Information

Rank code: 2007

Country Comparison :: Diplomatic representation from the US

This entry includes the chief of mission, embassy address, mailing address, telephone number, FAX number, branch office locations, consulate general locations, and consulate locations.

Rank country Diplomatic representation from the US Date of Information

Rank code: 2008

Country Comparison :: Transportation - note

This entry includes miscellaneous transportation information of significance not included elsewhere.

Rank country Transportation - note Date of Information

Rank code: 2010

Country Comparison :: Age structure

This entry provides the distribution of the population according to age. Information is included by sex and age group (0-14 years, 15-64 years, 65 years and over). The age structure of a population affects a nation's key socioeconomic issues. Countries with young populations (high percentage under age 15) need to invest more in schools, while countries with older populations (high percentage ages 65 and over) need to invest more in the health sector. The age structure can also be used to help predict potential political issues. For example, the rapid growth of a young adult population unable to find employment can lead to unrest.

Rank code: 2011

Country Comparison :: Geographic coordinates

This entry includes rounded latitude and longitude figures for the purpose of finding the approximate geographic center of an entity and is based on the locations provided in the Geographic Names Server (GNS), maintained by the National Geospatial-Intelligence Agency on behalf of the US Board on Geographic Names.

Rank country Geographic coordinates Date of Information

Rank code: 2012

Country Comparison :: GDP - composition by sector

This entry gives the percentage contribution of agriculture, industry, and services to total GDP. The distribution will total less than 100 percent if the data are incomplete.

Country Comparison :: Sex ratio

This entry includes the number of males for each female in five age groups - at birth, under 15 years, 15-64 years, 65 years and over, and for the total population. Sex ratio at birth has recently emerged as an indicator of certain kinds of sex discrimination in some countries. For instance, high sex ratios at birth in some Asian countries are now attributed to sex-selective abortion and infanticide due to a strong preference for sons. This will affect future marriage patterns and fertility patterns. Eventually, it could cause unrest among young adult males who are unable to find partners.

Country Comparison :: Heliports

This entry gives the total number of heliports with hard-surface runways, helipads, or landing areas that support routine sustained helicopter operations exclusively and have support facilities including one or more of the following facilities: lighting, fuel, passenger handling, or maintenance. It includes former airports used exclusively for helicopter operations but excludes heliports limited to day operations and natural clearings that could support helicopter landings and takeoffs.

Rank code: 2021

Country Comparison :: Natural hazards

This entry lists potential natural disasters. For countries where volcanic activity is common, a volcanism subfield highlights historically active volcanoes.

Rank country Natural hazards Date of Information

Rank code: 2022

Country Comparison :: People - note

This entry includes miscellaneous demographic information of significance not included elsewhere.

Rank country People - note Date of Information

Rank code: 2023

Country Comparison :: Area - comparative

This entry provides an area comparison based on total area equivalents. Most entities are compared with the entire US or one of the 50 states based on area measurements (1990 revised) provided by the US Bureau of the Census. The smaller entities are compared with Washington, DC (178 sq km, 69 sq mi) or The Mall in Washington, DC (0.59 sq km, 0.23 sq mi, 146 acres).

Rank country (sq km) Date of Information

Rank code: 2024

Country Comparison :: Military service age and obligation

This entry gives the required ages for voluntary or conscript military service and the length of service obligation.

Rank country (years of age) Date of Information

1 Spain 20.00 2004 2 Turkey 20.00 2004 3 Albania 19.00 2004 4 Germany 18.00 2004 5 Korea, North 17.00 2004 6 Libya 17.00 2004

Rank code: 2025

Country Comparison :: Manpower fit for military service

This entry gives the number of males and females falling in the military age range for a country (defined as being ages 16-49) and who are not otherwise disqualified for health reasons; accounts for the health situation in the country and provides a more realistic estimate of the actual number fit to serve.

Rank country Manpower fit for military service Date of Information

Rank code: 2030

Country Comparison :: Airports - with paved runways

This entry gives the total number of airports with paved runways (concrete or asphalt surfaces) by length. For airports with more than one runway, only the longest runway is included according to the following five groups - (1) over 3,047 m (over 10,000 ft), (2) 2,438 to 3,047 m (8,000 to 10,000 ft), (3) 1,524 to 2,437 m (5,000 to 8,000 ft), (4) 914 to 1,523 m (3,000 to 5,000 ft), and (5) under 914 m (under 3,000 ft). Only airports with usable runways are included in this listing. Not all airports have facilities for refueling, maintenance, or air traffic control. The type aircraft capable of operating from a runway of a given length is dependent upon a number of factors including elevation of the runway, runway gradient, average maximum daily temperature at the airport, engine types, flap settings, and take-off weight of the aircraft.

Country Comparison :: Airports - with unpaved runways

This entry gives the total number of airports with unpaved runways (grass, dirt, sand, or gravel surfaces) by length. For airports with more than one runway, only the longest runway is included according to the following five groups - (1) over 3,047 m (over 10,000 ft), (2) 2,438 to 3,047 m (8,000 to 10,000 ft), (3) 1,524 to 2,437 m (5,000 to 8,000 ft), (4) 914 to 1,523 m (3,000 to 5,000 ft), and (5) under 914 m (under 3,000 ft). Only airports with usable runways are included in this listing. Not all airports have facilities for refueling, maintenance, or air traffic control. The type aircraft capable of operating from a runway of a given length is dependent upon a number of factors including elevation of the runway, runway gradient, average maximum daily temperature at the airport, engine types, flap settings, and take-off weight of the aircraft.

Country Comparison :: Environment - current issues

This entry lists the most pressing and important environmental problems. The following terms and abbreviations are used throughout the entry: Acidification - the lowering of soil and water pH due to acid precipitation and deposition usually through precipitation; this process disrupts ecosystem nutrient flows and may kill freshwater fish and plants dependent on more neutral or alkaline conditions (see acid rain). Acid rain - characterized as containing harmful levels of sulfur dioxide or nitrogen oxide; acid rain is damaging and potentially deadly to the earth's fragile ecosystems; acidity is measured using the pH scale where 7 is neutral, values greater than 7 are considered alkaline, and values below 5.6 are considered acid precipitation; note - a pH of 2.4 (the acidity of vinegar) has been measured in rainfall in New England. Aerosol - a collection of airborne particles dispersed in a gas, smoke, or fog. Afforestation - converting a bare or agricultural space by planting trees and plants; reforestation involves replanting trees on areas that have been cut or destroyed by fire. Asbestos - a naturally occurring soft fibrous mineral commonly used in fireproofing materials and considered to be highly carcinogenic in particulate form. Biodiversity - also biological diversity; the relative number of species, diverse in form and function, at the genetic, organism, community, and ecosystem level; loss of biodiversity reduces an ecosystem's ability to recover from natural or man-induced disruption. Bio-indicators - a plant or animal species whose presence, abundance, and health reveal the general condition of its habitat. Biomass - the total weight or volume of living matter in a given area or volume. Carbon cycle - the term used to describe the exchange of carbon (in various

forms, e.g., as carbon dioxide) between the atmosphere, ocean, terrestrial biosphere, and geological deposits. Catchments - assemblages used to capture and retain rainwater and runoff; an important water management technique in areas with limited freshwater resources, such as Gibraltar. DDT (dichloro-diphenyl-trichloro-ethane) - a colorless, odorless insecticide that has toxic effects on most animals; the use of DDT was banned in the US in 1972. Defoliants - chemicals which cause plants to lose their leaves artificially; often used in agricultural practices for weed control, and may have detrimental impacts on human and ecosystem health. Deforestation - the destruction of vast areas of forest (e.g., unsustainable forestry practices, agricultural and range land clearing, and the over exploitation of wood products for use as fuel) without planting new growth. Desertification - the spread of desert-like conditions in arid or semi-arid areas, due to overgrazing, loss of agriculturally productive soils, or climate change. Dredging - the practice of deepening an existing waterway; also, a technique used for collecting bottom-dwelling marine organisms (e.g., shellfish) or harvesting coral, often causing significant destruction of reef and ocean-floor ecosystems. Drift-net fishing - done with a net, miles in extent, that is generally anchored to a boat and left to float with the tide; often results in an over harvesting and waste of large populations of non-commercial marine species (by-catch) by its effect of "sweeping the ocean clean." Ecosystems - ecological units comprised of complex communities of organisms and their specific environments. Effluents - waste materials, such as smoke, sewage, or industrial waste which are released into the environment, subsequently polluting it. Endangered species - a species that is threatened with extinction either by direct hunting or habitat destruction. Freshwater - water with very low soluble mineral content; sources include lakes, streams, rivers, glaciers, and underground aquifers. Greenhouse gas - a gas that "traps" infrared radiation in the lower atmosphere causing surface warming; water vapor, carbon dioxide, nitrous oxide, methane, hydrofluorocarbons, and ozone are the primary greenhouse gases in the Earth's atmosphere. Groundwater - water sources found below the surface of the earth often in naturally occurring reservoirs in permeable rock strata; the source for wells and natural springs. Highlands Water Project - a series of dams constructed jointly by Lesotho and South Africa to redirect Lesotho's abundant water supply into a rapidly growing area in South Africa; while it is the largest infrastructure project in southern Africa, it is also the most costly and controversial; objections to the project include claims that it forces people from their homes, submerges farmlands, and squanders economic resources. Inuit Circumpolar Conference (ICC) - represents the roughly 150,000 Inuits of Alaska, Canada, Greenland, and Russia in international environmental issues; a General Assembly convenes every three years to determine the focus of the ICC; the most current concerns are long-range transport of pollutants, sustainable development, and climate change. Metallurgical plants - industries which specialize in the science, technology, and processing of metals; these plants produce highly concentrated and toxic wastes which can contribute to pollution of ground water and air when not properly disposed. Noxious substances - injurious, very harmful to living beings. Overgrazing - the grazing of animals on plant material faster than it can naturally regrow leading to the permanent loss of plant cover, a common effect of too many animals grazing limited range land. Ozone shield - a layer of the atmosphere composed of ozone gas (O₃) that resides approximately 25 miles above the Earth's surface and absorbs solar ultraviolet radiation that can be harmful to living organisms. Poaching - the illegal killing of animals or fish, a great concern with respect to endangered or threatened species. Pollution - the contamination of a healthy environment by man-made waste. Potable water - water that is drinkable, safe to be consumed. Salination - the process through which fresh (drinkable) water becomes salt (undrinkable) water; hence, desalination is the reverse process; also involves the accumulation of salts in topsoil caused by evaporation of excessive irrigation

water, a process that can eventually render soil incapable of supporting crops. Siltation - occurs when water channels and reservoirs become clotted with silt and mud, a side effect of deforestation and soil erosion. Slash-and-burn agriculture - a rotating cultivation technique in which trees are cut down and burned in order to clear land for temporary agriculture; the land is used until its productivity declines at which point a new plot is selected and the process repeats; this practice is sustainable while population levels are low and time is permitted for regrowth of natural vegetation; conversely, where these conditions do not exist, the practice can have disastrous consequences for the environment. Soil degradation - damage to the land's productive capacity because of poor agricultural practices such as the excessive use of pesticides or fertilizers, soil compaction from heavy equipment, or erosion of topsoil, eventually resulting in reduced ability to produce agricultural products. Soil erosion - the removal of soil by the action of water or wind, compounded by poor agricultural practices, deforestation, overgrazing, and desertification. Ultraviolet (UV) radiation - a portion of the electromagnetic energy emitted by the sun and naturally filtered in the upper atmosphere by the ozone layer; UV radiation can be harmful to living organisms and has been linked to increasing rates of skin cancer in humans. Waterborne diseases - those in which bacteria survive in, and are transmitted through, water; always a serious threat in areas with an untreated water supply.

Rank country Environment - current issues Date of Information

Rank code: 2033

Country Comparison :: Environment - international agreements

This entry separates country participation in international environmental agreements into two levels - party to and signed, but not ratified. Agreements are listed in alphabetical order by the abbreviated form of the full name.

Rank country Environment - international agreements Date of Information

Country Comparison :: Military expenditures

This entry gives spending on defense programs for the most recent year available as a percent of gross domestic product (GDP); the GDP is calculated on an exchange rate basis, i.e., not in terms of purchasing power parity (PPP).

Rank country (% of GDP) Date of Information

Country Comparison :: Population below poverty line

National estimates of the percentage of the population falling below the poverty line are based on surveys of sub-groups, with the results weighted by the number of people in each group. Definitions of poverty vary considerably among nations. For example, rich nations generally employ more generous standards of poverty than poor nations.

Country Comparison :: Household income or consumption by percentage

share Data on household income or consumption come from household surveys, the results adjusted for household size. Nations use different standards and procedures in collecting and adjusting the data. Surveys based on income will normally show a more unequal distribution than surveys based on consumption. The quality of surveys is improving with time, yet caution is still necessary in making inter-country comparisons.

Country Comparison :: Administrative divisions

This entry generally gives the numbers, designatory terms, and first-order administrative divisions as approved by the US Board on Geographic Names (BGN). Changes that have been reported but not yet acted on by the BGN are noted.

Rank country Administrative divisions Date of Information

Rank code: 2052

Country Comparison :: Agriculture - products

This entry is an ordered listing of major crops and products starting with the most important.

Rank country Agriculture - products Date of Information

Rank code: 2053

Country Comparison :: Airports

This entry gives the total number of airports or airfields recognizable from the air. The runway(s) may be paved (concrete or asphalt surfaces) or unpaved (grass, earth, sand, or gravel surfaces) and may include closed or abandoned installations. Airports or airfields that are no longer recognizable (overgrown, no facilities, etc.) are not included. Note that not all airports have accommodations for refueling, maintenance, or air traffic control.

Country Comparison :: Birth rate

This entry gives the average annual number of births during a year per 1,000 persons in the population at midyear; also known as crude birth rate. The birth rate is usually the dominant factor in determining the rate of population growth. It depends on both the level of fertility and the age structure of the population.

Rank code: 2057

Country Comparison :: Capital

This entry gives the name of the seat of government, its geographic coordinates, the time difference relative to Coordinated Universal Time (UTC) and the time observed in Washington, DC, and, if applicable, information on daylight saving time (DST). Where appropriate, a special note has been added to highlight those countries that have multiple time zones.

Rank country Capital Date of Information

Rank code: 2058

Country Comparison :: Imports - commodities

This entry provides a listing of the highest-valued imported products; it sometimes includes the percent of total dollar value.

Rank country (%) Date of Information

Rank code: 2059

Country Comparison :: Climate

This entry includes a brief description of typical weather regimes throughout the year.

Rank country Climate Date of Information

Rank code: 2060

Country Comparison :: Coastline

This entry gives the total length of the boundary between the land area (including islands) and the sea.
